Operation and Maintenance, Defense-Wide
Fiscal Year (FY) 2027 Budget Estimates

$ in Thousands	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, D-W	62,609,095	1,531,960	-8,187,298	55,953,757	787,068	7,510,756	64,251,581

The Operation and Maintenance, Defense-Wide funding request supports critical Department-wide functions and transformational efforts for the Secretary, Military Departments, and warfighters. The funding pays for common information services and system sustainment, contract administration and audits, family support programs, and administrative functions for the Military Departments. This funding supports the activities of the United States Special Operations Command (USSOCOM), the United States Cyber Command (USCYBERCOM), numerous Combat Support Agencies, policy and oversight Agencies, and three Intelligence Agencies.

Budget/Program Highlights

Changes between FY 2026 and FY 2027 include (dollars in millions)	Overview
FY 2026 column of the FY 2026 Budget Request	55,936
Adjusted FY 2026	55,954
Net program changes in Defense Agencies (unclassified)	5,455
Net pricing changes in Defense Agencies (unclassified)	497
Price and program growth in classified programs	2,346
FY 2027 President's Budget Request	64,252

Classified Programs Major Changes:
Changes in classified programs may be found in Volume III of the Operation and Maintenance, Defense-Wide justification entitled "Other Programs, Classified Justification Book."

Defense Agency Programs FY 2027 Highlights:
Highlights of Defense Agency FY 2027 funding include program changes of:

- $+533.209 million (USCYBERCOM): The USCYBERCOM request supports its defensive cyber operations by modernizing tools, expanding automated threat hunting, and improving visibility across the Department of War Information Network. Funding enhances the Command's ability to detect, analyze, and mitigate sophisticated cyber threats, reducing operational risk and ensuring continuity of critical missions. The increase reflects the sustainment and enhancement of payload development used against a variety of cyber targets. Funding maintains Offensive Cyberspace Operations (OCO) common frameworks, operational orchestration tools, and standard infrastructure required to deliver effects at operational speed. It also continues the acceleration of Artificial Intelligence and Machine Learning AI/ML capabilities that address material and non material gaps across the Joint Cyber Warfighting Architecture. In addition, funding supports data management, enterprise integration, and development of a data centric environment required to maximize the operational value of AI/ML in cyberspace operations.

- $+501.706 million (DHRA): The DHRA increase supports the Department's payment to the Office of Personnel Management to establish the core Human Capital Management system as part of Department wide human capital modernization as well as transition activities to the Office of Personnel Management system and the decommissioning or rationalization of legacy systems replaced by that system. The request also transfers funding and 2,045 FTEs to the Defense Human Resources Activity for the U.S. Military Entrance Processing Command (USMEPCOM). This transfer realigns operational costs associated with USMEPCOM and designates DHRA as the executive agent.

- $+918.135 million (DISA): The DISA request includes the support of a White House initiative to address limitations in White House Communications Agency and DoW communications systems. This program/mission is classified with additional details available on request. The increase also supports adding artificial intelligence acceleration hardware to existing Joint Operational Edge sites overseas, putting powerful artificial intelligence tools directly in the hands of tactical mission partners. This hardware will include Graphics Processing Units , a specialized electronic circuit designed for rapidly handling complex processes for artificial intelligence workloads. The increase includes support to operationalize and sustain the Coalition Information Environment. Coalition Information Environment provides a secure, unified hybrid cloud environment for sharing information at the Secret and below levels with mission partners. It is replacing the Air Force's legacy Secret and Below Releasable Environment for collaboration capabilities and fully building out the Command and Control capabilities developed by the Joint Operational Edge -Coalition Environment pilot. The increase also supports the elimination of critical technical debt across the DoW Information Network. Over time, DISA has accumulated tech debt related to critical Defense Information Systems Network components and the network still include legacy Time-Division Multiplexing systems. Time-Division Multiplexing networks face obsolescence as vendors are ending support. This funding will accelerate transition to a modern, all Internet Protocol and optical core, mitigating security risks and performance limitations. This includes delivery of new service delivery nodes that will extend the Defense Information Systems Network directly to the warfighter and DISA mission partners at strategic locations.

- $+1,742.275 million (OSW): The OSW increase includes sustainment of automation and AI technologies, advances financial systems modernization and retirement projects, and manages the Advana program to ensure achieving a clean opinion on the FY 2028 financial statements. It also reflects the enhancement of the Chief Digital and Artificial Intelligence Office's (CDAO) AI Workforce Program and Center of Excellence training program to enhance the AI skills for DoW personnel, enhance CDAO's Cybersecurity & Risk Management support, and creation of new AI Rapid Capabilities support from AI Assessment and Assurance. The increase also supports the Department of War's mission to establish, operationalize, and proactively deter threats to National Defense Areas in accordance with Executive Order 14167, "Clarifying the Military's Role in Protecting the Territorial Integrity of the United States" signed by the President on January 20, 2025 and the National Security Presidential Memorandum 4 (NSPM-4) "Establishment of National Defense Areas" signed on April 11, 2025. The request also reflects a restoration of budgeted discretionary funds previously classified as reconciliation funding within the PB-26 request. The restoration of discretionary funding bolsters key OUSW(A&S) initiatives - including but not limited to, Acquisition Transformation Support, Global Investments and Economic Security, Logistics Systems Modernization support, Native American Lands Environmental Mitigation Program, Chemical Biological Weapons Elimination - and supports core daily operations essential for maintaining mission readiness, long-term sustainment, and warfighter support.

- $+1,095.702 million (USSOCOM): The USSOCOM request addresses the heightened operational demand by enhancing core capabilities to bolster the Department's joint combat force's warrior lethality in campaigning and exercise training within the USINDOPACOM, USSOUTHCOM, and USNORTHCOM area of responsibilities by expanding global presence and power projection to defend the Homeland and deter external threats. Other major increases in the budget include enhancements to the Special Operations Forces Intelligence Support program that includes Special Operations Forces-peculiar intelligence support to USSOCOM Headquarters, Components, and Theater Special Operations Commands outside the scope of the Defense Intelligence Agency intelligence support to Combatant Command program. The budget request also establishes the Special Operations Forces Autonomous Warfare Center. The

request also includes increases to classified programs and Special Access Programs. The FY 2027 budget request focuses on creating a strategic, asymmetric advantage for the nation by continuing to strengthen USSOCOM forces and their families, bolstering integrated deterrence capabilities, and ensuring our enduring advantage through innovation and modernization.

- $+1,039.905 million (TJS): The TJS increase includes the establishment of the Joint Interagency Task Force 401 (JIATF 401) which is the Department's lead organization to counter small Unmanned Aerial Systems (C-sUAS). JIATF 401 synchronizes C-sUAS efforts across the DoW to rapidly deliver joint capabilities at scale to defend the homeland, protect U.S. and allied forces, defend critical infrastructure, and assist federal agencies. The task force has a global focus and is a multifaceted organization leading DoW C-sUAS activities at the nexus of Office of Secretary of War, the Joint Staff, Combatant Commands, and the Services. The JIATF 401 will also exercise oversight and funding allocation for the Joint C-sUAS University which provides standardized institutional training to the warfighter and government partners. The request also addresses the heightened operational demand by enhancing core capabilities to bolster the Department's joint combat force's warrior lethality in the Joint Training, Exercise, and Evaluation Program expanding global presence and power projection to defend the Homeland and deter external threats.

9999		$0	$8,000	$0
Mandatory Total		**$0**	**$3,701,424**	**$15,977,460**

MANDATORY FUNDING JUSTIFICATION:

The FY 2027 request for Operation and Maintenance, Defense-Wide, includes $64,251,581 thousand of discretionary and $15,977,460 thousand of mandatory for a total of $80,229,041.

Defense Contract Management Agency (DCMA): The mandatory funding of $152,720 thousand funds the renovation and modernization of existing office spaces in 50 Department of War installations. These funds will be used for crucial infrastructure projects, including roof and window replacements, energy-efficient electricity upgrades, safety repairs, HVAC system improvements, and building secure office spaces within existing facilities.

Defense Information Systems (DISA): The mandatory funding of $12,385,145 thousand addresses the critical infrastructure capability gaps required to support Sovereign Artificial Intelligence across the DoW and critically deferred maintenance projects including, but not limited to, mechanical, plumbing, structural, architectural, fire alarm/suppression and Sensitive Compartmented Information Facility upgrades.

Defense Logistics Agency (DLA): The mandatory funding of $143,000 thousand reduces material readiness gaps by expanding the Warstopper program to increase industrial readiness and buy down manufacturing lead times. The Warstopper Program implements industrial preparedness measures and preserves critical industrial capabilities to support the Department's readiness requirements and meets requirements of the Defense Production Act of 1950, Section 103 of Executive Order 13603, and the NDAA 1992-1993 Conference Report requirements directing DLA to maintain industrial readiness for critical "War stopper" items.

Defense Security Cooperation Service (DSCA): The mandatory funding of $1,681 thousand supports service entitlements associated with ensuring that the mission costs align with assigned personnel. Costs include, but are not limited to, dependent education, entitlement travel for certain assignments, and costs associated with assignments.

Department of War Information Activity (DWIA): The mandatory funding of $37,115 thousand provides support in facilities sustainment, restoration, and modernization which addresses the deteriorating state of DWIA facilities by providing an enhanced level of sustainment for facilities as well as specifically targeting the restoration and modernization of facilities to provide serviceable, quality housing to all servicemembers and DWIA workforce. This is restoring Warrior Ethos by investing in readiness of our facilities and improving the quality of life of our service members, students, and support staff.

Department of War Dependents Education Activity (DoWEA): The mandatory funding of $1,650,716 thousand supports Warrior Ethos initiatives that improve quality of life for Service members and strengthen resilience, readiness, and force development across the Department. The request includes $869,542 thousand for the Department of War Education Activity to provide School Choice vouchers for active-duty dependents, consistent with Executive Order 14191, “Expanding Educational Freedom and Opportunity for Families,” issued on January 29, 2025. The request also includes $781,174 thousand to repair poor and failing Department of War Education Activity facilities to support warfighting readiness, improve resilience, enhance quality of life for Service members and families, and reduce future replacement costs.

Office of the Secretary of War (OSW): The mandatory funding provides $1,067,469 thousand for Air Superiority and the Defense Industrial Base. The mandatory funds for Air Superiority are for contracting support towards a new initiative in FY 2027 between the F-35 Joint Program Office, Air Force, Navy, and Marine Corps, to conduct a study to analyze and define the Minimum Sustaining and Maximum Production rates for each F35 variant (A, B, C). The study will include analysis of Lockheed Martin and Final Assembly and Check Out (FACO) facility production capacity limitations, as well as the capacity of critical suppliers to build components that may limit the total number of aircraft produced, such as engines, canopies, and centers. The study will include aircraft quantities as well as supporting analysis, assumptions, and documentation supporting the numbers. The mandatory funds for Defense Industrial Base provide support for Supply Chain Risk Management Tools by expanding the use of commercially available tools and private sector best practices to at least 50 Major Defense Acquisition Programs. These funds will also establish the Supply Chain Risk Management – Integration Center (SCRM-IC) to unify supply chain management across the Department of War. Funding in FY 2027 is required to resource the stand-up and initial operating capability of the Economic Defense Unit (EDU), the Wartime Production Unit (WPU), and the Assistant Secretary of War for International Armament Cooperation ASW(IAC).

The Joint Staff (TJS): The mandatory funding of $11,530 thousand provides support in facilities sustainment, restoration, and modernization which addresses the deteriorating state of TJS facilities by providing an enhanced level of sustainment for facilities as well as specifically targeting the

restoration and modernization of facilities. This is restoring Warrior Ethos by investing in readiness of our facilities and improving the quality of life of our service members, students, and support staff.

Warfighting Acquisition University (WarU): The mandatory funding of $15,084 thousand addresses the deteriorating state of Warfighting Acquisition University facilities by providing an enhanced level of sustainment for facilities as well as specifically targeting the restoration and modernization of the University's facilities to provide serviceable, quality accommodations to all service members and warfighting acquisition workforce. This is restoring Warrior Ethos by investing in readiness of our facilities and improving the quality of life of our students, faculty and support staff.

Washington Headquarters Service (WHS): The mandatory funding provides $513,000 thousand to WHS to restore the long-term sustainment of key infrastructure throughout the Pentagon Reservation and address a significant deferred maintenance backlog. This infrastructure investment is essential to ensure mission readiness and mitigate operational risk, and will bolster critical systems, including Fire Protection, Mission-Critical Power Redundancy, High-Voltage Utility Controls, Vertical Transport Systems (Elevators), and the replacement of high-risk equipment at the Heating and Refrigeration Plant.

The FY 2026 spend plan amount for Operation and Maintenance, Defense-Wide includes $55,953,757 thousand of discretionary and $3,701,424 thousand of mandatory (reconciliation) for a total of $59,655,181.

The FY2025 spend plan amount for Operation and Maintenance, Defense-Wide includes $62,609,095 thousand discretionary and $0 thousand of mandatory (reconciliation) for a total of $62,609,095.

United States Court of Appeals for the Armed Forces

($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, CAAF	$19.2	$0.2	$1.8	$21.2	$0.2	$0.2	$21.7

Description of Strategic Readiness Financed:

The United States Court of Appeals for the Armed Forces (USCAAF, "the Court") is an Article I Tribunal established by Chapter 47 of Title 10, United States Code (also known as the Uniform Code of Military Justice (UCMJ)), specifically Section 941. The Court exercises appellate jurisdiction over cases arising under the UCMJ on a broad range of legal issues. Decisions by the Court are subject to direct review by the Supreme Court of the United States. The Court is not a component of the Department of War (DoW) and does not operate in pursuit of DoW strategic priorities.

Overall Assessment

The FY 2027 budget request includes all customary expenses required to operate the Court. This includes salaries, benefits, travel expenses, rent, communications services, equipment purchases, contractual information technology support, security services, and the expense of printing opinions and decisions of the USCAAF.

Civil Military Programs
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, CMP	$269.6	$6.7	$-20.1	$256.3	$5.4	$-143.2	$118.5

Description of Strategic Readiness Financed:
Department of War (DoW) Civil Military Programs (CMP) encompass various outreach and service programs managed by the Assistant Secretary of Defense for Manpower and Reserve Affairs. Key programs include the National Guard Youth Challenge Program (NGYCP), the DoD Innovative Readiness Training (IRT) program, and the DoD STARBASE program. These programs focus on youth engagement, readiness training, and STEM education within the military, all in support of the Nation's warfighters.

While the NGYCP does not directly participate in combat operations, it provides crucial support to the warfighter by improving the quality of the potential recruiting pool, strengthening the National Guard, contributing to a stronger society, and supporting military families. These indirect benefits are essential for maintaining a strong and ready military force. The IRT program provides direct and tangible support to the warfighter by enhancing military readiness, providing valuable resources and infrastructure, strengthening community relations, and addressing domestic needs and disaster response. It's a win-win program that benefits both the military and the communities it serves. The DoD STARBASE program, while not directly involved in combat, provides crucial long-term support to the warfighter by cultivating a STEM-literate workforce, enhancing national security, increasing diversity in STEM fields, and supporting military families and communities. It's an investment in the future capabilities of the military and the Nation as a whole.

Overall Assessment
The FY 2027 request reflects a $143.2 million program decrease in the Grants (988) line compared to FY 2026. This reduction is driven primarily by the planned decommissioning of several National Guard Youth Challenge Program sites, which lowers the total amount of grant funding required. All other OP-32 cost categories zero out beginning in FY 2026 as Civil Military Programs execution consolidates under the Grants line. The FY 2027 funding level of $118.5 million supports continued delivery of remaining CMP missions, including STARBASE and Innovative Readiness Training, while aligning resources with program participation levels and state-level restructuring.

Cooperative Threat Reduction Program
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, CTR	$296.1	$7.4	$-20.6	$282.8	$5.9	$-67.4	$221.3

Description of Strategic Readiness Financed:
The Cooperative Threat Reduction (CTR) Program enables the Department of War (DoW) to work cooperatively with partner nations to reduce or eliminate the threat of the proliferation of Weapons of Mass Destruction (WMD) or WMD-related materials. The DoW derives authority to carry out the CTR Program through the Cooperative Threat Reduction Act (Public Law 113-291), and has used this authority to reduce chemical, biological, and nuclear threats to the United States and its interests worldwide. To accomplish this, the CTR Program includes several lines of effort: the Biological Threat Reduction Program (BTRP), the Proliferation Prevention Program (PPP), Global Nuclear Security (GNS), the Chemical Security Program (CSP) (formerly Chemical Security and Elimination (CSE)), and Transportation Elimination Disposition (TED) (formerly Delivery System Threat Reduction (DSTR)). These efforts facilitate the elimination and safe and secure transportation of WMD, weapon components, weapon-related material, and associated delivery vehicles. They also prevent the proliferation of WMD and WMD-related materials, technology, and expertise.

Overall Assessment
The FY 2027 CTR budget request reflects an overall program change of $-67.4 million when compared to the FY 2026 request. The decrease better aligns requirements with executive priorities. The CTR Program reduced: biological security requirements in Africa, the Middle East, South-Central Asia, and Europe; chemical security requirements in Europe, and the Middle East, South-Central Asia; border and maritime security requirements in Europe; nuclear security requirements in Europe. The CTR Program strategically adjusted advisory and assistance support costs and program travel costs and reduced biological threat reduction grants and construction projects. The FY 2027 CTR budget also reflects the strategic creation of a Transportation Elimination Disposition (TED) line of effort and congressional notification of a determination to expand CTR authorities into the Western Hemisphere. This is an administrative realignment of program requirements from CSP, DSTR, and GNS to TED to differentiate transportation, elimination and disposition activities from building partner capacity activities.

United States Cyber Command
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, USCYBERCOM	$1,699.0	$36.3	$-112.0	$1,623.4	$27.5	$533.2	$2,184.1

Description of Strategic Readiness Financed:
The FY 2027 request of $2.184 billion reflects the continued expansion of United States Cyber Command (USCYBERCOM) operational responsibilities, the accelerating demand for cyberspace forces, and the maturation of the Command's service-like authorities for readiness, capability development, and talent management. This funding enables the full spectrum of cyberspace operations required to defend national interests, protect critical networks, and ensure the United States maintains freedom of action in and through cyberspace.

Established as a Unified Combatant Command under the FY 2017 National Defense Authorization Act, USCYBERCOM exercises direct budget authority over its assigned forces to ensure readiness and operational effectiveness. Operations and Maintenance (O&M) resources are aligned to two primary funding streams that together enable the Command to execute its statutory responsibilities:

- USCYBERCOM Headquarters (015E): Finances the Command's institutional structure, including strategic direction, operational governance, civilian workforce support, and mission-essential headquarters functions. These resources enable USCYBERCOM to synchronize global cyberspace operations, integrate joint force activities, and execute Title 10 responsibilities for planning, coordinating, and directing cyberspace operations.
- Cyberspace Operations (012D): Supports the Core Readiness and employment of the Cyber Mission Force (CMF). Funding sustains defensive and offensive cyberspace operations, mission systems, infrastructure, and operational tools required to counter adversary activity. These resources ensure the CMF can conduct persistent engagement, defend critical networks, and deliver cyberspace effects in support of Combatant Command and national-level requirements.

Together, these funding streams provide the foundational readiness required for USCYBERCOM to field a trained, equipped, and mission-ready cyber force capable of protecting national security interests and maintaining operational superiority in cyberspace.

Overall Assessment
The FY 2027 program reflects targeted and Strategically aligned growth to mature the USCYBERCOM workforce and expand the Command's ability to generate and employ advanced cyberspace capabilities. Investments strengthen the Command's capacity to deliver offensive cyberspace

operations, counter adversary activity, and support joint force requirements in an increasingly contested domain. USCYBERCOM is in a critical phase of organizational development as it assumes service-like responsibilities for force readiness, capability development, and talent management. O&M resources are essential to building and sustaining a highly skilled cyber workforce, enhancing domain mastery, and ensuring the Command can meet rising operational demands and strategic competition challenges.

Warfighting Acquisition University
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, WarU	$184.1	$3.1	$-15.4	$171.8	$1.4	$19.8	$193.0

Description of Strategic Readiness Financed:

The Warfighting Acquisition University (WarU) (http://www.WarU.edu) is the Congressionally mandated acquisition professional development, training, and policy research and analysis organization of the Department of War (DoW), under the oversight of the Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S)). WarU mission is to: equip the acquisition workforce to rapidly accelerate delivery of warfighter capability through a talent management strategy that includes transformative education, collaborative partnerships, and a continuous drive for acquisition operational excellence. WarU vision is: an acquisition workforce operating with wartime urgency, commercial agility, and a warrior ethos.

WarU provides talent development and continuous professional learning for more than 151,000 warfighting acquisition workforce members, other DoW professionals, federal civilian agencies, and industry partners to develop, field, and sustain warfighting capability. WarU products and services target workplace performance, leadership and professionalism, while promoting organizational mission effectiveness.

Additionally, WarU performs research, develops professional publications, offers symposia and frequent topical webinars, and consults on subjects related to the acquisition functional areas. The FY 2027 request includes funding of 535 civilian full-time equivalents (FTE)s, and operational support to 43 military faculty assigned to WarU.

WarU Core Functions

WarU provides high quality, low-cost training, online resources, and direct support at the point of need to enable the acquisition, requirements determination, and contingency missions of the DoW (and elements of the Federal Government). WarU's core functions are defined as:

1. Teaching: Meeting the challenges of the current and forecasted threat environment requires a workforce that is competent and confident enough to innovate quickly and at scale. WarU instructor-led courses build upon certification training with continuous learning and job support

resources on WarU platform for developing critical job competencies, innovative thinking, and analytical skills across essential acquisition functional and leadership roles.

2. Learning Asset Development and Curation: WarU designs, develops, and deploys an expansive portfolio of on-line and instructor-led courses designed to develop workforce knowledge base and skills to solve complex acquisition problems, manage portfolios, and lead cross-functional teams to deliver the warfighter a decisive edge. WarU catalog of self-paced, online learning, including credentials and topical modules, helps the workforce meet certification requirements and pursue opportunities for career growth. WarU learning asset development capability ensures the workforce has the modern content needed to address foundational skills and emerging concepts with a process that incorporates real-world acquisition lessons learned and uses representative DoW scenarios to hone critical acquisition skills and confidence to decide and act. Asset development and maintenance are mission critical; moreover, learning content must be continuously refreshed to foster rapid technology adaptation, at the speed of relevance. In addition, WarU's category management of licenses with vendors such as Coursera, LinkedIn Learning, and Percipio, provide workforce members with economical access to commercial learning assets relevant to non-DoW specific aspects of acquisition, technology, logistics, and leadership.

3. On-Demand Learning: WarU platform hosts a wide-range of WarU-developed or curated learning assets such as eLearning, "how to" videos, performance support tools, and web events. WarU platform offers convenient access for workforce members to maintain currency, excel at job-related activities and explore emerging concepts. Through webinars and more formal in-person events, WarU helps the workforce stay up to date on the latest concepts in DoW acquisition and leadership. WarU's portfolio of online tools—including its online library, ACQuipedia, and job-support-resources— including the Acquisition Knowledge Matrix, Adaptive Acquisition Framework pathway resources, and a glossary help the workforce complete critical tasks. WarU media library also provides a compendium of on-demand assets.

4. Field Training Services (FTS): WarU's faculty members use their subject matter expertise to help acquisition program teams and other customers achieve specific outcomes and improve acquisition outcomes. These include Field Training Teams (FTTs) that provide comprehensive support to program offices, enhancing their decision-making capabilities across a phase of the acquisition and sustainment life cycle. Examples of these offerings include consulting on specific acquisition challenges, workshops tailored to program needs, functional simulations, and executive coaching.

5. Faculty Rotation Support/Research/Other Mandates: WarU executes activities in support of acquisition innovation and continuous improvement. These include Acquisition Workforce Educational Partnerships (AWEP) Initiatives, such as the Faculty Rotation Program for enhancing faculty currency, Peer Mentoring and Advising, Training to Meet Operational Challenges, Flexible Acquisition Practices, and Expert Lecturers. WarU is also required to conduct research and analysis of warfighting acquisition policy issues from an academic perspective. This includes support for warfighting acquisition university, Human Capital, and continually expanding the USW(A&S) body of knowledge through legislatively mandated research on issues and concerns identified by the workforce.

PBA-19 Summary

WarU Major Programs/Efforts

The Acquisition Transformation Strategy (ATS) is the Department's overarching effort to fundamentally modernize how the Department acquires capabilities, making the process faster, more agile, and better aligned to mission needs. At its core, ATS aims to shift acquisition from a slow, compliance-driven system to one that prioritizes speed, innovation, agility, effectiveness, and outcomes enabling the workforce to deliver relevant capabilities to the field on timelines that match operational demands. WarU is a critical enabler of this strategy, responsible for transforming the acquisition workforce so it can execute the new approaches envisioned under ATS. WarU serves as the driving force behind institutionalizing the ATS across the DoW, ensuring its core tenets are formally codified and embedded into content and practice. Through deliberate integration into training and professional development, WarU will sustain these principles over time and equip the acquisition workforce with the knowledge and skills required to effectively achieve the intent of this transformation. Department leadership has emphasized that ATS cannot succeed through policy changes alone; it will depend on workforce development, cultural change, and execution capacity that WarU provides. Through competency-based education, experiential learning, and direct support to acquisition missions, WarU operationalizes key ATS lines of effort. Together, ATS sets the strategic direction, and WarU makes that transformation an enduring reality across the Department.

In support of the President's priorities, the DoW is taking significant action to reform, right-size, and train the acquisition workforce, and WarU is at the forefront of these efforts. War U is leading the charge to restructure key performance objectives, analyze the acquisition workforce staffing levels, and rapidly provide the workforce with the acquisition reform training and tools required to succeed.

Section 832 of the National Defense Authorization Act (NDAA) for FY 2025 required WarU to establish a training program to support cross-functional personnel and contractors of the DoW involved in any phase of the acquisition and sustainment lifecycle. These Field Training Teams (FTTs) teams are directed to deliver on-site, mission-specific acquisition training, tailored to the needs of operational units across the DoW, and to assist with making important decisions with respect to acquisition or sustainment, requirements validation, the development of an acquisition strategy, awarding contracts, and ongoing management of performance and governance. To comply with the law, WarU must allocate 25 percent of its faculty capacity for a minimum of 50 percent of their time each year in support of the training program. This equates to 12.5 percent of total available faculty capacity.

WarU also continues to provide the global learning environment required to empower the acquisition workforce to meet emerging threats and provide the warfighter a decisive edge. These acquisition experts are responsible for providing and maintaining efficient and cost-effective warfighting capabilities for the DoW. Through certification courses, job-specific training courses and credentials, and workshops, WarU provides the tools necessary for the acquisition workforce to meet their training needs and competently serve as stewards of taxpayer dollars. In addition to the courses and credentials, WarU also provides workshops, tailored training, and rapid deployment training events. These resources allow the acquisition workforce to quickly learn subject-specific information and produce actionable products tailored to their specific needs.

WarU continues to collaborate with OUSW (A&S), the Services, and Components to realize significant economies of scale by serving as an enterprise Learning Management System (LMS) provider through its Cornerstone OnDemand (CSOD) platform, expanding access to additional organizations across the government. By consolidating LMS services under a single, scalable platform, WarU can reduce duplicative licensing, infrastructure, and administrative costs while standardizing training delivery and data management. This approach not only drives cost savings but also enhances networking, interoperability, improves visibility into workforce development, and enables more efficient deployment of training resources across the Department.

Prominent features of our operating environment are change and ambiguity. To thrive in this environment, the Warfighting Acquisition University must be flexible and adaptable as well as knowledgeable and well-prepared. The new modernized training program will give the workforce the tools it needs to continue providing our warfighters with the capabilities they need to succeed. Strategic investments in WarU will continue to drive embedded field and traditional cross functional, immersive, scenario-based experiential learning toward tailorable engagements and courses, supplemented with informal online learning, and job/role-specific credentials. These changes will support acquisition reforms by quickly upskilling the workforce in new areas and supporting individual and organizational needs with hyper-relevant content and solutions.

WarU Strategy

The Strategic Plan presents a high-level view of University's goals and objectives, laying out the organization's mission and vision for the future. The strategic plan outlines three primary goals and supporting objectives in support of its vision and mission.

Vision: An acquisition workforce operating with wartime urgency, commercial agility, and a warrior ethos.

Mission: Equip the acquisition workforce to rapidly accelerate delivery of warfighter capability through a talent management strategy that includes transformative education, collaborative partnerships, and a continuous drive for acquisition operational excellence.

Goal 1 – Drive a workforce ethos of urgency, speed and agility to deliver capabilities to the warfighter.
Objective 1.1: Implement content that instills the ethos of urgency, speed and agility
Objective 1.2: Build impactful partnerships that enable innovation and speed in acquisition efforts

Goal 2 – Modernize the educational continuum of the acquisition workforce to build a performance and results driven culture.
Objective 2.1: Institutionalize modernized training methodologies into competency-based learning models
Objective 2.2: Ensure WarU delivers on demand training at time of need
Objective 2.3: Expand and Integrate External Industry-focused Expertise into the Curriculum

Goal 3 – Serve as the lead change agent for warfighter dominance through improved acquisition.

Objective 3.1: Revolutionize and incentivize the acquisition workforce for excellence
Objective 3.2: Deliver streamlined warfighting acquisition services and assistance

These goals reflect WarU's transformation from a traditional training institution into a mission focused, execution-oriented enterprise that directly supports operational outcomes.

Defense Acquisition Workforce Development Account
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DAWDA	$55.8	$1.3	$-6.3	$50.8	$1.0	$-14.4	$37.5

Description of Strategic Readiness Financed:

The FY 2027 President's Budget Request for the Defense Acquisition Workforce Development Account (DAWDA) supports and aligns with 10 U.S.C. 1705 and provides for the readiness of the Defense Acquisition Workforce (DAW). The DAWDA ensures the DAW has the manpower capacity and acquisition skill sets needed to: (1) Properly perform its mission; (2) Provide appropriate oversight of contractor performance; and (3) Ensure the Department of War (DoW) receives the best value for the expenditure of public resources. This DAWDA request supports continued DAW skilling and modernization in accordance with the Defense Acquisition Workforce Improvement Act and DoD Instruction 5000.66. The FY 2025 enacted, the FY 2026 execution, and FY 2027 request continue to maintain the DAWDA's focus on acquisition workforce readiness through Office of the Secretary of War and Defense Agencies and Enterprise acquisition workforce initiatives.

DAWDA funded initiatives are categorized as recruiting and hiring, training and development, and retention and recognition.

The FY 2027 request supports the statutory purpose and DoW mission-critical need to sustain and shape the 21st century acquisition workforce capability to deliver world class warfighting capability in a challenging and rapidly changing environment. The capability of the 27K+ defense-wide DAW is critical to supporting Administration objectives and the National Defense Strategy. The Defense Agencies and DoW Enterprise leverage targeted investments to address evolving mission requirements, enhance workforce agility, and foster a culture of continuous improvement across all acquisition domains. The request maintains the DAWDA's focus on acquisition capability by supporting the reduction or elimination of DAW capability gaps (e.g., Cyber, Digital, Artificial Intelligence-AI), by providing the tools or capability to reduce costs, and improve acquisition speed and by retaining top talent within the DAW in support of the warfighter.

Overall Assessment

Program decreases in FY 2027 are largely due to travel efficiencies in alignment with Executive Order 14222, “Implementing the President’s Department of Government Efficiency Cost Efficiency Initiative.”

Defense Contract Audit Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DCAA	$659.4	$9.1	$-33.1	$634.4	$3.9	$-22.9	$615.4

Description of Strategic Readiness Financed:
The Defense Contract Audit Agency's (DCAA's) work supports the President's clear mission to achieve Peace through Strength and the Secretary of War's priorities to revive the warrior ethos, rebuild the military, and reestablish deterrence. The DCAA audits and financial advisory services enable contracting officials to make necessary investments to ensure the U.S. military remains the strongest and most lethal force in the world. The DCAA's outreach to defense contractors of all sizes helps to revive the industrial base and field emerging technology by enhancing contractors' understanding of contract requirements. Through industry outreach, DCAA strives to learn contractor's challenges and, when possible, ease the burden of defense contracting.

DCAA has no direct role in determining which companies are awarded defense contracts; rather, it provides recommendations to government officials on contractor cost assertions regarding specific products and services. With these recommendations, contracting officers are better able to negotiate prices and settle contracts for major weapons systems, services, and supplies. DCAA engages with over 3,800 contractors in a typical year, and in FY2025, examined more than $788 billion in contract costs issuing 2,480 audit reports and 7,047 memos.

DCAA continues to return savings to the Government that far exceed the cost of its operations. As a result of reported audit findings, the DCAA recognized $5.3 billion in savings. The return on taxpayers' investment is approximately $7.5 for every dollar invested in the Agency ($704.4 million in FY 2025, including reimbursable funding). The DCAA's workload and associated staffing levels continue to lag behind the DoW procurement funding levels resulting in risk-based audit prioritization.

Overall Assessment
Reductions in FY 2027 are primarily due to Civ Pay Reduction, 20% Contract Reduction, 20% Travel Budget Reduction To realign with the Secretary of War's highest priorities - Strengthening readiness, modernizing capabilities and sustaining the force. 30% Administrative and warehouse lease reduction due to April 11, 2025, Memorandum, "Rationalizing Real Property Leasing to Support Rebuilding the Military".

Defense Contract Management Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DCMA	$1,564.3	$21.1	$-110.6	$1,474.8	$6.7	$23.9	$1,505.4

Description of Strategic Readiness Financed:
The Defense Contract Management Agency (DCMA) ensures entrusted taxpayer resources are used to rebuild our military and supports the pre-contract award for delivering weapons systems to the warfighters. The DCMA operates under the authority of the Under Secretary of War for Acquisition and Sustainment as the Principal Staff Assistant. The DCMA is the centralized force multiplier for standardized inspection and acceptance of combat weapon systems and payments to the Defense Industrial Base (DIB). The Department's uniquely situated DIB sensor network, acquisition and support professionals are the critical link between the Department and the DIB at 880 DCMA sites in 14 countries; surveilling 17,414 global contractor facilities in 42 countries; administering approximately 303,000 active contracts totaling $7.81 trillion; delivering unparalleled insight to ensure timely delivery of warfighting equipment, safeguarding taxpayer dollars, supporting a healthy industrial base; and ultimately contribute to the strength and readiness of our armed forces. The Contract Administration Services and Contingency Contract Administration Services workload performed by the workforce enables services to increase the on-time delivery and procurement of critical warfighting equipment at a fair and equitable cost. The DCMA consistently generates a positive annual return on investment for the DoW and taxpayer significantly, greater than the DCMA's annual budget.

Overall Assessment
The net decrease for Fiscal Year (FY) 2026 is largely due to reductions in civilian personnel full-time equivalents and adjustments to product acceptance, cost and pricing, contract administration, and acquisition insight. Other program decreases are due to contract services and travel efficiencies in alignment with Executive Order 14222, "Implementing the President's Department of Government Efficiency Cost Efficiency Initiative" and contract restructuring. While there is a net decrease for FY 2026, there is program growth for Facilities, Sustainment, Restoration, and Modernization, among other things.

Defense Counterintelligence and Security Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DCSA	$901.9	$54.6	$157.9	$1,113.1	$10.8	$-81.6	$1,036.0

Description of Strategic Readiness Financed:

The Defense Counterintelligence and Security Agency (DCSA) serves as the primary Federal entity for personnel vetting to ensure an effective, efficient, and trusted workforce for the Federal Government as directed in the Executive Order (E.O.) 13869, as well as the continuation of the National Industrial Security Program (NISP) mission. The DCSA was formed over the course of 2019 to 2021 and is dedicated to building the best possible security enterprise to defend the United States. from extant and future adversaries attempting to gain a national security advantage through the workforce, technologies, and supply chain. Since its formal establishment, DCSA restructured its organization to realign personnel previously assigned to the disestablished Defense Vetting Directorate to better support and align with the National Defense Strategy by ensuring a trusted federal, industrial, and affiliated workforce through continuous vetting and insider threat programs. These programs enable government and industry to deliver uncompromised capabilities to the warfighter by utilizing artificial intelligence, machine learning, and cutting-edge technologies and innovation. The blending of the operational missions of Industrial Security, Personnel Security, Personnel Vetting, Counterintelligence, Insider Threat, and professional education and certification provides DCSA with the unique advantage in preserving the nation's strategic edge. The DCSA ensures that sensitive and classified U.S. and foreign government information, technologies, and material entrusted to cleared industry are securely protected. The DCSA, headquartered in Quantico, Virginia, with 165 field offices located across the United States, executes NISP oversight for the Department of War (DoW) and 35 other Federal executive branch agencies, determines security eligibility for all DoW personnel and conducts personnel vetting for more than 100 federal agencies. As the Security Training, Education, and Certification functional manager for the DoW, DCSA provides security education, training, certification, and professional development for DoW and other U.S. Government contractor employees, and U.S. foreign government partners. The DCSA conducts required NISP assessments to deter, detect, and identify loss or compromise of classified information and ensure corrective actions are taken to prevent recurrence.

Overall Assessment

The decrease from FY 2026 to FY 2027 can be primarily attributed to the reduction in funding for contract services that directly support the President's executive order, which emphasizes cost efficiency, transparency, and the consolidation of services. There was also a transfer out of the Applied Research Center for Intelligence and Security and the Critical Technology Protection and Integration Center to the Office of the Under Secretary of War for Intelligence and Security that is intended to appropriately align the budget with the requirements of program management functions. Furthermore, there is an increase in Personnel Security Investigation for Industry to facilitate personnel security investigations for the industry.

Defense Human Resources Activity
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DHRA	$1,060.1	$22.1	$-46.6	$1,035.5	$17.6	$501.7	$1,555.0

Description of Strategic Readiness Financed:
The Defense Human Resources Activity (DHRA) is a Field Activity of the Under Secretary of Defense for Personnel and Readiness (USW(P&R)) that consists of multiple direct reporting units. The DHRA gives USW(P&R) greater capability and flexibility in managing the work of a diverse set of activities supporting the Department of War (DoW) Human Resources (HR) mission. The DHRA Mission Support serves as an intermediary between the Centers/Offices and provides planning, programming, and budgeting for all activities within the DHRA enterprise, to include executing, coordinating, and providing direct oversight to the work of each Center/Office. The DHRA ensures that the Department's warfighters present and past, along with their families and civilian members of the Department, receive the care and support they deserve, fairly, and in a timely fashion, through benefits administration, program execution, and policy enforcement.

The Field Activity is comprised of operational programs that support the USW(P&R) in its mission to develop policies, plans, and programs that will ensure the readiness of the Total Force and the well-being of military families. The Field Activity supports the USW(P&R) vision of creating an organization dedicated and committed to the readiness of the Department's Service members, their families, and civilian employees.

Overall Assessment
The FY 2027 DHRA budget request for Non-Cyber programs represents a net programmatic increase of $501.7 million with a price growth of $17.6 million. The request includes funding for the DoW payment to the Office of Personnel Management (OPM) for establishment of the core Human Capital Management (HCM) system. Funding is also added for DoW activities to transition to the OPM HCM system and decommission or rationalize legacy systems that will be replaced by OPM. In addition, it transfers in the operational resourcing costs associated with the United States Military Entrance Processing Command (USMEPCOM) from the Army to DHRA. Efficiency measures that reflect civilian workforce optimization, and reductions in travel and service contracts have been strategically implemented to minimize impacts to DHRA's mission-critical functions as the premier provider of human resources management services to Departmental leaders, civilians, military members, their families, and retirees.

Defense Information Systems Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DISA	$3,125.6	$56.5	$312.9	$3,495.0	$62.1	$918.1	$4,475.2

Description of Strategic Readiness Financed:
The DISA budget contributes to the Department's strategic readiness across all domains, ensuring a decisive advantage for warfighting forces operating within and beyond the cyber realm. These investments align to bolster Operational Readiness, Modernization, Resilience, Force Structure, and Business Systems and Organizational Effectiveness. DISA fortifies its infrastructure and the warfighter's ability to securely and effectively communicate in all environments by focusing on communications, engineering, cybersecurity, proactive defense, and Zero Trust solutions.

In FY 2027, DISA is expanding capabilities in accordance with the Mission Network as a Service (MNaaS) framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force.

- Increased **cloud computing power** contributes to MNaaS by providing a secure and high-powered cloud environment to access applications and perform complex analysis using artificial intelligence.
- Combatant Command Network (CCMDNet) Optimization, **a single network for CCMD core IT that leverages DoDNet's infrastructure**, will enable CCMDs to access the Secret fabric with immediate access to Zero Trust cybersecurity protection through DISA's Thunderdome program.
- Identity, Credential, and Access Management (ICAM) furnishes **robust, multi-method user authentication and authorization t**o include role-based and attribute-based access controls. MNaaS will ensure every user, device, and non-person entity is uniquely identified and authenticated.
- The Coalition Information Environment (CIE) is establishing a **secure, unified hybrid cloud mission partner environment for both Command and Control (C2) and collaboration** at the Secret and below levels to foster collaboration with our allies.
- Critical Time Dissemination contributes to MNaaS by proving the Combined Joint Force with **precision timing** when using DISN and Command and Control services to **conduct sensitive targeting operations**.

The DoW Teleport program strengthens the warfighter by modernizing satellite communication (SATCOM) and Resilient Ground Infrastructure (RGI) to connect deployed forces to the Defense Information Systems Network, which is essential for planning, implementing, and supporting all operational missions, anytime, anywhere. The White House Communications Agency (WHCA) is making substantial investments to address limitations in communications systems utilized by POTUS, VPOTUS, WHMO and DoW. These classified improvements will provide the Commander-in-Chief with the ability to coordinate a response to emerging threats in real time from anywhere in the world. By making strategic investments in technological advancement and readiness, DISA helps to give U.S. warfighters a decisive edge.

Overall Assessment

In FY 2026, DISA received a significant increase in funding which allowed it to invest in strategic readiness initiatives across the agency. In FY 2027, these projects will be sustained to maintain the highest level of agility and lethality. Some new initiatives are being funded in FY 2027 as well. The major readiness increases include:

- $247,222 thousand for a classified White House support initiative that will address limitations in WHCA and DoW communication systems. This classified program will enhance Operational Readiness and Modernization.
- $96,272 thousand to address DoWIN Technical Debt. Over time, DISA has accumulated tech debt related to critical DISN components and the network still includes legacy Time-Division Multiplexing (TDM) systems. TDM networks face obsolescence as vendors are ending support. This funding will accelerate transition to a modern, all Internet Protocol (IP) and optical core, mitigating security risks and performance limitations. This modernization strengthens the DISN by guaranteeing the communications backbone is always available for the warfighter, preventing mission failure due to network outages.
- $82,514 thousand to support DISA adding artificial intelligence acceleration hardware to existing Joint Operational Edge (JOE) sites overseas, putting powerful artificial intelligence tools directly in the hands of tactical mission partners. This hardware will include GPUs, a specialized electronic circuit designed for rapidly handling complex processes for artificial intelligence workloads. This will fortify readiness for Allies and Mission Partners, while ensuring a Modernized Global Defense Posture.
- $80,000 thousand to operationalize and sustain the Coalition Information Environment (CIE), a secure, unified hybrid cloud environment for sharing information at the Secret and below levels with mission partners. This effort will contribute to several dimensions of readiness including Organizational Effectiveness, Operational Readiness, and fortifying Allies and Partners.
- $72,000 thousand to support the critical planning and design work required to migrate the 11 Combatant Commands from their legacy networks onto a single network for their core IT that leverages DoDNet’s infrastructure: CCMDNet. The goal is to complete all planning and design in FY 2027.

- $50,681 thousand for Cyber infrastructure will enhance the security and validity of data in DoW networks. Funding will support the ICAM capability across the CCMDs and Services. DISA is executing ICAM in accordance with the Mission Network as a Service (MNaaS) framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. By ensuring seamless identity synchronization, security, policy enforcement, and auditing, ICAM enforces Zero Trust principles across MNaaS. Funding will also support the User Activity Monitoring (UAM) technology refresh and standardization initiative. DISA is consolidating an array of CCMD and Defense Agency and Field Activity (DAFA) UAM capabilities into a common Commercial-Off-The-Shelf (COTS) solution to reduce duplication and provide a uniform standard to observe and record endpoint activities. These Cyber investments support critical Modernization and Operational Readiness objectives.
- $46,920 thousand for the enhancement and sustainment of INDOPACOM DISN connectivity. DISA will be conducting optical and Internet Protocol tech refresh and modernization, which includes extending the modern, high-speed network directly to warfighters by deploying new Service Delivery Nodes, which are the core IP and optical infrastructure of DISN. This investment will enhance Sustainment and Global Defense Posture.
- $27,958 thousand for increased Teleport and Airborne Intelligence Surveillance and Reconnaissance (AISR) resilient ground infrastructure sustainment. As the resilient ground infrastructure project builds and expands Teleport and AISR sites, additional funding is needed to keep them operational. This project is enabling the modernization of satellite communications and ensures reliable global connectivity for operational forces. DISA is increasing the capacity, resilience, and geographic diversity of DISA-managed SATCOM ground infrastructure to support deployed Warfighting forces. Reliable and resilient communications, access to intelligence data, and battlespace awareness are critical for supporting the SECWAR's priorities of maintaining readiness and enhancing lethality.

Defense Logistics Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DLA	$402.7	$9.7	$2.7	$415.1	$7.6	$162.9	$585.6

Description of Strategic Readiness Financed:
The Defense Logistics Agency's (DLA's) mission is to "Drive and sustain Warfighter readiness by delivering unmatched global support as the Nation's Logistics Combat Support Agency." As the Nation's Combat Logistics Support Agency and valued partner, DLA is innovative, adaptable, agile, and accountable and focused on the Warfighter Always. The DLA is predominately a working capital funded agency, however, DLA's O&M programs in direct support of strategic readiness include:

- **Warstopper:** Implements industrial preparedness measures for critical go-to war requirements. Identifies and addresses supply chain vulnerabilities, and enables surge capabilities.
    - **Mapping:** As DoW's Integrated Materiel Manager & Distributor of 70K map items, DLA provides nearly 250K hydrographic, topographic, and aeronautical map products (23,500 classified).
    - **Generalized Emulation of Microcircuits:** Sources non-procurable military grade microcircuits to keep legacy weapon systems operational.
- **DoW Enterprise Business Systems (DEBS):** Provides operational support for DEBS, such as the Defense Agencies Initiative, Joint Contingency Contracting System, and Standard Procurement System.
- **Logistic Support Activities (Classified Program):** Provides specialized logistics support to DoW's national-level objectives.

Overall Assessment
Significant growth-related increases occur in the Defense Agencies Initiative (DAI), the Law Enforcement Support Office (LESO), and the Permanent Change of Station (PPA). The increase for DAI provides the Defense Logistics Agency (DLA) with the resources required to support USTRANSCOM's transition to the Defense Agencies Initiative and to fund additional system sustainment activities necessary for the Department to progress toward a clean audit opinion. The LESO increase supports migration of the Accountability Property System of Record to a Department-owned server, ensuring the flexibility needed to respond to future Executive Orders and regulatory changes. The increase for PPA establishes the Permanent Change of Station activity in accordance with the Secretary of War's "Personal Property Activity Implementation Memorandum," dated January 21, 2026, including civilian FTE and associated support requirements.

Significant reductions occur in the Defense Agencies Initiative (DAI), the Standard Procurement System (SPS), and Family and Morale, Welfare and Recreation (FMWR). Reductions in DAI, SPS, and FMWR reflect efficiencies achieved through contract services realignment and support the Department's efforts to streamline operations while maintaining essential Warfighter readiness and surge-capable infrastructure. The SPS reduction aligns with the modernization effort replacing the legacy Procurement Desktop–Defense (PD2) application with the cloud-based Enterprise Contract Writing Module (ECWM), eliminating the need for PD2 funding after FY 2026. Additional reductions result from the completion of the DAI cloud migration in FY 2026, which removes the requirement for DISA on-premises hosting in FY 2027.

Defense Legal Services Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DLSA	$190.2	$3.9	$-39.2	$154.9	$2.0	$-9.3	$147.6

Description of Strategic Readiness Financed:
The Defense Legal Services Agency (DLSA) provides comprehensive legal advice, services, and adjudication capabilities to Defense Agencies, Department of War (DoW) Field Activities, and other assigned entities. The DLSA's legal expertise ensures lawful operations, safeguards classified information through personnel security, and enforces ethical compliance—all fundamental prerequisites for any successful military operation across the conflict spectrum.

The DLSA's major components include the Defense Office of Hearings and Appeals, which adjudicates personnel security clearance cases for contractor personnel performing classified work for DoW components and 30 other Federal Agencies, and the Office of Military Commissions (OMC), which handles trials of enemy combatants pursuant to the Military Commissions Act of 2009. The OMC is currently managing 12 detainees with active charges including alleged perpetrators of the September 11th attacks and the USS Cole bombing. Notably, the first of the trials involving these detainees, the trial for the alleged USS Cole Bomber, is firmly scheduled to begin on June 1, 2026, and is anticipated to run until some time in December 2026.

The DLSA implements the Secretary of War's priorities through timely legal counsel that enables decisive military advantage while maintaining adherence to domestic and international law. The agency administers the DoW Standards of Conduct Program; supports the Assistant Secretary of War for Legislative Affairs in developing DoW’s legislative program; negotiates on behalf of DoW clients; ensures proper use of Government funds and property; provides legal compliance opinions; and participates in contractual matters. These services directly contribute to the Department's ability to deploy and sustain combat-ready forces by ensuring personnel security, proper resource allocation, and legal defense of DoW interests.

Overall Assessment
The DLSA's FY 2027 budget request represents a balanced approach to meeting the Department's legal service requirements while supporting broader strategic readiness objectives and implementing Administration efficiency initiatives. The budget request maintains essential funding for

security clearance adjudications, legal proceedings, and legal services that directly enable DoW components to execute their missions effectively and lawfully.

These targeted investments and efficiencies directly contribute to DoW's lethality and readiness by ensuring legal obstacles do not impede mission execution, while simultaneously advancing the Administration's government efficiency initiatives. In short, DLSA provides global legal solutions in the form of advice, representation, and adjudication to support lawful operations and ethical decision-making for the Nation's warfighters and those who support them in the defense of the nation.

Defense Media Activity
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DWIA	$241.0	$4.8	$-27.9	$217.9	$3.0	$-13.4	$207.6

Description of Strategic Readiness Financed:
The Department of War Information Activity (DWIA, formerly Defense Media Activity (DMA)) is a Department of War mass media organization that creates and distributes the DoW content across a variety of media platforms to audiences around the world and provides joint-service training for the public affairs and visual information career fields.

Overall Assessment
Program decreases in FY 2027 are attributed to the reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services, efficiencies for workforce optimization in compliance with Executive Orders 14210, "Implementing the President's Department of Government Efficiency Workforce Optimization Initiative."

DoD Dependents Education
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DoWDE	$3,547.4	$69.2	$-11.6	$3,605.0	$48.5	$-160.2	$3,493.2

The Department of War Dependents Education (DoWDE) program includes the Department of War Education Activity (DoWEA) and the Family Assistance (FA)/Family Advocacy Program (FAP).

Description of Strategic Readiness Financed:
The Department of War Education Activity (DoWEA) directly supports Strategic Readiness by delivering consistent, high-quality PreK–12 education to military-connected students worldwide.

As a DoW Field Activity under the authority of the Under Secretary of War for Personnel and Readiness (USW(P&R)) and Assistant Secretary of War for Manpower & Reserve Affairs (ASW(M&RA)), DoWEA ensures educational continuity and excellence for over 66,000 students across 160+ schools in 11 countries, seven U.S. states, Guam, Puerto Rico, and through the Non-DoW Schools Program (NDSP) and Virtual School.

DoWEA's mission is critical to family readiness and force stability. By providing rigorous academic programs, standardized curricula, and smooth school transitions, DoWEA helps reduce the educational disruptions tied to frequent PCS moves and deployments.

Key programs funded include:

- **DoWDS & DDESS**
  - Delivering high-quality PK–12 education to military-connected students across DoWDS and DDESS schools, providing rigorous instruction, specialized student services, advanced coursework, career and technical education pathways, and robust co-curricular academic and athletic programs.
  - Providing virtual learning through synchronous and asynchronous instruction to ensure access for transitioning or geographically isolated students.

- **Management Headquarters, Consolidated School Support, and Educational Partnership Program**

  - Sustaining oversight and essential support services, including functions that coordinate curriculum, financial management, procurement, HR, IT, grant management, and facilities to ensure effective school operations.
  - Supporting the Non-DoW Schools Program (NDSP), which funds education for more than 4,800 students in remote overseas international school locations without DoWEA schools, including tuition and other eligible costs.
  - Administering Special Arrangements, federally funded agreements with U.S. public school districts that educate eligible dependents where DoWEA schools are not available.

- **Family Assistance/Family Advocacy Program:** Family Assistance (FA)/Family Advocacy Program (FAP) initiatives play a foundational role in bolstering overall DoW strategic readiness. These programs are indispensable enablers that support the human element of national defense, aligning with the National Defense Strategy. The programs are critical for the holistic support of service members and their families, directly impacting military quality of life and personnel readiness.

- **Family Assistance (FA):** These programs provide comprehensive resources to active duty and reserve component personnel and their families. Key initiatives include the 1-800 Military OneSource call center and website (the DoW's primary point of contact for service member and family support), the Military and Family Life Counseling Program, spouse education and career opportunities (e.g., MyCAA Scholarship, Career Accelerator Program Fellowship, licensure portability), and Child Development Program (CDP) initiatives. These services are vital for addressing quality of life, economic security, and overall family well-being, which directly translates to service member focus and deployment readiness.

- **Family Advocacy Program (FAP):** FAP delivers evidence-based prevention and clinical intervention programs to address adult-initiated child abuse and neglect, domestic abuse, and child-initiated serious harmful behaviors. By fostering safe and stable family environments, FAP helps to preserve military families, allowing service members to maintain optimal performance without the profound distractions of family crises. The program also supports data collection, training, research, and fatality reviews, enhancing the DoW's ability to protect its most vulnerable members.

- **Cultivating Financial Readiness & Professional Development:**
  - **Financial Readiness:** This program provides comprehensive financial literacy education, training and accredited counseling to service members at key military touchpoints in accordance with section 992 of title 10, United States Code. The program directly combats the operational distractions and security vulnerabilities caused by financial instability, ensuring a more resilient, mission-focused and deployable force.

  - **Voluntary Education:** Supporting off-duty education and training programs allows service members to attain academic and skill-based credentials, fostering professional and personal development. This investment enhances the overall capability and marketability of the force, aiding retention and successful transition to civilian life.

Collectively, DoWEA-funded programs are essential to support the Secretary of War's priority to improve quality of life for service members and their families by strengthening education, workforce support, and student services. This budget sustains mission-critical functions such as strengthening academic programs, maintaining compliance with the Individuals with Disabilities Education Act (IDEA), expanding virtual learning, and improving educator effectiveness through professional development. In parallel, programs such as Family Assistance (FA), the Family Advocacy Program (FAP), Financial Readiness, and Voluntary Education provide comprehensive support services that promote family stability, address domestic challenges, enhance financial literacy, and foster personal and professional growth. These integrated efforts directly enhance military quality of life, reduce stressors that impact readiness, and enable service members to remain mission-focused, knowing their families are supported and their children receive uninterrupted, high-quality education.

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DPAA	$184.3	$3.8	$-21.0	$167.1	$2.1	$-8.8	$160.4

Description of Strategic Readiness Financed:

The Defense Prisoners of War/Missing in Action (POW/MIA) Accounting Agency (DPAA) is a Defense Agency that provides families and the Nation with the fullest possible accounting for missing personnel from designated past conflicts. The DPAA leads the national effort to develop and implement the Department of War (DoW) policy on all matters relating to personnel accounting from past conflicts, conduct global search, recovery, and laboratory operations to identify personnel from past conflicts, ensure timely and accurate information is provided to the families of missing personnel, share their stories, and when possible, bring home their remains. This includes those who are unaccounted for from World War II, the Korean War, Cold War, Indochina (Vietnam) War, Persian Gulf War, the Iraq Theater of Operations, and other conflicts or incidents as the Secretary of Defense directs. The DPAA provides analytical support to official U.S. delegations and engages in technical discussions with host nation officials. Additionally, the DPAA is continuing to implement the transformation of the DoW's personnel accounting for past conflicts that involve enhanced strategic partnerships to account for missing personnel more effectively and to ensure their families receive accurate information.

Overall Assessment

Defense Security Cooperation Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DSCA	$10,932.0	$271.6	$-7,549.7	$3,654.0	$74.5	$52.3	$3,780.8

Description of Strategic Readiness Financed:

The Defense Security Cooperation Agency (DSCA), in coordination with the Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S)) and the Office of the Under Secretary of War for Policy (OUSW(P)), leads the security cooperation enterprise in delivering effective, enduring, and timely solutions that support national security, defense strategic guidance and mutual U.S. and partner interests.

Consistent with the 2026 National Defense Strategy (NDS), the FY 2027 President's Budget request continues to align and deliver security cooperation programs and efforts in accordance with priorities of the President of the United States and Secretary of War's (SecWar) priorities. These efforts include the day-to-day operations of the DSCA headquarters, the Defense Security Cooperation University (DSCU), the Department of War (DoW) Regional Centers for Security Studies, and the Defense Security Cooperation Service (DSCS). Under the provisions of the Title 10 U.S.C. Chapter 16, the FY 2027 budget request will continue to support the execution of a Department-wide framework for the assessment, monitoring, and evaluation of security cooperation activities and continue to implement a workforce development program targeting all DoW professionals supporting security cooperation efforts. The DSCA will continue to execute Department of State security sector assistance programs and activities in accordance with the Foreign Assistance Act and the Arms Export and Control Act. Additionally, the DSCA budget request supports program management and administration of the Humanitarian Assistance, Foreign Disaster Relief, and Humanitarian Mine Action programs funded within the Overseas Humanitarian, Disaster and Civic Aid appropriation.

Consistent with 10 U.S.C. § 134, the Under Secretary of War for Policy (USW)(P) is the principal authority for the establishment of the strategic framework, to include resourcing guidance for security cooperation programs, within which these activities are conducted, ensuring strategic alignment with U.S defense policy objectives and the fulfillment of overarching national security priorities. This includes matters pertaining to alliance management and implications for country, regional, or strategic-level guidance. This allocation of responsibilities underscores the enduring significance of policy considerations in all facets of arms transfers, technology security, and security cooperation, and guarantees a cohesive approach to achieving the Department's strategic imperatives.

PBA-19 Summary

The DSCA plans, directs, implements, administers, and provides guidance for the execution of assigned security cooperation programs and activities and facilitates the planning, implementation, monitoring, and evaluation of security cooperation activities funded through the DSCA. The DSCA activities encourage and enable foreign partners to responsibly act in support of U.S. national security objectives. Security cooperation activities are often complex and span the phases of conflict from shaping the environment to enabling civil authority activities. The DSCA collaborates closely with the interagency, geographic combatant commands (CCMD), industry, and partner nations to execute security cooperation activities. Moreover, the DSCA seeks to maximize security cooperation program effectiveness.

Overall Assessment
Explanation of Changes:

Changes from FY 2025 to FY 2026: The Defense Security Cooperation Agency's (DSCA) Operation and Maintenance, Defense-Wide budget request for FY 2026 is $3,654.0 million, representing a net decrease of $7,278.0 million from FY 2025 actuals. This funding continues to support security cooperation reforms mandated by the FY 2017 and FY 2026 National Defense Authorization Acts (NDAA), which enhance flexibility, transparency, and oversight of activities across the Department. The primary driver of the budget decrease is the change in supplemental funding execution for the Ukraine Security Assistance Initiative (USAI). This reduction is partially offset by targeted increases for enduring strategic priorities, including enhanced support for Taiwan Security Cooperation, the Drawdown Stock Replacement, and the transfer of the Defense Security Cooperation Service.

Changes from FY 2026 to FY 2027: The DSCA’s Operation and Maintenance, Defense-Wide budget request for FY 2027 is $3,780.8 million, a net increase of $126.8 million from FY 2026, driven by a $74.5 million price adjustment and a $52.3 million program increase. The request prioritizes key presidential initiatives by sustaining core operations for DSCA Headquarters, DSCS, and Regional Centers, while also advancing strategic data and burden-sharing efforts. In accordance with Title 10 USC Chapter 16, the budget supports the security cooperation assessment framework and critical workforce development programs, ensuring DSCA can maintain operational capacity and address evolving strategic priorities. It also includes $1.7 million in mandatory funding for mission operational costs.

Defense Threat Reduction Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DTRA	$892.1	$19.0	$-157.8	$753.2	$12.0	$-54.2	$711.0

Description of Strategic Readiness Financed:
The United States faces a highly competitive security environment characterized by evolving weapons of mass destruction (WMD) risks across multiple domains. Consistent with the National Security Strategy, the National Defense Strategy (NDS) and FY 2027-2031 Defense Planning Guidance (DPG), focused on Peace Through Strength, the Defense Threat Reduction Agency (DTRA) is aligned to counter threats with a focus on the Indo-pacific region. China and Russia are expanding and modernizing their nuclear forces, diversifying advanced conventional WMD delivery systems, and actively developing chemical, biological, radiological, and nuclear (CBRN) capabilities that directly threaten the homeland and American security. At the same time, Iran and North Korea are pursuing advanced warfighting capabilities to undermine regional security and global stability in ways that pose considerable risk to U.S. objectives. Additionally, the potential for the intentional or accidental release of biological pathogens or hazardous chemicals contributes to a dynamic CBRN threat environment.

DTRA's Fiscal Year (FY) 2027 budget request reflects continued focus on strengthening the agency's alignment to the Secretary of War's priorities. It invests in delivering the capabilities required to protect the Homeland and counter WMD risks while enabling the Department of War (DoW), the United States Government (USG), and international partners (through burden sharing) to deter strategic attacks against the United States and its Allies; prevent WMD and emerging CBRN threats; and prevail against WMD-armed adversaries in crisis and conflict.

DTRA enables the DoW, the USG, and selected allies to meet U.S. national security goals through deterrence, enhancing warfighter lethality, and defending the Homeland. DTRA aligns operations, activities, and investments primarily focused on China's WMD threats, but also addresses other adversaries and high-risk regional destabilizers. In its role as both a Defense Agency and Combat Support Agency, DTRA provides cross-cutting solutions to support each of these mission priorities. DTRA is committed to achieving concrete outcomes and strategic effects through its five core functions:

- Ensuring a reliable, resilient strategic deterrent through nuclear surety, mission assurance, and crisis response activities;
- Developing and delivering technical capabilities to the warfighter across the WMD threat spectrum;
- Preventing, reducing, and eliminating CBRN threats through targeted and focused risk reduction, arms control, partner capacity building and warfighter support;
- Providing strategic and operational support through subject matter expertise, technical reach back, tailored analysis, and exercise support;

- Supporting the Joint Force with plans, concepts, exercises, and materiel solutions to address CBRN operational and strategic risks.

As a Combat Support Agency, DTRA envisions, develops, and delivers capabilities to the Warfighter to counter WMD and emerging CBRN threats posed by adversaries. DTRA also supports whole-of-government efforts to prevent the acquisition, proliferation, and use of WMD and associated materials. Given the CBRN-related challenges posed by WMD-armed actors, DTRA will continue to enhance its crisis response readiness and its ability to posture for crisis and conflict.

DTRA's O&M Non-Cyber programs support the nuclear enterprise, develop common situational awareness to inform global integrated operations, and target building partner capacity efforts to enhance homeland defense and U.S. national security interests. DTRA programs strengthen our nuclear deterrent through force-on-force exercises and wargaming; tracking nuclear weapons to maintain positive control and support emergency verifications; providing visibility on mission risk across the DoW enterprise; conducting mission assurance assessments that provide risk mitigation strategies for Defense Critical Assets and Infrastructure; and testing strategies to defend critical missions against emulated adversarial disruption. Additionally, O&M funding enables DTRA to support Combatant Command (CCMD) responses to WMD and emerging CBRN threats through planning and exercise support; monitoring and verification activities; CBRN material security and elimination, creation of decision support tools to increase awareness of consequence of action and implications of WMD attack; and allied and partner capacity/capability for interoperability, crisis/conflict division of labor, and awareness of current and future WMD threats.

DTRA's O&M Cyber programs mitigate risk to DoW critical infrastructure through advanced cyber assessments including risk-based vulnerability assessments (Blue) and adversarial emulation (Red) audit vulnerability assessments, as well as penetration tests. Programs also ensure the Agency meets DoW cybersecurity compliance standards and maintains an acceptable cybersecurity posture.

Overall Assessment

The FY 2027 O&M Non-Cyber and Cyber budget request reflects an overall decrease of -$42.2 million when compared to the FY 2026 enacted budget. This net decrease includes a price adjustment of +$12.0 million; program increases of +$23.5 million; program decreases of -$70.3 million, and a functional transfer of -$7.4 million.

DTRA continually strives to achieve the right balance of civilian Full Time Equivalents (FTEs) and service support contracts. In the face of rapidly growing and evolving requirements to counter and deter WMD and emerging threats, DTRA will continue to strike the right parity across our mission portfolio to ensure support for the highest priorities within overall resource constraints.

*This exhibit includes Cyber and Non-Cyber resources.

PBA-19 Summary

Defense Technology Security Administration
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, DTSA	$43.8	$0.5	$-6.0	$38.3	$0.3	$8.5	$47.1

Description of Strategic Readiness Financed:
DTSA's mission links to the priorities of the FY 2026 National Defense Strategy (NDS) and the Secretary of War's priorities to re-establish deterrence, increase burden sharing, and restore the warrior ethos. DTSA is directly involved in advancing the objectives of Executive Orders (EO) 14268 Reforming Foreign Defense Sales To Improve Speed and Accountability and EO 14383 Establishing an America First Arms Transfer Strategy, which are designed to increase the transparency, speed, and efficacy of foreign defense sales. DTSA protects the U.S. military's critical technological advantages by ensuring the responsible transfer of information and technology that, in the wrong hands, could prove detrimental to U.S. national security interests. DTSA pays particular attention to transfers that could result in the proliferation of weapons of mass destruction and their means of delivery, as well as conventional weapons and dual-use technology that could erode the U.S. warfighter's technological advantage. DTSA assesses the risk of diversion of U.S.- produced, defense-related goods to countries and entities of concern, including terrorists, and helps develop mitigation measures, where possible, to reduce the risks of diversion or misuse. DTSA works with multilateral export control and nonproliferation regime members to identify and control critical technologies and to establish common licensing practices to prevent exports to military end-user and end-uses in countries of national security concern. DTSA works with international partners through bilateral technology security cooperative efforts to improve technology security practices and procedures that enable broader and deeper security cooperation. Further, DTSA chairs the National Disclosure Policy Committee and executes foreign disclosure reviews of classified information to support ally and partner interoperability with U.S. forces, thereby assisting in the enhancement of their military capabilities to address national security matters of mutual concern. DTSA also plays a critical role in implementing Australia, United Kingdom, United States (AUKUS)-impacted regulations and process changes for technology release approval. Finally, in executing the foregoing responsibilities, DTSA strives to build enduring advantages by balancing the safeguarding of critical defense information and technologies with fostering the health of the U.S. defense industrial base through four core functions: (1) conducting national security reviews of defense technology transfers; (2) working closely with allies and partners on cooperative endeavors that have a technology security dimension; (3) developing and implementing DoW policies related to defense technology exports, technology release processes, and foreign disclosure of classified information; and (4) performing mission application management functions for other U.S. Government (USG) agencies, as well as the DoW.

Overall Assessment

The changes largely reflect efficiencies related to contract services, travel, and the working capital fund in alignment with Executive Order 14222, "Implementing the President's Department of Government Efficiency Cost Efficiency Initiative."

FY 2025 to FY 2026: Program decreases $-6.2 million in FY 2026 reflect efficiencies related to contract services, travel, and the working capital fund in alignment with Executive Order 14222, "Implementing the President's Department of Government Efficiency Cost Efficiency Initiative." The decrease also contributed to the mandated reductions in FY 2026 created a significant under-execution of civilian compensation ($-4.8M) forcing the agency to implement an internal hiring freeze and leave critical positions vacant, and $-1.4M dollars in other Operations Cost.

FY 2026 to FY 2027: The Program increase of $8.5 million related to accurately costing for 137 FTEs civilian compensation and IT modernization cost. The increase in civilian compensation reflects a critical funding realignment required to execute DTSA's national security mission and restores the ability to recruit for critical positions, essential roles and align staffing with mission requirements. This increase reflects the staffing and funding levels DTSA must be resourced to properly safeguard U.S. technology and support our allies effectively. Additionally, the increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

This increase also provides the necessary funding to execute a complete IT modernization of DTSA's mission applications, directly enabling the implementation of Executive Order 14268 on defense sales. DTSA's primary application, USXPORTS, facilitates over $618 billion in U.S. technology export licensing reviews. This investment is essential to creating the rapid, secure, and reliable technology transfer process mandated by national policy. Funding will also integrate the mandatory cybersecurity monitoring required to secure these critical systems within the cloud environment.

Lastly, the increase accounts for the actual cost of mandatory services provided by the Defense Finance and Accounting Service, training requirements, and travel required for international agreements and to enable alignment to U.S. export control policies in multilateral regimes.

Missile Defense Agency
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, MDA	$671.4	$16.8	$9.6	$697.7	$14.4	$-224.9	$487.2

Description of Strategic Readiness Financed:
The Missile Defense Agency provides unique sustainment support for the Ballistic Missile Defense (BMD) Aegis Weapon System (AWS), Ground-Based Midcourse Defense (GMD) system, Missile Defense System Radars, and Terminal High Altitude Area Defense (THAAD) systems.

- AWS sustainment support includes AWS Aegis Standard Missile-3 (SM-3) recertifications and repairs, maintenance of Aegis Ashore sites and deployed BMD Aegis ship baselines, and Operational Readiness, which the Missile Defense Agency (MDA) supports in conjunction with the Navy, who is responsible for operations and sustainment of common items.
- GMD system sustainment support for operational Ground-Based Interceptors and GMD Weapon System, which MDA supports in conjunction with the Services. The respective Services are responsible for operations and sustainment of common items and common use areas.
- Missile Defense System Radars unique sustainment support includes five (5) Forward Based Mode (FBM) Army Navy/Transportable Radar Surveillance and Control-2 (AN/TPY-2) radars, five (5) Upgraded Early Warning Radars, Long Range Discrimination Radar, and COBRA DANE Radar, which MDA supports in conjunction with the United States Space Force, who is responsible for operations and sustainment of common items.
- THAAD Missile Defense unique sustainment support includes sustainment of the THAAD Missile Defense unique and developmental items, which MDA supports in conjunction with the Army, who is responsible for the operations and sustainment of common items.

Overall Assessment
Fiscal Year 2027 results in a net decrease due to the transition and transfer of Terminal High Altitude Area Defense and Terminal Based Mode AN/TPY-2 to the US Army and programmatic changes Reduced Depot-Level Maintenance and SM-3 IIA recertifications in FY 2027 to align with U.S. Navy ship operations, maintenance schedules, and sustainment plans. Aegis reductions due to the realignment of Aegis Baselines software enhancement capabilities, including the development of Aegis Baseline 10.1, 10M, maintaining operational readiness and test site effectiveness to Research, Development, Test and Evaluation (RDT&E) per Commander's Training and Readiness assessments. Reduced AN/TPY-2 repair and return capabilities and sustainment of the aging radar fleet and associated components due to increased requirements for software upgrades developed within RDT&E. The FY 2027 budget request provides funding for improving Missile Defense System weapon system reliability, availability, maintainability, and operational readiness to engage missile threats in support of the Department’s Strategic Readiness and

Sustainment. The budget also provides missile defense supports to the U.S. Central Command by providing replacement of critical AN/TPY-2 radar components; SM-3 recertifications and repairs.

Overseas Humanitarian, Disaster, and Civic Aid
($ in Millions)

(Dollars in Millions)

Appropriation Summary	FY 2025* Actuals	Price Change	Program Change	FY 2026** Enacted	Price Change	Program Change	FY 2027*** Request
O&M, OHDACA	$119.0	$3.0	$-21.2	$100.8	$2.2	$-24.8	$78.2

- The FY 2027 request for the Overseas Humanitarian, Disaster, and Civic Aid includes $78.187 thousands of discretionary funds.

Description of Strategic Readiness Financed:
The Overseas Humanitarian, Disaster, and Civic Aid (OHDACA) appropriation supports the Secretary of War (SECWAR) and the Combatant Commanders (CCDRs) in the pursuit of national and theater strategies to build partner nation resilience, capacity and capability; expand and strengthen alliances and partnerships; advance Department of War (DoW) access, influence, and visibility; and increase burden-sharing with allies and partners. OHDACA-funded Security Cooperation programs include Humanitarian Assistance (HA) and Humanitarian Mine Assistance (HMA). These programs are critically needed to support DoD goals and further U.S. national security and defense objectives. The OHDACA appropriation is also used to fund DoD support to USG Foreign Disaster Relief (FDR) activities.

The HA program is designed to assure friendly nations and allies of our support and provide basic humanitarian aid and services to populations in need. It also enables the CCMDs to assist countries by improving their capacity to prepare for, and respond to crisis response capacity, minimizing the potential for crises to develop or expand further. The DoD, and particularly the CCMDs seek access to shape the military/civilian environment, help avert political and humanitarian crises, promote democratic development and regional stability, build local capacity, generate long-term positive perceptions of DoD by host nation civilian and military institutions, and enable countries to begin conflict recovery.

The HMA program, executed by the CCMDs, provides significant access, training, and readiness-enhancing benefits to the U.S. military forces while contributing to alleviating the highly visible, worldwide problem of explosive remnants of war, which includes landmines, unexploded ordnance, and small arms ammunition. The program allows U.S. military forces to hone critical wartime, civil-military, language, cultural, and foreign internal defense skills.

The FDR program, executed by the CCMDs, provides unique assistance during natural and man-made disasters when interagency support is requested. The DoD's ability to respond rapidly with extensive manpower, transportation, and communication capabilities assists in capability gaps that result in the containment of crises and limits threats to regional stability.

Overall Assessment

The reduction in FY 2026 is largely due to the realignment of security cooperation programs with the President's priorities. Further reductions are related to contract services and travel efficiencies in alignment with Executive Order 14222, "Implementing the President's Department of Government Efficiency Cost Efficiency Initiative."

Office of Inspector General
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, OIG	$544.6	$8.8	$-26.7	$528.4	$4.6	$-26.4	$506.6

Description of Strategic Readiness Financed:
The Department of War (DoW) Office of Inspector General (OIG) promotes the economy, efficiency, and effectiveness of Department of War programs and operations, and the integrity of its workforce, through independent audits, evaluations, investigations, and reviews conducted in accordance with the Inspector General Act. The Office of Inspector General audits, investigates, and evaluates, Department of War programs and operations, and manages the Department of War Hotline, Contractor Disclosure Program, and Whistleblower Protection Program. It also produces quarterly reports on Overseas Contingency Operations, for which the Inspector General has been designated as the Lead Inspector General or Special Inspector General. The Office of Inspector General executes its mission through five oversight and investigative components, the Office of General Counsel, and a range of mission-support functions.

Office of Local Defense Community Cooperation
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, OLDCC	$468.3	$11.5	$-296.8	$183.1	$3.6	$-44.2	$142.6

Description of Strategic Readiness Financed:
The Office of Local Defense Community Cooperation (OLDCC) was codified in the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 and National Defense Authorization Act for Fiscal Year 2022 as a field activity to develop, sustain, and deploy the expertise, experience, and tools required to support the Department of War (DoW) mission. Since its creation in the early 1960s, then as the Office of Economic Adjustment, the component continues to field a unique line capability to assist states and communities – through various programs of grants and technical assistance – to: support the readiness and resiliency of our nation's military installations/facilities and defense industrial base; respond to civilian impacts from Defense activity; and respond to emerging national security threats. This is particularly important for smaller communities that lack resources to otherwise design and construct civilian facilities and infrastructure upon which our installations depend.

The OLDCC furthers the Secretary of War's priorities by supporting efforts to enhance the readiness and lethality of military installations, ranges, and test facilities. These efforts support our defense communities, our warfighters, and their families. In accordance with 10 USC §2391 and numerous defense authorization and appropriation acts, OLDCC executes programs of assistance on behalf of the Secretary to make grants, conclude cooperative agreements, and supplement other Federal programs to work with states and communities.

The OLDCC's roles and activities, including its grant-making and technical support capabilities as well as its brokering of resolutions to issues between communities and the Military Departments, are neither replicated nor duplicated elsewhere in the Department. The OLDCC works to carefully gain the perspective of local communities and/or their states, taking care to not substitute its judgment for civilian leadership. It then evaluates the needs of each project, availability of other federal funding, and existing non-federal organizations and resources prior to awarding funds to ensure activities are sized to need and do not support any activity where other Military Department authority and/or appropriations may be applied, or where other federal funds may be available. Activities within OLDCC's business lines align with and directly support the National Defense Strategy to leverage geographically dispersed assets, other U.S. Government departments and agencies, and DoW's network of allies and partners (50 states, Territories, Commonwealths, and 100+ communities), to capitalize on their comparative advantages. OLDCC's technical and financial assistance leverages the capabilities of our state and local government partners that, in turn, enhances the readiness and lethality of

our installations, ranges, and defense industrial base. These capabilities then enable our civilian partners to deliver at the speed of relevance: safe places for Service members and families; civilian services and infrastructure; and, technology and innovation for the future defense industrial base. Presently, the component is responsible for the oversight of approximately 204 grants awards, representing over $1.6 billion in obligations.

Overall Assessment

Program growth in FY 2027 is due to an increase in grants throughout the United States that support our warfighters and promote readiness and lethality of DoW missions through technical and financial assistance to states, counties, municipalities, regions, and other communities. Major changes across each Fiscal Year are due to OLDCC appropriations being enacted above the President's request. For example, additional appropriations were received in FY 2026 for $130 million for the Defense Community Infrastructure Program (above the $50 million requested in the President's Budget, for a total of $130 million). Reductions in FY 2026 are also due to contract services, travel, and workforce optimization efficiencies in alignment with Executive Orders 14222, "Implementing the President's Department of Government Efficiency Cost Efficiency Initiative," and 14210, "Implementing the President's Department of Government Efficiency Workforce Optimization Initiative."

Office of the Secretary of War
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, OSW	$3,223.7	$72.9	$-838.7	$2,457.8	$39.5	$1,742.3	$4,239.6

Description of Strategic Readiness Financed:
The Office of the Secretary of War (OSW) is responsible for policy development, planning, resource management, and program evaluation. The OSW includes the offices of top civilian defense decision-makers concerning personnel, weapons acquisition, research, intelligence, and fiscal policy, as well as offices the Secretary of War (SECWAR) establishes to assist in carrying out assigned responsibilities. The OSW includes the immediate offices of the SECWAR and Deputy Secretary of War, the Under Secretaries of War, the Principal Staff Assistants (PSAs), the Executive Support Offices, and other core programs.

Overall Assessment
In FY 2027, the Office of the Secretary of War (OSW) strategically reinvested its Operation and Maintenance (O&M) funding, resulting in a net increase of $585.3 million compared to FY 2026. This increase reflects a department-wide effort to prioritize lethality and rebuild the U.S. military, guided by SECDEF's directives to identify efficiencies, restore the warrior ethos, and enhance combat capabilities.

Specifically, non-cyber O&M programs saw an increase of $562.3 million, while Military Information Support Operations O&M increased by $16.3 million. Cyber O&M experienced a slight decrease of $6.7 million.

In alignment with Executive Order 1422 ("Implementing the President’s Department of Government Efficiency Cost Efficiency Imitative"), and with the recommendations of OSW Principal Staff Assistants (PSAs), OSW identified significant cost savings:

- **Advisory and Assistance Services:** $16.1 million was saved through the reduction of contracts for advisory and assistance services.
- **Workforce Optimization:** $11 million was saved through departmental workforce optimization efforts.
- **Terminating Non-Sustainable Programs:** $63 million in non-cyber O&M savings was realized by terminating short-term, unsustainable programs like Anomalous Health Incidents (AHI) and Mergers and Acquisitions (M&A).
- **Eliminating Non-Lethal Programs:** An additional $28.3 million was saved by eliminating other programs deemed to have a limited impact on lethality.

The savings generated through these efficiencies were strategically reinvested in programs directly supporting lethality and military readiness. Key investments include:

- **Artificial Intelligence (AI) Workforce Enhancement:** $120 million was allocated to bolster AI workforce programs and develop a center of excellence training program to improve the AI skills of DoW personnel.
- **Robotics and Autonomous Systems Proving Ground:** $30 million was allocated to the development of a robotics autonomous systems proving ground for testing and validating robotic and autonomous technologies in realistic environments, enhancing OSW's ability to support the warfighter and respond to emerging situations.
- **Defense Industrial Base Resiliency:** $73.5 million was invested to strengthen the resiliency and innovation of the U.S. defense industrial base, supporting the Department's efforts to rebuild the nation's military and reestablish deterrence.

Support for International Sporting Competitions
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, SISC	$0.1	$0.0	$-0.2	$0.0	$0.0	$0.0	$0.0

Description of Strategic Readiness Financed:
The Support for International Sporting Competitions, Defense (SISC) account is funded with a no-year appropriation that provides continuing Department of War (DoW) support to national and international sporting events that are either certified by the Attorney General or supports specific organizations, such as: the Special Olympics, Paralympics, and the United States Olympic and Paralympic Committees (USOPC) through the Paralympic Military Program.

Overall Assessment
The Department is not requesting any appropriated funds in FY 2027 due to the available balances in the account from the DoD Appropriations Acts for FY 2015 and FY 2023. In FY 2026, the Department is supporting 18 Paralympic sporting events sanctioned by the USOPC through the Paralympic Military Program with an estimated cost of $1.7 million. In FY 2027, the Department intends to support approximately 19 sporting events with an estimated cost of $2 million. The International Sporting Competitions planning cycles do not fully align with the DoD budget cycle, which can result in year of execution requests for support.

United States Special Operations Command
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, SOCOM	$9,781.8	$284.4	$-395.7	$9,670.5	$124.8	$1,095.7	$10,891.1

Description of Strategic Readiness Financed:

The United States Special Operations Command (USSOCOM) Fiscal Year (FY) 2027 Operations and Maintenance (O&M) budget request focuses on aligning resources and capabilities to maintain a ready, lethal, and capable force in support of Geographic Combatant Commands (GCC). The request supports improving Special Operations Forces (SOF) warfighting readiness and achieving program balance across the enterprise. In the Countering Weapons of Mass Destruction (CWMD) role, USSOCOM maintains the Department's CWMD campaign, establishes intelligence priorities, monitors global operations, and conducts assessments. In its Counter Violent Extremist Organizations (C-VEO) role, USSOCOM continues to provide a global framework for action and synthesizes stakeholder perspectives into a single, comprehensive military assessment of the Department's global counterterrorism effort to promote situational awareness, inform prioritization efforts to counter global violent extremist networks, and facilitate a coherent and effective campaign to support the Secretary of War and the Chairman of the Joint Chiefs of Staff.

Additionally, the FY 2027 budget request resources SOF activities such as forward-stationed forces, CONUS-stationed contingency forces, select rotational presence directly tied to warfighting, and partnership development. These efforts were supported by aligning and transitioning resources to modernize capabilities to maintain a ready, capable, and deployable force that can identify, disrupt, counter, and defeat a wide spectrum of transnational threats. The USSOCOM remains focused on transregional problem sets, ensuring SOF personnel are true experts in the terrain, languages, and cultures in their respective areas of responsibility.

Overall Assessment
The FY 2027 O&M President's Budget request (discretionary only) is $10.891 billion. The $1.221 billion increase from the FY 2026 O&M enacted budget includes price changes totaling $125 million (1.3%) and programmatic changes totaling $1.096 billion (11.3%). The FY 2027 budget request reflects the Secretary of War's focus on restoring the warrior ethos, rebuilding military capabilities, and enhancing national deterrence while simultaneously balancing readiness to create a strategic, asymmetric advantage for the nation by strengthening our force and their families, bolstering integrated deterrence capabilities, and ensuring our enduring advantage through innovation and modernization.

Program change highlights in the FY 2027 President's Budget request as compared to FY 2026 enacted budget include:
+$399.7 million to classified programs and $107.8 million for Special Access Programs. Additional details are available at a higher classification level.
+$112.5 million for the Special Operations Information Technology Enterprise Contract (SITEC) reflecting the programmatic change that occurred with the realignment of FY 2026 discretionary to mandatory (reconciliation) budget to enhance USSOCOM mission readiness and to fully fund SITEC in FY 2027.
+ $96.5 million for USSOCOM operational deployments to address the heightened operational demand by enhancing core capabilities to bolster the joint combat force's warrior lethality in campaigning and exercise training within the USINDOPACOM, USSOUTHCOM, and USNORTHCOM areas of responsibility by expanding global presence and power projection to defend the Homeland and deter external threats.
+ $90.1 million for Special Operations Forces Intelligence Systems.
+ $55.3 million for Civilian Pay Adjustments in the Theater Forces line item based on FY 2027 projected execution.
+ $50.6 million to establish the SOF Autonomous Warfare Center. Additional details are available at a higher classification level.
+ $42.5 million for Flying Hour Program which is primarily a result of the CV-22 program's prop-rotor gear box issues, a 22% MH-47G U.S. Army working capital fund depot level reparable price increase, and a SOF commercial parts contract increase for the Advanced Threat Warning system.
+ $42.2 million for Sonic Spear to address global integration of the force across multiple levels of command and control while conducting Joint All Domain Operations with select Combatant Commands and Theater Special Operations Commands to execute a campaign of exercises and training events that prepare the Joint Force for a transregional, multi-functional, and multi-domain conflict against near-peer adversaries.
+ $40.8 million for Counter Uncrewed Systems reflecting the programmatic change that occurred with the realignment of FY 2026 discretionary to mandatory (reconciliation) budget to enhance USSOCOM mission readiness.

- $134.2 million to SOF Organic Intelligence, Surveillance and Reconnaissance for the divestment of the Long Endurance Aircraft, the reduction of U28A contractor logistics support of CONUS training and simulator support, and the divestment of Multi-Mission Tactical Unmanned Aerial System increment 2 requirement and sustainment of the MQ-27B.

The FY 2027 budget request focuses on creating a strategic, asymmetric advantage for the nation by continuing to strengthen USSOCOM forces and their families, bolstering integrated deterrence capabilities, and ensuring our enduring advantage through innovation and modernization.

The Joint Staff
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, TJS	$1,281.5	$24.8	$174.4	$1,480.7	$21.9	$1,039.9	$2,542.5

Description of Strategic Readiness Financed:
The Chairman of the Joint Chiefs of Staff (CJCS) is the principal military adviser to the President, National Security Council, and Secretary of War. The Chairman presides over and serves as a member of the Joint Chiefs of Staff. The CJCS relies upon the Joint Staff (TJS) to craft and distribute guidance for combatant forces' unified strategic direction, operations under unified commands, and integration into effective combat forces. On behalf of the Chairman, TJS provides Combatant Commands (CCMDs), the Services, and U.S. warfighters with joint policy, strategy, and doctrine necessary to employ effective joint combat forces in contingencies worldwide.

Goldwater-Nichols legislation (P.L. 99-433) strengthened joint military participation in the management of Department of War resources by providing the CJCS, CCMDs, and the Joint Staff a greater voice in the planning, programming, budgeting, and execution process. While resource management is an internal matter of each Military Department by statute, the Chairman retains responsibility to review major personnel, materiel, and logistics requirements of the Armed Services in relation to strategic and operational plans. Ultimately, the CJCS is the one person tasked with providing the President and Secretary of War strategic planning, direction, and advice on requirements, programs, and budget priorities identified by the CCMDs and Services.

The major program areas that make up the Joint Staff's Operation and Maintenance funding for FY 2027 enable the Joint Staff and CCMD staffs to provide advice and recommendations to the CJCS through information sharing, joint doctrine and education development, exercises, and detailed studies and analyses. The major programs are: (1) Chief Digital and Artificial Intelligence Office, (2) Joint Training, Exercise, and Evaluation Program (JTEEP), including direct support to JTEEP Facility Operations, (3) Joint Staff Analytical Support, (4) Cyber, (5) Combatant Commander Initiative Fund, (6) Joint Force Development and Design, (7) Management Headquarters, (8) the Pentagon Reservation Maintenance Revolving Fund, (9) Facilities Sustainment, Restoration & Modernization, (10) Facility Operations, (11) National Defense University, and (12) Joint Interagency Task Force 401 (JIATF-401) Counter Small Unmanned Aerial Systems (CsUAS).

In FY 2017, the National Defense University (NDU) realigned under the Joint Staff as a CJCS Controlled Activity. As such, CJCS has been delegated the authority from the Secretary of War for direct management control and responsibility over the programming and execution of NDU's resources. NDU's description of operations financed is provided following the Joint Staff's operations description.

In FY 2018, the Combatant Commander Exercise Engagement and Training Transformation (CE2T2) Program realigned funding under the Joint Staff as a CJCS Program. As such, CJCS has been delegated the authority from the Secretary of War for direct management control and responsibility over the programming and execution of CE2T2 resources. CE2T2's description of operations financed is included in the Joint Staff's operations description. The program name changed to JTEEP as the joint exercise program was reshaped.

In FY 2027, the baseline for JIATF-401 will be established to lead the Department of War C-sUAS efforts and develop capabilities to address the global proliferation of sUAS, both on and off the battlefield.

Overall Assessment

FY 2027 Increases are driven primarily by the establishment of the JIATF-401 to lead the Department of War Counter-small Unmanned Aircraft Systems efforts, significant investments in Joint Readiness, Joint Staff Digital modernization, and increased investments in the National Defense University's modernization efforts and the establishment of the National Intelligence College following transfer of responsibilities formerly aligned to the Office of the Director of National Intelligence's National Intelligence University.

FY 2027 Decreases across all line items continue to promote efficiencies and advance the policies of the administration in alignment with Executive Order 14222, “Implementing the President’s Department of Government Efficiency Cost Efficiency Initiative.”

Washington Headquarters Services
($ in Millions)

Appropriation Summary	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
O&M, WHS	$473.8	$-9.5	$-54.2	$410.1	$7.0	$119.5	$536.5

Description of Strategic Readiness Financed:

The Washington Headquarters Services (WHS), a critical Department of War (DoW) field activity, provides essential enterprise-wide administrative, operational, and facility management services that directly enable the Office of the Secretary of War(OSW), the Joint Staff, and other Pentagon-based DoW components to execute their national security missions effectively and efficiently across the full spectrum of military operations.

The WHS serves as the indispensable backbone of DoW headquarters operations, providing the foundational infrastructure and services without which senior DoW leadership could not function. As the manager of the Pentagon—the command center for Department's global military operations—WHS directly enables strategic initiatives such as the Nuclear Command, Control, and Communications (NC3) functions housed within the facility, ensuring uninterrupted connectivity between national leadership and nuclear forces. This NC3 support role positions WHS as a vital link in the nation's strategic deterrence posture, making its mission essential to national security at the highest level.

Through its comprehensive portfolio of facility management, security, personnel, information technology, contracting, and financial services, WHS creates the secure, efficient, and resilient operational environment necessary for strategic-level decision-making that drives all DoW operations worldwide. WHS provides direct, daily support to the Secretary of War, Deputy Secretary of War, Service Secretaries, and other senior defense officials, enabling their leadership functions and policy implementation across the Department. The Pentagon Reservation—housing over 25,000 military and civilian personnel including the Department's most senior leaders—relies entirely on WHS for its day-to-day operations, security posture, and emergency response capabilities.

The WHS's management of the Raven Rock Mountain Complex (RRMC)—a critical alternate command site—further underscores its strategic importance to national defense. This hardened facility ensures continuity of operations for DoW's most essential command functions during crises, providing resilient backup capabilities for the Department's leadership. The RRMC mission directly supports the National Military Command System's ability to maintain command and control under the most challenging circumstances, including scenarios involving attacks on the Pentagon itself.

PBA-19 Summary

The WHS implements the Secretary of War's strategic priorities by ensuring the Pentagon's physical and operational infrastructure directly supports the Department's highest-level decision-making processes. In today's complex security environment, where senior leadership must respond rapidly to emerging threats across multiple domains, WHS's services are not merely administrative but mission-critical enablers of command and control. The agency's management of the Pentagon Force Protection Agency, information technology infrastructure, personnel security, and continuity of operations planning directly contributes to the Department's ability to maintain uninterrupted command functions during crises and conflicts.

WHS implemented significant efficiency measures in FY 2027 in alignment with Administration initiatives and strategically balanced resources to preserve the core capabilities that directly support DoW's most critical command functions, including Strategic Readiness no-fail missions. The careful optimization of service delivery models and targeted investments in facility security, information technology, and emergency management represent a deliberate approach that enhances Pentagon resilience while demonstrating fiscal responsibility. These efficiencies have been implemented with precision to ensure no degradation in the headquarters support services that underpin DoW's global command and control capabilities.

The WHS is a fundamental operation that enables direct contribution to DoW's strategic readiness and decision advantage. In an era of strategic competition where command and control functions face sophisticated multi-domain threats, WHS provides the secure, resilient infrastructure that allows senior leadership to exercise uninterrupted command authority across both primary and alternate command facilities. WHS delivers the operational foundation that empowers decisive leadership across all domains of warfare, ensuring our most senior defense officials can effectively direct the nation's military forces regardless of circumstances or threats.

Overall Assessment

The WHS mission directly enables DoW operational readiness, sustains its activities, modernization of infrastructure and systems, and optimization of force structure. WHS' focus on providing essential support services, managing resources effectively, and ensuring a secure and functional environment in the NCR is vital for the overall success of the DoW.

The WHS FY 2027 budget request represents a carefully calibrated approach to meeting the Department's headquarters management requirements while supporting broader strategic readiness objectives and implementing Administration efficiency initiatives. The request prioritizes investments in critical infrastructure protection, secure communications, and emergency management capabilities that directly enable the Secretary of War, Service Secretaries, and other senior leaders to execute their command responsibilities without interruption.

The primary changes between the FY 2026 and FY 2027 budget requests balance these critical responsibilities with the need to achieve them efficiently while providing accurate and transparent information.

I. Description of Operations Financed:
The Department of War Civil Military Programs are managed by the Office of the Assistant Secretary of War for Manpower and Reserve Affairs in the Office of the Under Secretary of War for Personnel and Readiness, and encompass outreach and service programs identified as follows:

- National Guard Youth Challenge Program
- Innovative Readiness Training Program
- DoW STARBASE Program

National Guard Youth Challenge Program: (Title 32 U.S.C. 509) – The National Guard Youth Challenge Program is a youth development and outreach initiative managed by the Office of the Assistant Secretary of War for Manpower and Reserve Affairs and administered by the National Guard Bureau through cooperative agreements with participating states. The program provides structured, military-based training and supervised work experience to help at-risk youth improve life skills, academic achievement, and employment potential.

The program spans 18 months and includes a minimum 22½-week residential phase—beginning with a two-week pre-challenge period—followed by a 12-month post-residential phase. The program has demonstrated measurable success: participants show higher employment rates, increased earnings, and greater likelihood of earning a high school diploma, GED, or college credits compared to their peers.

Federal funding may not exceed 75 percent of total operating costs, ensuring shared investment with states. The program currently operates at 32 Youth Challenge and 7 Job Challenge locations across states and territories, including the District of Columbia and Puerto Rico.

Core program components include:

- Helping participants earn a high school diploma or equivalent
- Leadership development, teamwork, and community service
- At select locations, a Job Challenge Phase offering occupational skills training, credentialing, individualized academic and career counseling, leadership development, and employer engagement

Innovative Readiness Training Program: (Title 10 U.S.C. 2012) – The Innovative Readiness Training Program builds mutually beneficial partnerships between American communities and the Department of War. The program provides hands-on, mission-essential training for Service members while addressing public and civil-society needs. Each year, approximately 6,000 to 7,000 joint Service members gain experience in complex interagency, joint, and total-force environments—conditions that are rarely encountered outside national emergencies and often only simulated in other training events.

Innovative Readiness Training missions typically include horizontal and vertical construction, infrastructure support, mobile medical and dental clinics, optometry and veterinary services, and cyber vulnerability assessments. These missions strengthen readiness, enhance community resilience, and reinforce the connection between the military and the public.

Examples of Fiscal Year 2025 missions include:

- **Medical Mission – Operation Healthy Ellwood:** From July 20 to August 3, more than 160 joint Service members from four branches and 33 units provided no-cost medical, dental, optometry, veterinary, and behavioral health services in Ellwood City, Pennsylvania. The mission addressed a critical healthcare gap created by the 2019 closure of the Ellwood City Medical Center. The clinic, located at Lincoln Junior Senior High School, served over 2,400 patients during its 10-day operation. Service members completed 869 mission-essential tasks and logged 2,031 training hours, while strengthening civil-military relationships.
- **Civil Engineering Mission – Operation Build Eyak:** From April 1 to July 12, the Army National Guard, Marine Corps Reserve, and Air Force Reserve partnered with the Native Village of Eyak in Cordova, Alaska, to support maritime infrastructure development in an area still affected by the 1989 Exxon Valdez oil spill. A total of 185 Service members contributed expertise in horizontal construction, civil engineering planning, and equipment maintenance. Despite challenging terrain and environmental conditions, the team successfully cleared five acres of land to support construction of a rapid oil-spill response facility. The mission provided an estimated $1 million in no-cost construction services and delivered 16,470 hours of hands-on training for military engineers.
- **Cybersecurity Mission – Cyber Tatanka:** From June 1 to June 15, Cyber Tatanka brought together National Guard cyber teams, international partners, and interagency collaborators to simulate advanced cyber threats and strengthen collective defense capabilities. More than 150 participants trained through real-time collaboration and scenario-based exercises to enhance readiness for emerging global cyber challenges.
- **Civil Affairs Mission – Operation Outreach Nueces:** From July 13 to July 25, the Marine Corps Reserve's 3rd Civil Affairs Group partnered with the Nueces County Commissioner's Office and Texas A&M's Colonia Program to conduct surveys in underserved colonia communities along the Texas–Mexico border. Marines completed survey work in 23 of 24 colonias, supporting state grant submissions and improving community planning. The mission provided more than 1,030 hours of civil affairs training, including public engagement, data processing, and analysis.

Department of War STARBASE Program (Title 10 U.S.C. 2193b) – The STARBASE Program is a youth outreach initiative designed to strengthen students' knowledge and skills in science, technology, engineering, and mathematics. STARBASE locations are situated on or near military installations, giving students exposure to military personnel and facilities and helping bridge the civil-military divide. The program primarily

serves schools with high proportions of students eligible for Title I services and uses a hands-on curriculum aligned with or exceeding national education standards. The Department is not requesting any funding for the STARBASE Program for FY 2027.

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $3,915

1) Innovative Readiness Training $3,915
Increase funds critical units and individual training that ensures forces are prepared to meet operational demands across engineering, medical, cyber, and civil affairs mission areas.
(FY 2026 Baseline: $16,381 thousand)

9. Program Decreases ..... $-147,093

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases ..... $-143,363

1) National Guard Youth Challenge ..... $-89,250

2) STARBASE ..... $-54,113

c) Program Decreases in FY 2027 ..... $-3,730

1) National Guard Youth Challenge ..... $-3,730
Decrease reflects lower projected cadet enrollment and program participation in states that must provide matching funds to operate the program.
(FY 2026 Baseline: $110,256 thousand)

FY 2027 Budget Request $118,488

IV. Performance Criteria and Evaluation Summary:

The Office of the Assistant Secretary of War for Manpower and Reserve Affairs provides policy oversight and budget control for the Department of War's Civil-Military Programs by establishing policies, directives, and funding controls. The National Guard Bureau administers the program on behalf of the Secretary of War through cooperative agreements with participating states. Program performance and compliance are evaluated by the Secretary of War, the Deputy Secretary of War, the Office of the Under Secretary of War for Personnel and Readiness, and the Office of the Assistant Secretary of War for Manpower and Reserve Affairs.

There are currently 39 programs operating in 24 states, the District of Columbia, and Puerto Rico. This includes 32 Youth Challenge (YC) Programs and 7 Job Challenge (JC) Programs.

The performance measure reflects the number of students expected to graduate from the Challenge academies each fiscal year.
Fiscal Year 2025 Total: 9,130
Fiscal Year 2026 Total: 8,505
Fiscal Year 2027 Total: 8,375

Fiscal Year 2027 Budget Estimates

United States Cyber Command

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 1: Operating Forces/Cyberspace Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
USCYBERCOM	1,699,040	36,282	-111,956	1,623,366	27,532	533,209	2,184,107

I. Description of Operations Financed:
Consistent with the FY 2022 National Defense Authorization Act, the USCYBERCOM exercises direct responsibility for its budget under the oversight of the Department of War (DOW) and Principal Cyber Advisor. Beginning in FY 2024, resources supporting the Cyber Mission Force were consolidated from the Military Departments and the Defense Information Systems Agency (DISA) into the USCYBERCOM's Defense-Wide appropriation. This consolidation strengthens unity of effort, improves execution oversight, and ensures resources are aligned to operational requirements and statutory responsibilities.

FY 2027 President's Budget Request: $2,184,107 thousand
The FY 2027 request of $2,184,107 thousand, an increase of $560,741 thousand above the FY 2026 enacted level. This funding finances the full spectrum of operations required for the USCYBERCOM to plan, direct, and conduct global cyberspace operations. The requested supports 1,955 civilian Full-Time Equivalents (FTEs) and provides the operational foundation necessary to defend national interests in and through cyberspace.

The FY 2027 growth reflects targeted investments in four strategic priority areas essential to sustaining cyber readiness and maintaining operational advantage:

- Sharpening the Force: Resources enhance readiness, resilience, and mission effectiveness across the CMF and headquarters workforce through training, operational support, and continuous mission sustainment.
- Strengthening Warfighting Advantage: Funding expands capabilities that provide operational edge in competition, crisis, and conflict, ensuring the Joint Force maintains freedom of action in cyberspace.
- Building Decisive Advantage: Investments supports execution of statutory authorities and operational responsibilities that secure national-level objectives and enable persistent engagement against adversary cyber activity.
- Targeted Growth: Funding prioritizes the maturation of the Cyber National Mission Force (CNMF) and the DoW Cyber Defense Command (DCDC), enabling both sub-unified commands to meet increasing operational demand and readiness requirements.

This budget supports the USCYBERCOM's four primary missions: 1) Defending the DoW Information Network (DoWIN); 2) Defending the homeland from significant cyber threats; 3) Supporting the Joint Force operations worldwide; and 4) Strengthening partnerships with allies, interagency partners and the private sector.

Resources will be applied to the following priority areas

- Critical Manning: Funds civilian and contractor personnel essential for operational planning, mission execution, and 24/7 cyber defense and response.

- Operational Readiness: Supports temporary duty (TDY) travel for global operations, training, and exercises; sustains mission systems and infrastructure; and ensures continuous availability of operational platforms and command-and-control capabilities.
- Mission Execution: Conducts full-spectrum cyberspace operations to deter adversaries, assure Joint Force mission success, and maintain freedom of action in cyberspace while denying it to hostile actors.

All activities are aligned with the DoW Cyber Strategy and directly support the Department's ability to counter increasingly sophisticated adversary threats, maintains operational advantage, and ensures the United States and its allies retain a decisive edge in cyberspace

The FY 2026 spend plan amount for Operations and Maintenance includes $1,623,366 thousand of discretionary and $348,466 thousand of mandatory (reconciliation) for a total of $1,971,832 thousand.

II. Force Structure Summary:

The USCYBERCOM executes its mission through four Service Cyber Components—Army Cyber Command (ARCYBER), Fleet Cyber Command/Tenth Fleet (FLTCYBER), Air Force Cyber Command/16th Air Force (AFCYBER), and Marine Forces Cyberspace Command (MARFORCYBER)—which generate, train, and equip cyberspace forces to ensure the Joint Force has access to trained and ready cyber operators, analysts, and mission support personnel. The USCYBERCOM maintains operational control of the Cyber Mission Teams through six subordinate headquarters: four Joint Force Headquarters–Cyber (JFHQ-C) aligned to the Services and geographic Combatant Commands, and two sub-unified commands—the Cyber National Mission Force (CNMF) and the Department of War Cyber Defense Command (DCDC). Together, these organizations execute the USCYBERCOM's mission across four primary lines of effort: (1) defending the Department of War Information Network (DoWIN); (2) providing cyberspace support to Combatant Commanders worldwide; (3) strengthening the Nation's ability to withstand and respond to significant cyber incidents; and (4) advancing Department of War missions in cyberspace through collaboration with allies and partners. This force structure enables the USCYBERCOM to conduct persistent, globally integrated cyberspace operations and ensures the Command can meet rising operational demands in a contested and rapidly evolving domain. The following represents the breakout of civilian Full-Time Equivalents (FTEs) for the Cyber Mission Force and associated forces, with the FY 2027 FTE increase reflecting targeted workforce growth to meet expanding operational requirements, strengthen DoWIN defense, and enhance the Command's ability to conduct persistent engagement against sophisticated adversaries.

Civilian FTEs	FY2025 Actuals	FY2026 Enacted	FY2027 Request
USCYBERCOM Headquarters	344	407	400
CNMF	39	46	72
DCDC	152	152	166
Air Force	413	423	480
Army	373	364	371
Navy	157	136	125
Marines	280	310	328
Total	1,758	1,838	1,942

IV. Performance Criteria and Evaluation Summary:

FY 2025 PROIR YEAR ASSESMENT
In FY 2025, the USCYBERCOM successfully absorbed consolidated Cyber Mission Force (CMF) resources and maintained required readiness levels across all mission areas. CMF teams met certification and employment standards, enabling persistent engagement and support to Combatant Commanders. Headquarters' functions matured to support unified budget execution and operational oversight. Defensive operations protected the DoWIN from significant malicious cyber activity, while offensive operations disrupted adversary campaigns targeting U.S. interests. FY 2025 performance demonstrated the Command's ability to sustain global operations during a major organizational transition.

- Maintain baseline readiness of CMF teams consolidated under the USCYBERCOM beginning in FY 2024.
- Sustain operational availability of mission systems, infrastructure, and tools supporting defensive and offensive cyberspace operations.
- Execute global cyberspace operations in support of Combatant Commanders and national-level requirements.
- Strengthen headquarters governance, planning, and integration functions following consolidation of CMF resources from the Military Departments and Defense Information Systems Agency.
- Maintain 24/7 defense of the DoW Information Network (DoWIN) and support national-level cyber incident response.

FY 2026 CURRENT YEAR ASSESMENT
In FY 2026, the USCYBERCOM advances its ability to generate and employ cyberspace forces by improving training throughput, expanding defensive capabilities, and maturing enterprise-level command and control. The Command strengthens its role as the Joint Force's cyberspace readiness authority and implements governance structures required for service-like responsibilities. Defensive operations mitigate multiple high-impact threats to the DoWIN, while offensive operations support Combatant Command priorities. Foundational AI governance and infrastructure planning position the Command for accelerated capability development in FY 2027.

- Improve readiness and availability of CMF teams through enhanced training, mission rehearsal, and operational support.
- Expand defensive cyberspace operations capacity to counter increasingly sophisticated adversary activity.
- Strengthen enterprise-wide command and control, situational awareness, and operational integration across the Joint Force.
- Mature service-like responsibilities for talent management, capability development, and readiness oversight.
- Implement foundational artificial intelligence (AI) governance and begin infrastructure planning to support future AI/ML integration.

FY 2027 PLANS AND OBJECTIVE
The FY 2027 program will reflect targeted growth designed to mature the USCYBERCOM workforce and expand the Command's ability to generate and employ advanced cyberspace capabilities. Investments in AI/ML, JCWA modernization, and workforce expansion will strengthen the Command's capacity to deliver offensive cyberspace operations, counter adversary activity, and support Joint Force requirements. Defensive operations will achieve greater automation and visibility across the DoWIN, while offensive operations will deliver measurable effects against

adversary campaigns. The USCYBERCOM will advance its service-like responsibilities by enhancing readiness oversight, capability development processes, and talent management frameworks, ensuring the Command can meet rising operational demands in an increasingly contested domain.

- Expand workforce capacity and technical expertise to meet rising operational demand across Cyber National Mission Force (CNMF), DoW Cyber Defense Command (DCDC), and CMF teams.
- Increase operational effectiveness through targeted investments in Artificial Intelligence and Machine Learning (AI/ML), data integration, and Joint Cyber Warfighting Architecture (JCWA), modernization.
- Strengthen the Command's ability to deliver cyberspace effects in competition, crisis, and conflict.
- Enhance global defensive operations through improved visibility, automated threat detection, and advanced analytics.
- Mature service-like responsibilities for force readiness, capability development, and talent management.
- Sustain persistent engagement against priority adversaries and defend the homeland from significant cyber threats.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**1,758**	**1,838**	**1,942**	**80**	**104**

Civilian FTEs (Total)	**1,758**	**1,838**	**1,942**	**80**	**104**
U.S. Direct Hire	1,758	1,838	1,942	80	104
Total Direct Hire	**1,758**	**1,838**	**1,942**	**80**	**104**
Average Annual Civilian Salary ($ in thousands)	**196.3**	**193.4**	**219.3**	**-2.9**	**25.9**
Contractor FTEs (Total)	**1,903**	**1,503**	**1,709**	**-400**	**206**

Personnel Summary Explanations:

12D - Cyberspace Operations

Cyber National Mission Force (CNMF): +26 Civilian FTEs
The increase supports mission growth in homeland defense and counter-cartel operations. As a sub-unified command with a persistently high operational tempo, CNMF requires additional civilian personnel to sustain continuous operations, expand analytic capacity, and meet increased national-level tasking. Growth reflects Departmental prioritization of CNMF's role in defending the Nation against significant cyber threats.

DoW Cyber Defense Command (DCDC): +14 Civilian FTEs
Additional FTEs support expanded responsibilities for defense of the Department of War Information Network (DoWIN). As a sub-unified command with global defensive cyberspace operations responsibilities, DCDC requires increased civilian workforce capacity to execute continuous monitoring, manage enterprise-wide defensive operations, and meet the expanded scope of DoWIN protection.

Air Force Component: +57 Civilian FTEs
The increase supports mission growth in Counter-Critical Infrastructure and Key Resources operations. Civilian personnel provide continuity and technical expertise essential to sustaining training ranges, maintaining operational capabilities, and supporting specialized mission areas within the Air Force cyber component

Cyber Mission Force (CMF) Teams: +14 Civilian FTEs

Additional FTEs across CMF teams enhance enterprise-wide readiness and mission effectiveness. These positions provide specialized technical skills directly aligned to operational requirements, increasing mission throughput and strengthening the CMF's ability to meet rising operational demand.

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 1: Operating Forces/Management and Operational Headquarters

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Cyberspace Operations	1,384,475	30,858	-104,220	1,311,113	22,447	546,821	1,880,381

I. Description of Operations Financed:
The U.S. Cyber Command (USCYBERCOM) directs, synchronizes, and coordinates cyberspace operations in defense of national interests. Funding supports the Command's responsibility to plan and execute cyberspace operations, integrate global cyber activities, and collaborate with domestic and international partners to protect the Nation and advance Department of War (DoW) objectives.

The USCYBERCOM delivers operational advantage to the DoW by defending the Department of War Information Network (DoWIN), countering malicious cyberspace activity, and providing cyberspace options to Combatant Commanders and the Joint Force. The Command conducts continuous operations to disrupt foreign military, intelligence, and criminal cyber actors who threaten the United States, its allies, and its critical infrastructure. These activities include countering adversaries who exploit cyberspace for intelligence collection, intellectual property theft, coercive influence, disruption of democratic processes, and support to transnational illicit networks.

The USCYBERCOM directs cyberspace operations through subordinate commands, including the Cyber National Mission Force Headquarters (CNMF-HQ), the DoW Cyber Defense Command (DCDC), Joint Task Forces, and other Joint Force Headquarters elements. The commanders of Army Cyber Command (ARCYBER), Marine Corps Forces Cyberspace Command (MARFORCYBER), Fleet Cyber Command/Tenth Fleet (FLEETCYBER), Air Force Cyber Command/16th Air Force (AFCYBER), and Coast Guard Cyber Command lead their respective Service cyber components within the USCYBERCOM enterprise. These integrated forces provide the command-and-control, operational planning, intelligence integration, and mission execution capabilities required to maintain freedom of action in cyberspace and deny adversaries the ability to exploit the domain.

USCYBERCOM Cyber Operations Funded Programs and Organizations:
Civilian Pay: The USCYBERCOM Cyberspace Operations funding supports ten Headquarters Directorates and two sub-unified commands, including salaries and benefits for civilian Full-Time Equivalents. Resources enable the Command to sustain a highly skilled civilian workforce with the technical and leadership expertise required to support operational planning, mission integration, intelligence analysis, and enterprise management functions. Funding ensures the USCYBERCOM can recruit, develop, and retain the specialized civilian talent necessary to execute headquarters responsibilities and maintain operational readiness across the Command.

Cyber National Mission Force Headquarters (CNMF-HQ): CNMF-HQ is a sub-unified command established to counter malicious cyberspace activity targeting U.S. critical infrastructure and national-level interests. CNMF-HQ conducts persistent cyberspace operations against the most significant foreign adversary threats and, when directed, denies, disrupts, or degrades hostile cyber activity targeting the Nation. CNMF-HQ is the only U.S. organization that deploys intelligence-driven Defend Forward teams worldwide to identify and mitigate foreign cyber threats before they

reach U.S. networks. Funding supports the headquarters functions required to plan, coordinate, and execute these operations in alignment with national-level priorities.

DoW Cyber Defense Command (DCDC): DCDC exercises command and control of the global security and defense of the DoWIN. DCDC synchronizes protection activities across DoW components to ensure power projection and freedom of action across all DoW network enclaves and warfighting domains. Its mission includes the continuous protection of the DoWIN, management of global defensive cyber requirements, and assessment of DoWIN readiness in support of Combatant Command operational needs. DCDC provides unity of command between the USCYBERCOM and subordinate headquarters and unity of effort across all DoW components, ensuring the availability, resilience, and security of the DoWIN for Joint missions, including effects delivered in and through cyberspace.

Cyber Mission Force (CMF): Cyber Mission Force is the USCYBERCOM's operational arm responsible for executing the Command's mission to direct, synchronize, and conduct cyberspace operations in defense of U.S. national interests. The CMF consists of 147 teams organized into Cyber Protection Teams, Combat Mission Teams, Combat Support Teams, National Mission Teams, and National Support Teams. These teams conduct defensive and offensive cyberspace operations, provide direct support to Combatant Commanders, and execute national-level missions to counter foreign cyber threats. CMF personnel deliver the operational capabilities required to maintain freedom of action in cyberspace and deny adversaries the ability to exploit the domain.

Joint Force Headquarters-Cyberspace (JFHQ-C): The JFHQ-C analyzes, plans, and executes cyberspace operations in support of Combatant Commanders. JFHQ-C provides operational-level command-and-control and integrates cyberspace capabilities into actionable plans and orders. Through its subordinate Cyberspace Operations–Integrated Planning Elements, JFHQ-C delivers tactical expertise, develops courses of action, and ensures cyberspace operations are synchronized with broader Joint Force activities.

Cyberspace Operations-Integrated Planning Elements (CO-IPEs): The CO-IPEs are forward-deployed planning cells embedded within Combatant Command staffs. CO-IPEs provide direct reach-back to the USCYBERCOM to ensure authorities, synchronization, and deconfliction are in place for cyberspace operations. They support planning for DoWIN operations, Defensive Cyberspace Operations (DCO), and Offensive Cyberspace Operations (OCO) in coordination with their respective JFHQ-C. CO-IPEs ensure cyberspace operations are fully integrated into Combatant Command operational design and execution.

Joint Force Trainer (JFT): The JFT is the DoW's primary enterprise for building cyber readiness. Joint Force Trainer prepares the cyberspace workforce through training, exercises, mission rehearsals, and experimentation. It develops and assesses advanced Tactics, Techniques, and Procedures for complex, multi-network missions to ensure interoperability and readiness in support of the National Military Strategy and National Defense Strategic Guidance.

As the JFT, the USCYBERCOM manages a Service-like training program that ensures Joint Forces are trained, certified, and ready to meet Combatant Command requirements. Certifications awarded through this program are mandatory for operators to work on designated DoW infrastructure. Each year, JFT delivers advanced training to 2,000–4,000 personnel across multiple cyber work roles, including Operators and Exploitation Analysts. Key courses – such as the Future Operator Readiness Growth and Enrichment (FORGE), Holistic Analytic Mastery and

Refinement (HAMR), and the Computer Network Operations Qualification Course (CNOQC) – directly support the readiness and operational effectiveness of the Cyber Mission Force.

Joint Cyber Warfighting Architecture (JCWA) Integration and Innovation: JCWA Integration and Innovation supports the USCYBERCOM's enterprise platform enabling the Cyber Mission Force to conduct the full spectrum of cyberspace operations. Funding provides foundational software, systems engineering, enterprise architecture, software development, SAP/STO support, test and evaluation, and external integration. It also supports capability innovation, artificial intelligence and machine learning initiatives, and collaboration with federal laboratories. The JCWA consists of six elements: Cyber Weapons and Tools, Data and Sensors, Robust Infrastructure, Cloud and Unified Platform, Persistent Cyber Training Environment (PCTE), and Cyber Command and Control (C2).

Artificial Intelligence (AI) Integration: AI investment accelerates the Command's ability to counter sophisticated adversary techniques through AI/ML-enabled automation and analytics. FY 2026 funding establishes foundational AI governance, initiates a partnership with the National Security Agency, and begins infrastructure planning and buildout. These efforts enable FY 2027 deployment of infrastructure capable of hosting classified and unclassified AI development environments ("AI sandboxes") and advanced frontier-model capabilities. This investment supports automated threat detection, enhanced cybersecurity monitoring, and reduced manual analytic burden across the JCWA ecosystem.

Cyber Weapons and Tools: Cyber Weapons and Tools provide dual-use software and hardware capabilities used by the Cyber Mission Force on the Joint Common Access Platform to conduct offensive cyberspace operations. Funding supports development, testing, evaluation, validation, and sustainment of operational tools and platforms, including the Joint Development Environment, Personal Security Product testing, independent testing, signature diversity, and capability repositories. These capabilities enable the Cyber Mission Force to conduct the full spectrum of operations and integrate offensive cyber capabilities into Joint operations.

Data and Sensors: The Data and Sensors portfolio equips the Cyber Mission Force with capabilities required for global defensive operations, including Hunt Forward Operations, Enhanced Sensing and Mitigation, deployable kits – such as the Deployable Mission Support System and Joint Cyber Hunting Kit – and critical data feeds and analytics. These capabilities detect and defend against malicious activity across the DoWIN and partner networks.

- **Deployable Hunt and Mitigation:** Cyber Protection Teams employ deployable kits that combine hunt and mitigation tools with robust computing and storage to rapidly engage threats on forward-deployed networks. These capabilities are essential to the U.S. Indo-Pacific Command Pacific Deterrence Initiative (PDI), reducing vulnerabilities and strengthening defensive posture.
- **Intelligence and Analytics**: Funding supports access to commercial threat intelligence, software licensing, and analytic tools required to counter Malicious Cyber Activity and Malign Influence Activity. Data feeds provide real-time warnings and enable rapid mitigations across DoW enclaves.
- **Strategic Mandate:** These efforts are mandated by Section 1815 of the FY 2008 National Defense Authorization Act (Public Law 110-181) due to their essential role in homeland defense, domestic emergency response, and military support to civil authorities.

Robust Infrastructure (RI): Robust Infrastructure supports the Joint Cyber Force by providing armories, platforms, and infrastructure required to launch cyber capabilities, payloads, or analytics on classified and unclassified platforms. This includes the Joint Common Access Platform, which provides a protected, orchestrated environment and common firing platform for cyberspace operations. As part of USINDOPACOM's PDI, this portfolio integrates alternate access tools into the JCWA and includes support for Operations in the Information Environment.

Cloud and Unified Platform: Cloud and Unified Platform provide interconnected, interoperable infrastructure for integrated planning and execution of cyberspace operations. Cloud and Unified Platform delivers a persistently owned and maintained environment with full lifecycle support, enabling data storage, processing, and analytics across JCWA components. It provides programming interfaces, standards, and services to share data across tactical, regional, and enterprise echelons.

Cyber Training Environment the Persistent Cyber Training Environment (PCTE): The PCTE is the DoW's official training platform for the Cyber Mission Force. PCTE provides a shared, virtual environment that emulates complex, realistic networks, enabling individuals and teams to conduct full-spectrum training, mission rehearsals, and large-scale exercises. By standardizing training and enabling content reuse across the Joint Force, PCTE maximizes readiness and ensures cyber operators are prepared to execute real-world missions.

The PCTE program achieved Milestone B on 6 December 2019 and received approval to transition from a Major Capability Acquisition program to the Software Acquisition Pathway Execution Phase with a signed Acquisition Decision Memorandum dated 2 May 2025 from the Army Acquisition Executive. An updated Cyber Capability Integration and Development System validated Information System – Capability Development Document was approved on 8 January 2024. Through continuous integration and continuous delivery, PCTE has met the critical requirement for a standardized CMF training capability since the release of PCTE Version 2 in FY 2020 and continues to evolve through rapid prototyping and iterative software releases.

Cyber Command and Control (C2): Cyber C2 provides near real-time tracking, processing, and dissemination of cyberspace-related information, enabling cross-domain collaboration with DoW, coalition, and interagency partners. Cyber C2 delivers visualization and decision-support tools that enable planning, directing, monitoring, assessing, and managing cyberspace operations. These capabilities also support Nuclear Command, Control, and Communications by ensuring timely situational awareness and operational integration across the cyber domain.

Missile Defense and Defeat Enhancement (MDDE): The MDDE program provides advanced non-kinetic capabilities that directly support the USCYBERCOM's operational requirements for missile defense, missile defeat, and broader strategic deterrence missions. MDDE resources enable the development, integration, and sustainment of cyberspace capabilities that detect, disrupt, and degrade adversary missile-related systems, addressing validated operational requirements and closing capability gaps identified through real-world mission demand and technical assessments.

Additional program details are classified and provided in the Information Technology Cyberspace Congressional Justification Book.

The FY 2026 spend plan amount for Operations and Maintenance, (O&M) includes $1,311,113 thousand of discretionary and $ 316,701 thousand of mandatory (reconciliation) for a total of $1,627,814 thousand.

II. Force Structure Summary:

This includes the USCYBERCOM personnel at Service Components including Army Cyber Command (ARCYBER), Fleet Cyber Command/Tenth Fleet (FLTCYBER), Air Force Cyber Command/16th Air Force (AFCYBER), Marine Forces Cyberspace Command (MARFORCYBER), Cyber National Mission Force (CNMF), and the DoW Cyber Defense Command (DCDC) to accomplish the mission objectives through four lines of effort: (1) defend the DoWIN; (2) provide support to combatant commanders for execution of their missions around the world; (3) strengthen our nation's ability to withstand and respond to cyberattacks; and (4) advance DoW missions in cyberspace through collaboration with allies and partners. The following represents the breakout of civilian FTEs for the Cyber Mission Force and associated forces

Civilian FTEs	FY2025 Actuals	FY2026 Enacted	FY2027 Request
CNMF	39	46	72
DCDC	152	152	166
Air Force	413	423	480
Army	373	364	371
Navy	157	136	125
Marines	280	310	328
Total	1,414	1,431	1,542

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action

FY 2026 President's Budget Request (Amended, if applicable) $1,300,384

1. Congressional Adjustments $10,729

    a) Distributed Adjustments $18,500

        1) CYBEROM requested transfer from Proc. DW line 71 ..... $8,500

        2) Program Increase - Internet Operations Management $10,000

    b) Undistributed Adjustments $0

    c) Adjustments to Meet Congressional Intent $0

    d) General Provisions ..... $-7,771

        1) Sec 8136 Savings from Efficiencies ..... $-7,771

FY 2026 Appropriated Amount $1,311,113

2. Supplemental Appropriations $0

    a) Supplemental Funding $0

3. Fact-of-Life Changes $0

    a) Functional Transfers $0

    b) Technical Adjustments $0

    c) Emergent Requirements $0

FY 2026 Baseline Funding $1,311,113

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $1,311,113

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $1,311,113

6. Price Change $22,447

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $580,374

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $580,374

1) Cyber Weapons Tools (CWT) $169,657

Increase reflects the sustainment and enhancement of payload development used against a variety of cyber targets. Funding maintains Offensive Cyberspace Operations common frameworks, operational orchestration tools, and standard infrastructure required to deliver effects at operational speed. This investment ensures tools remain current, validated, and aligned with evolving mission requirements.
(FY 2026 Baseline: $66,337 thousand)

2) Data and Sensors.....$35,852
Boundary Defense
Increase continues to enhance Boundary Defense capabilities by accelerating deployment and sustainment of advanced perimeter security technologies, including next generation firewalls, zero trust access controls, and automated inspection tools. These capabilities identify and block malicious traffic before it reaches internal networks, reducing attack surfaces and improving cross domain security.

Enhanced Sensing
Increase to expands sensing depth, diversity, and fidelity to support current cyber operations. Funding integrates replacement sensor architectures, improves telemetry collection, and strengthens advanced analytics, providing real time insight into adversary behavior across the battlespace. Enhanced sensing accelerates threat detection and improves data driven operational decision making.

(FY 2026 Baseline: $169,105 thousand)

3) Enhanced Performance Award Pool $3,271
The increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

4) JFHQs/CNMF.....$128,115
Increase strengthens the USCYBERCOM’s defensive cyber operations by modernizing tools, expanding automated threat-hunting, and improving visibility across the Department of War Information Network. Funding enhances the Command’s ability to detect, analyze, and mitigate sophisticated cyber threats, reducing operational risk and ensuring continuity of critical missions
(FY 2026 Baseline: $123,617 thousand)

5) Joint Cyber Warfighting Architecture Integration and Innovation $146,927
Increase reflects the continued acceleration of Artificial Intelligence and Machine Learning (AI/ML) capabilities that address material and non material gaps across the Joint Cyber Warfighting Architecture.

Funding supports data management, enterprise integration, and development of a data centric environment required to maximize the operational value of AI/ML in cyberspace operations.
(FY 2026 Baseline: $24,000 thousand)

6) Robust Infrastructure $36,678
Increase reflects the sustainment of infrastructure supporting Joint Force cyberspace operations. Funding provides the armories, platforms, and operational environments required to launch cyber capabilities, payloads, and analytics on classified and unclassified platforms. This investment ensures the availability and readiness of the infrastructure needed to deliver approved cyberspace effects.
(FY 2026 Baseline: $201,996 thousand)

7) USCYBERCOM Civilian Pay (12D) $59,874
Increase and +111 FTEs address persistent workforce gaps, expand mission essential capacity, and correct structural shortfalls that limit the USCYBERCOM's ability to sustain global cyberspace operations. Additional personnel strengthen Air Force, Army, and Navy Cyber Mission Force teams, provide critical headquarters expertise, and align resources with validated FY 2025 execution and updated FY 2026 civilian pay rates. This targeted growth ensures the Command can meet operational demand with a fully staffed, trained, and mission ready civilian workforce.
(FY 2026 Baseline: $274,830 thousand; 1,431 FTEs; +111 FTEs)

9. Program Decreases ..... $-33,553

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases ..... $-10,000

1) Internet Operations Management ..... $-10,000
Reduces the one-time increase for Internet Operation Management
(FY 2026 Baseline: $169,105 thousand)

c) Program Decreases in FY 2027 ..... $-23,553

1) Efficiency - DCR Workforce Optimization Cap ..... $-155
Reduces civilian personnel full-time equivalents and funding to optimize the workforce in compliance with Executive Order 14210, "implementing the President's Department of Government Efficiency Workforce

Optimization Initiative."
(FY 2026 Baseline: $274,830 thousand)

2) Efficiency - Travel.....$-22,543
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.

3) Federal Employee Retirement System.....$-855
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $274,830 thousand)

FY 2027 Budget Request.....$1,880,381

IV. Performance Criteria and Evaluation Summary:

FY 2025 PRIOR YEAR ASSESSMENT
The USCYBERCOM sustained CMF readiness and executed continuous cyberspace operations against foreign adversaries targeting U.S. networks, critical infrastructure, and national-level interests.

- Cyber National Mission Force Headquarters (CNMF-HQ) conducted persistent operations and deployed Defend Forward teams to identify and mitigate foreign cyber threats before they reached U.S. networks.
- Department of War Cyber Defense Command (DCDC) maintained global defense of the DoW Information Network (DoWIN), ensuring availability and resilience across all DoW network enclaves Joint Force Headquarters-Cyberspace (JFHQ-C), and CO-IPEs integrated cyberspace operations into Combatant Command planning and execution, improving operational synchronization and authorities deconfliction.
- The Joint Force Trainer (JFT) delivered advanced training and mission rehearsals to thousands of operators, ensuring Joint Forces remained certified to operate on designated DoW infrastructure.

FY 2026 CURRENT YEAR ASSESSMENT
The USCYBERCOM strengthens its ability to direct, synchronize, and conduct cyberspace operations across the Joint Force.

- CNMF HQ expands persistent operations against significant foreign adversary threats, while DCDC improves global DoWIN defense and synchronizes protection activities across DoW components.
- JFHQ-C and CO-IPEs enhance operational integration with Combatant Commands, improving planning, authorities' alignment, and mission execution.
- Joint Cyber Warfighting Architecture (JWCA) modernization advances through improvements in Cyber Weapons and Tools, Data and Sensors, and Robust Infrastructure, enabling more effective DCO and OCO operations.
- Artificial Intelligence (AI) governance and infrastructure planning lays the foundation for FY 2027 deployment of AI sandboxes and frontier model capabilities.
- The JFT continues to deliver advanced training and mission rehearsals, ensuring Cyber Mission Force (CMF) operators remain certified and ready.

FY 2027 PLANS AND OBJECTIVE
The USCYBERCOM plans to expand workforce capacity and technical expertise across CNMF, DCDC, JFHQ-C, and CMF teams to meet rising operational demand. Deploy artificial intelligence and machine learning -enabled automation and analytics to enhance threat detection, cybersecurity monitoring, and operational decision-making.

- Strengthen JWCA enterprise integration, including software development, systems engineering, test and evaluation, and capability innovation.

- Improve global defensive operations through expanded sensing, advanced analytics, and enhanced visibility across the DoWIN and partner networks.
- Sustain persistent engagement against foreign military, intelligence, and criminal cyber actors targeting U.S. critical infrastructure and national-level interests.
- Advance enterprise-level engineering, architecture, and systems integration to support global cyberspace operations.
- Expand Persistent Cyber Training Environment and Joint Force Trainer capacity to meet increased CMF training throughput and readiness requirements.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

Personnel Summary Explanations:

12D - Cyberspace Operations
Cyber National Mission Force (CNMF): +26 Civilian FTEs
The increase supports mission growth in homeland defense and counter-cartel operations. As a sub-unified command with a persistently high operational tempo, CNMF requires additional civilian personnel to sustain continuous operations, expand analytic capacity, and meet increased national-level tasking. Growth reflects Departmental prioritization of CNMF's role in defending the Nation against significant cyber threats.

DoW Cyber Defense Command (DCDC): +14 Civilian FTEs
Additional FTEs support expanded responsibilities for defense of the Department of War Information Network (DoWIN). As a sub-unified command with global defensive cyberspace operations responsibilities, DCDC requires increased civilian workforce capacity to execute continuous monitoring, manage enterprise-wide defensive operations, and meet the expanded scope of DoWIN protection.

Air Force Component: +57 Civilian FTEs
The increase supports mission growth in Counter-Critical Infrastructure and Key Resources operations. Civilian personnel provide continuity and technical expertise essential to sustaining training ranges, maintaining operational capabilities, and supporting specialized mission areas within the Air Force cyber component

Cyber Mission Force (CMF) Teams: +14 Civilian FTEs
Additional FTEs across CMF teams enhance enterprise-wide readiness and mission effectiveness. These positions provide specialized technical skills directly aligned to operational requirements, increasing mission throughput and strengthening the CMF's ability to meet rising operational demand.

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 1: Operating Forces/Management and Operational Headquarters

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
USCYBERCOM Headquarters	314,565	5,424	-7,736	312,253	5,085	-13,612	303,726

I. Description of Operations Financed:
The U.S. Cyber Command (USCYBERCOM) headquarters plans, directs, and integrates cyberspace operations in support of national security objectives. Funding enables USCYBERCOM to execute its role as the Department of War (DoW) lead for global cyberspace operations, ensuring unity of effort across the Cyber Mission Force, Service Cyber Components, and interagency and international partners.

As the operational headquarters for DoW cyberspace forces, USCYBERCOM provides command and control, operational planning, intelligence integration, and mission oversight for activities that defend the DoW Information Network, counter malicious cyber actors, and support Joint Force operations worldwide. Resources ensure the Command can develop cyberspace options for Combatant Commanders, respond to significant cyber threats, and maintain freedom of action in cyberspace.

The FY 2027 request strengthens USCYBERCOM’s ability to manage global operational demand, sustain mission command, and maintain readiness in a contested and rapidly evolving domain. Funding supports operational planning, mission integration, readiness oversight, and capability development required to conduct persistent engagement against foreign military, intelligence, and criminal cyber actors. These investments ensure the Command can meet increasing operational requirements, counter sophisticated adversaries, and provide the Joint Force with reliable, integrated cyberspace capabilities.

USCYBERCOM Headquarters Operational Funded Programs:
Civilian Pay: The USCYBERCOM's Headquarters civilian workforce executes core operational headquarters functions required to plan, direct, and integrate cyberspace operations across the DoW. Civilian personnel enable four primary mission areas: 1) defending the DoWIN; 2) providing cyberspace support to Combatant Commanders; 3) strengthening national resilience against Malicious Cyberspace Actors; and, 4) advancing DoW cyberspace missions through collaboration with allies and partners.

Headquarters civilians provide the continuity, technical depth, and mission expertise essential to unifying cyberspace operations, integrating intelligence, and strengthening DoW cyber capabilities. They support enterprise-level efforts to operate resilient information networks, counter cyberspace threats, and assure operational access for the Joint Force.

The civilian workforce also develops the design, training, and certification standards for the Cyber Mission Force, enabling the Services to build and sustain mission-ready forces. In FY 2027, the Headquarters includes Full-Time Equivalents 445 civilian FTEs distributed across ten directorates.

USCYBERCOM continues to implement targeted recruiting and retention strategies in coordination with the Army Civilian Human Resources Agency Cyber HR Team. To accelerate hiring timelines, the Command is expanding unclassified workspace for positions requiring lower-level clearances and increasing security review capacity for billets requiring higher-level clearances.

Travel: Resources support operational temporary duty travel required for mission execution. While USCYBERCOM does not deploy forces, operational travel enables teams to conduct global cyberspace operations, integrate with Combatant Commands, and support offensive and defensive missions. Funding also supports travel for required training and certification to maintain operational qualifications for cyberspace operations on sensitive DoW and partner infrastructure.

Defense Industrial Base: Resources support USCYBERCOM's role in assisting the Defense Industrial Base Cybersecurity program to protect DoW information and intellectual property residing on or transiting Defense Industrial Base networks. These resources provide situational awareness of Malicious Cyberspace Actor activity affecting critical programs, technologies, and science-and-technology advantages on unclassified Defense Industrial Base systems.

Facilities and Security: Resources provide full logistical, facility, and security support required for USCYBERCOM’s operational headquarters. Funding sustains mission-ready facilities, security operations, maintenance, and renovation activities necessary to support operational planning, mission command, and the delivery of cyberspace forces and capabilities.

Headquarters Information Technology (IT): The C4 Systems Directorate and Chief Information Officer deliver and sustain IT, cybersecurity, and command-and-control capabilities required for USCYBERCOM and its subordinate organizations. Funding supports the governance and operation of a secure commercial cloud environment aligned with the DoW Digital Modernization Strategy. Resources enable cloud hosting, engineering, and migration of mission and business systems into a multi-cloud environment to support cyberspace operations planning and execution.

Funding also refines joint Defensive Cyberspace Operations architecture, improves mission readiness, and accelerates the integration of new capabilities into operational use. These efforts ensure USCYBERCOM can maintain a coherent operational architecture, improve command-and-control effectiveness, and sustain a decisive advantage in defending national security interests in an increasingly contested cyber environment.

The FY 2026 spend plan amount for Operations and Maintenance includes $312,253 thousand of discretionary and $31,765 thousand of mandatory (reconciliation) for a total of $344,018 thousand.

II. Force Structure Summary:

The USCYBERCOM maintains operational control of the Cyber Mission Teams through Joint Forces Headquarters (JFHQ), and Cyber National Mission Forces (CNMF) to accomplish the mission objectives through four lines of effort: (1) defend the DoWIN; (2) provide support to combatant commanders for execution of its missions around the world; (3) strengthen our nation's ability to withstand and respond to cyberattack; and (4) advance DoW missions in cyberspace through collaboration with allies and partners

8. Program Increases $8,253

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $8,253

1) USCYBERCOM HQ Civilian Pay $8,253
Funds an increase in FY 2027 compensation costs while decreasing civilian FTEs by 7, supporting mission realignment under the USCYBERCOM 2.0 implementation plan. The USCYBERCOM 2.0 effort modernizes headquarters functions to address workforce, planning, and integration gaps that limit readiness and slow capability development. Implementation continues to mature critical organizations focused on talent management, advanced training, and operational integration, enabling the Command to meet expanding statutory responsibilities and rising global cyber mission demand, despite a reduced civilian workforce.
(FY 2026 Baseline: $80,656 thousand; 407 FTEs; -7 FTEs)

9. Program Decreases ..... $-21,865

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-21,865

1) Efficiency -DCR Workforce Optimization Cap ..... $-465
Reduces civilian personnel full-time equivalents and funding to optimize the workforce in compliance with Executive Order 14210, "implementing the President's Department of Government Efficiency Workforce Optimization Initiative."
(FY 2026 Baseline: $80,656 thousand)

2) Federal Employee Retirement System ..... $-466
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $80,656 thousand)

3) USCYBERCOM HQ ..... $-4,860
Reduces funds for Advisory and Assistance Services contracts to promote efficiencies and implement Administration policy consistent with Executive Order 14222, Implementing the President’s Department of Government Efficiency and Cost Efficiency Initiative. These reductions target contracted support for staff functions, capability development, and operational support activities where efficiencies can be achieved

without impacting core mission execution. The adjustment aligns USCYBERCOM's contract portfolio with government-wide direction to streamline contracted services and increase reliance on organic workforce capabilities where appropriate.
(FY 2026 Baseline: $139,750 thousand)

4) USCYBERCOM HQ IT ..... $-16,074
Reduces funds for Advisory and Assistance Services contract support to promote efficiencies and implement Administration policy consistent with Executive Order 14222, Implementing the President's Department of Government Efficiency and Cost Efficiency Initiative. This reduction targets contracted IT support functions where efficiencies can be achieved through improved processes, consolidation, and increased reliance on organic capabilities. The adjustment aligns USCYBERCOM's IT contract portfolio with government-wide direction to streamline contracted services while sustaining essential headquarters IT operations.
(FY 2026 Baseline: $91,847 thousand)

FY 2027 Budget Request $303,726

IV. Performance Criteria and Evaluation Summary:

FY 2025 PRIOR YEAR ASSESSMENT

- USCYBERCOM successfully consolidated CMF resources and maintained required readiness levels across all mission areas. CMF teams met certification and employment standards, enabling persistent engagement and support to Combatant Commanders.
- Headquarters operations matured to support unified budget execution and operational oversight. Defensive operations protected the Department of War Information Network (DoWIN) from significant malicious cyber activity, while offensive operations disrupted adversary campaigns targeting U.S. interests.
- Demonstrated the Command's ability to sustain readiness during a major organizational transition and establish the foundation for service-like responsibilities.

FY 2026 CURRENT YEAR ASSESSMENT

- FY 2026 investments enhanced cyber capabilities through targeted technical, scientific, and engineering support. Funding sustained secure cloud technologies across classification levels and supported evolving DoWIN operational requirements. Key efforts included integrating special program capabilities, developing new operating concepts to counter emerging threats, and refining systems engineering processes to improve mission effectiveness.
- FY 2026 performance reflects an increase in the Command's operational tempo, improvements in domain mastery, and the maturing of institutional processes.
- Accelerated AI governance and infrastructure capability development into FY 2027.

FY 2027 PLANS AND OBJECTIVES

- In FY 2027, funding supports the engineering, architecture, and systems integration activities required for USCYBERCOM to plan, direct, and sustain cyberspace operations at the enterprise level. Resources advance the Joint Cyber Warfighting Architecture, strengthen the Cyber National Mission Force's ability to conduct Hunt Forward Operations, and enhance analytic support to assess malicious cyberspace actor target systems.
- Expand workforce capacity and technical expertise to generate and employ advanced cyberspace capabilities Increase operational effectiveness through targeted investments in AI/ML, data integration, and Joint Cyber Warfighting Architecture modernization.
- Strengthen the Command's ability to deliver cyberspace effects in competition, crisis, and conflict.
- Enhance global defensive operations through improved visibility, automated threat detection, and advanced analytics.
- Mature service-like responsibilities for force readiness, capability development, and talent management.
- Sustain persistent engagement against priority adversaries and defend the homeland from significant cyber threats.
- Advance enterprise-level engineering, architecture, and systems integration to support global cyberspace operations.

WarU	184,111	3,079	-15,365	171,825	1,421	19,771	193,017

I. Description of Operations Financed:

The Warfighting Acquisition University (WarU) (http://www.WarU.edu) is the Congressionally mandated acquisition professional development, training, and policy research and analysis organization of the Department of War (DoW), under the oversight of the Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S)). WarU's mission is to equip the acquisition workforce to rapidly accelerate delivery of warfighter capability through a talent management strategy that includes transformative education, collaborative partnerships, and a continuous drive for acquisition operational excellence. WarU's vision is: an acquisition workforce operating with wartime urgency, commercial agility, and a warrior ethos.

WarU provides talent development and continuous professional learning for more than 151,000 warfighting acquisition workforce members, other DoW professionals, federal civilian agencies, and industry partners to develop, field, and sustain warfighting capability. WarU products and services target workplace performance, leadership and professionalism, while promoting organizational mission effectiveness.

Additionally, WarU performs research, develops professional publications, offers symposia and frequent topical webinars, and consults on subjects related to the acquisition functional areas. The FY 2027 request includes funding of 535 civilian full-time equivalents (FTEs), and operational support to 43 military faculty assigned to WarU.

WarU's main campus is located at Fort Belvoir, Virginia. The University’s structure supports a cross-functional, modernized training methodology that emphasizes immersive, scenario-based experiential learning focused on portfolio management competencies to optimize the kill chain while developing dominant decision makers delivered through regional campuses and specialized colleges. WarU has five regional campuses strategically located in areas with a high concentration of DoW acquisition workforce members. The five regional campuses are:

- Capital and Northeast – Fort Belvoir, Virginia (serves a workforce of 36,070)
- Mid-Atlantic – California, Maryland (serves a workforce of 25,573)
- Midwest – Kettering, Ohio (serves a workforce of 23,034)
- South – Huntsville, Alabama (serves a workforce of 37,330)
- West – San Diego, California (serves a workforce of 29,235)

WarU also has two colleges:

- Defense Systems Management College (DSMC) – Fort Belvoir, Virginia. The DSMC is tasked with offering the global DoW acquisition workforce a range of executive-level training and educational programs to include program management, international acquisition management, requirements determination, field training services, leadership, and research.
- College of Contract Management (CCM) – Richmond, Virginia. Located near the Defense Contract Management Agency (DCMA) headquarters, the CCM is tasked to provide the professional, accredited courses necessary to enhance the DCMA's workforce leadership skills, and competencies related to post-award contract management.

WarU Core Functions

WarU provides high quality, low-cost training, online resources, and direct support at the point of need to enable the acquisition, requirements determination, and contingency missions of the DoW (and elements of the Federal Government). WarU's core functions are defined as:

1. Teaching: Meeting the challenges of the current and forecasted threat environment requires a workforce that is competent and confident enough to innovate quickly and at scale. WarU instructor-led courses build upon certification training with continuous learning and job support resources on the WarU platform for developing critical job competencies, innovative thinking, and analytical skills across essential acquisition functional and leadership roles.
2. Learning Asset Development and Curation: WarU designs, develops, and deploys an expansive portfolio of on-line and instructor-led courses designed to develop workforce knowledge base and skills to solve complex acquisition problems, manage portfolios, and lead cross-functional teams to deliver the warfighter a decisive edge. WarU's catalog of self-paced, online learning, including credentials and topical modules, helps the workforce meet certification requirements and pursue opportunities for career growth. The WarU learning asset development capability ensures the workforce has the modern content needed to address foundational skills and emerging concepts with a process that incorporates real-world acquisition lessons learned and uses representative DoW scenarios to hone critical acquisition skills and confidence to decide and act. Asset development and maintenance are mission critical; moreover, learning content must be continuously refreshed to foster rapid technology adaptation, at the speed of relevance. In addition, WarU's category management of licenses with vendors such as Coursera, LinkedIn Learning, and Percipio, provide workforce members with economical access to commercial learning assets relevant to non-DoW specific aspects of acquisition, technology, logistics, and leadership.
3. On-Demand Learning: The WarU platform hosts a wide-range of WarU-developed or curated learning assets such as eLearning, "how to" videos, performance support tools, and web events. The WarU platform offers convenient access for workforce members to maintain currency, excel at job-related activities and explore emerging concepts. Through webinars and more formal in-person events, WarU helps the workforce stay up to date on the latest concepts in DoW acquisition and leadership. WarU's portfolio of online tools—including its online library, ACQuipedia, and job-support-resources— including the Acquisition Knowledge Matrix, Adaptive Acquisition Framework pathway resources, and a glossary help the workforce complete critical tasks. The WarU media library also provides a compendium of on-demand assets.
4. Field Training Services (FTS): WarU's faculty members use their subject matter expertise to help acquisition program teams and other customers achieve specific outcomes and improve acquisition outcomes. These include Field Training Teams (FTTs) that provide comprehensive support to program offices, enhancing their decision-making capabilities across a phase of the acquisition and

sustainment life cycle. Examples of these offerings include consulting on specific acquisition challenges, workshops tailored to program needs, functional simulations, and executive coaching.

5. Faculty Rotation Support/Research/Other Mandates: WarU executes activities in support of acquisition innovation and continuous improvement. These include Acquisition Workforce Educational Partnerships (AWEP) Initiatives, such as the Faculty Rotation Program for enhancing faculty currency, Peer Mentoring and Advising, Training to Meet Operational Challenges, Flexible Acquisition Practices, and Expert Lecturers. WarU is also required to conduct research and analysis of warfighting acquisition policy issues from an academic perspective. This includes support for warfighting acquisition university, Human Capital, and continually expanding the USW(A&S) body of knowledge through legislatively mandated research on issues and concerns identified by the workforce.

WarU Major Programs/Efforts

The Acquisition Transformation Strategy (ATS) is the Department's overarching effort to fundamentally modernize how the DoW acquires capabilities, making the process faster, more agile, and better aligned to mission needs. At its core, ATS aims to shift acquisition from a slow, compliance-driven system to one that prioritizes speed, innovation, agility, effectiveness, and outcomes enabling the workforce to deliver relevant capabilities to the field on timelines that match operational demands. WarU is a critical enabler of this strategy, responsible for transforming the acquisition workforce so it can execute the new approaches envisioned under ATS. WarU serves as the driving force behind institutionalizing the ATS across the DoW, ensuring its core tenets are formally codified and embedded into content and practice. Through deliberate integration into training and professional development, WarU will sustain these principles over time and equip the acquisition workforce with the knowledge and skills required to effectively achieve the intent of this transformation. Department leadership has emphasized that ATS cannot succeed through policy changes alone; it will depend on workforce development, cultural change, and execution capacity that WarU provides. Through competency-based education, experiential learning, and direct support to acquisition missions, WarU operationalizes key ATS lines of effort. Together, ATS sets the strategic direction, and WarU makes that transformation an enduring reality across the Department.

In support of the President's priorities, the DoW is taking significant action to reform, right-size, and train the acquisition workforce, and WarU is at the forefront of these efforts. WarU is leading the charge to restructure key performance objectives, analyze the acquisition workforce staffing levels, and rapidly provide the workforce with the acquisition reform training and tools required to succeed.

Section 832 of the National Defense Authorization Act (NDAA) for FY 2025 required WarU to establish a training program to support cross-functional personnel and contractors of the DoW involved in any phase of the acquisition and sustainment lifecycle. These FTTs are directed to deliver on-site, mission-specific acquisition training, tailored to the needs of operational units across the DoW, and to assist with making important decisions with respect to acquisition or sustainment, requirements validation, the development of an acquisition strategy, awarding contracts, and ongoing management of performance and governance. To comply with the law, WarU must allocate 25 percent of its faculty capacity for a minimum of 50 percent of their time each year in support of the training program. This equates to 12.5 percent of total available faculty capacity.

WarU also continues to provide the global learning environment required to empower the acquisition workforce to meet emerging threats and provide the warfighter a decisive edge. These acquisition experts are responsible for providing and maintaining efficient and cost-effective warfighting capabilities for the DoW. Through certification courses, job-specific training courses and credentials, and workshops, WarU provides the tools necessary for the acquisition workforce to meet their training needs and competently serve as stewards of taxpayer dollars. In addition to

the courses and credentials, WarU also provides workshops, tailored training, and rapid deployment training events. These resources allow the acquisition workforce to quickly learn subject-specific information and produce actionable products tailored to their specific needs.
WarU continues to collaborate with OUSW(A&S), the Services, and Components to realize significant economies of scale by serving as an enterprise Learning Management System (LMS) provider through its Cornerstone OnDemand (CSOD) platform, expanding access to additional organizations across the government. By consolidating LMS services under a single, scalable platform, WarU can reduce duplicative licensing, infrastructure, and administrative costs while standardizing training delivery and data management. This approach not only drives cost savings but also enhances networking, interoperability, improves visibility into workforce development, and enables more efficient deployment of training resources across the Department.
Prominent features of our operating environment are change and ambiguity. To thrive in this environment, WarU must be flexible and adaptable as well as knowledgeable and well-prepared. The new modernized training program will give the workforce the tools it needs to continue providing our warfighters with the capabilities they need to succeed. Strategic investments in WarU will continue to drive embedded field and traditional cross-functional, immersive, scenario-based experiential learning toward tailorable engagements and courses, supplemented with informal online learning, and job/role-specific credentials. These changes will support acquisition reforms by quickly upskilling the workforce in new areas and supporting individual and organizational needs with hyper-relevant content and solutions.

Accomplishments (through March 15, 2026)

- Delivered 1.849 million hours of training
- Adaptive Acquisition Framework (AAF) had 223,782 page views
- Provided a total of 87 credentials, which attracted over 12,054 new enrollments
- Provided 2,532 course offerings with 341,508 completions
- Hosted 197 consulting engagements and 290 workshops
- Held 10 executive coaching events
- Streamed 131 webcasts to 44,453 attendees, many of which were recorded and placed on WarU media servers, further expanding the reach to more than 10,469 views.

WarU Strategy

The Strategic Plan presents a high-level view of the Warfighting Acquisition University's (WarU) goals and objectives, laying out the organization's mission and vision for the future. The strategic plan outlines three primary goals and supporting objectives in support of its vision and mission.
Vision: An acquisition workforce operating with wartime urgency, commercial agility, and a warrior ethos.
Mission: Equip the acquisition workforce to rapidly accelerate delivery of warfighter capability through a talent management strategy that includes transformative education, collaborative partnerships, and a continuous drive for acquisition operational excellence.
Goal 1 – Drive a workforce ethos of urgency, speed and agility to deliver capabilities to the warfighter.

- Objective 1.1: Implement content that instills the ethos of urgency, speed, and agility.
- Objective 1.2: Build impactful partnerships that enable innovation and speed in acquisition efforts.

Goal 2 – Modernize the educational continuum of the acquisition workforce to build a performance and results-driven culture.

- Objective 2.1: Institutionalize modernized training methodologies into competency-based learning models.
- Objective 2.2: Ensure WarU delivers on-demand training at the time of need.
- Objective 2.3: Expand and Integrate External Industry-focused Expertise into the Curriculum.

Goal 3 – Serve as the lead change agent for warfighter dominance through improved acquisition.

- Objective 3.1: Revolutionize and incentivize the acquisition workforce for excellence.
- Objective 3.2: Deliver streamlined warfighting acquisition services and assistance.

These goals reflect WarU's transformation from a traditional training institution into a mission-focused, execution-oriented enterprise that directly supports operational outcomes.

Mission Success

WarU continues to prove it's not just a training institution but a force multiplier that delivers tangible mission outcomes. By embedding within programs, driving innovation, and aligning workforce practices with evolving policy, WarU directly supports the Department's acquisition reform initiatives. Some examples are:

1. Field Training Teams and Embedded Program Support
   - Program Management Activity-209 Next Generation Radio: Assisted with acquisition strategy and document updates through bi-weekly engagements.
   - Sentinel Program Office: Supported re-baselining post-Nunn-McCurdy breach, guiding strategy and transition workshops.
   - Naval Information Warfare Systems Command (NAVWAR) Overmatch Portfolio: Planning to execute a Base Camp Field Training Team (FTT) with the Agile Center of Excellence and Program Executive Office (PEO) for Command, Control, Communications, Computers, and Intelligence (C4I) leadership.
   - F-35 & Defense Prisoner of War/Missing in Action Accounting Agency: Conducted workshops to improve work statements for contracting effectiveness.
   - Air Force Installation Contracting Center – 764th Enterprise Sourcing Squadron: Conducted a multi-phase services acquisition workshop for a $974 million base operations support recompete.

---

2. Tailored Acquisition and Workforce Development Training
   - Defense Logistics Agency – PEO, Enterprise Analytics: Delivered Software Acquisition Pathway training to over 300 personnel for business systems.
   - Army Development Command Aviation: Delivered Artificial Intelligence training supporting wargame applications and demonstrated the Army's CamoGPT.
   - Office of Principal Cyber Advisor: Provided Software Acquisition Pathway training aligned with the Secretary of War's March 2025 memo on software modernization.
   - WarU/Human Capital Initiatives Workforce Management Group: Facilitated cross-functional competency alignment discussions.

---

3. Cybersecurity, Software, and Agile Enablement

- Joint Light Tactical Vehicle/Advanced Reconnaissance Vehicle Programs: Conducted Cyber Test and Evaluation workshops and cyber resilience engineering using the National Cyber Range.
- Army Ground Vehicle Systems Center: Provided an Agile software management workshop covering the Scrum Framework and Adaptive Acquisition Framework integration.
- Systems Modeling Language Workshop for PEO Command, Control, Communications, and Networking: Delivered digital engineering training aligned with Under Secretary of War for Research and Engineering workforce priorities.
- Innovation Teaching Factory with Naval Surface Warfare Center: Developed innovation skills using a real-world decoy scenario.
- WarU-Joint Light Tactical Vehicle "Survivable Weapon Systems" Workshops: Enabled Submarine Commander's Readiness Evaluations and mission-based cyber risk assessments.

---

4. Strategic Policy Instruction, Executive Support, and Acquisition Reform
   - Executive Order on Modernizing Warfighting Acquisitions: WarU leads the workforce reform section and supports Service Acquisition Executives and the Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S)).
   - Defense Health Agency Director and PEO Operational Mission Systems: Provided an executive overview workshop focused on reacclimating to Middle-Tier Acquisition.
   - OUSW(A&S) Anti-Deficiency Act Violation Training: Provided enhanced compliance literacy through detailed, policy-aligned instruction.
   - Deputy Assistant Secretary of the Army for Defense Exports and Cooperation: Facilitated industrial base strategy discussions to support export and cooperation strategy.

---

5. Contracting, Cost Estimation, and Sustainment Optimization
   - Marine Corps Food Services Subsistence Advisory Workgroup: Provided a custom strategy workshop for a $2.4 billion contract to improve operational sustainment.
   - United States Air Force VC-25B Integrated Baseline Review Training: Supported baseline and schedule evaluation with the contractor and identified cost/schedule risks.
   - Earned Value Management Workshops: Delivered program-specific insights to strengthen Program Management Office financial oversight.

The FY 2027 request includes $15,084K mandatory facilities sustainment, restoration and modernization funding and $193,017K of discretionary for a total of $208,101K. The mandatory funds address the deteriorating state of Warfighting Acquisition University facilities by providing an enhanced level of sustainment for facilities as well as specifically targeting the restoration and modernization of the University's facilities to provide serviceable, quality accommodations to all service members and warfighting acquisition workforce. This is restoring Warrior Ethos by investing in readiness of our facilities and improving the quality of life of our students, faculty and support staff.

FY 2026 Normalized Current Estimate $171,825

6. Price Change $1,421

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $30,166

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $30,166

1) Civilian Personnel $1,612

The FY27 increase in civilian pay reflects a shift to hiring and retaining more highly specialized faculty with advanced acquisition, data analytics, technological and field-experience qualifications that command higher market salaries. As mission requirements expand in complexity, including with AI, Cyber, and other emerging technologies, WarU must compete for in-demand talent and upskill existing personnel, resulting in higher per-capita costs while maintaining a stable workforce size.
(FY 2026 Baseline: $120,080 thousand; 535 FTEs)

2) Defense Business System Reform.....$27,757
The increase supports the Defense Business System Reform effort to modernize its defense business systems by eliminating duplicative and obsolete legacy systems and transitioning to integrated, enterprise-wide solutions. This reform effort improves data accuracy, strengthens auditability, enhances cybersecurity, and reduces sustainment costs while enabling faster, more informed decision-making. By consolidating systems and standardizing business processes, the Department will increase operational efficiency, improve financial transparency, and better support mission execution across the enterprise.
(FY 2026 Baseline: $12,633 thousand)

3) Enhanced Performance Award.....$313
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $120,080 thousand)

4) Travel of Persons $484
The increase supports the Acquisition Transformation Strategy by reengineering training to include cross functional, competency-based training with increased reliance on simulations and models. This will require more faculty travel to facilitate in person training with multiple functional areas being covered.
(FY 2026 Baseline: $708 thousand)

9. Program Decreases .....$-10,395

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-10,395

1) Efficiency - Contract Services ..... $-9,997
The reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $25,782 thousand)

2) Federal Employees Retirement System (FERS) Contribution Rates ..... $-398
The reduction reflects updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department's required contributions for both Revised Annuity Employees (RAE) and Further Revised Annuity Employees (FRAE). The decrease aligns funding with current long-term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government-wide retirement funding requirements.
(FY 2026 Baseline: $120,080 thousand)

FY 2027 Budget Request $193,017

IV. Performance Criteria and Evaluation Summary:

Measuring WarU's value in terms of direct acquisition outcomes is a challenge because those outcomes are influenced by a wide range of variables beyond any single training intervention. Program results also depend on funding stability, requirements volatility, leadership decisions, contractor performance, external policy changes, and operational demands—many of which can shift over time and are outside the control of the workforce being trained. Even when training improves individual knowledge or decision-making, its impact is often diluted or masked by these broader systemic factors.

There's also a timing and measurement problem. Training effects are indirect and tend to show up over the long term, while acquisition outcomes are tracked at the program level and influenced by team dynamics rather than individual performance. It's difficult to isolate whether a cost overrun was due to gaps in training, poor requirements definition, or external disruptions. Additionally, most training metrics focus on completion or satisfaction rather than demonstrated behavior change or mission impact, making it challenging to quantify how learning translates into better acquisition decisions in a measurable, defensible way.

The most common occupational education industry standard for measuring value of training is learning hours delivered, given the importance supervisors place on time away from the mission. Accordingly, WarU views how much time leaders are allowing their teams to spend with WarU and how many courses they complete to develop their careers, keep abreast of changes and meet their readiness/Warfighter support requirements as a strong indicator of the value operational units place on WarU. WarU remains relevant by engaging the acquisition workforce to understand their requirements and quickly developing and delivering relevant content to reduce the time from a problem to a solution to the maximum extent possible.

Learning Hours	**FY 2025**	**FY 2026**	**FY 2027**
Teaching	4,254,457	4,339,546	4,426,337
Field Training Services	535,616	546,328	557,255
On-Demand Learning/3rd Party	856,862	956,027	975,147
	5,646,635	**5,841,901**	**5,958,739**

FY 2026 and FY 2027 numbers are projected.

I. Description of Operations Financed:

Overview of DCAA

The Defense Contract Audit Agency (DCAA) provides independent audit and financial expertise to ensure every dollar is used effectively to safeguard our nation's interests. DCAA operates under the authority, direction, and control of the Under Secretary of War (Comptroller) (USW-C). Per DoDD 5105.36, perform all necessary contract audits for the Department of War (DoW) and to provide accounting and financial advisory services regarding contracts and subcontracts to all DoW Components responsible for procurement and contract administration. DCAA's capabilities span the entire acquisition lifecycle, from before a contract is awarded to its final closeout. This presence promotes financial integrity at every stage and assures the DoW maximizes the value of every taxpayer dollar spent on the Warfighter.

Each year, DCAA conducts thousands of audits that provide the basis for recommendations to the acquisition community. In FY 2025, DCAA identified over $18 billion in total audit exceptions, creating crucial negotiation space for contracting officers by offering critical insight. Auditors performed 9,527 engagements consisting of 2,480 reports and 7,047 memos, totaling over $788 billion.

Beyond the core audit mission, DCAA provides indispensable advisory and investigative support. These capabilities allow DCAA to proactively assist acquisition partners and hold contractors accountable, protecting taxpayer dollars across the entire defense enterprise. Tailored advisory services help contracting officers navigate complex financial issues and negotiate from a position of strength. DCAA supported contracting officers throughout FY 2025 through advisory services that examined $72 billion in contract costs. These services are tailored to reduce costs and provide full benefits.

DCAA delivers significant and measurable returns on investment to the American taxpayer. In FY 2025, DCAA examined nearly $788 billion in contract costs, delivering over $5.3 billion in savings. This demonstrated an impressive $7.50 in savings for every $1 invested in its audit activities.

Alignment with the Department of War priorities

DCAA continues to cultivate the future by supporting the National Defense Strategy objectives of "America First. Peace Through Strength. Common Sense" and the Secretary of War's Priorities of Defend the U.S. Homeland, deter China in the Indo-Pacific through Strength not confrontation, increase burden sharing with U.S Allies and Partners and supercharge the U.S Defense Industrial Base. DCAA audits enable contracting officials to make necessary investments to ensure the U.S. military remains the strongest and most lethal force in the world. DCAA's outreach to defense contractors of all sizes supports the DoW's policy to accelerate defense procurement and revitalize the defense industrial base to restore peace through strength.

Mission Specifics
Civilian pay accounts for 85 percent of DCAA's allocated funds with focuses on:

- DCAA's audits ensure industry complies with applicable laws, regulations, and contract terms. These audits provide negotiation space, confidence in contractor capabilities, and maximize value of the DoW dollars spent on weapons systems, services, and supplies to equip the Warfighter.

- DCAA executed a reorganization to deliver audit expertise with greater speed, precision, and impact. Replacing the legacy regions with three new mission-focused directorates strategically realigns and embeds DCAA audit teams directly with the military buying commands they support. Forming the Land Directorate, Sea Directorate, and Air Directorate break down legacy silos, creating unified and flexible audit teams ready for rapid deployment for the DoW's most urgent acquisition priorities.

- A Centralized Audit Function (CAF) team was established to focus on complex, high-risk, and enterprise-level audits. This provides robust oversight into the Department's largest expenditures, enhancing oversight capability and responsible stewardship of funds.

- DCAA emphasized integration to provide greater flexibility and responsiveness. DCAA's Field Detachment auditors, those responsible for the most sensitive work for classified contractors, are now fully integrated into the new directorates. A central Field Detachment Cell provides dedicated oversight and safeguards for all classified work.

- DCAA provides tailored advisory services to help contracting officers navigate complex financial issues and negotiate from a position of strength, providing on-demand expertise for better decisions. Key services include direct contract negotiation support, independent analysis of contractor proposals, advice on pricing and specific cost elements, and assessments of compliance with acquisition regulations.

- DCAA's Office of Investigative Support played a critical role detecting and deterring fraud in DoW contracts, providing specialized audit and financial expertise combating fraud and holding violators accountable. This support contributed to investigations and prosecutions that recovered over $689.9 million and resulted in 485 months of sentencing along with other sanctions in FY 2025.

- DCAA's Information Technology and Chief Digital and Artificial Intelligence Office (CDAO) develops tools to streamline mandatory contractor financial submissions, automate repetitive manual processes, and leverage the power of data analysis. These tools are configure and integrate in-house, leveraging existing software, or developed in collaboration with other defense agencies using existing data stores. This technology-driven approach was instrumental in identifying over $6 billion in funds that could be freed up for more critical Warfighter needs by reallocating funds, canceling unneeded obligations, and halting a major program extension.

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $16,492

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $16,492

1) Civilian Pay Awards $7,785
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that

sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $522,418 thousand; 3,376 FTEs)

2) Information Technology (IT) Support Services $4,726
Increase supports the realignment of one of the large IT contracts from Equipment Purchases to IT Contract Support Services. This administrative action is being done to properly align the budget in accordance with resource execution.
(FY 2026 Baseline: $15,917 thousand)

3) Facilities and Utilities $2,342
Increase supports consolidation of offices and relocation to lower cost areas (resulting in initial upfront costs but anticipated future cost savings) and upgrading offices to meet stringent DCAA standards. Increase is also due to maintaining essential services, such as heating and security, required for a safe and productive work environment.
(FY 2026 Baseline: $4,013 thousand)

4) Transportation $1,227
Increase supports transportation associated with consolidation of offices and relocation to lower cost areas (resulting in initial upfront costs but anticipated future cost savings).
(FY 2026 Baseline: $818 thousand)

5) Permanent Change of Station (PCS) Benefits $223
Increase funds for forecasted PCS costs for the relocation of persons and planned personnel moves in support of the office relocation (resulting in initial upfront costs but anticipated future cost savings).
(FY 2026 Baseline: $1,118 thousand)

6) Other Intragovernmental Purchases $99
Increase funds for annual hardware support costs for IT infrastructure due to delays in DCAA's transition to the Defense Information Systems Agency (DISA)-managed DoDNet network. This support ensures continued network access and security for DCAA employees and infrastructure during the transition and the higher upfront costs will lead to anticipated future savings.
(FY 2026 Baseline: $36,790 thousand)

7) Disability Compensation $90
Increase funds for forecasted disability compensation costs based on historical execution. The Federal Employees 'Compensation Act program is financed by the Employees' Compensation Fund, which consists

of monies paid into it by Federal agencies receiving appropriations from Congress.

(FY 2026 Baseline: $1,576 thousand)

9. Program Decreases ..... $-39,289

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-39,289

1) Efficiency - Contract Services (Information Technology (IT) Support) ..... $-10,389
The reduction of funding for contract services is undertaken in direct support of the President’s executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness. DCAA also reduced funding due to the anticipated saving of transiting to the DISA-managed DoDNet network. The DISA-managed network will reduce direct costs and ensures continued network access and security for employees and infrastructure.
(FY 2026 Baseline: $15,917 thousand)

2) Other Services ..... $-9,126
The reduction is due to lower cost projections in training, printing, credentials and professional services which are associated with fewer agency personnel.
(FY 2026 Baseline: $16,299 thousand)

3) Compensation and Benefits ..... $-5,642
The reduction is due to a detailed cost factor analysis of the impact on the average annual rates based on DCAA's evolving workforce composition (attrition of higher-graded employees replaced by lower-graded new hires), as well as a decrease in the planned civilian pay raise.
(FY 2026 Baseline: $522,418 thousand; 3,376 FTEs)

4) Equipment Purchases Non Fund ..... $-4,726
The reduction is due to the realignment of one of the large Information Technology contracts from Equipment Purchases to IT Contract Support Services. This administrative action is being done to properly align the budget in accordance with resource execution.

(FY 2026 Baseline: $4,719 thousand)

5) Federal Retirement System - Agency Contribution Rates.....$-4,039
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $522,418 thousand; 3,376 FTEs)

6) Civilian Personnel.....$-2,637
The reduction reflects a decrease in 16 civilian FTEs due to ongoing workforce optimization efforts in compliance with Executive Order 14210, "Implementing the President's Department of Government Efficiency Workforce Optimization Initiative".
(FY 2026 Baseline: $522,418 thousand; 3,376 FTEs; -16 FTEs)

7) Efficiency - Supplies and Materials .....$-1,747
Reduces funding for supplies and materials to align with historical execution levels and ensure alignment with the priorities of the Secretary of War to improve the efficiency and effectiveness of our mission and business operations.
(FY 2026 Baseline: $12,242 thousand)

8) Efficiency - Travel Budget .....$-581
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
(FY 2026 Baseline: $8,524 thousand)

9) Defense Finance Accounting Service (DFAS) Financial Operations .....$-401
Reduction is due to lower anticipated DFAS support costs due to Workforce Optimization. Compliance with Executive Order 14210, "Implementing the President's Department of Government Efficiency Workforce Optimization Initiative" has resulted in reduced civilian personnel full-time equivalents. The reduced workforce has reduced anticipated costs of DFAS manhours in support of DCAA mission.
(FY 2026 Baseline: $5,912 thousand)

FY 2027 Budget Request $611,600

IV. Performance Criteria and Evaluation Summary:

DCAA's goal is to provide high quality audit services performed in accordance with Generally Accepted Government Auditing Standards (GAGAS). DCAA has developed audit performance measures which assess the quality of audits, the timeliness of audit services, and the efficient and effective use of budgetary resources.

Performance Based Measures Overview As a key defense acquisition organization, DCAA is responsible with providing a wide range of audit and financial advisory services supporting the negotiation, administration, and settlement of contracts for government contracting officers. DCAA must retain a cadre of trained, highly competent, and professional employees. Labor and related fringe benefits account for approximately 85 percent of the Agency's budget. Most of DCAA's workload is directed by statutory and regulatory requirements that ensure the government meets its fiduciary responsibilities to ensure the greatest value of every dollar. DCAA supports the oversight and internal control responsibilities of the Office of the Secretary of War, the DoW IG, the GAO, and Congress. DCAA performs audits primarily for contracting officers in the Departments of the Army, Navy, Air Force, and the Defense Contract Management Agency. Audit services provided by DCAA create crucial negotiation space for contracting officers.

Strategic Plan DCAA employs strategic planning to achieve its vision through defined goals by 2030. DCAA's Strategic Plan for FY 2025 – FY 2030 addresses key challenges and drives improvements to optimize value for the DoW. DCAA uses the DoW Human Capital Plan alongside the Strategic Plan to address strategies related to recruitment, onboarding, employee development, retention, and succession planning.

DCAA Mission Provide independent audit and financial expertise to ensure every dollar is used effectively to safeguard our nation's interests.

DCAA Vision Delivering Warfighter advantage through unparalleled acquisition insight.

DCAA Strategic Plan Goals
Goal 1: Optimize value for strategic partners.
Goal 2: Cultivate an innovative and multi-talented workforce.
Goal 3: Capitalize on Technological Innovations.

Summary of Audit Performance Based Measures DCAA continues refining performance measures to closely align with the Strategic Plan. Detailed descriptions are provided for each of the existing measures.

		FY 2025 Actual	FY 2026 Objective	FY 2027 Objective
	Quality Related Measures:			
1	DCAA Quality Assurance Review Results – Reports Issued Free of Significant Errors or Misstatements	Maintain/exceed prior year rate - 96%	Maintain/exceed prior year rate	Maintain/exceed prior year rate
	Productivity Measures:			
2	Forward Pricing Proposal Audits Issued by Original Due Date	Maintain/exceed prior year rate - 94%	Maintain/exceed prior year rate	Maintain/exceed prior year rate
3	Pre-Award Accounting System Audit delivered within 90 days	Maintain prior year rate - 58 days	Maintain prior year rate	Maintain prior year rate
4	Truth in Negotiations Audits Completed	50	37	92
5	Government Property	Complete Department-wide pilot	Perform inventory reviews of contractors material to Financial Statements	Perform follow-up activity at necessary contractors

Description of Performance Measures:

1. DCAA Quality Assurance Review Results – Reports Issued Free of Significant Errors or Misstatements. DCAA uses this measure to validate the quality of audit reports issued. DCAA's Quality Assurance performs post issuance quality reviews of reports to make this determination. The goal is to maintain or exceed the percentage of reports free of significant errors or misstatements each cycle.

2. Percent of forward-pricing proposal audit reports issued by the original agreed-to due date. Contracting officers negotiating prices for new contracts rely on DCAA's timely audit advice to assess the reasonableness of contractor-proposed prices. DCAA's timely response is critical to awarding contracts on time. The agency measures the percent of forward pricing proposal audit reports issued by the original agreed-upon due date between the auditor and requester, with the goal of maintaining or improving this percentage each year.

3. Pre-Award Accounting System Audit delivered within 90 days. Contracting officers in the process of negotiating cost-reimbursable contracts may request DCAA's audit advice to assess the reasonableness of the contractor's accounting system, ensuring the contractor has designed, or has a system in place, that is capable of accounting for and billing costs on government contracts. This is critical to awarding contracts on schedule and enabling progress billings. DCAA measures timeliness in delivering pre-award services against a 90-day benchmark.

4. Truth in Negotiations (TiN) Audits Completed. Starting in FY 2026, DCAA will increase the number of audits in this high-risk, high-return, area as requested from the Defense Pricing, Contracting, Acquisition Policy (DPCAP). These audits evaluate contractor compliance with the Truth in Negotiations Act, ensuring contractors provide contracting officers with the most current, accurate, and complete data at the time of negotiations.

5. Government Property. DCAA continues expanding its efforts regarding the government property in contractor possession inventory project, supporting the Department's Financial Improvement and Audit Remediation priorities. This effort supports the Pentagon's goal to pass a full financial audit.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**3,670**	**3,603**	**3,688**	**-67**	**85**
U.S. Direct Hire	3,466	3,392	3,484	-74	92
Total Direct Hire	**3,466**	**3,392**	**3,484**	**-74**	**92**
Reimbursable Civilians	204	211	204	7	-7
Civilian FTEs (Total)	**3,675**	**3,587**	**3,564**	**-88**	**-23**
U.S. Direct Hire	3,471	3,376	3,360	-95	-16
Total Direct Hire	**3,471**	**3,376**	**3,360**	**-95**	**-16**
Reimbursable Civilians	204	211	204	7	-7
Average Annual Civilian Salary ($ in thousands)	**160.7**	**155.5**	**155.5**	**-5.1**	**-0.1**
Contractor FTEs (Total)	**124**	**125**	**125**	**1**	**0**

Personnel Summary Explanations:

Civilian: The net change from FY 2026 to FY 2027 is -23 FTE.
The decreases are due to Workforce Optimization. Compliance with Executive Order 14210, "Implementing the President's Department of Government Efficiency Workforce Optimization Initiative" has resulted in reduced civilian personnel full-time equivalents and funding to optimize the workforce.

* DCAA's reimbursable authority for FY 2027 is 204 FTEs, not including the 99 FTEs supporting Foreign Military Sales - Contract Administration Services (FMS-CAS), which are directly funded by the Defense Security Cooperation Agency (DSCA).

Fiscal Year 2027 Budget Estimates

Defense Contract Audit Agency Cyber

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DCAA Cyber	4,858	101	-1,115	3,844	45	-64	3,825

I. Description of Operations Financed:

The Defense Contract Audit Agency (DCAA) cybersecurity operations mission and major functions secure, configure, operate, maintain, and sustain DCAA cyberspace operations. Preserving the confidentiality, availability, and integrity of DCAA's segment of the DoW Information Network (DoWIN).

DCAA's Cyberspace Activities budget protects, secures, and defends the information and information technology (IT) systems under its purview by ensuring functional owners and operators have confidence in the confidentiality, integrity, and availability of DCAA's information. Some of the key security principles include providing isolation; containment; redundancy; layers of defense; least privilege; situational awareness; and physical or logical segmentation of networks, services, and applications. This budget request supports these endeavors by providing government and contract support to prevent unauthorized access into the network by protecting all information systems, enclaves, and computing environments from external and internal threats.

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $202

1) Compensation and Benefits $7
The increase in funds reflect the proper pricing of the civilian pay based on current and historical execution.
(FY 2026 Baseline: $1,906 thousand; 9 FTEs; +0 FTEs)

2) Other Intra-Governmental Purchases $195
The increase in funds for are due to the realigning of the costs associated with the Defense Information Systems Agency (DISA) from IT contract Support Services to Other Intra-Government Purchases as an administrative action to properly align the budget in accordance with resource execution.

(FY 2026 Baseline: $10 thousand)

9. Program Decreases ..... $-266

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-266

1) Efficiency - Services (Information Technology Support) ..... $-266
The reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.

(FY 2026 Baseline: $1,928 thousand)

FY 2027 Budget Request $3,825

Fiscal Year 2027 Budget Estimates

Defense Counterintelligence and Security Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DCSA	901,872	54,358	156,825	1,113,055	10,600	-87,681	1,035,974

I. Description of Operations Financed:

The Defense Counterintelligence and Security Agency (DCSA) serves as the primary Federal entity for personnel vetting to ensure an effective, efficient, and trusted workforce for the Federal Government as directed in the Executive Order (E.O.) 13869, as well as the continuation of the National Industrial Security Program (NISP) mission. The DCSA was formed over the course of 2019 to 2021 and is dedicated to building the best possible security enterprise to defend the United States. from extant and future adversaries attempting to gain a national security advantage through the workforce, technologies, and supply chain. Since its formal establishment, DCSA restructured its organization to realign personnel previously assigned to the disestablished Defense Vetting Directorate to better support and align with the National Defense Strategy by ensuring a trusted federal, industrial, and affiliated workforce through continuous vetting and insider threat programs. These programs enable government and industry to deliver uncompromised capabilities to the warfighter by utilizing artificial intelligence, machine learning, and cutting-edge technologies and innovation. The blending of the operational missions of Industrial Security, Personnel Security, Personnel Vetting, Counterintelligence, Insider Threat, and professional education and certification provides DCSA with the unique advantage in preserving the nation’s strategic edge. The DCSA ensures that sensitive and classified U.S. and foreign government information, technologies, and material entrusted to cleared industry are securely protected. The DCSA, headquartered in Quantico, Virginia, with 165 field offices located across the United States, executes NISP oversight for the Department of War (DoW) and 35 other Federal executive branch agencies, determines security eligibility for all DoW personnel and conducts personnel vetting for more than 100 federal agencies. As the Security Training, Education, and Certification functional manager for the DoW, DCSA provides security education, training, certification, and professional development for DoW and other U.S. Government contractor employees, and U.S. foreign government partners. The DCSA conducts required NISP assessments to deter, detect, and identify loss or compromise of classified information and ensure corrective actions are taken to prevent recurrence.

A. Industrial Security (IS) Directorate:

The DCSA Industrial Security Operating Component is responsible for administering the DoW portion of the NISP on behalf of the DoW and 35 federal executive branch agencies that have entered into industrial security agreements.

To implement responsibilities under the NISP, the IS Directorate actively engages with industry and individual members of the Defense Industrial Base (DIB) on a regular basis, addressing a wide range of issues. These interactions support DCSA's role as the Cognizant Security Office (CSO) for the DoW in protecting classified information accessed or possessed by cleared facilities. From the initial assessment and issuance of Facility Clearances (FCL) to enable processing of classified contract requirements, to continuous monitoring and field

oversight., DCSA has made significant improvements. In FY 2025, DCSA reduced overall timelines for granting facility clearances and decreased the total inventory of pending FCL cases to 247 (compared to 482 cases in FY 2023 and 307 cases in FY 2024). The IS Directorate conducts risk-based evaluations to determine the trustworthiness of a facility and whether an FCL can be granted, enabling access to classified information for government contract performance. Using sound risk management principles, the IS Directorate prioritizes the appropriate level of engagement with each facility.

The core of the NISP is the Security Review, which DCSA conducts as the CSO within the DoW. These reviews ensure industry compliance with requirements to protect classified information in classified contracts. Security Reviews evaluate and rate cleared contractors' security programs to assess compliance with 32 CFR Part 117, using a risk-based approach to determine whether appropriate mitigation measures are in place to minimize the potential compromise, loss, or damage of classified information. The IS Directorate has increased the number of Security Reviews through continuous process improvements and the implementation of updated 32 CFR Part 117 policies. Currently, DCSA reaches approximately 49% of the 9,370 facilities under DoW's cognizance that require annual assessments. As DCSA continues to identify and mitigate risks across industry, it refines its oversight methodology, including the Security Review and rating process. This approach has resulted in the development of a new Security Review score, created in collaboration with industry and government stakeholders, to effectively implement the policy-designated five-tier rating system. Additionally, DCSA performs Cyber Operational Readiness Assessments (CORA) on behalf of the DoW for contractors with approved Secret Internet Protocol Router Network (SIPRNet) information systems.

1. National Industrial Security Program

Industrial Security administers the NISP through the granting of FCLs, assessing and mitigating Foreign Ownership, Control, and Influence (FOCI), the authorization of contractor classified information systems, international security requirements, managing enabling information systems, and providing Field Operations guidance on oversight.

2. CORA Program

The IS Directorate implements a portion of the CORA program, formerly known as the Command Cyber Readiness Inspection program. This initiative is mandated by Chairman of the Joint Chiefs of Staff (CJCS). The CORA program enables DCSA to evaluate the cybersecurity posture of NISP contractors with SIPRNet nodes, thereby enhancing accountability and improving the overall security of the DoD Information Network (DODIN).

3. Arms, Ammunition, and Explosives (AA&E) Security

The IS Directorate assesses physical security measures for sensitive conventional AA&E at contractor facilities. DCSA's contributions to the AA&E program include conducting Pre-Award Security Surveys and annual physical security inspections of U.S. contractor-owned, contractor-operated facilities that manufacture, test, store, and transport DoW's sensitive conventional AA&E.

- Scope: Facilities are categorized by Security Risk Categories (SRC I, II, III, or IV). Most AA&E facilities are uncleared (93), while a smaller subset (73) consists of cleared contractors with Facility Clearances.

4. Entity Vetting and Beneficial Ownership Analysis

Pursuant to 32 C.F.R. Part 170, the IS Directorate performs entity vetting in support of the DoW Cybersecurity Maturity Model Certification (CMMC) Program Office for CMMC Third-Party Assessment Organizations (C3PAO) for risks related to FOCI prior to Accreditation Body's approval of the C3PAO or reporting changed conditions. DCSA estimates it will be responsible for vetting ~275 companies annually with a 25-working day timeline.
Additionally, the IS Directorate is preparing its entity vetting mission to include provisions under Section 847 of the Fiscal Year (FY) 2020 National Defense Authorization Act (NDAA). This mission involves conducting analysis, mitigation, and management of FOCI and beneficial ownership risks for certain pre-award DoW contracts exceeding $5 million.

These efforts support the Office of the Under Secretary of War for Intelligence and Security (OUSW(I&S)), Office of the Under Secretary of War for Acquisition & Sustainment (OUSW(A&S)), and Office of the Under Secretary of War for Research and Engineering (OUSW(R&E)). By enabling the protection of DoW supply chains, the IS Directorate plays a critical role in reducing DIB FOCI risks.

5. Controlled Unclassified Information (CUI) Safeguarding
The IS Directorate supports the safeguarding of CUI. These requirements include:

- Delivering comprehensive security education, training, and awareness programs on CUI protection and management to both DoW personnel and contractors, collaborating with USW(I&S) and Center for Development of Security Excellence.
- Ensure consistent implementation of security policies across DoW Components.
- Administer the DoW CUI Program for classified contracts with CUI requirements and provide security assistance to DoW Components in defining CUI requirements, thereby establishing and maintaining essential security standards.

B. DoW Insider Threat Management and Analysis Center (DITMAC):

The DITMAC provides an enterprise level, integrated capability to collect and analyze information to support insider threat deterrence, detection, and mitigation within the DoW. The program gathers, integrates, reviews, assesses, and responds to information derived from DoW Insider Threat hubs, industry insider threat reporting, counterintelligence (CI), security, cybersecurity, civilian and military personnel management, workplace violence, anti-terrorism risk management, law enforcement, and other sources as necessary and appropriate to identify, persons of concerns, coordinate risk mitigation and management, and counter insider threats to DoW personnel, information technology, and facilities. The

DITMAC further supports the 43 DoW component insider threat hubs by providing enterprise services which include a Behavioral Threat Analysis Center composed of a wide range of subject matter experts, geographically dispersed insider threat representatives which support installations and the NISP, assessments and professionalization of insider threat personnel and programs, and management of requirements for integrated systems.

C. Training Directorate:

1. Security Training (ST) Directorate

As the Security Training, Education, and Certification functional manager for the DoW, the ST Directorate provides security education, training, and certification products and services to the DoW, other federal agencies, and industry under the NISP. Leveraging agile delivery platforms across three locations, the ST Directorate offers accessible learning options including instructor-led courses, online courses, virtual instructor-led courses, certifications, online modules, webinars, videos, toolkits, and job aids. The ST Directorate also develops and manages the Security Professional Education Development Certification Program, offering National Commission for Certifying Agencies accredited professional certifications across multiple security disciplines with access to testing centers worldwide. This program professionalizes the security workforce by establishing common competencies that promote interoperability, facilitates professional development, and standardizes training. Across three schoolhouses, the ST Directorate provides curricula for a wide variety of audiences including the defense security enterprise, cleared industry, select federal agencies, and DCSA Security professionals supporting the NISP and Personnel Vetting missions. The ST Directorate sustains a comprehensive catalog of security training offerings aligned to current security policy.

2. National Center for Credibility Assessment (NCCA)

The NCCA is the sole provider responsible for providing education and training in credibility assessment, as well as auditing the quality assurance programs of agencies to ensure compliance with federal standards. Additionally, it provides oversight and guidance for research, development, testing and evaluation of credibility assessment equipment and protocols within the federal government. The NCCA services 29 federal partner agencies, conducting three 12-week initial polygraph examiner training courses per year and multiple continuing education courses, to include required countermeasures training. The NCCA has the oversight responsibility to ensure federal programs consisting of approximately 1,000 polygraph examiners conduct their examinations in accordance with federal and agency policies and requirements. These federally trained examiners conduct more than 106,000 screening, operational, and criminal specific examinations per year.

D. Counterintelligence (CI) Analysis Directorate:

The CI Analysis Directorate identifies, assesses, and disrupts foreign intelligence entity threats to DCSA, the trusted workforce and the cleared national industrial base, including its critical technologies, supply chains, and personnel. CI agents work extensively with companies and other U.S. government agencies to swiftly and efficiently identify, share, and refer actionable threat information in coordination with the IS Directorate. The CI Analysis Directorate conducts all-source analysis assessing FOCI related to contractors/sub-contractors pursuing classified contracts as well as certain DoW contracts exceeding $5 million in accordance with Section 847 of the FY 2020 NDAA. The CI Analysis Directorate assessments inform

the development of DCSA's comprehensive FOCI mitigation strategy countering identified foreign threats related to the prospective contractor. CI employs cyber tools and analytical processes to address cyber-based threats to cleared contractors. The CI Analysis Directorate's expertise in cyber, CI, and analysis fosters a work center capable of implementing innovative solutions to identify, assess, and neutralize the threats related to CI from foreign adversaries.

E. Personnel Security:

1. Personnel Security Investigations for Industry (PSI-I)

The centrally managed PSI-I budget is used to execute requests for initial background investigations and continuous vetting (CV) for all contractor personnel security clearances performing classified missions or developing critical technology in support of DoW components and 35 other federal agencies participating in the NISP. Budgetary requirements are based on anticipated industry investigations by case type, and CV related products in accordance with the DCSA Working Capital Fund published rates and adjusted to include costs on a case-by-case basis for Triggered Enhanced Subject Interviews and Reimbursable Security Investigations. The budget requirements for PSI-I are rising due to modifications in security policy including the Trusted Workforce 2.0 requirements for initial vetting and CV. Additionally, there are increases in investigation pricing, and growing demand for research, development, and acquisition programs supporting the DoW components and Federal agencies participating in the NISP.

2. Personnel Security Management Office for Industry (PSMOI)

The PSMOI provides personnel security support and oversight of NISP contractor personnel by PSI-I mission, granting interim determinations for national security clearances. It provides personnel security oversight of industry personnel having access to U.S. and foreign classified information. It manages approximately 1.3 million cleared contractors during the lifecycle of their time having access to classified information.

3. Security Review Proceedings (SRP) Reforms

The SRP executes the mandated reforms, which require the need for legal sufficiency reviews (LSRs) of all proposed letters of intent and statements of reasons (LOI/SOR). and letters of denial or revocation (LOD/LOR). It also provides personnel an opportunity to engage in a personal appearance before the final determination. The responsibility for this program lies with DCSA, as outlined in the memorandum signed on April 6, 2023, by the Under Secretary of War for Intelligence and Security USW(I&S)). This program applies to eligibility determinations for civilian personnel, military members, and contractor personnel requiring sensitive compartmented information (SCI) eligibility. It has transformed the Department's process for determining eligibility for access to classified information or to occupy a national security position. Personnel are given an opportunity to engage in a personal appearance before a decision is made to issue a LOD/LOR. The program implements LSRs of all proposed LOIs/SORs and all LODs/LORs before a decision is made to issue any such documents.

4. International Military Student (IMS) Screening

The IMS program provides centralized screening and vetting of IMS training in the U.S. because of the December 2019 Pensacola Naval Air Station Shooting. The DoW procedures for IMS vetting were established in accordance with Section 1090 of the FY 2021 NDAA. Budgetary requirements are based on the anticipated number of initial and continuing or periodic reviews. The IMS population is vetted through the Expedited Screen Protocol products and services offered by the DCSA Working Capital Fund. This capability optimizes intelligence data sources, other classified and unclassified U.S. Government data systems and human analytics to provide multi-point identity detection of potential foreign risks and high risk, which includes association with international terrorism, foreign intelligence entities, and international crime.

A. Management Headquarters:

DCSA Headquarters enables mission execution through centralized management of strategic enterprise priorities to provide direct service support to field operations. These functions provide critical common services support devoted to the daily operations by enabling industry's delivery of uncompromised capabilities and leveraging advanced technologies and innovation. The support consists of financial management, contract procurement operations, human capital management, legal advice and assistance through general counsel and inspector general, strategic communications, security, maintenance of facilities, strategic management, logistical, property management, and equal employment opportunity.

1. Facilities and Physical Security

DCSA acquires, modifies, and sustains physical space as well as provides comprehensive, compliant, and responsive solutions for the protection of its assets which include personnel, facilities and information as part of the agency mission. This support includes protection of DCSA's assets while also fostering an agency-wide culture of security and accountability awareness. This capability is supported by the Logistics Management Office (LMO) that conducts facility acquisition, maintenance, property management, and logistical management and the Security Programs Office (SPO) that provides security management, access control, insider threat, emergency management, and antiterrorism/force protection support for approximately 165 DCSA CONUS/OCONUS (Alaska/Hawaii/Puerto Rico/Guam) field offices. The LMO and SPO programs ensure proper planning to address the evolving physical space requirements associated with mission expansion and transfers, which encompass compliance with Sensitive Compartmented Information Facility standards, maintenance and security improvements for existing physical spaces, government vehicle leasing, and a regional field structure to optimize efficiencies and mission accomplishment.

2. Enterprise Operations (ATH) (Formally OCIO)

The ATH is responsible for the operations and oversight of all IT infrastructure, platforms, tools, systems and investments. The ATH provides enterprise IT services to DCSA's workforce of nearly 10,000 staff in 165 locations that enable DCSA to carry out its personnel security, industrial security, counterintelligence, and security training mission areas. The ATH provides customer support, desktop computing, mobile computing, collaboration, telecommunications, secure network communications, and infrastructure and platform hosting capabilities across three networks: Non-classified Internet Protocol (IP) Router Network (NIPRNet), SIPRNet, and Joint Worldwide Intelligence Communications System (JWICS). One of the primary focuses of ATH is to enhance the DCSA Customer

Experience through standardization. The ATH provides DCSA's Enterprise Program Acquisition Executive (PAE) with secure networks, infrastructure, platforms, and tools that enable the PAE to provide a portfolio of applications that supports the DCSA mission. The ATH is tasked to provide the best secure IT services available in a cost-effective manner to meet DCSA's business operations and customer needs. The ATH provides wide-ranging network protection and security for the DCSA network and information systems. The ATH is responsible for developing, maintaining, and facilitating the implementation and integration of DCSA IT architecture and services with a focus on resiliency and responding to a wide range of agency requirements to optimize mission and enterprise performance with the enterprise goal to develop a secure digital ecosystem. The ATH provides robust monitoring capability with access and insight into all DCSA mission and business systems. This mission is accomplished by continuously implementing enterprise capabilities, while decommissioning inadequate infrastructure, platforms, tools and systems, to strengthen and optimize the enterprise IT foundation for the DCSA mission success across all goals. The ATH is responsible for implementation, execution, and oversight of all IT directives and mandates from Executive Orders, Secretary of War, DoW Chief Information Officer, Office of Management and Budget, National Institutes of Standards and Technology, Defense Information Systems Agency, National Security Agency, Committee on National Security Systems, Office of the Director of National Intelligence, and Joint Forces Headquarters DODIN. The DCSA IT strategy and budget submission aligns to the DoW's Capability Planning Guidance.

3. Personnel Security Investigations (PSI)

The DCSA PSI budget funds personnel vetting costs associated with initial background investigations, continuous vetting (CV), and adjudications for DCSA government personnel. The DCSA PSI budget requirements are based on personnel requirements, clearance requirements, changes in Trusted Workforce policy, and personnel vetting rates**.**

B. Program Acquisition Executive (PAE) (formerly the Program Executive Offices (PEO)

The PAE provides a portfolio of enterprise-wide mission IT system programs designed to implement best practices and agile methodologies delivering innovative IT solutions. This approach enhances the DCSA broad-spectrum of National Security capabilities to better serve the DoW, the U.S. Government, and cleared industry. Essential programs encompassed within the PAE include:

1. Polygraph+/ (Next Gen Polygraph)

The Polygraph+/Next Gen Polygraph program is a transformative effort to modernize federal polygraph and credibility assessment technologies, enhancing accuracy, reliability, usability, and traceability. Current polygraph technology is aging, susceptible to countermeasures, and lacks the sophisticated data analytics necessary for today's complex security environment. Polygraph+/Next Gen Polygraph will revolutionize credibility assessment through incorporating non-invasive advancements in medical-grade sensing with on prem and cloud-based advanced data analytics, bundled together in the first purpose-built credibility assessment system designed specifically for US Government applications. This program will significantly enhance national security by providing more accurate and reliable credibility assessments, enabling faster and better-informed decisions in support of an enterprise of federal government stakeholders and partners.

2. Defense Security Analysis and Threat System (DSATS)

In FY 2027 DCSA will sunset the legacy DITMAC System of Systems (DSoS) Increment I on the SIPRNet and JWICS networks for reporting and tracking insider threat cases; and will sustain DSATS on the NIPRNet, SIPRNet and JWICS networks. Sustainment includes licenses, security patching, defect resolution, user management, training, operations, and help desk support to multiple DoW and Intelligence Community entities. Additionally, sustainment of the underlying system architecture, hosting platform, and data layer are planned to ensure a safe and secure system and data integration.

3. National Industrial Security System (NISS)

The NISS provides industrial security capabilities that include serving as the system of record for facilities clearance information and industrial security oversight, improved risk assessment and mitigation related to contractors under FOCI, and identification of clearance requirements for contracting companies. NISS funding supports software sustainment activities to include system updates to meet emerging DoW and DCSA policies such as migration to new cloud environments, data sharing with DoW stakeholders. It also encompasses cybersecurity updates to remain compliant with emerging accreditation standards including Security Technical Implementation Guides, application and platform configurations continuous monitoring along with annual security reviews for NIPRNet and SIPRNet, software licenses and system vulnerability assessments, and mitigation plans. Current NISS legacy system capabilities and workflows will be integrated into a single Increment II (NI2), a modernized IT system that provides a strong security presence and offers users a singular point of access to all DCSA Industrial Security workflows. The NI2 system will meet current performance characteristics and incorporate emerging technologies & capabilities to automate and support the Industrial Security mission.

4. National Background Investigation Services (NBIS)

The NBIS is being developed as an end-to-end enterprise information system architecture and data strategy for migrating and modernizing the Office of Personnel Management legacy IT systems supporting the initial investigation and continuous vetting (CV) of DoW and Federal Agencies' personnel. In support of the Trusted Workforce 2.0 implementation plan, DCSA will complete transition to a unified, secure cloud-based infrastructure that addresses the new three-tier clearance process requirements while providing customers with faster access to clearance decisions and stronger data protection. NBIS leverages DoW's cybersecurity technologies, processes, and capabilities to protect personal data and investigative information for government civilians, military personnel, and contractors. It supports the distributed adjudication processes with built-in security, active governance structure, and a new national security culture based on process improvements, artificial intelligence, machine learning and change management. The impact of NBIS has also created a transformative catalyst in DCSA's personnel vetting mission for the implementation of efficiencies that will streamline workflows leading to reduced case inventory and improved timeliness. The NBIS goals directly align with the Administration's priority to increase the speed of hiring talent into the trusted workforce and facilitate the mobility across the federal government.

5. Portfolio Acquisition Executive Data Management (PAEDM) Formally known as Integrated Security Data Services (ISDS)

The PAEDM is implementing Federal and DoW Data Strategies and DCSA's modernization and efficiency objectives of DCSA for common Data Services. The PAEDM will integrate disparate data sources into a cloud-based capability to improve identification and mitigation of risks while ensuring compliance with data governance, privacy, and security regulations. The PAEDM will continue to build on its Authorized to Operate Minimum Viable Product Capabilities with four provider data sources as a unified data ecosystem supporting all DCSA mission domains. The PAEDM will bolster national security by empowering data-driven decision-making and providing robust support for key programs such as DSATS, NBIS, and NISS. This initiative will facilitate a more proactive and informed security posture by enabling the agency to meet any mission or business need through enhanced access to and analysis of its data holdings. The PAEDM will leverage modern technology, integrated with standardized approaches and best practices to deliver capabilities with quality, speed, and efficiency.

6. Security Education & Training Systems (SETS)

The SETS provide end-to-end learning services enabling accessibility of security education training and content for DCSA's mission systems and the broader government workforce. They serve the DCSA learning community across various sectors, including government, industry, and public workforces, fostering unity throughout the DCSA enterprise. The SETS sustain current operations while beginning the transition to a secure data centric training platform that integrates modernized learning management, content delivery, and analytics capabilities. The modernization scope includes migration to a Federal Risk and Authorization Management Program, adoption of Total Learning Architecture standards for interoperability, automation of learner tracking and reporting, and implementation of single sign-on with role-based access. The SETS enables identification and implementation of the modernized ecosystem, aligning to agency strategy, technology, and data principles, and leveraging Scaled Agile Framework methodology to drive transformation. The program's end state is a comprehensive platform supporting the full education, training, and learning management mission with improved user experience, scalability, and data-driven decision making.

3. Fact-of-Life Changes $0

a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $1,113,055

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $1,113,055

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $1,113,055

6. Price Change $10,600

7. Functional Transfers $9,963

a) Transfers In $17,163

1) Counterintelligence Program $1,320
Detail at a higher classification.

Breakout:
+$1,320 thousand mission funds

2) Program Acquisition Executive $15,163
Detail at a higher classification.

Breakout:
+$6,554 thousand mission funds
+$8,609 thousand civilian labor cost
(FY 2026 Baseline: $0 thousand; 0 FTEs; +55 FTEs)

3) Training Directorate $680
Detail at a higher classification.

Breakout:
+$680 thousand mission funds

b) Transfers Out ..... $-7,200

1) Applied Research Center for Intelligence and Security and Critical Technology Protection and Integration Center $-7,200
Transfers funding for the Applied Research Center for Intelligence and Security and the Critical Technology Protection Integration Center to the Office of the Under Secretary for Intelligence and Security to properly align the budget with the requirement and program management functions and ensuring alignment with broader DoW intelligence and security priorities.
(FY 2026 Baseline: $7,200 thousand)

8. Program Increases $128,872

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $128,872

1) Civilian Pay $7,375
Civilian Compensation
Increase of 5 FTEs to develop, maintain, and provide training for Defense Agency and Field Activity operations security (OPSEC) program managers and practitioners as well as aid in their OPSEC program development, review, assessments, and surveys enhancing overall security for the DoW’s capabilities and missions that meet established standards while also complying with applicable policies and regulations.

Increase of 5 FTEs to establish a research, development, and acquisition program for the transformation of the DoW polygraph examination capabilities to improve the detection of deception and defeat countermeasures through the development and implementation of artificial intelligence and machine learning capabilities that facilitate improved credibility determinations in support of Trusted Workforce policy.

Increase of 25 FTEs to expand capacity for the security review proceedings mission that meets all DoW requirements for timeliness and due process in support of determinations for the denial or revocations of a DoW civilian, military, or contractor access to classified information.

Increase of 6 FTEs for oversight and administration of the National Industrial Security Program to ensure the protection of critical technology development from compromise by foreign adversaries and vendor protection of classified information in accordance with all applicable policies and regulations.
(FY 2026 Baseline: $233,445 thousand; 1,351 FTEs; +41 FTEs)

2) Counterintelligence Analysis $1,500
Increase funds contractor support to DCSA efforts to develop, test, and implement advanced technology for the improvement of credibility assessments in support of Trusted Workforce policy.
(FY 2026 Baseline: $78,762 thousand)

3) Enhanced Performance Awards $19,612
Increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $233,445 thousand)

4) Headquarters Activities $3,000
Funds the acquisition and delivery of an end-to-end financial management IT system to consolidate the planning, programming, budgeting, and execution process to a single cloud-enabled capability that provides automation for improved workflows and support to audit readiness.
(FY 2026 Baseline: $33,093 thousand)

5) Industrial Security $18,336
Increase to add contractor support for the pre-award foreign ownership, control, or influence analysis of all DoW commercial contracts valued at $5 million or more.

(FY 2026 Baseline: $174,387 thousand)

6) National Industrial Security System.....$12,555
Expands capacity and addresses increased costs for capabilities transitioning from research and development to the operational baseline supporting the Industrial Security Mission forforeign ownership, control, or influence (FOCI) analysis of all cleared contracts, issuance of facility clearances, and pre-award FOCI analysis of all DoW commercial contracts valued at $5 million or more. Delivers a capability for government personnel across the Defense Security Enterprise to schedule and coordinate visits to cleared contractor facilities creating efficiency in National Industrial Security Program coverage and improving coordination of efforts to protect critical technology and data from compromise by foreign adversaries.
(FY 2026 Baseline: $17,339 thousand)

7) Personnel Security Investigations for Industry $64,400
Increase allows DCSA the ability to pay for an additional 24,000 Tier-3 background investigations and 39,000 Tier-5 background investigations in addition to the associated continuous vetting fees for new cleared contractors supporting classified missions or developing critical technology for DoW.
(FY 2026 Baseline: $409,145 thousand)

8) Security Training.....$2,094
Increase for planned growth to implement the Operations Security (OPSEC) Support Element to train 4th Estate OPSEC program managers and practitioners in the national capital region in OPSEC program development, reviews, and assessments.
(FY 2026 Baseline: $40,952 thousand)

9. Program Decreases .....$-226,516

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-226,516

1) Federal Employee Retirement System.....$-1,204
The reduction reflects updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department’s required contributions for FERS regular, Revised Annuity Employees and Further Revised Annuity Employees. The decrease aligns funding with current long-term

cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government-wide retirement funding requirements.
(FY 2026 Baseline: $233,445 thousand)

2) Contract Services Reduction.....$-166,599
The reduction of funding for contract services is undertaken indirect support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.

3) Management Headquarters Activities .....$-346
Reduction of contractor support and contracts supporting agency business functions.
(FY 2026 Baseline: $33,093 thousand)

4) National Background Investigations Services .....$-26,474
Reduced costs for sustainment due to decommissioning of legacy systems.
(FY 2026 Baseline: $178,120 thousand)

5) Personnel Security Investigations for Industry .....$-30,892
Reduced cost requirements for initial investigation and continuous vetting of cleared contractors based on static personnel vetting rates and decreased contractor support requirements for the Department of War.
(FY 2026 Baseline: $409,145 thousand)

6) Facilities and Physical Security.....$-1,001
Supports reduced funding warehouse facilities in support of the Secretary of War initiative to reduce lease cost and realign resources toward strategic priorities.
(FY 2026 Baseline: $28,783 thousand)

FY 2027 Budget Request $1,035,974

IV. Performance Criteria and Evaluation Summary:

1. Industrial Security (IS) Directorate:

A. NISP Performance Measure Protection of Classified Information

Comments: The Defense Counterintelligence and Security Agency administers the National Industrial Security Program on behalf of the Department of War and 35 Federal Executive Branch Agencies with industrial security services agreements with the Department of War for 12,938 cleared facilities across 11,430 companies that access, and safeguard classified information in the performance of their government contracts. The Defense Counterintelligence and Security Agency provides oversight to geographically dispersed cleared contractors across the United States that range from small consulting firms with part-time, inexperienced security managers to large manufacturing and research and development plants with professional security staffs. Some larger facilities possess vast amounts of classified information, averaging 4,770 classified Information Technology systems, and have very complex security requirements. The Defense Counterintelligence and Security Agency oversees an estimated 95% of United States Government classified requirements under the National Industrial Security Program and acts as the Cognizant Security Office.

The Industrial Security Directorate regularly collaborates with industry and individual members of the Defense Industrial Base addressing a wide range of issues. These interactions support the Defense Counterintelligence and Security Agency's role as the Cognizant Security Office for the Department of War in protecting classified information accessed or possessed by cleared facilities. The Defense Counterintelligence and Security Agency has implemented significant improvements in its processes, from the initial assessment and issuance of Facility Clearances necessary for handling classified contract requirements to ongoing monitoring and field oversight. In Fiscal Year 2025, the Defense Counterintelligence and Security Agency reduced the overall timelines for granting Facility Clearances and decreased the total inventory of pending Facility Clearances cases to 247 down from 307 in Fiscal Year 2024 and 482 in Fiscal Year 2023. The Industrial Security Directorate conducts risk-based evaluations to determine the trustworthiness of a facility and determine whether a Facility Clearance can be issued, enabling access to classified information for government contract performance. By applying sound risk management principles, the Industrial Security Directorate ensures that the level of engagement with each facility is appropriate.

The core of National Industrial Security Program is the Security Review conducted by the Defense Counterintelligence and Security Agency as the Cognizant Security Office. These reviews are designed to ensure that the industry complies with requirements for safeguarding classified information in classified contracts. Security Reviews evaluate and rate cleared contractors' security programs to assess compliance with Title 32 of the Code of Federal Regulations, Part 117, using a risk-based approach to determine whether appropriate mitigation measures are in place to minimize the potential compromise, loss, or damage of classified information. The Defense Counterintelligence and Security Agency has increased the number of Security Reviews through continuous process improvements and the implementation of updated Title 32 of the Code of Federal Regulations, Part 117 policies. Currently, the Defense Counterintelligence and Security Agency reaches approximately 49% of the 9,370 facilities under the Department of War's cognizance that require annual assessments. As the Defense Counterintelligence and Security Agency works to identify and address risks across industry, it refines its oversight methodology, including the Security Review and rating process. This

approach led to the introduction of a new Security Review score, developed in collaboration with industry and government stakeholders, to effectively implement the effective application of the five-tier rating system mandated by policy. Additionally, the Defense Counterintelligence and Security Agency performs Cyber Operational Readiness Assessments for contractors with approved Secret Internet Protocol Router Network information systems on behalf of the Department of War.

The following metrics track engagement with industry across a variety of activities and report on various meaningful outcomes of the activities.

FY 2025 Actions	
Security Reviews	4,591 (approximately 49%)
Advise and Assist Actions	538
NISP Classified Information Systems	4,770
Contractor Classified IT Systems Authorized	2,109
Cyber Operations Readiness Assessments (CORA)	60
Facility Clearances Issued	1,132
FCL Change Conditions Processed	539
CMMC, Certified Third Party Assessor Organizations (C3PAO) Vetting	99
Vetting Strategic Capital Companies for OUSW(R&E)	14
Pre-award security surveys (PASS) conducted	170
Annual Arms Ammunition & Explosive Facility Inspections	63
Foreign Visit Requests Processed	5,676
Certified Foreign Visitors Processed	16,613
SAP Contracts Overseen	100
Security Reviews of SAPs	49
CUI Briefing Conducted	25
Personnel Briefed on CUI	8,175
CUI RFIs Completed	165
New CUI Products Delivered	11
FY 2025 Findings	
Total Vulnerabilities Identified	911 / 794 Mitigated
Total Administrative Findings Identified	11,385
Security Violations Processed	831
Cases Involving Loss/Compromise of Classified Information	569 completed 102 pending
Number of Invalidations/Revocations	24/0
Number of Revalidations	25

2. Enterprise Training:

A. Security Training Directorate (ST)

Performance Measure #1: Requested Seats for FY 2025 scheduled courses at the Center for Development of Security Excellence

The number of student seats available (throughput capacity) for Instructor-led classroom and virtual Instructor-led courses to the student seats requested by the security community in FY 2024. During FY 2024, the CDSE continued with a dual track of in-person and virtual instructor-led training offerings to manage requirements and maximize access to security training.

Seats Available in Courses Scheduled	Oct-24	Nov-24	Dec-24	Jan-25	Feb-25	Mar-25	Apr-25	May-25	Jun-25	Jul-25	Aug-25	Sep-25	Total
Monthly Available Seats as Scheduled	485	354	514	121	495	194	321	714	239	210	605	312	4564
Requested Total Seats	423	168	213	107	211	95	192	340	181	128	423	157	2638
% of Seat Available to Requested	87%	47%	41%	88%	43%	49%	60%	48%	76%	61%	70%	50%	58%

ST Performance Measure #2: Required Active Course Inventory.
This measure provides the actual number of active training courses (virtual and instructor-led, eLearning, and short format learning) in the inventory compared with the total number of courses in maintenance due to new/updated policy, updated Defense Security Skill Standards, changing security landscape, new mission areas and/or security community requests. The goal is to ensure all courses continue to be current, accurate, and relevant with the current security environment which requires continuous maintenance and sustainment of courses. The emphasis is on online learning products instead of classroom training, where possible, to meet the exponential growth in the demand for products.

Active Products	Oct- 24	Nov-24	Dec- 24	Jan- 25	Feb- 25	Mar- 25	Apr- 25	May- 25	Jun- 25	Jul- 25	Aug- 25	Sep-25
Active Products	1190	1190	1189	1189	1190	1192	1194	1196	1195	1195	1195	1196
Products in Development	116	122	135	136	127	125	119	108	122	117	106	74
% of Total Inventory Development	10%	11%	12%	12%	11%	11%	10%	10%	11%	10%	9%	7%

3. Counterintelligence (CI) Analysis Directorate:

A. CI Performance Measures:

These measures describe the annual processing of intelligence information reports and the relevance of analytic products to the community. The Counterintelligence Analysis Directorate identifies threats to personnel, facilities, information, and technology resident in the cleared United States industrial base, the Defense Counterintelligence and Security Agency enterprise, and is charged to identify threats targeting the federal government's trusted workforce. In all three instances, the Counterintelligence Analysis Directorate articulates those threats to stakeholders and action agencies for potential mitigation, investigative, or operational consideration. The Defense Counterintelligence and Security Agency continually updates and aligns activities to identify, assess, and disrupt National Intelligence Priorities Framework actors targeting critical defense technologies, the Defense Counterintelligence and Security Agency, and the federal government's trusted workforce. Production targets are projected to remain consistent with prior years: (1) release at least 90% of the annual intelligence information report production target and (2) at least 95% of all analytic products produced will address National Intelligence Priorities Framework Counterintelligence Tier 1-3 countries and non-state actors – Foreign Intelligence Entities.

4. Personnel Security Investigation – Industry (PSI – I):

A. The PSI-I budget is based on total number of forecasted investigations, by case type, and adjustments to include costs on a case-by-case basis for Triggered Enhanced Subject Interviews and Reimbursable Security Investigations rate. The DCSA administers requests for initial and Continuous Vetting for contractor personnel to include Tier 5A for Top Secret/SCI, and Tier 3A for Secret and Confidential clearances. To manage risk in enterprise insider threat mitigation, the PSI-I program budget funds Continuous Vetting on an estimated one million cleared contractors using Continuous Vetting related investigative products and services, to include time-based checks and alert resolution. The metrics evaluate the number of personnel serviced by their multiple lines of business when executing the PSI-I budget.

	FY 2024	FY 2025	FY 2026	FY 2027
Personnel Serviced Cleared Contractors	1,044,898	1,058,481	1,072,241	1,086,179
Initial Clearance Conducted	99,471	89,406	94,609	96,611
Continuous Vetting	113,531	115,006	116,501	118,014

B. The International Military Students budget is based on total number of forecasted screenings, by case type, and the DCSA rate to perform the screenings. The Defense Security Cooperation Agency administers requests for International Military Students. The metrics evaluate the number of International Military Students when executing the budget.

	FY 2024	FY2025	FY 2026	FY 2027
Initial	16,914	17,232	17,039	17,062
Continuous Review	43,933	33,752	38,047	38,577

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**1,366**	**1,432**	**1,530**	**66**	**98**
U.S. Direct Hire	1,366	1,432	1,530	66	98
Total Direct Hire	**1,366**	**1,432**	**1,530**	**66**	**98**
Civilian FTEs (Total)	**1,179**	**1,351**	**1,447**	**172**	**96**
U.S. Direct Hire	1,179	1,351	1,447	172	96
Total Direct Hire	**1,179**	**1,351**	**1,447**	**172**	**96**
Average Annual Civilian Salary ($ in thousands)	**192.1**	**172.8**	**187.5**	**-19.3**	**14.7**
Contractor FTEs (Total)	**595**	**538**	**552**	**-57**	**14**

Personnel Summary Explanations:

The net change from FY 2026 to FY 2027 is +96 FTEs.
The net increase of +96 Direct FTEs reflects the transfer in of +55 FTEs in support of Counterintelligence Analysis (Details at a higher classification)
+25 FTEs to support the expand capacity to the Security Review Proceedings Reform
+5 FTE supporting the Operations Security Support Element
+5 FTEs supporting Polygraph Next effort dedicated to introducing AI capabilities
+6 FTEs to improve DCSA efforts for oversight and administration of the National Industrial Security Program

I. Description of Operations Financed:
Cyberspace Activities

The Defense Counterintelligence and Security Agency (DCSA) Cyberspace activities deliver highly efficient and effective services that safeguard Agency information assets and support its national security missions. These missions encompass industrial security oversight, compliance, security education, and personnel vetting. This mission is accomplished through a comprehensive IT Modernization initiative centered on the enterprise-wide implementation of a Zero Trust architecture. By leveraging risk-informed decision-making and a focus on enterprise integration, these activities enhance mission collaboration and ensure that users have secure access to critical information and services. The use of advanced technologies, such as Artificial Intelligence (AI) and automation, directly improves the resilience and integrity of our core mission functions, allowing mission systems to adapt to evolving threats. This framework establishes clear accountability and governance, providing tangible mission assurance to stakeholders through services like continuous vetting capabilities of Background Investigation Services and the Trusted Workforce Interoperability Gateway (TWIG). This resilient security posture protects critical missions across both traditional and cloud environments at all classification levels.

1) Cyberspace Activities $6,105
The funding increase addresses equipment maintenance contracts ($4,568 thousand). DCSA's expansion of underlying IT infrastructure and increased user demand create an expanded attack surface for malicious

actors, requiring increased funding to conduct risk management and to ensure prevention of cyber-attacks against the cloud infrastructure, protection of critical data, mitigation of supply chain vulnerabilities, and improvement of response and recovery capacity across the lifecycle of cybersecurity equipment. The funding increase also addresses equipment purchases ($1,537 thousand) of hardware, software, product maintenance, and other IT-related products and services supporting cybersecurity requirements on the unclassified and classified enclaves.
(FY 2026 Baseline: $10,558 thousand)

Fiscal Year 2027 Budget Estimates

Defense Contract Management Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DCMA	1,522,859	20,443	-111,373	1,431,929	6,450	24,609	1,462,988

I. Description of Operations Financed:

The Defense Contract Management Agency (DCMA) ensures entrusted taxpayer resources are used to rebuild our military and supports the pre-contract award for delivering weapons systems to the Warfighters. rates under the authority of the Under Secretary of War for Acquisition and Sustainment (USW(A&S)) as the Principal Staff Assistant. As authorized by Department of Defense Directive 5105.64 and Federal Acquisition Regulation (FAR) Part 42.302, the DCMA mission is to perform Contract Administration Services (CAS) and Contingency Contract Administration Services (CCAS) for the Department of War (DOW), other federal agencies, and international partners. This mission ensures taxpayers get what they pay for and enables the DOW to verify financial statements meet established standards to prevent fraud and ensure regulatory compliance. The DCMA is the centralized force multiplier for standardized inspection and acceptance of combat weapon systems and payments to the Defense Industrial Base (DIB). DCMA's acquisition and support professionals are the Department's critical sensor network, providing an essential link to the DIB through 663 sites in 12 countries. Across a global footprint in 45 countries, they provide administration to over 19,000 contractors, managing approximately 306,000 active contracts valued at $7.79 trillion. This unique position delivers unparalleled insight to ensure the timely delivery of warfighting equipment, safeguard taxpayer dollars, and support a healthy industrial base, directly contributing to the strength and readiness of our armed forces.

The CAS and CCAS workload performed by the workforce enables Military Departments (MILDEPs) and buying commands to increase the on-time delivery and procurement of critical warfighting equipment at a fair and equitable cost. The DOW weapon system and materiel investments are key factors that drive DCMA workload throughout the CAS and CCAS acquisition lifecycle.

The DCMA consistently generates a positive annual return on investment (ROI) for DOW and taxpayers significantly, greater than the DCMA’s annual budget. For every dollar invested in DCMA for FY 2025, DCMA efforts resulted in a ratio of approximately 8.3:1. The DCMA activities such as litigation, cost and pricing actions, cost rate settlements, workers’ compensation claims, and Equal Employment Opportunity (EEO) settlements returned $9.24 billion to the Department in refunds, recovered costs, forward (future) pricing rates, and negotiated price reductions. The DCMA has consistently produced a positive ROI for the past seven years, averaging a return of $3.95 for every $1 invested.

Alignment with the Department of War priorities

The DCMA directly supports DOW priorities to enable DOW to remain the world's preeminent fighting force. The DCMA mission and responsibilities align with National Defense Strategy (NDS) efforts to; Defend the United States (U.S.) Homeland and supercharge the U.S. DIB. DCMA workforce performs acquisition life-cycle management activities from pre-award through contract closeout, which include:

- Controlling contractor indirect costs by establishing forward and final rates, resolving claims and disputes, and making final determinations on cost accounting standard audits.
- Providing negotiation intelligence by providing business system compliance for contract accounting, property management, material management, earned value and purchasing systems.
- Influencing contract negotiations by making commercial item determinations and providing insight into contract cost and pricing, approximately 85% of the DCMA workforce are acquisition professionals including production, quality assurance, manufacturing, contracting, and engineering personnel performing the mission globally.
- Administering DOW awarded contracts through the execution of contract modifications; cost monitoring; managing ground and flight operations, delivery schedules, and government property; providing transportation authorizations for in-plant material; accepting and authorizing payments for contracted goods and services; recovering expiring and cancelling funds; and contract close-out.

The DCMA is at the forefront of executing the DOW Security Cooperation mission to build and sustain Allied security interests and industrial capabilities collaboratively. Within the Security Cooperation community, the DCMA provides support to Foreign Military Sales delegated by the Service buying commands, Foreign Direct Commercial Sales contracts, and international agreements, which the DCMA directly aligns personnel to support Allies in critical locations in the U.S. and overseas.

FY 2027 Budget Priorities

The FY 2027 DCMA budget priorities are to implement DOW directives to optimize the value-added support to MILDEPs and buying commands; streamline processes to gain mission efficiencies; invest strategically in non-labor projects to maximize potential returns on investment; modernize legacy Information Technology (IT) systems; and leverage advanced IT for greater efficiencies.

Approximately 84% ($1,250.43 million) of the FY 2027 non-cyber budget request supports Agency personnel compensation for the direct funded full-time equivalent employees. The remaining 16% ($212.56 million) supports the DCMA workforce for critical requirements as: IT network and modernization, commercial tools, technical refresh and equipment sustainment; facility project renovations, sustainment, and leases; intragovernmental support for human resource and accounting services; mission travel; Ability One contract closeout and contractor support; equipment; permanent change of station (household goods storage); and supplies. The DOW continues to invest in new emerging programs and weapon systems. DCMA continues to leverage automation to effectively align its workforce with its workload and support current and future DOW investment growth most efficiently.

Personnel Compensation

The DCMA workforce is the most valuable asset for mission accomplishment. The DCMA will continue to assess the workforce and workload requirements to better align with the nation's demand and NDS while ensuring continued recruitment and retention of a high-caliber acquisition workforce. The DCMA has invested in an innovative initiative to model Operational Unit (OU) functional workload and utilize model output to inform OU workforce requirements and data-informed resourcing decisions. This developing and evolving approach continues to be instrumental in improving the DCMA allocation and alignment of the workforce with mission workload.

Blue List

In accordance with Executive Order (E.O.) 14307, "Unleashing American Drone Dominance," released on June 6, 2025, and the subsequent SECWAR Memorandum, "Accelerating U.S. Military Drone Dominance," published on July 10, 2025, the Blue List mission transferred from the Defense Innovation Unit (DIU) to the DCMA. DCMA continues to build out the capability to provide on-demand or marketplace drone equipment to the warfighter at the tactical edge.

The Blue List is a centralized digital platform to publish and maintain approved unmanned aerial system (UAS) components and systems, automate demand intake and triage, and provide end-to-end workflows for submissions, assessor reviews, and verification sampling in a role-based, secure, highly available, and scalable environment. It delivers management situational awareness through compliance tracking, analytics, artificial intelligence (AI) enabled search, and integrates with existing and future DOW systems such as procurement and training management, and leverages a modular, open architecture to rapidly iterate and scale across air, land, and sea domains as the program evolves.

The Blue List platform focuses on incremental development to deliver future scalability and DOW priorities.

Information Technology

The DCMA acquisition workforce relies on automation to enable and enhance communication capabilities with the commercial industry, the DOW acquisition community, and its customers. The DCMA executes an annual non-labor IT budget of approximately $77.4 million to maintain mission systems and resources, excluding cyber. In accordance with DOW guidance, the DCMA continues to integrate several major reform initiatives to prioritize IT efforts and improve its network environment for managing and optimizing business operations and the mission support infrastructure required to support the Warfighter. By fiscal year (FY) 2027, the Defense Information Systems Agency (DISA) plans to have completed the transfer/transition of the DCMA common-use IT to the Department of Defense Network (DoDNet), in accordance with the Fourth Estate Network Optimization plan. The DCMA continues to fund mission IT hardware, software, and other IT efforts within its baseline budget to sustain lifecycle replacements as required. The DCMA-funded IT non-labor costs increased beginning in FY 2025 due to the migration costs for the Fourth Estate Network Optimization reform initiatives. The DCMA modernization strategy supports the DOW IT Reform and Modernization initiatives to retire legacy software applications and continues to buy down accumulated technical debt.

Facilities

The DCMA facility rent/lease/agreement has a standard annual estimated cost of approximately $39 million for mission-critical requirements, with no trade-space for major course corrections. In FY 2027, the DCMA needs to build out two major secure spaces on DOW military installations (Carson, CA and Hanscom AFB, MA) to support programs associated with integrated deterrence efforts. The DCMA mission is to execute a new

strategic enterprise space plan in response to the "Return to In-Person Work" (RIPW) Presidential Memorandum and the NDAA for FY 2025. The DCMA space efficiency action plan will close and increase seating capacities at enduring sites to accommodate displaced employees (and reduce RIPW exemptions) in a progressive and targeted approach. As such, the FY 2027 space efficiency effort will focus on internal furniture reconfigurations, to the extent service providers (such as Military Hosts, GSA and UNICOR) can support increase seating capacities in several offices (for example, Garden City, NY; Fort Eustis, VA; and San Diego, CA). Finally, the DCMA continues to explore collaborations and partnerships with other DOW Agencies to improve space efficiency further and accommodate greater in-person work.

The FY 2027 request for the Defense Contract Management Agency includes $1,462,988 thousand of discretionary and $152,720 thousand of mandatory for a total of $1,615,708 thousand. The mandatory funds the renovation and modernization of existing office spaces in 50 Department of War installations. These funds will be used for crucial infrastructure projects, including roof and window replacements, energy-efficient electricity upgrades, safety repairs, HVAC system improvements, and building secure office spaces within existing facilities.

b) Decreases $0

Revised FY 2026 Estimate $1,431,929

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $1,431,929

6. Price Change $6,450

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $38,935

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $38,935

1) Compensation and Benefits - Performance Awards $14,622
This increase in funding strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent

that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $16,537 thousand; 0 FTEs)

2) DISA Reimbursable Telecomm Services $2,569
This funding increase will enable the procurement of necessary commodity Information and Technology services from the Defense Information Systems Agency. These services are required to continue the implementation of the Fourth Estate Network Optimization effort, directly supporting the modernization of network capabilities.
(FY 2026 Baseline: $53,423 thousand)

3) Foreign Nationals Indirect Hire $2
Funding increase is required to account for a slightly higher cost projection for more experienced and skilled Foreign national support.
(FY 2026 Baseline: $252 thousand)

4) Compensation and Benefits - Workforce.....$21,742
To ensure the defense industrial base can meet the nation's demands for its most advanced and sensitive security programs, DCMA is required to strategically expand its workforce to keep pace with production. The workforce increase directly addresses the projecting growth trends, escalating workload for Special Access and Sensitive Compartmental Information program growth. Ensures DCMA's ability to maintain and sustain the demand for essential contract administration, product acceptance, and quality assurance.
(FY 2026 Baseline: $1,216,162 thousand; 7,391 FTEs; +144 FTEs)

9. Program Decreases .....$-14,326

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-14,326

1) Compensation and Benefits - Federal Employee Retirement System (FERS) .....$-4,568
The reduction reflects updated FERS contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department's required contributions for FERS regular, Revised Annuity Employees and Further Revised

Annuity Employees. The decrease aligns funding with current long term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government wide retirement funding requirements.
(FY 2026 Baseline: $147,284 thousand; 0 FTEs)

2) IT Contract Support Services ..... $-4,629
Reduced funding supports the continued modernization of the Defense Contract Management Agency's network; funds are being realigned to procure necessary IT services from the Defense Information Systems Agency.
(FY 2026 Baseline: $18,153 thousand)

3) Efficiency - Contract Services -Management Professional Support Services ..... $-3,543
The reduction of funding for contract services is undertaken in direct support of the President’s executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $7,835 thousand)

4) Efficiency - Travel Budget ..... $-123
Reduces discretionary travel funding to align with Secretary of War's Highest priorities to strengthen readiness, modernize capabilities and sustain the Force.

(FY 2026 Baseline: $8,816 thousand)

5) Permanent Change of Station (PCS) Benefits ..... $-1,000
The reduction in PCS funding is due to the plan to offer less PCS moves and reallocate the funding to maintain a skilled workforce.
(FY 2026 Baseline: $3,500 thousand)

6) Facilities Sustainment, Restoration & Modernization By Contract ..... $-463
The decrease in funding is the result of the optimization of the Agency's footprint, partnering with the military services and achieving an efficient rehabilitation of the facilities, as well as consolidation costs.
(FY 2026 Baseline: $13,968 thousand)

FY 2027 Budget Request $1,462,988

IV. Performance Criteria and Evaluation Summary:

Summary

The DCMA is uniquely positioned and committed to provide independent and actionable acquisition insight to warfighter lethality, and support acquisition reform. The DCMA anticipates the Fourth Estate Network Optimization IT consolidation functions across the Defense Agencies and Field Activities will generate future efficiencies to include transition of IT services to DISA commodity support, together with reform efficiencies in the DCMA IT mission services, such as software, hardware telecom, and application costs. The DCMA space plan to right-size the facility footprint is integral to the Agency overall mission execution strategy to optimize resources, assist partner agencies in executing scarce resources wisely, and ultimately ensure the front-line warfighters get the equipment and services for maximum lethality when needed. In FY 2025 the DCMA delivered 304.4 million items valued at $96.1 billion to the warfighter. The DOW continually looks to the DCMA to assume greater mission responsibilities and perform an expanded role in the evolutionary improvement of government business and DIB partnerships. The DCMA has undertaken many business-related reforms, including making Commercial Items Determinations and Recommendations; expediting contract closeout activities (such as policy and legislative changes); focusing on office consolidation or directed relocations to military installations; and implementing AI and machine learning initiatives to improve DIB analytics for DOW decision-making.

DCMA is a critical stakeholder in the DOW effort to achieve the NDAA mandated unmodified audit opinion by December 31, 2028. DCMA provides audit support for the following:

1) Servicer Provider for contract oversight and program management of the Mechanization of Contract Administration Services (MOCAS) system.
2) Responsible/accountable entity for government furnished property to contractors.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

Personnel Summary Explanations:

Civilian FTEs: The change from FY 2026 to FY 2027 is 144 to reflect civilian personnel increases to support mission critical duties in the areas of product acceptance and contract administration for the following programs: Sentinel (LGM-35A ICBM), Long-Range Standoff Weapon, Mk21A Reentry Vehicle, B-21 Raider, Blue List (Unleashing Military Drone Dominance), and Next-Generation Air Dominance family of programs.

Civilian FTEs: The change from FY 2025 to FY 2026 is -742 to reflect civilian personnel reductions taking risks in the following programs:

Product Acceptance (-414 FTEs)
Cost & Pricing (-90 FTEs)
Contract Administration (-202 FTEs)
Acquisition Insight (-36 FTEs)

Fiscal Year 2027 Budget Estimates

Defense Contract Management Agency Cyber

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DCMA Cyber	41,411	646	801	42,858	228	-719	42,367

I. Description of Operations Financed:

The Defense Contract Management Agency (DCMA) Cyber budget protects, secures, and defends information and IT systems under its purview to ensure functional owners and operators have confidence in the confidentiality, integrity, availability, and non-repudiation of the DCMA information needed to make informed decisions. Some key security principles include isolation; containment; redundancy; layers of defense; least privilege; situational awareness; and physical or logical segmentation of networks, services, and applications. This budget supports these activities by providing government and contractor support to prevent unauthorized network access by protecting all information systems, enclaves, and computing environments from external and internal threats of interception, modification, fabrication, and interruption.

To execute the Department of War's (DoW) Cyber Strategy and protect the warfighter, the DCMA operates through two distinct, mission-focused cybersecurity entities. First, DCMA IT Cybersecurity Operations (Funding Element 1) is responsible for the internal defense of the agency, tasked with protecting, securing, and defending all DCMA information and Information Technology (IT) systems. This team maintains a vigilant presence to deter threats against the agency's own networks and infrastructure. Concurrently, the Defense Industrial Base Cyber Assessment Center (Funding Element 2) executes an external-facing mission as the DoW's sole entity for conducting cybersecurity assessments of the Defense Industrial Base, proactively identifying and mitigating vulnerabilities across the contractor supply chain.

FUNDING ELEMENT 1: DCMA IT CYBERSECURITY OPERATIONS

The DCMA IT Cybersecurity Operations mission is to directly support the warfighter by ensuring the operational readiness and security of all internal DCMA networks and systems. We defend the agency against persistent cyber threats to guarantee confidentiality, integrity, and availability of critical data used for acquisition, contract management, and mission support. Our defensive cyberspace operations are foundational to the agency's ability to deliver for the warfighter.

Our budget protects and defends the information and IT systems under DCMA’s purview. DCMA employs key security principles including isolation, containment, redundancy, least privilege, and network segmentation to build a resilient, multi-layered defense. These principles are put into action through our 24/7 Defensive Cyberspace Operations, which are critical to mission assurance. These active functions include:

- Proactive Threat Hunting: Actively searching our networks for advanced persistent threats and indicators of compromise that have bypassed traditional defenses.

- Incident Response: Our Incident Response function is critical to containing threats at their earliest stages. Following the onboarding of new contract support, our team's detection capabilities have markedly improved. While we prevented any *major* incidents in FY25, we now successfully triage and resolve an average of 20 lower-level security events per month.
- Vulnerability Management: Continuously scanning and patching over 40,000 assets to close adversary access points before they can be exploited.

FY 2027 Strategic Initiatives:
In FY 2027, this budget will fund critical improvements to our cybersecurity environment, with a primary focus on implementing a Zero Trust Architecture. Our FY 2027 budget is pivotal for advancing this multi-year effort, with key objectives including:

- Network Segmentation: Sustain and improve ongoing initiatives towards the micro-segmentation for our most critical applications to prevent adversary lateral movement.
- Data-Centric Security: Discovering, classifying, and encrypting all critical data-at-rest across our cloud and on-premise environments.
- Accelerate Cybersecurity Modernization by integrating AI-driven defenses and advanced automation to preemptively neutralize evolving threats.
- Optimize Operational Resilience and reduce overhead by transitioning from legacy physical data centers to a secure, scalable cloud architecture.

Furthermore, we will continue to leverage DISA's Cybersecurity Service Provider services to increase visibility while strengthening our own Tier III Cybersecurity Service Provider capabilities to better support our mission partners. These efforts are essential to enabling a more agile, mobile, and secure cloud-supported workforce
Our budget supports the targeted recruitment and continuous development of an elite, highly specialized cybersecurity workforce.

FUNDING ELEMENT 2: DEFENSE INDUSTRIAL BASE CYBERSECURITY ASSESSMENT CENTER (DIBCAC)

The Defense Industrial Base Cybersecurity Assessment Center (DIBCAC) is the sole entity entrusted with the Department's mission of conducting cybersecurity assessments of defense contractor information systems that process, transmit, or store Controlled Unclassified Information. The Defense Industrial Base supply chain includes over 220,000 defense contractors and suppliers and is increasingly targeted by capable adversaries to undermine U.S. national interests. The DIBCAC directly supports the DoD DIB Cybersecurity Strategy mission and vision to ensure the generation, reliability, and preservation of U.S. warfighting capabilities by protecting sensitive information, operational capabilities, and product integrity. Furthermore, the DIBCAC assists in Goal 2 of the strategy to "enhance the cybersecurity posture of the DIB" by achieving Objective 2.1, "evaluate DIB compliance with DoD's cybersecurity requirements" as the office of primary responsibility for current DoD cybersecurity assessments and as the office of coordinating responsibility for DoD's Cybersecurity Maturity Model Certification program. The DIBCAC prioritizes assessments based upon the DoD Sector Risk Management Agency's list of systemically important entities as required by the National Security Memorandum 22 and other critical priorities.

The DIBCAC is committed to collaborating with foreign partners to protect Controlled Unclassified Information worldwide. The complex multinational supply chain and rapidly evolving technology landscape transcends national borders and territories, making ongoing international

cooperation essential. In support of DoD Chief Information Office and OUSD Acquisition & Sustainment initiatives, the DIBCAC and foreign partners work closely to establish a mutually accepted reciprocal cybersecurity assessment framework to be included in the existing Defense Procurement Agreement Government Quality Assurance annexes. DIBCAC engagements with foreign partners include assessor training of the partner's personnel and joint cybersecurity assessments performed in the U.S. and the partner nation.

A crucial player in the Department of Justice Civil Cyber Fraud Initiative, DIBCAC works closely with investigative entities within DoD, such as the Naval Criminal Investigative Service. As the only organic DoW entity focused on unclassified cybersecurity assessments throughout the global Defense Industrial Base supply chain, DIBCAC's expertise and insights remain invaluable in supporting potential DIB cybersecurity fraud investigations.

II. Force Structure Summary:
N/A

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action			
A. BA Subactivities	FY 2025 Actuals	Budget Request	Amount	Percent	Current Enacted	FY 2027 Request
Cyberspace Activities	$41,411	$43,434	$-576	-1.33%	$42,858	$42,367
Total	**$41,411**	**$43,434**	**$-576**	**-1.33%**	**$42,858**	**$42,367**

FY 2026 Baseline Funding	**$42,858**

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $42,858

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $42,858

6. Price Change $228

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $3,970

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $3,970

1) Civilian Personnel Compensation $3,672
This increase will support the Defense Industrial Base Cybersecurity Assessment Center (DIBCAC) workforce, which operates under the Cybersecurity Maturity Model Certification program. The DIBCAC's

mission is two-fold: first, it conducts Level 2 assessments to ensure that Third-Party Assessment Organizations are qualified and meet the required standards (NIST SP 800-171) to assess the defense industry. Second, it performs more in-depth Level 3 assessments (aligned with NIST SP 800-172) directly on Defense Industrial Base companies that handle high-priority Controlled Unclassified Information. This dual approach of assessing the assessors and directly auditing critical companies ensures the comprehensive security of the defense supply chain.
(FY 2026 Baseline: $27,609 thousand; 147 FTEs; +20 FTEs)

2) Civilian Personnel Compensation - Enhanced Performance Award $298
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

(FY 2026 Baseline: $355 thousand; 0 FTEs)

9. Program Decreases .....$-4,689

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-4,689

1) DISA Reimbursable Telecomm Services .....$-2,509
The funding decrease aligns the budget with the planned execution of funding based on estimates that best support the mandated adoption of Defense Information System Agency - Department of Defense Network.
(FY 2026 Baseline: $5,131 thousand)

2) Efficiency - Travel Budget .....$-733
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
(FY 2026 Baseline: $2,341 thousand)

3) Federal Retirement System - Agency Contribution Rates.....$-93

The reduction reflects updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department's required contributions for FERS regular, Revised Annuity Employees and Further Revised Annuity Employees. The decrease aligns funding with current long-term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government-wide retirement funding requirements.
(FY 2026 Baseline: $2,531 thousand; 0 FTEs)

4) IT Contract Support Services .....$-1,354
The funding decrease aligns the budget with the planned execution of funding to best support the hire of critical personnel that make up functional assessment teams.
(FY 2026 Baseline: $6,833 thousand)

FY 2027 Budget Request $42,367

IV. Performance Criteria and Evaluation Summary:

N/A

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**141**	**147**	**167**	**6**	**20**
U.S. Direct Hire	141	147	167	6	20
Total Direct Hire	**141**	**147**	**167**	**6**	**20**
Civilian FTEs (Total)	**141**	**147**	**167**	**6**	**20**
U.S. Direct Hire	141	147	167	6	20
Total Direct Hire	**141**	**147**	**167**	**6**	**20**
Average Annual Civilian Salary ($ in thousands)	**193.4**	**187.8**	**189.0**	**-5.6**	**1.2**
Contractor FTEs (Total)	**24**	**24**	**24**	**0**	**0**

Personnel Summary Explanations:

Civilian FTEs: The change from FY 2025 to FY 2026 is +6 FTEs for the DCMA to establish an additional functional team, to perform approximately 20 cyber security assessments annually.

Civilian FTEs: The change from FY 2026 to FY 2027 is +20 FTEs for the DCMA to establish 3 functional teams, to perform 65 additional cyber security assessments annually.

Fiscal Year 2027 Budget Estimates

Defense Human Resources Activity

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DHRA	1,021,051	21,217	-52,945	989,323	16,760	499,269	1,505,352

I. Description of Operations Financed:
The Defense Human Resources Activity (DHRA) is a field activity of the Under Secretary of War for Personnel and Readiness. DHRA consists of multiple direct reporting units and provides the Under Secretary with greater capability and flexibility to manage a diverse set of programs that support the Department of War human resources mission. DHRA Mission Support serves as an intermediary between Centers and Offices and provides planning, programming, and budgeting for all organizations within the DHRA enterprise, including execution, coordination, and oversight of their work. DHRA ensures that Service members, families, civilian employees, and retirees receive timely and equitable support through benefits administration, program execution, and policy implementation.

The DHRA budget funds execution of the organization's mission to:

- Organize, direct, and manage all assigned resources, including the programs described in this exhibit.
- Design and manage DHRA programs to improve performance, economy, and efficiency.
- Maintain the Department's central repository of human resources information, including approximately 60 million personnel records.
- Provide program and policy support, information management, and administrative services to Department Components on civilian human resources matters.
- Provide Department-wide guidance on civilian personnel policy implementation and professional development programs.
- Deliver data-driven analytic solutions that support decisions affecting the readiness of the All-Volunteer Force.
- Develop and administer policies and programs for sexual assault prevention and response.
- Develop and administer suicide prevention policies and programs.
- Administer transition assistance programs for approximately 200,000 Service members each year.
- Develop and administer policies and programs to combat trafficking in persons.
- Support the development of civilian personnel policies and provide advisory services that affect more than 800,000 civilian employees.
- Support the development and management of language and cultural capabilities across the Department.
- Serve as the focal point for commercial travel policy and oversight for approximately 2.8 million Service members and civilian personnel.
- Develop policy for Department identification cards and manage associated programs, issuing approximately 425,000 cards each month.
- Serve as the authoritative source for identity verification and authentication for credentialing, security, entitlements, and benefits.
- Administer federal responsibilities under the Uniformed and Overseas Citizens Absentee Voting Act for approximately 2.8 million eligible overseas voters.

- Provide assistive technology devices and services that enable access to electronic and information technology for Department and federal employees with disabilities, supporting approximately 7,000 accommodations annually.
- Support approximately 650,000 Service members and Veterans in pursuing education, degrees, and certifications.
- Conduct research and analysis to assess the effectiveness of personnel and readiness programs and identify opportunities to strengthen the All-Volunteer Force.
- Provide training, education, research, and consultation on equal opportunity, sexual harassment, hazing, bullying, and related readiness issues.
- Support sustained investments that ensure qualified applicants are available to maintain or restore military readiness.

DHRA's programs directly support the mission of the Under Secretary of War for Personnel and Readiness to develop policies, plans, and programs that ensure Total Force readiness and the well-being of Service members, families, and civilian employees.

Narrative Explanation of Changes:

The FY 2027 DHRA budget represents a net programmatic increase of approximately $499.3 million with a price growth of $16.8 million.

Defense Civilian Personnel Advisory Service (DCPAS):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
34,482	32,333	28,505

The **Defense Civilian Personnel Advisory Service (DCPAS)** provides enterprise leadership for the Department's civilian human resources mission. The civilian workforce represents more than one third of the Total Force and delivers critical support to the warfighter across engineering, supply management, information technology, cybersecurity, intelligence, financial management, and other mission essential fields. Established in 1993, DCPAS develops and administers civilian personnel policies, plans, and programs that support the full human resources lifecycle for more than 800,000 civilian employees worldwide. DCPAS will lead coordination with OPM and lead policy development for the adoption of Core HCM.

DCPAS is organized around five major functional areas:

- Employment and Compensation: Recruitment, staffing, compensation, and workforce shaping.
- Benefits, Wage, and Non appropriated Fund Policy: Benefits, work life programs, injury and unemployment compensation, non-appropriated fund policy, and wage surveys.
- Talent Development: Training, education, and professional development programs.
- Labor and Employee Relations: Labor management engagement, union pre-decisional involvement, and employee performance management.

- Enterprise Solutions and Integration: Oversight of the Department's civilian human resources information systems portfolio, including modernization and sustainment activities, USA Staffing, the electronic Official Personnel Folder, and the Human Resources Line of Business.

Each functional area provides policy development, training, advisory services, and operational support to the military departments and defense agencies. DCPAS continues to advance the Department's ability to recruit, develop, and retain a highly skilled civilian workforce that strengthens mission readiness.

For additional information, please visit https://www.dcpas.osd.mil.

Defense Equal Opportunity Management Institute (DEOMI):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
5,538	**5,194**	**4,639**

The **Defense Equal Opportunity Management Institute (DEOMI)** provides training and education for the Military Equal Opportunity workforce across the Active Duty, Reserve, National Guard, and Coast Guard. DEOMI also trains civilian Equal Employment Opportunity practitioners and develops online courses used by approximately 2,500 students each year.

DEOMI's mission is to strengthen organizational culture and support Total Force readiness through training, research, and learning tools. The program develops curriculum, produces field materials, conducts research, and evaluates equal opportunity and organizational climate programs for use across the Department.

For additional information, please visit https://www.deomi.mil.

Defense Manpower Data Center (DMDC) manages the following programs:

- Defense Enrollment Eligibility Reporting System (DEERS)
- Enterprise Data Service (EDS)
- Enterprise Human Resource Information System (EHRIS)
- Identity Credential Management (ICM)
- Personnel Support Programs (PSP)

For additional information, please visit https://dwp.dmdc.osd.mil.

DMDC - Defense Enrollment Eligibility Reporting System (DEERS):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
74,814	76,771	76,088

The **Defense Enrollment Eligibility Reporting System (DEERS)** is the Department's central system for identity, affiliation, and benefits eligibility information. DEERS maintains personnel and identity data for about 80 million individuals, including Service members, retirees, family members, Veterans, and caregivers. Data is updated through Department systems and through RAPIDS sites worldwide.

DEERS supports access to a wide range of Department benefits, including medical and dental coverage, life insurance, education programs, commissary and exchange access, and morale-welfare services. The program provides real time eligibility information to thousands of locations across the Department and manages TRICARE enrollments for the Military Health System. DEERS also supports customer inquiries through self-service tools and the DMDC Support Center.

DEERS includes two major subprogram areas:

- Benefits and Entitlements: Provides real time eligibility decisions for medical, dental, life insurance, education, commissary, exchange, and morale welfare programs. Manages TRICARE enrollments and supports customer inquiries related to benefits and eligibility.
- Electronic Health Record Modernization / Virtual Lifetime Electronic Record: Supports shared electronic health records across the Department and the Department of Veterans Affairs by providing authoritative identity and eligibility data. Helps match records across systems, supports benefits eligibility, and enables secure data exchange with Federal and commercial partners.

DMDC - Enterprise Data Service (EDS):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
122,045	102,630	92,809

The **Enterprise Data Services (EDS)** manages how DMDC collects, stores, protects, and shares its enterprise data. The program ensures data is accurate, accessible, and safeguarded in line with DoW cybersecurity and privacy requirements. EDS supports personnel, identity, benefits, and readiness data used across the DoW and by other Federal partners including the Core HCM.

EDS is organized into two subprograms: Data Governance and Data Operations, and Enterprise IT Business Services.

Data Governance and Data Operations

Oversees DMDC's core data repositories and ensures data quality and consistency. This includes maintaining the Personnel Data Repository and related systems, acquiring personnel and workforce data from across the DoW, and providing identity and personnel information to authorized users. Key activities include:

- Identity Web Services, which provides personnel, identity, and benefits data to DoW organizations and Federal partners through real time and batch services.
- DoW Person Search, which allows authorized users to look up personnel and limited dependent information.
- Data Acquisition, which collects personnel records for Active, Reserve, retired, and civilian DoW populations to support research, analysis, and reporting.
- Uniformed Services Human Resources Information System (USHRIS), which reduces redundant personnel and pay systems by consolidating data into a single modernized system.
- Information Delivery and Decision Support, which fulfills thousands of data requests each year for leadership, research, readiness assessments, and public inquiries.
- The Personnel Data Repository and satellite databases, which store identity, personnel, and benefits information for individuals who access DoW systems and services.
- Data governance activities, including metadata management, master data management, and data quality oversight.
- Beacon, the DHRA analytics environment that consolidates reporting data and supports research and analysis across the agency.
- Shared Core Services, which provides common data access, security, and processing services for DMDC applications.
- Data Delivery Services, which provides automated, real-time access to DMDC data through web services and APIs to support modern data sharing needs.

Enterprise IT Business Services

Provides the IT services and hosting environments needed to support DMDC and DHRA programs. This includes cloud hosting, enterprise service management tools, and IT portfolio management. Key activities include:

- Cloud Center of Excellence, which manages DHRA's approved cloud hosting environments and supports the DoW transition from on premises systems to cloud solutions.
- DHRA ServiceNow, which supports enterprise service management, helpdesk operations, and IT service workflows across DHRA and DMDC.

DMDC - Enterprise Human Resource Information System (EHRIS):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
66,687	**36,027**	**278,060**

The **Enterprise Human Resource Information System (EHRIS)** program develops and maintains the systems that support civilian human resources management across the Department of War. The program includes Civilian Human Resource Information Technology Enterprise Services, Civilian Human Resource Information Technology Information Systems, and the Defense Civilian Personnel Data System.

Civilian Human Resource Information Technology – Enterprise Services
Supports the development, operation, and sustainment of civilian human resources information technology systems not provided by the Defense Civilian Personnel Data System. These systems support unemployment and injury compensation, equal employment opportunity case management, labor and employee relations case management, senior executive performance and talent management, human capital planning, and the priority placement program. Civilian human resources information technology functions are planned to transition to the Office of Personnel Management human resources information technology system in fiscal year 2027.

Civilian Human Resource Information Technology – Information Systems

Centralizes planning and strategy for civilian human resources information technology across the Defense Manpower Data Center. This subprogram works with functional sponsors and users to define requirements, align systems with Department priorities, and ensure capabilities are not duplicated. It provides oversight of civilian human resources information technology systems to support consistent, enterprise-level management.

Defense Civilian Personnel Data System

Supports human resources management for more than 800,000 civilian employees across the Department of War, the United States Agency for Global Media, and the Executive Office of the President. The system provides automated tools that support federal human resources requirements, including generating pay schedules for employees covered by the Federal Wage System.

EHRIS will work across its components to ensure adoption and transition onto OPM's Core HCM.

DMDC - Identity Credential Management (ICM):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
89,901	**104,820**	**109,636**

The **Identity Credential Management (ICM)** program supports identity updates and the issuance of identification cards for Service members, civilian employees, contractors, retirees, and other Federal partners. The program sustains Identity Services and the Real-time Automated Personnel Identification System and Common Access Card infrastructure.

Identity Services

Supports systems used to credential and authenticate individuals who are not eligible for a Common Access Card but still require access to Department of War resources. Identity Services includes:

- myAuth, a secure, phishing-resistant multifactor authentication credential used to access online Department resources.
- Identity, credential, and access management services that support registration and sponsorship of mission partners and their externally issued credentials.
- The Alternate Token Management System, which manages medium-assurance public key infrastructure certificates for users who cannot receive a Common Access Card, including administrators, groups, and individuals with specialized access needs.

Real-time Automated Personnel Identification System and Common Access Card

Provides the global system of software and hardware used to issue official Department of War identification cards. This system produces the Common Access Card and its associated public key infrastructure certificates, which support access to Department installations, networks, computers, and benefits.

The system also produces the Uniformed Service Identification card for retirees, family members, the Inactive Ready Reserve, Medal of Honor recipients, fully disabled veterans, and other eligible groups. It is the authoritative method for registering new family members so they can receive Department benefits and services.

DMDC - Personnel Support Programs (PSP):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
47,610	39,664	30,485

The **Personnel Support Programs** provide information technology services that enhance the effectiveness and readiness of the Department of War. These programs deliver accurate and timely information to support the safety and well-being of DoW personnel. The program includes the following subprograms:

Defense Personnel Accountability Systems

Supports applications and web services that collect, analyze, and share information on the physical location of DoW personnel and affiliated individuals. These systems include the Personnel Accountability Reporting System, the Personnel Location Exchange Suite, and the Joint Personnel Accounting Reconciliation and Reporting System.

Defense Travel System

Provides an automated, end-to-end travel management system that allows DoW travelers to create travel authorizations, make reservations, receive approvals, submit vouchers, and receive reimbursement.

Personnel Data Reporting Systems

Provides applications that use personnel data from DoW authoritative sources to support information needs across Defense Agencies, the Military Services, Defense Field Activities, the Joint Staff, Combatant Commands, Service members, and veterans. These systems include:

- Defense Personnel Records Information Retrieval System, which provides a secure method to request and retrieve official military personnel file documents, including the DD Form 214, for DoW, the Department of Veterans Affairs, and the Department of Labor.
- Financial Readiness Systems, which include the Servicemembers Civil Relief Act and Military Lending Act applications. These tools allow users to verify military status and determine eligibility for financial protections.
- General and Flag Officer management, which serves as the DoW system for managing senior military officers, including nominations, appointments, and personnel actions.
- Joint Duty Assignment Management Information System, which centralizes the management of joint duty billets, officer assignments, promotions, and joint qualification tracking.

NEO Tracking System and Emergency Tracking Accountability System

Provides an integrated hardware and software platform used during large scale evacuations, non-combatant evacuation operations, and mass casualty events. These systems account for evacuees and track their movement throughout the evacuation process.

Platform Solutions

Provides platform-as-a-service capabilities that support information technology services across the Defense Human Resources Activity. This includes modern hosting environments, enterprise tools, and technology solutions that improve system performance and availability.

Servicemember Support

Provides information technology solutions that support the safety and well-being of DoW personnel. Programs include:

- Defense Sexual Assault Incident Database, the Department’s centralized system for collecting and maintaining information on sexual assault cases involving members of the Armed Forces, including retaliation reporting.
- Military Recruiter Information System, which supports reenlistment eligibility checks, prior-service selection, recruiter access to schools, and recruit market analysis.

Defense Personnel Analytics Center (DPAC) manages the following programs:

- DoW Office of the Actuary (OACT)
- Office of People Analytics (OPA)

DPAC - Office of the Actuary (OACT):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
2,505	2,702	2,437

The **Office of the Actuary** supports the Department of War by producing actuarial estimates and financial calculations for major military benefit programs. The program includes the Office of the Actuary and the Station and Housing Allowances program.

The Office of the Actuary participates in audit committees for the Military Retirement Fund and the Medicare-Eligible Retiree Health Care Fund. It calculates required contributions for the Department of War and the Department of the Treasury, estimates fund liabilities for annual financial statements, and supports the Education Benefits Fund and the Voluntary Separation Incentive Fund. These calculations use methods and assumptions approved by the Department's Boards of Actuaries.

The Office of the Actuary produces cost estimates for legislative proposals related to military benefits and updates valuation models to reflect changes in law. It also supports reviews and commissions that study military compensation and benefits.

For additional information, please visit https://www.actuary.defense.gov.

The Station and Housing Allowances program manages the Department's annual station and housing allowances portfolio. This includes collecting and analyzing housing and cost of living data to determine the Basic Allowance for Housing, Overseas Housing Allowance, and cost-of-living allowances for members of the Uniformed Services. The program also manages the policies and regulations governing these allowances.

For additional information, please visit https://www.travel.dod.mil/Allowances/.

DPAC - Office of People Analytics (OPA):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
119,068	112,960	90,701

The **Office of People Analytics** provides research, analysis, and data-driven insights that support program and policy decisions across the Department of War. The program includes four functional areas: Recruitment and Outreach Research, Testing and Assessment, Health and Resilience, and Retention and Readiness. These areas are supported by Statistics, Data Science, and Analytics, and by Research Strategy, Policy, and Dissemination.

Recruitment and Outreach Research

The Joint Advertising, Market Research and Studies program provides research and outreach that support recruiting across the Department of War. It monitors youth attitudes toward military service, provides prospect lists to the Military Services, and conducts outreach to improve awareness of military career opportunities.

Testing and Assessment

The Defense Testing and Assessment Center develops and administers the Department's selection and classification tools, including the Armed Services Vocational Aptitude Battery and the Tailored Adaptive Personality Assessment System. These tools support recruiting, selection, and career exploration. The program also supports foreign language testing capabilities.

Health and Resilience

Conducts research and analysis on behavioral health and well-being across the Department of War. This includes studies on sexual assault, harassment, discrimination, suicide, and command climate. The program administers and reports on large-scale surveys, including the Workplace Experiences Survey, the Service Academy Experiences Survey, and the Defense Organizational Climate Survey.

Retention and Readiness

Conducts research on retention, quality of life, and readiness across the Department of War. Topics include satisfaction with military life, housing, financial readiness, food access, spouse employment, and the impacts of Permanent Change of Station moves. The program administers the Status of Forces Surveys and the Spouse Surveys.

Statistics, Data Science, and Analytics

Provides data science, statistical methods, analytics, and survey operations support across all Office of People Analytics functional areas. This includes data acquisition, predictive analysis, survey sampling, weighting, bias assessment, and the creation of analytic products and tools.

Research Strategy, Policy, and Dissemination

Provides research strategy, survey policy, communications, and dissemination support. This includes managing research intake and prioritization, supporting data sharing procedures, developing visualizations, and ensuring compliance with Department survey requirements.

For additional information, please visit https://www.opa.mil.

Defense Support Service Center (DSSC) manages the following programs:

- Computer/Electronic Accommodations Program (CAP)
- Defense Activity for Non-Traditional Education Support (DANTES)
- Defense Language and National Security Education Office (DLNSEO)
- Equal Employment Opportunity (EEO)
- Defense Travel Management Office (DTMO)
- Employer Support of the Guard and Reserves (ESGR)
- Federal Voting Assistance Program (FVAP)
- Military-Civilian Transition Office (MCTO)

DSSC - Computer/Electronic Accommodations Program (CAP):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
5,841	3,733	3,760

The **Computer/Electronic Accommodations Program** is the Department of War's centrally funded program that provides assistive technology devices and services to civilian employees with disabilities and to wounded, ill, and injured Service members. The program also supports active-duty and Reserve personnel who require assistive technology to perform their duties.

The National Defense Authorization Act of 2006 granted authority for Service members who receive assistive technology through the program to retain the equipment when they separate from active duty. In 2015, a Department-wide policy expanded the program's support for wounded, ill, and injured Service members through the Military Health System and the Recovery Coordination Program.

Today, approximately 2.8 million Department of War civilian employees, Service members, and eligible beneficiaries may receive assistive technology through the program. Since its creation, the program has provided more than 260,000 devices and services to over 103,000 individuals.

For additional information, please visit https://www.cap.mil.

DSSC - Defense Activity for Non-Traditional Education Support (DANTES):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
12,862	19,923	10,514

The **Defense Activity for Non-Traditional Education Support** delivers the Department of War's portfolio of individual education and credentialing programs that support approximately 650,000 Service members in meeting their education and transition goals. These programs support the Office of the Assistant Secretary of War for Military Personnel Policy by managing partnerships and services that expand access to quality postsecondary opportunities, help Service members make informed decisions, support academic and career pathways, and strengthen military student success. Centralized management reduces duplication across the Military Services and supports recruitment, retention, readiness, and transition.

The program includes the following subprograms:

College and Career Readiness

Helps Service members develop education and career plans, prepare for online learning, and compare academic institutions that have been reviewed for quality and value. Credentialing and licensing tools connect career goals with required civilian credentials.

Overseas Education Program

Expands access to postsecondary opportunities for Service members stationed overseas by supporting institutional compliance with tuition assistance policies and managing partnerships that provide basic skills, academic testing, language training, and education from undergraduate through graduate levels, including in forward deployed locations.

Military Credit for Prior Learning

Allows Service members to earn college credit recommendations based on prior learning, examinations, military training, and occupational experience. These credit recommendations reduce the number of courses needed for a degree, saving time and reducing tuition assistance costs.

Academic Skills Training

Improves math, literacy, and science skills to increase Armed Forces Vocational Aptitude Battery and Armed Forces Qualification Test scores. Supports academic readiness for enlistment, increases eligibility for more demanding military roles, and helps Service members place into college level courses without requiring remedial classes.

For additional information, please visit https://www.dantes.mil.

DSSC - Defense Language and National Security Education Office (DLNSEO):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
49,311	55,268	17,792

Funding in the above table includes the following the Language Training Centers and Language Flagship Program funding profiles:

	(Dollars in Thousands)		
Program	FY 2025	FY 2026	FY 2027
Language Training Centers – baseline	0	0	0
Language Training Centers – congressional add	0	10,000	0
Language Flagship Program - baseline	16,341	8,000	8,000
Language Flagship Program – congressional add	4,000	20,000	0

The **Defense Language and National Security Education Office** provides strategic direction, policy support, and program oversight for language, regional expertise, and cultural capability requirements across the Department of War. The office manages programs that build and sustain language and cultural skills needed to meet current, emerging, and surge requirements, while also developing a long-term workforce pipeline that supports national security needs.

The office supports the Department's mission to build partner capacity by expanding foreign language, regional, and cultural skills across the force and by providing English language training that supports heritage recruiting. Partnerships with U.S. academic institutions help ensure a steady flow of highly qualified, language-proficient candidates into federal service.

Language Training Center Program

The Language Training Center Program is authorized under Section 529 of the National Defense Authorization Act for Fiscal Year 2010, as amended by Section 575 of the National Defense Authorization Act for Fiscal Year 2024. The program provides grants to U.S. institutions of higher

education, in partnership with Department of War components, to deliver training in critical languages and strategic regions for Active-Duty, Reserve, and civilian personnel.

Language Flagship Program and Boren Scholarships and Fellowships

These programs support advanced language study for U.S. undergraduate and graduate students who commit to federal service in national security. The office provides grants to U.S. institutions of higher education to develop programs that enable students to achieve professional-level proficiency in critical languages. Boren Scholarships and Fellowships provide financial support for students pursuing these studies.

For additional information, please visit https://www.dlnseo.org.

DSSC - Equal Employment Opportunity (EEO):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
2,168	**1,751**	**1,636**

The **Equal Employment Opportunity** program supports the Department of War by providing investigations and resolutions for discrimination complaints across the Department, including the Military Departments and Defense agencies and activities.

Investigations and Resolutions Directorate

The Investigations and Resolutions Directorate conducts and facilitates equal employment opportunity discrimination complaint investigations across the Department. The directorate investigates approximately 2,000 cases each year within the Department of War.

DSSC - Defense Travel Management Office (DTMO):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
13,937	**10,610**	**8,253**

The **Defense Travel Management Office** is the central organization for commercial travel across the Department of War. The office supports approximately 2.8 million Service members and civilian personnel by providing oversight of commercial travel management, travel policy and implementation, the Government Travel Charge Card program, customer support and training, and functional oversight of the Department's temporary duty travel system.

Centralizing travel functions under one organization allows the Department to standardize management practices, reduce duplication, leverage economies of scale, and lower administrative costs. The office focuses on travel reform and modernization by simplifying travel policy, improving compliance, expanding strategic sourcing, enhancing processes, using modern technologies, and reducing overall travel costs while supporting the Department's mission.

For additional information, please visit https://www.travel.dod.mil.

DSSC - Employer Support of the Guard and Reserve (ESGR):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
9,195	8,302	5,426

The **Employer Support of the Guard and Reserve** program promotes a culture in which employers support and value the employment of National Guard and Reserve members. This support strengthens the readiness of the Reserve Components by helping Service members balance their military and civilian responsibilities.

The program builds supportive work environments through outreach, employer recognition, and education on employment rights and responsibilities. It also helps resolve conflicts between Service members and their civilian employers. ESGR operates nationwide in every state, territory, and the District of Columbia through a network of approximately 2,000 volunteers and 54 support staff.

The program's national engagement efforts increase awareness of the Uniformed Services Employment and Reemployment Rights Act and highlight the important role employers play in supporting National Guard and Reserve personnel. ESGR provides guidance to Reserve Component staff, Service leadership, and Department of War officials on employer relations policies, instructions, and legislation.

For additional information, please visit https://www.esgr.mil.

DSSC - Federal Voting Assistance Program (FVAP):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
4,991	4,974	4,980

The **Federal Voting Assistance Program** administers the Department's responsibilities under the Uniformed and Overseas Citizens Absentee Voting Act of 1986 and other federal laws related to military and overseas voter registration and assistance. The program supports more than 2.8

million eligible overseas citizens, Service members, and their families by ensuring they are aware of their right to vote and have the tools needed to successfully cast their ballots from anywhere in the world.

The program provides direct assistance to voters covered by the Uniformed and Overseas Citizens Absentee Voting Act and works closely with state and local election officials. Outreach efforts focus on Service members and overseas citizens, with particular emphasis on younger and first-time voters. Activities include email and mail outreach to all members of the Uniformed Services, social media engagement, public service announcements, and online advertising targeted to military and overseas audiences.

The program also works directly with the Military Services to provide training, information, and tools for Voting Assistance Officers and Installation Voter Assistance Offices, which offer in-person support at the command, installation, and unit levels.

For additional information, please visit https://www.fvap.gov.

DSSC - Military-Civilian Transition Office (MCTO):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
12,069	**21,236**	**9,205**

The **Military Civilian Transition Office** provides full-spectrum program management that improves the design, content, development, and delivery of counseling, information, training, support, and resources for Service members and their families as they transition or reintegrate. The office supports transitioning personnel and their families at locations worldwide.

The office manages the following programs:

- *Transition Assistance Program*
- *Yellow Ribbon Reintegration Program*
- *Department of War SkillBridge*
- *Beyond Yellow Ribbon (fiscal year 2026 only)*

The office provides program management for these efforts, including research, strategy, policy development, program design, budget and contract management, grant management, curriculum development, program evaluation, compliance, information technology, public affairs, communications, and outreach. The office ensures consistent support across all Military Departments and components for eligible Service members and families at more than 200 global locations.

The office also manages Department of War and federal interagency governance for transition and reintegration services. It coordinates with the Department of Veterans Affairs and Department of War Joint Executive Committee, the Transition Assistance Program Interagency partners, Manpower and Reserve Affairs, the Joint Staff, the National Guard Bureau, the Military Departments, employers, higher education institutions, and other governmental and non-governmental organizations. Consolidated resources support streamlined program management and planned information technology modernization.

Defense Support Service Center – Military Civilian Transition Office / Transition Assistance Program

The Transition Assistance Program is established in Title 10, United States Code, Sections 1142 and 1144. The program provides streamlined and effective transition assistance that supports individualized preparation for approximately 200,000 eligible Service members who separate, retire, or are released from active duty each year.

The program is designed and delivered through a federal interagency partnership led by the Department of War, with the Military-Civilian Transition Office serving as the lead agent for governance, coordination, and collaboration. A multi-agency Memorandum of Understanding with the Departments of Labor, Education, Veterans Affairs, and Homeland Security, as well as the Small Business Administration and the Office of Personnel Management, establishes the federal government's long-term commitment to govern, design, staff, resource, and deliver the program at more than 200 locations worldwide.

The program is a statutory requirement for all Service members separating after 180 days of continuous active duty under Title 10. The Military-Civilian Transition Office is leading a shift from an end-of-service transition model to a career-long approach that emphasizes individualized career readiness planning throughout a Service member's military career. Annual curriculum updates ensure that career readiness and transition assistance materials remain adaptive and forward-looking. The office oversees implementation across the Military Departments to ensure delivery aligns with law, policy, and leadership intent. Collaboration with governmental and non-governmental partners expands opportunities that support Service member career readiness.

The office's interagency evaluation strategy and planned information technology modernization support improved program evaluation, assessment, and compliance. These efforts strengthen execution of statutory and policy requirements and promote continuous improvement in program effectiveness.

For additional information, please visit https://www.dodtap.mil.

Defense Support Service Center – Military-Civilian Transition Office / Yellow Ribbon Reintegration Program

The Yellow Ribbon Reintegration Program is established in Section 10101 of Title 10, United States Code. The program supports the well-being of National Guard and Reserve Component Service members, their families, and their communities by connecting them with resources throughout and beyond the activation, mobilization, and deployment cycle. Events held worldwide provide support before, during, and after activation or

deployment for eligible Reserve Component Service members, their families, and designated representatives. The program offers access to services, resources, and referrals that help reduce stress and strengthen resilience during all phases of the deployment cycle. Events also provide information on benefits such as health care, education, and financial and legal counseling.

The program maintains collaborative relationships with federal, state, and local organizations to streamline the delivery of military information and resources. These partnerships ensure that relevant and timely support is available at events and through community-based networks. The program coordinates with organizations such as Employer Support of the Guard and Reserve, the Small Business Administration, and the Departments of Labor and Veterans Affairs.

The program works to improve consistency and standardization across the Reserve Components. It develops in-person and online curriculum to provide flexible support that meets the changing needs of Service members and their families. A key focus is improving data collection, analysis, evaluation, and assessment to identify efficiencies, control costs, and enhance program effectiveness. These efforts support the readiness, resilience, and retention of Reserve Component Service members.

For additional information, please visit https://www.yellowribbon.mil.

Defense Support Service Center – Military Civilian Transition Office / SkillBridge Program

The SkillBridge Program is established in Title 10, United States Code, Chapter 58, Section 1143. The program provides eligible transitioning Service members with job training and employment skills training, including apprenticeships, to help prepare them for civilian employment. Service members gain civilian work experience through industry training, apprenticeships, or internships during their final 180 days of service.

For Service members, the program offers an opportunity to build civilian workforce skills before separation. For employers, the program provides access to a highly trained and motivated talent pool. Service members participating in SkillBridge continue to receive military pay and benefits, while industry partners provide civilian training and work experience. Commanders may authorize up to 180 days of permissive duty for full-time participation with industry partners. Employers provide real-world training and in-demand experience while assessing a Service member's potential for future employment.

The program helps bridge the gap between military service and civilian careers. More than 5,000 industry partners have signed memoranda of understanding with the Department of War SkillBridge Program, supporting approximately 20,000 Service members each year.

For additional information, please visit https://skillbridge.osd.mil.

DSSC - MCTO / Beyond Yellow Ribbon (BYR):

Funding in the above table includes the following Beyond Yellow Ribbon (BYR) funding profile:

	(Dollars in Thousands)		
Program	**FY 2025**	**FY 2026**	**FY 2027**
BYR – baseline	0	0	0
BYR – congressional add	0	12,000	0

Defense Support Service Center – Military Civilian Transition Office / Beyond Yellow Ribbon

The Beyond Yellow Ribbon program supports locally based efforts that provide outreach and reintegration services for National Guard and Reserve Component Service members and their families before, during, and after deployment, mobilization, or activation. These services are developed and implemented by funding recipients and focus on building sustainable community support networks.

Program elements include employment assistance, physical and behavioral health support, fitness programs, financial counseling, and child and youth services. These resources help strengthen resilience and readiness for Service members and their families throughout the deployment cycle.

Mission Support:

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
30,668	**32,788**	**30,371**

Mission Support provides strategic guidance and manages key services that enable force management, development, and well-being across the Defense Human Resources Activity. These functions are carried out through the Office of the Director, Equal Employment Opportunity Office, Office of the General Counsel, Comptroller, Facilities and Security, and Human Resources. These offices deliver essential personnel services, financial management, legal support, and administrative services.

Mission Support is also responsible for contracting, facilities management, training, and security. It oversees National Capital Region transportation subsidies and coordinates with the Defense Finance and Accounting Service and the Defense Logistics Agency for human resources support.

Mission Support supports personnel located in Alexandria, Virginia; Pensacola, Florida; Monterey, California; San Antonio, Texas; Fort Knox, Kentucky; Travis Air Force Base, California; Patrick Space Force Base, Florida; and overseas locations in Korea and Germany.

For additional information, please visit https://www.dhra.mil.

Civilian Pay/Labor:

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
252,688	**219,945**	**423,757**

The Civilian Pay/Labor program line funds civilian pay and benefits for 3,146 civilian full-time equivalents in fiscal year 2027. The increase from fiscal year 2026 to fiscal year 2027 reflects the transfer of operational resourcing costs for the U.S. Military Entrance Processing Command from the Army.

Sexual Assault Prevention and Response Office (SAPRO):

(Dollars in Thousands)		
FY 2025	**FY 2026**	**FY 2027**
29,779	**73,297**	**34,343**

** In fiscal year 2026, the office received a $47 million congressional increase for Special Victims' Counsel. Funding is vetted by the office and reprogrammed to the Military Services for execution.*

The **Sexual Assault Prevention and Response Office** represents the Secretary of War and serves as the single point of authority, accountability, and oversight for the sexual assault prevention and response program, in accordance with Section 1611 of the National Defense Authorization Act for Fiscal Year 2011. The office supports military readiness by reducing incidents of sexual assault through prevention, advocacy, policy execution, planning, and oversight across the Department of War.

The office:

- Oversees implementation of the Sexual Assault Prevention and Response program to prevent sexual assault and encourage reporting and access to victim services.
- Evaluates program effectiveness using standardized metrics and methodologies.
- Assesses the Department's ability to meet the needs of adult sexual assault victims.
- Oversees implementation of comprehensive policy and ensures Military Department compliance.
- Collects and analyzes data from onsite visits, reports, surveys, and other sources to assess program performance.
- Prepares annual reports to Congress on progress in preventing and responding to sexual assault, including assessments of programs at the military service academies.
- Oversees policy and program requirements for the Defense Sexual Assault Information Database, including user training.
- Administers the Department of War Sexual Assault Advocate Certification Program.

- Serves as the Functional Community Manager for the Sexual Assault Response Workforce through the Office of Force Resiliency.
- Manages the Department of War Safe Helpline, a 24/7 resource for individuals impacted by sexual assault, including those in deployed or remote environments.
- Provides on-demand primary prevention support, job aids, and professional development for prevention personnel.
- Operates the Sexual Assault Prevention and Response Training and Education Center to develop and deliver Integrated Primary Prevention and program training.
- Implements recommendations from the Independent Review Commission to strengthen prevention, improve victim advocacy, reform military justice processes, and enhance research.

For additional information, please visit https://www.sapr.mil.

U.S. Military Entrance Processing Command (USMEPCOM):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
0	0	241,955

The **U.S. Military Entrance Processing Command** is funded to conduct medical testing for all Armed Forces applicants and to administer the Armed Services Vocational Aptitude Battery to applicants and high school students. The Department of War transfers operational resourcing costs for the command from the Army to the Defense Human Resources Activity beginning in fiscal year 2027. These funds support the enlistment of volunteer applicants during peacetime and the induction of registrants through the Selective Service System during mobilization. Personnel at Military Entrance Processing Stations who conduct aptitude testing are also supported by these resources. The command operates 65 Military Entrance Processing Stations, one Remote Processing Station, and 164 Military Entrance Test sites across the continental United States, Hawaii, Alaska, and Puerto Rico.

The command's operations are resourced to manage applications for all Military Services and the Coast Guard during peacetime. During mobilization, the command processes applicants and inductees in coordination with the Selective Service System. Funding also supports civilian personnel at Military Entrance Processing Stations. Additional funded activities include medical and aptitude testing for applicants and students, supplies and printing for testing, travel for military and civilian personnel, the applicant processing system, and facilities, logistics, and administrative support.

The Defense Human Resources Activity funds the infrastructure and communication capabilities of the applicant processing system, which are required for the Department of War to conduct military accession during peacetime, mobilization, and wartime.

For additional information, please visit https://www.mepcom.army.mil.

The FY 2026 spend plan amount for Operations & Maintenance includes $1,035,535 thousand of discretionary and $10,000 thousand of mandatory (reconciliation) for a total of $1,045,535 thousand.

SUBTOTAL BASELINE FUNDING	**989,323**	
Supplemental	0	
Reprogrammings	0	
Price Changes		16,760
Functional Transfers		403,035
Program Changes		96,234
CURRENT ESTIMATE	**989,323**	**1,505,352**
Less: Supplemental	0	
NORMALIZED CURRENT ESTIMATE	**$989,323**	**$1,505,352**

FY 2026 President's Budget Request (Amended, if applicable)	**$932,144**
1. Congressional Adjustments	$57,179
a) Distributed Adjustments	$62,558
1) Program increase: Special Victims' Counsel	$47,000
2) Program increase: Language Flagship Program	$20,000
3) Program increase: Beyond Yellow Ribbon	$12,000
4) Program increase: Defense Language Training Centers	$10,000
5) Unjustified Growth	$-15,000
6) Historical Unobligated Balances	$-9,101
7) Projected Underexecution of Civilian Compensation	$-2,341
b) Undistributed Adjustments	$0
c) Adjustments to Meet Congressional Intent	$0
d) General Provisions	$-5,379
1) Sec. 8136 Management Efficiencies	$-5,379
FY 2026 Appropriated Amount	**$989,323**
2. Supplemental Appropriations	$0

a) Supplemental Funding $0

3. Fact-of-Life Changes $0

a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $989,323

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $989,323

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $989,323

6. Price Change $16,760

7. Functional Transfers $403,035

a) Transfers In $450,852

1) U.S. Military Entrance Processing Command $434,719

Transfers funding and 1,937 FTEs to the Defense Human Resources Activity for the U.S. Military Entrance Processing Command (USMEPCOM). This transfer realigns operational costs associated with USMEPCOM and designates DHRA as the executive agent.
(FY 2026 Baseline: $219,945 thousand; 1,193 FTEs; +1,937 FTEs)

2) Office of Command Climate and Well Being Integration $13,867
Transfers funding and 13 FTEs to realign the Office of Command Climate and Well Being Integration from the Office of Force Resiliency in OUSW(P&R) to the Defense Human Resources Activity.
(FY 2026 Baseline: $297,810 thousand; 1,193 FTEs; +13 FTEs)

3) Military Credentialing Program $1,639
Transfers funding to realign the Military Credentialing Program from the Assistant Secretary of War for Readiness to the Office of the Under Secretary of War for Personnel and Readiness.

(FY 2026 Baseline: $9,923 thousand; 0 FTEs; +0 FTEs)

4) Office of Force Resiliency – Enterprise Operations Support.....$627
Transfers funding to realign the Office of Force Resiliency Enterprise Operations Support from the Office of Force Resiliency in OUSW(P&R) to the Defense Human Resources Activity.
(FY 2026 Baseline: $77,865 thousand; 0 FTEs; +0 FTEs)

b) Transfers Out .....$-47,817

1) Defense Suicide Prevention Office .....$-45,197
Transfers funding and 26 FTEs for the Defense Suicide Prevention Office from the Office of the Under Secretary of War for Personnel and Readiness and the Defense Human Resources Activity to the Defense Health Agency. (Note: Cyber OP-5 showing a transfer of $88K and 0 FTE in Cyber)
(FY 2026 Baseline: $254,340 thousand; 1,193 FTEs; -26 FTEs)

2) Strategic Policy Making Element of DCPAS .....$-2,620
Transfers funding and 13 FTEs for the strategic policy making element of the Defense Civilian Personnel Advisory Service from the Defense Human Resources Activity to the Assistant Secretary of War for Manpower and Reserve Affairs.
(FY 2026 Baseline: $219,945 thousand; 1,193 FTEs; -13 FTEs)

8. Program Increases $278,272

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $246,453

1) DMDC - Enterprise Human Resources Information System $242,000
+$192,000 thousand - Increase supports the Department's payment to the Office of Personnel Management to establish the core Human Capital Management system as part of Department wide human capital modernization.
+$50,000 thousand - Increase supports transition activities to the Office of Personnel Management system and the decommissioning or rationalization of legacy systems replaced by that system.
(FY 2026 Baseline: $36,027 thousand; 0 FTEs)

2) Defense Suicide Prevention Office $4,453
Increase supports the functional transfer of the Defense Suicide Prevention Office from the Office of the Under Secretary of War for Personnel and Readiness and the Defense Human Resources Activity to the Defense Health Agency.
(FY 2026 Baseline: $34,395 thousand; 0 FTEs)

c) Program Growth in FY 2027 .....$31,819

1) U.S. Military Entrance Processing Command $10,800
Increase supports continued Applicant Medical Consultation services for the Military Services.
(FY 2026 Baseline: $0 thousand; 0 FTEs; +0 FTEs)

2) DMDC - Identity Credential Management.....$7,227
Increase supports High-Impact Zero Trust protections by providing an alternative multifactor authentication capability for users unable to use public key infrastructure credentials or in environments where those credentials are unavailable.
(FY 2026 Baseline: $104,820 thousand; 0 FTEs; +0 FTEs)

3) Civilian Pay/Labor.....$3,846
Increase to continue providing USMEPCOM Applicant Medical Consultation support for the Services.
(FY 2026 Baseline: $219,945 thousand; 1,193 FTEs; +40 FTEs)

4) Armed Service Vocational Aptitude Battery Career Exploration Program $3,105

Increase supports 2 FTEs and enhances the ASVAB Career Exploration Program and the Enterprise-Wide Accession Smart Form to strengthen military recruiting operations and expand the pool of eligible candidates.
(FY 2026 Baseline: $232,905 thousand; 1,193 FTEs; +2 FTEs)

5) Enhanced Performance Award $2,114
Increase supports the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long term capability for the Department.
(FY 2026 Baseline: $219,945 thousand; 1,193 FTEs; +0 FTEs)

6) DSSC - Military-Civilian Transition Office $2,065
Increase supports expanded outreach services for the SkillBridge program.
(FY 2026 Baseline: $21,236 thousand; 0 FTEs; +0 FTEs)

7) DSSC - Defense Travel Management Office $790
+$777 thousand - Increase supports required contracts for Enterprise Administrative Support, the Travel Operations Management and Modernization System, and the Commercial Travel Information Management system to meet statutory requirements and respond to information requests.
+$11 thousand - Increase supports travel required to meet statutory responsibilities previously performed by contractors and remote staff.
+$2 thousand - Increase supports purchased communications for Defense Travel System Helpdesk enhancements.
(FY 2026 Baseline: $10,610 thousand; 0 FTEs; +0 FTEs)

8) DSSC - Employer Support of the Guard and Reserve $649
+$592 thousand - Increase supports revised printing and reproduction requirements under a Government Publishing Services agreement for marketing materials and volunteer recognition.
+$28 thousand - Increase supports travel for field oversight of volunteers.
+$18 thousand - Increase supports additional information technology service requirements in FY 2027.
+$11 thousand - Increase supports communication services for Defense Information Systems Agency server hosting.
(FY 2026 Baseline: $8,302 thousand; 0 FTEs; +0 FTEs)

9) Defense Equal Opportunity Management Institute $503

+$452 thousand - Increase supports professional management services for anticipated suicide and sexual harassment training requirements and information technology lifecycle replacement.
+$51 thousand - Increase supports Blackboard license cost growth.
(FY 2026 Baseline: $5,194 thousand; 0 FTEs)

10) DSSC - Computer/Electronic Accommodations Program $285
+$265 thousand - Increase supports expanded accommodation services for Department civilians and Service members, enabled by savings from reduced full-time contract support and expanded outreach to Military Treatment Facilities and bases.
+$20 thousand - Increase supports information technology contract services required to operate the CAPX and Managed IT systems concurrently during CAPX sunset.
(FY 2026 Baseline: $3,733 thousand; 0 FTEs)

11) DSSC - Federal Voting Assistance Program $277
+$250 thousand - Increase supports Post-Election Surveys required under 52 USC 20301(b), including statistical analysis of uniformed services and overseas voter participation following Presidential elections.
+$27 thousand - Increase supports information technology contract services for command, control, communications, computers, cyber, intelligence, surveillance, and reconnaissance requirements for Managed IT systems.
(FY 2026 Baseline: $4,974 thousand; 0 FTEs)

12) Sexual Assault Prevention and Response Office $103
Increase supports development of a non-clinical model to promote recovery, restoration, and resilience for warfighters and other members of the military community who have experienced sexual assault.
(FY 2026 Baseline: $73,297 thousand; 0 FTEs)

13) DSSC - Equal Employment Opportunity $55
+$54 thousand - Increase supports efficiencies in case processing and inventory management.
+$1 thousand - Increase supports training, leadership development, and postal services to fully fund anticipated FY 2027 requirements.
(FY 2026 Baseline: $1,751 thousand; 0 FTEs)

9. Program Decreases .....$-182,038

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases ..... $-89,987

1) Program increase: Special Victims' Counsel ..... $-47,987
Decrease reflects the reduction of the FY 2026 congressional add for Special Victims' Counsel.
(FY 2026 Baseline: $73,297 thousand; 0 FTEs)

2) Program increase: Language Flagship Program ..... $-20,000
Decrease reflects the reduction of the FY 2026 congressional add for the Language Flagship Program.
(FY 2026 Baseline: $55,268 thousand; 0 FTEs)

3) Program increase: Beyond Yellow Ribbon ..... $-12,000
Decrease reflects the reduction of the FY 2026 congressional add for Beyond Yellow Ribbon.
(FY 2026 Baseline: $21,236 thousand; 0 FTEs)

4) Program increase: Defense Language Training Centers ..... $-10,000
Decrease reflects the reduction of the FY 2026 congressional add for Defense Language Training Centers.
(FY 2026 Baseline: $55,268 thousand; 0 FTEs)

c) Program Decreases in FY 2027 ..... $-92,051

1) Efficiency - Contract Services ..... $-64,852
Decrease supports Administration directed cost efficiency by reducing Advisory and Assistance Services in alignment with Executive Order 14222.

- DPAC - OPA (-$26,676 thousand)
- DMDC - PSP (-$10,004 thousand)
- DSSC - DLNSEO (-$5,000 thousand)
- DMDC - EDS (-$4,184 thousand)
- SAPRO (-$4,094 thousand)
- DCPAS (-$3,553 thousand)
- Mission Support (-$3,000 thousand)
- DSSC - ESGR (-$2,510 thousand)
- DMDC - ICM (-$2,000 thousand)
- DSSC - DTMO (-$1,868 thousand)
- DSSC - DANTES (-$1,011 thousand)
- DEOMI (-$952 thousand)

(FY 2026 Baseline: $42,358 thousand; 0 FTEs)

2) DMDC - Enterprise Data Services .....$-7,765
Decrease reflects cost savings from decommissioning on premises data centers following cloud migration.
(FY 2026 Baseline: $102,630 thousand; 0 FTEs)

3) DSSC - Defense Language and National Security Education Office .....$-3,637
-$1,967 thousand - Decrease reflects reduced Test Delivery requirements.
-$1,670 thousand - Decrease reflects consolidation of Managed IT services across DSSC.
(FY 2026 Baseline: $55,268 thousand; 0 FTEs)

4) DMDC - Identity Credential Management .....$-2,596
Decrease reflects cost savings from decommissioning on-premises data centers following cloud migration.
(FY 2026 Baseline: $104,820 thousand; 0 FTEs)

5) DSSC - Military-Civilian Transition Office .....$-2,542
-$2,529 thousand -Decrease reflects revised EventPlus IT contract support requirements.
-$10 thousand - Decrease reflects reduced administrative contract support.
-$3 thousand - Decrease reflects reduced QLIK license requirements.
(FY 2026 Baseline: $21,236 thousand; 0 FTEs)

6) DMDC - Defense Enrollment Eligibility Reporting System .....$-2,287
Decrease reflects cost savings from decommissioning on premises data centers following cloud migration.
(FY 2026 Baseline: $76,771 thousand; 0 FTEs)

7) DSSC - Defense Travel Management Office .....$-1,501
-$809 thousand - Decrease reflects migration of DTMO Passport to cloud infrastructure.
-$650 thousand - Decrease reflects reduced IT support requirements.
-$42 thousand - Decrease reflects reduced legacy system license requirements.
(FY 2026 Baseline: $10,610 thousand; 0 FTEs)

8) DSSC - Employment Support of the Guard and Reserve .....$-1,186
-$594 thousand - Decrease reflects reduced State Committee budgets.
-$592 thousand - Decrease reflects transition to Government Publishing Services.
(FY 2026 Baseline: $8,302 thousand; 0 FTEs)

9) Federal Employees Retirement System – Agency Contribution Rates.....$-1,093

Decrease reflects updated Federal Employees Retirement System contribution rates.
(FY 2026 Baseline: $219,945 thousand; 1,193 FTEs; +0 FTEs)

10) Defense Civilian Personnel Activity .....$-955
-$955 thousand - The Department's Leadership Development (LDP) and workforce training program reductions decreases the cohort sizes and limited to one event a year. This reduces the associated venue, travel, and lodging costs for each training event.
(FY 2026 Baseline: $32,333 thousand; 0 FTEs)

11) DMDC - Enterprise Human Resources Information System .....$-707
Decrease reflects cost savings from decommissioning the Defense Talent Management System.
(FY 2026 Baseline: $36,027 thousand; 0 FTEs)

12) DPAC - Office of People Analytics .....$-569
Decrease reflects the elimination of the Selective Service System insert.
(FY 2026 Baseline: $119,068 thousand)

13) Civilian Pay/Labor .....$-425
Decrease reflects refined compensation rate development based on execution analysis.
(FY 2026 Baseline: $219,945 thousand; 1,193 FTEs; +0 FTEs)

14) Efficiency - Travel.....$-355
Decrease supports prioritization of mission essential travel by reducing discretionary travel requirements.

- DSSC - EEO (-$186 thousand)
- DEOMI (-$101 thousand)
- DSSC - FVAP (-46 thousand)
- DPAC - OPA (-$20 thousand)
- DSSC - CAP (-$2 thousand)

(FY 2026 Baseline: $3,091 thousand; 0 FTEs)

15) DSSC - Computer/Electronic Accommodations Program .....$-335
-$334 thousand - Decrease reflects contract modifications removing full time program management and IT services.
-$1 thousand - Decrease reflects reduced purchased communications requirements.
(FY 2026 Baseline: $3,733 thousand; 0 FTEs)

16) DSSC - Federal Voting Assistance Program .....$-329

-$324 thousand - Decrease reflects reduced contract requirements.
-$5 thousand - Decrease reflects reduced printing requirements in a non-election year.
(FY 2026 Baseline: $4,974 thousand; 0 FTEs)

17) DPAC - Office of the Actuary .....$-322
Decrease reflects reduced contract support costs for Cost of Living Allowances data collection and analysis.
(FY 2026 Baseline: $2,702 thousand; 0 FTEs)

18) DSSC - Defense Activity for Non-Traditional Education Support .....$-244
-$214 thousand - Decrease reflects reduced requirements for the Voluntary Education Partnership MOU system.
-$16 thousand - Decrease reflects transfer of facility cost responsibilities.
-$9 thousand - Decrease reflects reduced printing.
-$5 thousand - Decrease reflects elimination of digital reference publications.

(FY 2026 Baseline: $9,923 thousand; 0 FTEs)

19) Mission Support.....$-215
Decrease reflects elimination of Harvard program training.
(FY 2026 Baseline: $32,788 thousand; 0 FTEs)

20) Defense Equal Opportunity Management Institute .....$-115
Decrease reflects reductions in IT contract support services and postal service requirements.
(FY 2026 Baseline: $5,194 thousand; 0 FTEs)

21) DSSC - Equal Employment Opportunity .....$-21
-$20 thousand - Decrease reflects reduced training and leadership development requirements.
-$1 thousand - Decrease reflects reduced supplies and materials requirements.
(FY 2026 Baseline: $1,751 thousand; 0 FTEs)

FY 2027 Budget Request $1,505,352

IV. Performance Criteria and Evaluation Summary:

Defense Civilian Personnel Advisory Service (DCPAS)

Improve Timeliness and Quality of Hires

Performance Statement:
The Department relies on a skilled civilian workforce to support missions worldwide. Civilian employees provide continuity and technical expertise that enable military readiness. To meet mission requirements, the Department must hire qualified personnel efficiently. This effort focuses on improving the timeliness and quality of civilian hiring by monitoring measurable indicators and identifying areas for improvement.

Performance Evaluation:
Performance will be assessed using two measures. The first is the average number of days from a Request for Personnel Action (RPA) to Entry on Duty (EOD). The Department's goal is to meet an 80-day standard for hiring timeliness. The second measure is the hiring manager satisfaction rate, assessed through the Department's Hiring Manager Survey. Both measures will be reviewed quarterly to identify trends and opportunities to strengthen the hiring process.

Performance Outcome:
Meeting the 80-day hiring standard and improving hiring manager satisfaction support readiness by ensuring the Department can fill critical positions when needed. DCPAS will use data from these measures to refine hiring practices, reduce delays, and improve the hiring experience. In coordination with the Office of Personnel Management, DCPAS will continue improving the hiring manager survey to increase participation and strengthen feedback. DCPAS will also work with stakeholders to promote consistent time-to-hire practices across the Department.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Time-To Hire Rate – Average Number of Days to Hire from RPA creation to EOD	96	80	80
DoW Hiring Customer Satisfaction Rate – Average Response Rate through 3 for the DoW Hiring Manager Survey	80 percent	85 percent	85 percent

Defense Equal Opportunity Management Institute (DEOMI)

DEOMI/Education and Training Directorate

Performance Statement:
DEOMI provides classroom and virtual training to prepare Equal Opportunity Advisors, Command Climate Specialists, Equal Employment Opportunity professionals, Alternative Dispute Resolution Program Managers, and Affirmative Employment Program Managers to support

personnel across the Department of War and the Department of Homeland Security. Training is delivered through a learning management system to ensure consistent access for students across locations.

Performance Evaluation:
Performance will be measured by the percentage of students who successfully complete course requirements. DEOMI's goal is for at least 90 percent of enrolled students to meet all training standards across the courses offered.

Performance Outcome:
Achieving a 90 percent completion rate ensures that trained personnel are prepared to provide leaders with assessments, guidance, and training on equal opportunity, equal employment opportunity, and prevention of discriminatory or harassing behaviors. This supports a professional environment across the Department of War and the Department of Homeland Security.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Number of Students trained EOAC	120	284	284
Number of Students trained EOARCC	53	187	187
Number of Students trained SEPMC	0	93	93
Number of Students trained EEOMC	80	144	144
Number of Students trained EPS Entry	64	87	87
Number of Students trained EPS Intermediate	27	97	97
Number of Students trained EPS Advanced	0	64	64
Number of Students trained DPMC	59	115	115
Number of Students trained vLTAS	Do not track	Do not track	Do not track

Acronyms:
EOAC – Equal Opportunity Advisor Course
EOARCC – Equal Opportunity Advisor Reserve Component Course
SEPMC – Special Emphasis Program Manager Course
EEOMC – Equal Employment Opportunity Meditation Course
EPS – Equal Employment Opportunity Professional Series
DPMC – Disability Program Management Course
vLTAS- Virtual Leadership Team Awareness Seminar

Defense Manpower Data Center (DMDC)
Defense Enrollment Eligibility Reporting System (DEERS)/Benefits and Entitlements Programs

Performance Statement:

The Benefits and Entitlements programs provide real-time eligibility determinations for more than 18 million individuals who rely on Department benefits. These services ensure that military members, civilians, retirees, family members, and other eligible populations receive required benefits without delay. As additional federal partners adopt modernized electronic health record systems, the number of eligibility inquiries and updates is expected to increase. DMDC continues to improve system availability, processing accuracy, and self-service options to support timely access to benefits.

Performance Evaluation:
Performance will be measured by the number of benefit determination and maintenance activities completed each year, the number of identity and eligibility inquiries processed, and the use of self-service enrollment tools. These measures reflect the accuracy, efficiency, and accessibility of eligibility services. Annual volumes in these areas are expected to remain in the millions, consistent with historical demand reflected in the performance table.

Performance Outcome:
Accurate eligibility determinations for more than 18 million individuals help ensure timely access to medical and other legislatively mandated benefits. Continuous system availability reduces delays in care and services. Increased use of self-service tools allows beneficiaries to update information directly, reducing call volume and improving processing times. Improvements in determination accuracy help reduce rework and minimize the risk of improper payments.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Number of Entitlement and Benefit Determination and Maintenance Activities Processed	33 million	33 million	33 million
Number of successful Beneficiary Web Enrollment transactions	970 thousand	1 million	1 million
Number of eligibility-related inquiries processed (excluding direct care/Electronic Health Record Modernization) With the TRICARE Regional Enrolling Contractors transitions essentially completed, it's anticipated there will be a decrease in the eligibility inquiries.	3.5 billion	3.5 billion	3.5 billion

Defense Manpower Data Center (DMDC)
Defense Enrollment Eligibility Reporting System (DEERS)/ Electronic Health Record Modernization / Virtual Lifetime Electronic Record (EHRM/VLER)

Performance Statement:
The Electronic Health Record Modernization (EHRM) and Virtual Lifetime Electronic Record programs provide verified identity and personnel information to support the exchange of medical data across Department facilities, the Department of Veterans Affairs (VA), and other authorized

partners. These services ensure that patient identity information is accurate and available when needed. DMDC maintains synchronized records between Department and VA systems and supports the high volume of identity and eligibility queries required for medical care and benefits administration.

Performance Evaluation:
Performance will be measured by tracking the availability of patient identity services, with a target of maintaining 99.9 percent system availability. DMDC will also track the number of medical identity and eligibility queries completed to support EHRM, as well as the number of records synchronized and maintained between Department and VA systems. These measures reflect the reliability and accuracy of identity data used in medical and benefits processes.

Performance Outcome:
Maintaining 99.9 percent availability ensures that medical providers have timely access to accurate patient identity information, reducing delays in care and improving data sharing. Accurate synchronization of records with the VA supports timely and correct benefits determinations and ensures that patient information remains current as both Departments continue transitioning to modernized electronic health record systems.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
System availability of critical patient identity services (Note: This includes all EHRM applications.)	99.64 percent availability	99.8 percent availability	99.9 percent availability
Number of medical identity and eligibility queries completed successfully	1.1 billion	1 billion	1.2 billion
Number of records synchronized between DEERS and VA's Master Person Index	47 million	49 million	50 million
Number of maintenance transactions between DEERS and VA's Master Person Index	47 million	60 million	60 million

Defense Manpower Data Center (DMDC)
Enterprise Human Resource Information Systems (EHRIS)/ Civilian Human Resources (HR) Information Technology (IT) Program Planning and Management

Performance Statement:
The Enterprise Human Resources Information Systems (EHRIS) program provides authoritative personnel data and human resources information services that support civilian workforce management across the Department. These systems ensure that personnel actions, workforce reporting, and human resources transactions are processed accurately and consistently. EHRIS supports a large volume of personnel records and transactions each year, enabling timely and reliable human resources operations.

Performance Evaluation:
Performance will be measured by the availability of EHRIS systems, with a target of maintaining 98.5 percent system availability. Performance will also be assessed by the number of personnel transactions processed annually, as reflected in the performance table. These measures demonstrate the reliability of the systems and their ability to support high-volume human resources operations.

Performance Outcome:
Maintaining 98.5 percent availability ensures that human resources offices and managers have continuous access to personnel data needed for hiring, onboarding, workforce reporting, and other critical functions. High-volume transaction processing supports accurate and timely updates to personnel records, which improves data quality and reduces delays in human resources actions. Reliable system performance strengthens workforce management across the Department.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Percent of time EHRIS IT services are available to end-users	99.8 percent	98.5 percent	98.5 percent
Number of Requests for Personnel Actions processed by the civilian personnel system(s)	5.0 million	4.3 million	4.0 million

Defense Manpower Data Center (DMDC)
Identity Credential Management (ICM)/Real-time Automated Personnel Identification System (RAPIDS) & Common Access Card (CAC)

Performance Statement:
RAPIDS and the Common Access Card program provide the global system of software and hardware used to produce official Department of War identification cards. The program delivers identity credentialing services to military members, civilians, contractors, and other authorized individuals, ensuring timely and accurate issuance of Department-wide identification credentials. RAPIDS supports credentialing operations at sites worldwide and enables both in-person and online ID card services.

Performance Evaluation:
DMDC evaluates program performance by measuring the successful issuance of ID cards at RAPIDS workstations, overall RAPIDS system availability, and the time required to encode a CAC. The program maintains targets of a 95 percent successful issuance rate, 99 percent system availability outside scheduled maintenance windows, and an average CAC encoding time of 3 minutes, not to exceed 6 minutes. DMDC also measures the success rate of online USID card transactions and the availability of ID Card Office Online (IDCO) to support expanded self-service options.

Performance Outcome:

A high successful issuance rate reduces Department costs by limiting cardstock and consumable waste and shortening customer processing time. Expanding self-service options decreases in person demand at ID card offices, enabling long-term reductions in hardware and staffing requirements. High RAPIDS availability shortens transaction times and increases the number of customers that can be served each day, ensuring credentialed individuals remain mission-ready. Successful online USID card renewals provide a convenient option for cardholders, particularly those who cannot travel to or who live far from a RAPIDS site.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Rate of successful ID cards issuance at RAPIDS workstations	98.49 percent	95 percent	95 percent
RAPIDS availability	97.93 percent, outside of scheduled maintenance windows	99 percent, outside of scheduled maintenance windows	99 percent, outside of scheduled maintenance windows
CAC Encoding Time	3.05 minutes	3.5 minutes	3.5 minutes
Total successful online USID Card Renewals	361,422	150,000	150,000
Identity Card Office (IDCO) availability	99.46 percent, outside of scheduled maintenance windows	99 percent, outside of scheduled maintenance windows	99 percent, outside of scheduled maintenance windows

Defense Manpower Data Center (DMDC)
Identity Credential Management (ICM)/ Mission Partner Identity, Credentialing and Access Management (MP ICAM) Services

Performance Statement:
The Mission Partner Identity, Credentialing, and Access Management (MP ICAM) system provides sponsorship and credential management services for mission partners who require access to Department of War systems and facilities. MP ICAM enables mission partners to initiate, sponsor, and manage both DoW and non-DoW credentials, supporting logical and physical access based on credential type and sponsorship requirements. These capabilities strengthen secure identity management for external organizations that support DoW missions.

Performance Evaluation:
MP ICAM is in sustainment and continues to expand its functionality to meet mission partner access needs. DMDC measures performance by tracking the number of applicants registered in MP ICAM and has established a goal of increasing mission partner registrations by 5 percent annually as adoption expands across the DoW enterprise. DMDC also monitors the number of applicants sponsored to receive DoW credentials through MP ICAM to ensure the system supports mission partner access requirements.

Performance Outcome:

Increasing the number of applicants registered and sponsored within MP ICAM enhances the Department's ability to manage mission partner access efficiently and securely. As more mission partners use non-DoW credentials, the Department anticipates a reduction in the number of DoW-issued credentials required, lowering production and lifecycle management costs. Expanded use of MP ICAM improves access for mission partners while maintaining strong identity assurance across DoW systems and facilities.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Number of Applicants who have registered their non-DoW Personal Identity Verification (PIV) credential in the Mission Partner Identity Credential and Access Management System (MP ICAM)	1,644	2,500	4,000
Number of Applicants who have been sponsored to receive a DoW credential in the Mission Partner Identity Credential and Access Management System (MP ICAM)	646,770	685,000	685,000

Defense Manpower Data Center (DMDC)
Identity Credential Management (ICM)/Identity Services (IDES)

Performance Statement:
Identity Services provides the systems DMDC develops and maintains to authenticate Common Access Card (CAC) and Uniformed Services Identification (USID) card-eligible beneficiaries, Veterans, and other individuals with a continuing Department of War (DoW) affiliation. Identity Services also supports individuals who do not qualify for a Public Key Infrastructure (PKI) smart card but require access to a DoW resource. DMDC has implemented enhanced phishing-resistant multi-factor authentication and improved remote identity proofing through myAuth, with the goal of reducing fraud, improving self-service capabilities, and aligning with current industry standards for identity and authentication assurance.

Performance Evaluation
DMDC measures performance by tracking the number of fraud cases reported to the DMDC Customer Contact Center (CCC) and the Veterans Benefits Administration Fraud, Waste, and Abuse (VBA FWA) program, with a goal of reducing reported fraud by 5 percent annually. DMDC is also investing in improved infrastructure and hosting, including the planned decommissioning of DS Logon by the end of FY 2026 and migration to a DoW-approved cloud service offering to improve authentication and identity-proofing availability.

Performance Outcome:
Enhancements to myAuth, including phishing-resistant multi-factor authentication and improved remote identity proofing, are expected to reduce fraudulent activity reported to the CCC and VBA FWA. Improved availability of authentication and identity proofing services decreases transaction times for end users, enabling more efficient access to critical benefits information and reducing calls to the CCC related to service degradation.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Number of fraud cases reported	343	434	420
DS Logon availability	99.5 percent	99.3 percent	NA (Decommissioned)
myAuth Availability	100 percent	99.5 percent	99.9 percent
myAuth Self Service Account Creation	99 percent	99 percent	99 percent

Defense Manpower Data Center (DMDC)
Personnel Support Programs (PSP)/Defense Travel System (DTS)

Performance Statement:
The Defense Travel System (DTS) provides an automated, end-to-end travel management capability that enables travelers to create authorizations and travel orders, prepare reservations, receive approvals, generate travel vouchers, and obtain reimbursement. DTS also supports analysis and planning for future travel management solutions.

Performance Evaluation:
DMDC measures performance by maintaining a 98.5 percent system availability target for DTS to ensure reliable access for travelers and approving officials.

Performance Outcome:
High system availability ensures personnel can plan travel, obtain approvals, and receive reimbursement in a timely manner, supporting mission readiness and efficient administrative processing.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Availability of the DTS	99 percent	98.5 percent	98.5 percent

Defense Manpower Data Center (DMDC)
Personnel Support Programs (PSP)/Personnel Data Reporting Systems

Performance Statement:
Personnel Data Reporting Systems supports applications that use personnel data received from authoritative Department sources to provide manpower reporting capabilities for Defense Agencies and Field Activities, the Military Services, Joint Staff, Combatant Commands (CCMDs), Service Members, and Veterans.

Performance Evaluation:

DMDC measures performance by maintaining 99 percent availability of its IT systems; achieving 99.9 percent uptime for the Service Members Civil Relief Act (SCRA) and Military Lending Act (MLA) systems; completing the Joint Duty Assignment List (JDAL) on a one-year cycle; and streamlining interfaces for Joint Officer data entry.

Performance Outcome:
Improved system availability and data-management processes enhance security, reduce technology debt, and strengthen interoperability across personnel systems.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
System uptime for SCRA and MLA systems	99.93	99.9 percent	99.9 percent
JDAL cycle time	1 year	1 year	1 year
Total number of entries for joint officer data	2,153	2,000	2,000

Defense Manpower Data Center (DMDC)
Enterprise Data Service (EDS)/Data Governance and Data Operations

Performance Statement:
Data Governance and Data Operations oversees the collection, custodial storage, and use of DMDC enterprise data assets. The program provides subject-matter expertise and insight into personnel data and supports policy development and decision-making across the Federal Government through data reporting. DMDC has established goals to accurately process received data, reduce database instance counts, and eliminate redundant data collections.

Performance Evaluation:
DMDC measures performance by processing received data within one business day, reducing database instance counts by 10 percent, and decreasing redundant data collections by 35 percent, including a reduction of 25 million updates to the Personnel Data Repository (PDR) annually.

Performance Outcome:
Achieving these goals reduces hardware and contract support requirements, lowers software licensing needs, eliminates redundant data, and decreases cyber threat exposure points. These improvements also enhance the accuracy and availability of data used to inform personnel and readiness policy, issue credentials, determine eligibility for benefits and entitlements, and support federal and state benefit programs.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Data Governance and Data Operations Length of time to accurately process received data sets	24 hours	24 hours	24 hours
Amount of redundant data collections	6 percent	6 percent	6 percent

Number of defined data management processes	7	5	5
Average amount of time from data receipt to data being available to customers	12 days	12 days	12 days
Number of PDR updates	25 million	25 million	25 million

DPAC - Office of the Actuary (OACT)
Office of the Actuary

Performance Statement:
The Office of the Actuary performs valuations in accordance with generally accepted actuarial principles and practices, produces high-quality actuarial products, and provides objective actuarial expertise to support internal and external customers and stakeholders. The goal is for all valuations subject to audit to have no significant audit findings related to the office's work.

Performance Evaluation:
Each valuation undergoes internal review by credentialed actuaries and external review by two independent boards of actuaries chartered under the Federal Advisory Committee Act. These reviews assess assumptions, methodologies, and results to ensure compliance with accepted actuarial standards and audit requirements.

Performance Outcome:
Auditability of all trust funds is a Departmental priority. The Office of the Actuary supports the long history of unqualified audit opinions for the Military Retirement Fund and works to ensure no significant findings for the actuarial portions of the audits of the retiree health care funds.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Material weaknesses/significant deficiencies attributed to OACT's valuation work products	0	0	0

Performance Statement:
The Office of the Actuary provides and promotes learning and development opportunities to ensure work is performed by staff with the professional qualifications and skills required for actuarial practice.

Performance Evaluation:
Professional development is measured through junior staff participation in actuarial exams and courses, and senior staff attendance at professional meetings and conferences. Credentialed actuaries maintain compliance with national qualification standards through required continuing professional development.

Performance Outcome:

Junior staff progress toward professional actuarial credentials. Senior staff maintain required continuing education and attest annually to meet national qualification standards.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
OACT actuarial staff taking at least one actuarial exam or acquiring sufficient Continuing Education credits	7	8	8

Performance Statement:
The Office of the Actuary maintains awareness of current military benefit programs and potential changes by engaging with policy offices, participating in departmental working groups, and maintaining expertise in relevant data systems. The office ensures that current data and benefit provisions are accurately reflected in actuarial results.

Performance Evaluation:
Performance is measured by maintaining regular contact with established points of contact across the Department, the Office of Management and Budget, the Department of Veterans Affairs, and the Congressional Budget Office, and by proactively monitoring proposed legislation affecting military retirement and related benefits. The office maintains access to required data environments and collaborates with data stewards to ensure valuation results are based on accurate and complete data.

Performance Outcome:
All legislated changes to military retirement, education, survivor, and retiree health benefits are incorporated into valuation and financial statement work. Cost percentages and per capita amounts are updated to reflect benefit changes taking effect before the end of the fiscal year. Valuation results remain aligned with evolving data platforms and program requirements.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Benefit/data changes not reflected in valuation/financial statement work	0	0	0

DPAC - Office of the Actuary (OACT)
Station and Housing Allowances Program

Performance Statement:
The rental allowance component of the Overseas Housing Allowance is calculated for more than 500 overseas locations to offset housing costs and ensure Service members can obtain adequate and suitable housing on the local economy near their permanent duty station.

Performance Evaluation:
Conduct biannual rental data analyses for each overseas location within 60 days after receiving complete rental data submissions.

Performance Outcome:
Ensures Service members receive timely and accurate rental allowances to offset their overseas housing costs.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
OHA Rental Allowance Completion	<= 60 Days	<= 60 Days	<= 60 Days

Performance Statement:
The utility and recurring maintenance portion of the Overseas Housing Allowance is calculated as a monthly rate to help Service members stationed overseas cover household utility expenses, recurring maintenance, and minor repair costs.

Performance Evaluation:
Conduct annual surveys to collect country-specific data on utility and recurring maintenance expenses. Analyze survey results and recommend updated allowance rates for each country within 60 days after the survey concludes.

Performance Outcome:
Ensures Service members receive timely and accurate allowances to offset overseas utility and recurring maintenance costs.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
OHA Utility and Recurring Maintenance Allowance Completion	<= 60 Days	<= 60 Days	<= 60 Days

Performance Statement:
The Overseas Cost-of-Living Allowance is a non-taxable allowance designed to offset higher prices for non-housing goods and services outside the continental United States and to help equalize purchasing power with Service members stationed within the continental United States.

Performance Evaluation:
Conduct annual analyses and establish updated allowance rates for more than 100 overseas locations within 60 days after receiving complete data submissions from country allowance coordinators.

Performance Outcome:
Ensures Service members stationed overseas receive timely and accurate allowance updates that maintain purchasing power comparable to their stateside counterparts.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
OCOLA Completion	<= 60 Days	<= 60 Days	<= 60 Days

DPAC - Office of People Analytics (OPA)
Recruitment and Outreach Research/ Joint Advertising Market Research & Studies (JAMRS)

Performance Statement:
Recruitment and outreach efforts aim to build a receptive recruiting environment by increasing understanding, appreciation, and advocacy of military service among youth and key influencers.

Performance Evaluation:
Increase website traffic to TodaysMilitary.com year over year. Ensure that at least 20 percent of influencers recall seeing joint recruitment outreach.

Performance Outcome:
Meeting or exceeding performance goals strengthens the Department's ability to promote military service, enhances Service recruiting efforts, and supports a unified advertising approach that improves efficiency and fosters a more receptive recruiting environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Increase website traffic to TodaysMilitary.com compared to FY 2017 (a non-paid advertising campaign year). Target = increase in traffic by 25 percent	41 percent	40 percent	40 percent
Percentage of influencers who recall seeing joint recruitment outreach will meet or exceed 20 percent	52 percent	35 percent	35 percent

Performance Statement:
Provide the Military Services with comprehensive coverage of the prospect market for direct marketing and outreach.

Performance Evaluation:
Deliver contact information for at least 85 percent of the national population of high-school seniors to the Military Services.

Performance Outcome:
A consolidated prospect database reduces duplication of effort and cost across the Military Services and Components, providing a shared resource that supports recruiting missions efficiently and effectively.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate

Deliver to the Services contact information for a minimum of 70 percent of the universe of senior year high school aged students	81 percent	70 percent	70 percent

Performance Statement:
Provide joint market research products that meet shared information needs across the recruiting enterprise, including distribution, frequency, and customer satisfaction with research deliverables.

Performance Evaluation:
Maintain at least 500 stakeholders or visitors accessing market research deliverables on the Office of People Analytics website. Maintain an average of at least 150 monthly downloads of market research products. Maintain an average customer satisfaction rating of at least 3.5 on a 5-point scale across major deliverables.

Performance Outcome:
Meeting shared information needs reduces duplication across the Military Services and provides leaders with timely trend data and market intelligence to guide strategic and tactical recruiting decisions, helping prevent mission shortfalls and inefficient resource use.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Maintain a minimum of 500 stakeholder/visitors viewing market research deliverables on OPA's website	2,156	500	500
Maintain an average of at least 150 downloads a month by stakeholders from OPA's website	938	400	400
Maintain an average customer satisfaction rating of at least 3.5 on a 5.0 scale across all major market research deliverables	4.12	4.3	4.3

DPAC - Office of People Analytics (OPA)
Testing and Assessment

Performance Statement:
Testing and Assessment oversees the quality and administration of the Armed Services Vocational Aptitude Battery and related cognitive and non-cognitive instruments used for students, applicants, and enlistees.

Performance Evaluation:

Administer valid testing instruments to 350,000 military applicants annually, with fewer than 5 percent of operational tests identified as compromised and fewer than 15 percent of computerized tests experiencing unanticipated interruptions.

Performance Outcome:
Reliable and valid test scores improve the accuracy of selection and job classification decisions, contributing to stronger training outcomes and improved job performance across the force.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Number of military applicants administered the ASVAB meeting (above) compromise and IT performance thresholds.	496,898	405,900	422,136

DPAC - Office of People Analytics (OPA)
Multiple Subprograms

Performance Statement:
Provide high-quality and timely attitude and opinion surveys and focus groups that support the Department's evaluation of existing programs and policies and establish baseline measures before new initiatives are implemented.

Performance Evaluation:
Ensure survey results are representative of the Department's population by applying scientific methods such as sampling, weighting, and non-response bias analysis. Make final survey or focus group results available for analysis within 180 days of closing for at least 90 percent of surveys.

Performance Outcome:
Supports data-driven decision-making for personnel and readiness programs and policies, enabling the Department to focus limited resources on the most important personnel and quality-of-life issues affecting the military community.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Survey results available for final analysis within 180 days of survey/focus group closing for more than 90 percent of surveys	95 percent	95 percent	95 percent

Performance Statement:
Provide analytic research deliverables that address information needs related to quality of life and resiliency across the force.

Performance Evaluation:

Deliver at least 10 analytic research products related to quality of life and resiliency to a minimum of four policy offices. Maintain customer satisfaction ratings of “good” or “very good” based on feedback from sponsors, users, and other stakeholders.

Performance Outcome:
Meeting resiliency-related information needs ensures that policies and programs are informed by data and that resources are directed toward mitigating risks associated with destructive behaviors.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Deliver a minimum of 10 analytic research deliverables related to quality of life and resiliency in FY 2027 to at least four policy office stakeholders across the Department	67	30	30
Maintain a customer satisfaction of good/very good rating based on comments, feedback, emails, and other communications from sponsors, users, or customers across all resiliency-focused analytic research deliverables	Good/Very Good	Good/Very Good	Good/Very Good

Performance Statement:
Maintain or increase response rates on high-priority Department-wide surveys.

Performance Evaluation:
Maintain a response rate that is at least as high as, or higher than, the most recent administration of the same survey.

Performance Outcome:
Provides decision-makers with high-quality, reliable data on the attitudes, opinions, and experiences of Service members, supporting effective personnel policy development.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Maintain a weighted response rate that is at least 13 percent of sample members	27 percent	13 percent	13 percent

DPAC - Office of People Analytics (OPA)
Statistics, Data Science, and Analytics

Performance Statement:

Provide analytic research products and analytical tools that enhance research quality and efficiency across the Office of People Analytics.

Performance Evaluation:
Distribute at least five analytic products in support of Office of People Analytics research activities.

Performance Outcome:
Strengthens data-driven decision-making by improving analytical processes and introducing new research strategies that increase efficiency and expand analytic capability.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Distribute a minimum of five analytic products in support of OPA research in FY 2027	6	6	6

DSSC- Computer/Electronic Accommodations Program (CAP)
Computer/Electronic Accommodations Program (CAP)/Accommodations

Performance Statement:
The Computer/Electronic Accommodations Program provides assistive technology devices and services as reasonable accommodations in support of Sections 501 and 504 of the Rehabilitation Act of 1973. These accommodations enable individuals with disabilities and wounded, ill, or injured Service members to access information and communication technology. Program performance is measured through customer feedback and the timeliness of providing assistive technology and employment support services. Timely and effective accommodations promote equal access and opportunity in the workplace and support the ability of employees and Service members to perform essential job functions.

Performance Evaluation:
Evaluate program effectiveness by ensuring that at least 92 percent of respondents report a positive impact on their ability to perform essential job functions after receiving an accommodation. Meet a processing timeframe of 30 days for providing assistive technology devices and services, supported by the program's online portal and business system. Data reviews identify factors contributing to delays and inform process improvements.

Performance Outcome:
Program performance supports workplace inclusion, enhances productivity, and ensures responsible stewardship of government resources. Accommodations are processed within 30 days, and at least 92 percent of customers report a positive impact on their ability to perform job duties. These measures strengthen mission accomplishment, increase job satisfaction, and expand awareness and use of assistive technology across the Department.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Positive impact to work performance, due to CAP accommodations.	93 percent	92 percent	93 percent
Decrease the time from customer request received to ordered by CAP for the AT devices and services.	27 days	30 days	30 days

DSSC - Defense Activity for Non-Traditional Education Support (DANTES)
Credit for Prior Learning (CPL) Generation, Acceptance, and Application

Performance Statement:
DANTES strengthens Service member education and career advancement through two complementary program areas: Credit for Prior Learning (CPL) and College and Career Readiness Programs. CPL supports degree completion by translating military training and occupational experience into college credit recommendations and improving the efficiency of military course and occupational evaluations through virtual review readiness and targeted schoolhouse feedback. College and Career Readiness Programs enhance foundational academic skills and support career exploration by helping Service members improve reading, math, and science proficiency—often by an average of 45 percent—and by providing tools such as the Academic Skills Training (AST) Program and the Kuder Journey Program to support qualification improvement and career planning.

Performance Evaluation:
Program effectiveness is assessed through measures that evaluate both the quality of CPL processes and the impact of academic and career readiness initiatives. CPL performance is evaluated by the percentage of training sites demonstrating readiness for virtual reviews, the percentage of evaluations conducted virtually each year, changes in recommended college credits following curriculum summits, the number of academic institutions using the automated Military Guide credit evaluation system, and stakeholder satisfaction with information quality.

Readiness program performance is evaluated by comparing AST pre- and post-test results and translating post-test scores into predicted Armed Forces Qualification Test (AFQT) outcomes. Additional evaluation includes Service member feedback on the AST and Kuder Journey programs, the degree to which programs meet expectations, improvements in reading, math, and science skills—targeting an average 45 percent increase—and customer satisfaction survey results.

Performance Outcome:
Together, CPL and College and Career Readiness Programs increase the number of recommended college credits generated, accepted, and applied toward degrees; improve transparency and access to military training and occupational evaluation data; and strengthen the Department's return on investment in education and training. These programs enhance academic readiness, support qualifications and career advancement, and improve overall success in pursuing education and career goals. AST and AFQT linked improvements demonstrate measurable gains in foundational skills, while the Kuder Journey Program supports informed career planning and development. By aligning military learning with higher

education standards and strengthening academic readiness, the programs contribute directly to more efficient pathways to degree completion and improved Service member outcomes.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Percent of positive training site readiness scores	Maintain >90 percent site readiness scores	Maintain >90 percent site readiness scores	Maintain >90 percent site readiness scores
Percent of targeted academic institutions sharing credit award decisions through the automated digital guide	50 percent of pilot universities integrated	Benchmark plus 2 percent	Benchmark plus 2 percent
Percent of the time that all functional tools are available to end users of AST	Maintain availability of the tools >98 percent of the time	Maintain availability of the tools >98 percent of the time	Maintain availability of the tools >98 percent of the time
Length of time between AST technical support inquiries and the response	Respond to inquiries within 24 business hours	Respond to inquiries within 24 business hours	Respond to inquiries within 24 business hours
Percent of the time that all functional tools are available to end users of Kuder Journey	Maintain availability of the tools >98 percent of the time	Maintain availability of the tools >98 percent of the time	Maintain availability of the tools >98 percent of the time
Length of time between Kuder Journey technical support inquiries and the response	Respond to inquiries within 24 business hours	Respond to inquiries within 24 business hours	Respond to inquiries within 24 business hours

DSSC - Defense Language and National Security Education Office (DLNSEO)

	(Dollars in Thousands)		
Program	**FY 2025**	**FY 2026**	**FY 2027**
Language Training Centers – baseline	0	0	0
Language Training Centers – congressional add	0	10,000	0
Language Flagship Program - baseline	16,341	8,000	8,000
Language Flagship Program – congressional add	4,000	20,000	0

Language Training Center (LTC): The Language Training Center Program (LTC) is authorized under Section 529 of the NDAA for FY 2010 as amended in Section 575 of the NDAA for FY 2024. LTC is a grant program initiative for U.S. Institutions of Higher Education in partnership with

DoW components designed to deliver specific training in critical languages and strategic regions for Active-Duty, Reserve Component and DoW civilian personnel.

Language Flagship Program and Boren Scholarships and Fellowships: DLNSEO efforts support language studies to U.S. undergraduate and graduate students who commit to federal service in national security through nationally recognized Boren Scholarships and Fellowships and provide grants to U.S. Institutions of Higher Education to develop and implement a range of programs of advanced instruction in critical languages to enable students to attain professional-level proficiency.

DSSC - Defense Language and National Security Education Office (DLNSEO)
Language Training Center (LTC) Program Strategic Metric; Improving Training Goals and Outcomes

Performance Statement:
The Language Training Center (LTC) Program leverages the capabilities of U.S. Institutions of Higher Education to provide Department of War personnel with instruction in critical languages, regional expertise, and cultural competencies. Authorized under Section 529 of the FY 2010 National Defense Authorization Act (NDAA), as amended by Section 575 of the FY 2024 NDAA, the program aligns academic expertise with operational language requirements. Participating institutions establish course specific training goals and measurable outcomes, and results are reported quarterly to support program oversight and continuous improvement.

Performance Evaluation:
For FY 2026 and FY 2027, the LTC Program projects that an average of 91 percent of students will meet or exceed proficiency targets across all LTC courses. These targets are developed jointly by each academic institution and its Department of War partner to ensure alignment with mission requirements, which vary by component, language, and operational need.

Performance Outcome:
No funding was provided for LTC activities in FY 2025. Projected outcomes for FY 2026 and FY 2027 reflect the program's established ability to deliver mission aligned language training when appropriations are available.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Average percentage of students meeting or exceeding proficiency targets across all LTC courses in the training year.	N/A	91 percent	91 percent

*No LTC activity was funded in FY 2025. Estimates for FY 2026 and FY 2027 are based on potential Congressional funding.

Remarks:
The LTC Program has demonstrated the capacity to deliver tailored language instruction that supports a wide range of Department of War (DoW) mission requirements. DoW components—including Foreign Area Officers, intelligence personnel, special operations forces, general purpose

forces, and National Guard and Reserve units—work directly with their academic partners to establish performance goals that reflect their specific operational needs. This collaborative model ensures that training outcomes remain aligned with national security requirements.

DSSC - Defense Language and National Security Education Office (DLNSEO)
Language Flagship Program Strategic Metric; Improving the Pipeline of U.S. Graduates with Professional Level Critical Language Skills

Performance Statement:
The Language Flagship Program develops undergraduate students with advanced proficiency in critical languages to support national security workforce needs. The program measures success by the percentage of participants completing overseas capstone programs who achieve the Flagship Certification standard of ILR 3/2+/2+ in speaking, reading, and listening, as assessed through the Interagency Language Roundtable (ILR) performance scale.

Performance Evaluation:
In FY 2025, 65.2 percent of students completing Language Flagship capstone programs achieved the ILR 3/2+/2+ proficiency standard across speaking, reading, and listening modalities.

For FY 2026, based on prior-year program performance and cohort variability, DLNSEO estimates that 60 percent of students completing capstone programs will meet the ILR 3/2+/2+ standard.

For FY 2027, DLNSEO anticipates that 61 percent of students completing capstone programs will achieve the ILR 3/2+/2+ proficiency level.

Performance Outcome:
The Language Flagship Program contributes to a pipeline of graduates prepared for federal service in national security roles requiring advanced language, regional, and cultural expertise. Students who achieve Flagship Certification demonstrate professional-level proficiency and are positioned to support Department of War and broader national security community mission requirements.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Defense Language, Regional, Expertise, and Culture Program Strategic Metric	65.2 percent	60 percent	61 percent

DSSC - Equal Employment Opportunity (EEO)
Investigations and Resolutions Directorate

Performance Statement:
The Investigations and Resolutions Directorate provides Equal Employment Opportunity complaint investigations and facilitation services for Department of War Components and Activities. Centralizing these services reduces costs and supports consistent investigative practices across the Department. Federal requirements call for an impartial investigation to be completed within 180 days of a complaint being filed unless both

parties agree in writing to extend the timeline. Agencies must request an investigation within 30 days of receiving a formal complaint. The Investigations and Resolutions Directorate has 120 days to complete the investigation and tracks performance by measuring the average number of days required to complete each case.

Performance Evaluation:
In FY 2027, the Investigations and Resolutions Directorate will continue improving the time required to complete Equal Employment Opportunity complaint investigations that result in a Report of Investigation. The goal is to complete each investigation within 120 days from the date the request is received and return the Report of Investigation to the requesting agency within that timeframe.

Performance Outcome:
Meeting the 120-day requirement reduces the likelihood that the Department of War will receive sanction orders for untimely investigations. When investigations exceed required timelines, the Equal Employment Opportunity Commission may issue sanctions that include financial judgments for complainants without reviewing the merits of the case. By meeting the target timeline, the Investigations and Resolutions Directorate helps the Department avoid these outcomes and ensures timely, fair processing of complaints.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Number of processing days of EEO complaint investigations	213	120	120

DSSC - Defense Travel Management Office (DTMO)
Reform Travel Management

Performance Statement:
The Defense Travel Management Office supports the Department of War by managing and modernizing an $11 billion travel enterprise. This work ensures that commercial travel across the Department is cost-efficient, transparent, and aligned with mission needs.

Performance Evaluation:
The Defense Travel Management Office evaluates its performance through an integrated approach that links strategy, operations, policy, governance, programs, and systems. This approach focuses on reducing travel costs and returning rebate dollars to the Department. A central part of this effort is the use of data analysis to generate business intelligence that improves program oversight, identifies cost saving opportunities, and strengthens accountability to taxpayers. The Defense Travel Management Office maintains a travel data warehouse and business intelligence tools that allow the Department of War to analyze travel spending, benchmark performance, and monitor progress in improving visibility and accuracy across all travel categories.

Performance Outcome:
Greater visibility into travel spending supports strategic sourcing, policy development, and program improvements. These efforts increase cost-effectiveness, reduce unnecessary spending, and improve customer satisfaction across the Department of War travel enterprise.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Travel Spend Visibility[1]	87 percent	72 percent	72 percent
Cost Avoidance from Strategic Sourcing			
DoW Preferred Commercial Lodging Program[2]	$32.9 million	$24 million	$24 million
US Government Rental Car Program[3]	$10 million	$20 million	$20 million
Rebates[4]			
Government Travel Charge Card Rebates[2]	$110 million	$120 million	$115 million
Preferred Dining Program Rebates[2]	$154,363.50	$255 thousand	$225 thousand
Customer Satisfaction[5]			
Integrated Lodging Program	86 percent	82 percent	80 percent
US Government Rental Car Program	84 percent	80 percent	80 percent
Government Travel Charge Card Program	71 percent	80 percent	80 percent
Travel Management Company Services	85 percent	85 percent	83 percent
Commercial Air	82 percent	85 percent	83 percent

[1]Travel spend visibility is the percent of total Department of War direct travel costs supported by validated data identifying the travel spend category.
[2]Cost avoidance for the Department of War Preferred Commercial Lodging Program is the total dollars avoided when lodging is booked at preferred commercial properties below 95.6 percent of per diem, which was the average per diem percentage for all continental United States commercial stays.
[3]Cost avoidance for the United States Government Rental Car Program is calculated as the sum of all Department of War rental car bookings at the published rate minus the sum of all bookings at the actual government rate offered and selected.
[4]Rebates represent the total dollar value of rebates received from the corresponding Department of War program.
[5]Customer satisfaction reflects the percentage equivalent of the mean Likert scale score for questions related to each program area.

DSSC - Employer Support of the Guard and Reserve (ESGR)
Employer Support of the Guard and Reserve (ESGR)/Employer Engagement

Performance Statement:
Employer Support of the Guard and Reserve promotes understanding and support for Guard and Reserve Service members among civilian employers. The program's mission is supported by Title 38 U.S. Code Section 4333, 10 U.S. Code Section 1588, and 10 U.S. Code Section 2241(c). Employer Support of the Guard and Reserve uses approximately 2,000 volunteers to engage and educate current and potential employers of approximately 762,000 Guard and Reserve Service members on their rights and responsibilities under the Uniformed Services Employment and Reemployment Rights Act.

Performance Evaluation:
Performance is measured by the number of employers and Service members reached through outreach and education, and by the number of volunteers formally trained to support the mission.

In FY 2025, Employer Support of the Guard and Reserve engaged 243,870 employers on the value of Guard and Reserve employees and provided Uniformed Services Employment and Reemployment Rights Act education. Targets for employers engaged are 200,000 in FY 2026 and 201,000 in FY 2027.

In FY 2025, 271,520 Service members received Uniformed Services Employment and Reemployment Rights Act education. Targets for Service members engaged are 200,000 in FY 2026 and 202,000 in FY 2027.

In FY 2025, Employer Support of the Guard and Reserve trained 1,280 volunteers through in-person, virtual, and web-based courses. The program aims to train 500 volunteers per year through FY 2027. Volunteers historically contribute more than 185,000 hours of service annually, with an estimated value of $6 million. Attendance is tracked through event reports and virtual platform data, and the value of volunteer time is based on Independent Sector averages.

Performance Outcome:
These efforts help employers and Service members better understand Uniformed Services Employment and Reemployment Rights Act protections, reducing workplace disputes related to military service. Increased employer awareness also reinforces the importance of a strong Reserve Component, which represents 38 percent of the Total Military Force while operating with 16 percent of the Department of War budget. Meeting engagement and training targets supports retention by allowing Guard and Reserve Service members to focus on readiness while fulfilling their military duties.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Employers Engaged	243,870	200,000	201,000
Service members Engaged	271,520	200,000	202,000
Volunteers Trained	1,280	500	500

Remarks:
Use of web-based technology has increased the effectiveness of volunteer training.

DSSC - Employer Support of the Guard and Reserve (ESGR)
Employer Support of the Guard and Reserve (ESGR)/Ombudsman Services

Performance Statement:
Employer Support of the Guard and Reserve provides assistance in resolving conflicts between Service members and their civilian employers. This work supports the Department of War's Uniformed Services Employment and Reemployment Rights Act outreach responsibilities under 38 U.S. Code Section 4333. Ombudsman Services answers Uniformed Services Employment and Reemployment Rights Act inquiries and mediates workplace conflicts related to Guard and Reserve military service. Through a Customer Service Center and trained volunteer mediators, the program helps Service members and employers understand their rights and responsibilities and resolve disputes quickly.

Performance Evaluation:
Performance is measured by the number of Uniformed Services Employment and Reemployment Rights Act inquiries received and the resolution rate of mediated cases.

In FY 2025, the Employer Support of the Guard and Reserve Customer Service Center and volunteers answered 15,461 inquiries from Service members and employers. The annual target is 15,000 inquiries. Inquiry volume varies based on mobilizations, natural disasters, outreach activities, and other factors. Data is collected through the Inquiry and Case Management System and event reports.

In FY 2025, the resolution rate for mediated cases was 72 percent, exceeding the annual target of 70 percent. Resolution rates can vary because mediation requires both parties to participate and agree to a solution. The Inquiry and Case Management System is used to track case outcomes.

Performance Outcome:
By answering Uniformed Services Employment and Reemployment Rights Act questions and helping resolve workplace issues, the program supports military readiness and retention. Service members are better able to prepare for annual training, active-duty orders, and mobilizations when workplace concerns are addressed promptly. Increased awareness among employers and Service members also helps reduce disputes related to military service.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Inquiries answered	15,461	15,000	15,000
Percent conflict resolution	72 percent	70 percent	70 percent

DSSC - Federal Voting Assistance Program (FVAP)
Federal Voting Assistance Program (FVAP)/Voting Assistance, Tools, and Resource Interactions

Performance Statement:
The Federal Voting Assistance Program works to ensure Service members, their eligible family members, and overseas citizens are aware of their right to vote and have the tools and resources needed to do so from anywhere in the world. The Director of the Federal Voting Assistance

Program administers the Uniformed and Overseas Citizens Absentee Voting Act on behalf of the Secretary of War. The Act requires states to transmit requested absentee ballots to Uniformed and Overseas Citizens Absentee Voting Act voters no later than 45 days before a federal election and to provide electronic transmission upon request.

Citizens covered by the Uniformed and Overseas Citizens Absentee Voting Act include members of the Uniformed Services, members of the Merchant Marines, eligible family members, and U.S. citizens residing outside the United States. The Federal Voting Assistance Program supports these voters through partnerships with the Military Services, Department of State, Department of Justice, and election officials from all 50 states, U.S. territories, and the District of Columbia. Increasing the likelihood that interested Uniformed and Overseas Citizens Absentee Voting Act active-duty members use available Federal Voting Assistance Program resources, including the FVAP.gov website, helps increase awareness of Department of War voting assistance and supports the program's mission.

Performance Evaluation:
The Federal Voting Assistance Program evaluates performance by reviewing post-election surveys of active-duty military voters to compare absentee ballot return rates between those who use Department of War voting resources and those who do not. The program also evaluates the number of overseas citizen website conversions, calculated as the number of conversions on FVAP.gov divided by the estimated overseas civilian population eligible for absentee voting visiting the site.

Data sources include Google Analytics, social media analytics, post-election surveys of active-duty personnel, overseas citizen voters, and voting assistance officers. Electronic data collection tools identify user interactions with Federal Voting Assistance Program resources and awareness campaigns. Reports from Voting Assistance Officers, Installation Voter Assistance Offices, and the U.S. Election Assistance Commission are reviewed and validated. Success is defined as 20 percent of eligible voters converting to the website.

Performance Outcome:
Increased use of Department of War voting resources supports greater voter awareness and improves the likelihood that Uniformed and Overseas Citizens Absentee Voting Act active-duty members successfully return absentee ballots. Increased overseas civilian conversions indicate that more citizens are completing the federal voter registration and ballot request form and submitting it to their state of legal residence for processing. These outcomes provide a measure of overall program effectiveness.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Difference between active-duty Service member absentee ballot requesters interacting with DoW voting assistance resources or tools, versus those not, on casting an absentee ballot.	Not available due to non-voting periods/years	Statistically significant difference	Not available due to non-voting periods/years

Percentage of eligible overseas civilian voters website conversions.	Not available due to non-voting periods/years	20 percent	Not available due to non-voting periods/years

Remarks:
The Federal Voting Assistance Program is required by Congress to report voter registration and participation rates for active-duty military and overseas citizen populations. These metrics are not a precise indicator of program effectiveness because they include voting rates for domestic active-duty members and do not isolate absentee voters. All calculations are estimates based on the Citizen Voting Age Population published by the Census Bureau. Interest in voting is a key factor in whether an individual chooses to cast an absentee ballot, and increased awareness does not necessarily result in increased absentee voting.

DSSC - Military-Civilian Transition Office (MCTO)
Military-Civilian Transition Office (MCTO) / Transition & Reintegration-Information Technology

Performance Statement:
The Military-Civilian Transition Office provides program management to support the transition and reintegration of Service members and their families. Its core programs include the Transition Assistance Program, codified in Title 10 U.S. Code Chapter 58 Sections 1142 and 1144; the Yellow Ribbon Reintegration Program, codified in Public Law 110 181 Section 582; and SkillBridge, codified in Title 10 U.S. Code Chapter 58 Section 1143. These programs support approximately 200,000 Service members each year as they separate, retire, or are released from active duty.

The Military-Civilian Transition Office leads federal interagency coordination with the Departments of Labor, Education, Veterans Affairs, and Homeland Security, the Small Business Administration, and the Office of Personnel Management. This collaboration supports delivery of transition services and resources across the federal government.

The office is developing a Transition and Reintegration Information Technology Enterprise System to support statutory compliance, program evaluation, and data-driven decision-making. The system will provide a single source for transition data, support Career Readiness Standards, enable warm handovers to partner agencies, and deliver tailored transition and reintegration curricula.

Performance Evaluation:
The Military-Civilian Transition Office evaluates performance by tracking the percentage of known eligible transitioning active-duty Service members who complete required program elements. The goal is to track 90 percent completion.

For the Transition Assistance Program, required elements include individual counseling, pre-separation counseling, a self-assessment, completion of one-day courses from the Department of War, Department of Labor, and Department of Veterans Affairs, and participation in at least one two-day specialized training track, as required by Title 10 U.S. Code Sections 1142 and 1144, Public Law 112 56, and Public Law 115 232.

For the Yellow Ribbon Reintegration Program, performance is measured by delivery of information and support before, during, and after activation, mobilization, or deployment.

For SkillBridge, performance measures include applications, participation, job offers, job acceptance, initial salary, and job retention.

The office tracks completion of required electronic transition documentation to measure implementation of the transition assistance enterprise system. The goal is 95 percent completion. Data is validated through the Defense Manpower Data Center and the Defense Enrollment Eligibility Reporting System, and compliance reports are shared with Military Departments and interagency partners.

The transition and reintegration strategy uses qualitative and quantitative methods to assess program effectiveness. Pre- and post-separation assessments evaluate Service members' preparation for post-transition goals and measure long-term outcomes. Federal data sources, including employment and education indicators, support evaluation of post separation results in accordance with Title 10 U.S. Code Section 1155.

The evaluation plan includes 25 measures and indicators that track performance, trends, and challenges. Participant assessments and surveys provide feedback on curriculum quality and program delivery.

Performance Outcome:
Long-term outcome data will improve understanding of post-transition experiences for Service members who served at least 365 days on Title 10 active-duty orders. This data is necessary to evaluate how transition programs influence employment, education, and other post-service outcomes.

The goal is to verify the percentage of known eligible transitioning Service members who meet Career Readiness Standards or receive a warm handover to partner agencies before separation or retirement. Tracking long term outcomes supports continuous improvement and fulfills requirements established in the National Defense Authorization Act for Fiscal Year 2019.

The Department of War's ability to sustain the All-Volunteer Force depends in part on how well the Nation supports transitioning Service members, veterans, and their families. A single-source data system will provide a consistent structure to assess transition needs, identify gaps, and support Service members as they prepare for post service goals.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate

Percent of users of military departments completing eForms to measure implementation of a transition assistance Enterprise System.	95 percent	95 percent	95 percent
Percent of eligible transitioning Reserve Component Service members completing TAP requirements to ensure transition preparedness.	85 percent	85 percent	85 percent
Percent of eligible transitioning Active-Duty Service members completing TAP requirements to indicate transition preparedness.	90 percent	90 percent	90 percent

DSSC - Military-Civilian Transition Office (MCTO)
MCTO/YRRP/Event Satisfaction

Performance Statement:
The Military-Civilian Transition Office measures the percentage of National Guard and Reserve Component Service members and their families who report satisfaction with Yellow Ribbon Reintegration Program events. This metric reflects overall satisfaction with the information, resources, and support provided throughout the deployment cycle. It also indicates whether the program is meeting its mission to improve the well-being of National Guard and Reserve Component Service members and their families by providing timely and relevant deployment-cycle support. The goal is to achieve and maintain an overall event satisfaction rate of 85 percent.

Performance Evaluation:
Event satisfaction is measured through a post-event survey administered by the Reserve Components to National Guard and Reserve Component Service members and their guests. The survey asks participants to indicate the extent to which they agree that the event was helpful. All attendees age 18 and older are encouraged to complete the survey before departing the event.

Survey responses are collected electronically or on paper and processed through an automated system that compiles, analyzes, and prepares the data for reporting. Quarterly quality control checks ensure accuracy and consistency. Results are analyzed and reported quarterly to identify trends and assess program performance.

Performance Outcome:
Event satisfaction provides an overall indication of whether the Yellow Ribbon Reintegration Program is meeting its mission to support the well-being of National Guard and Reserve Component Service members and their families throughout the deployment cycle. The metric also helps

identify trends, inconsistencies, and areas for improvement in program delivery, including the quality and relevance of information, support, and resources provided.

Achieving the program goal of 85 percent satisfaction supports improved deployment readiness, resilience, and reintegration outcomes for Service members and their families.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Event satisfaction	85 percent	85 percent	85 percent

DSSC - Military-Civilian Transition Office (MCTO)
Military-Civilian Transition Office Yellow Ribbon Reintegration Program — Learning Gains

Performance Statement:
The Military-Civilian Transition Office measures the percentage of National Guard and Reserve Component Service members and their families who report useful learning gains from Yellow Ribbon Reintegration Program events. This metric reflects the usefulness and relevance of the information, resources, and support provided throughout the deployment cycle. Learning gains, including among participants who attend multiple events across multiple deployments, indicate the program's effectiveness in delivering timely and helpful deployment-cycle support. The goal is to achieve and maintain an overall learning gain rate of 90 percent.

Performance Evaluation:
Learning gains are measured through a post-event survey administered by the Reserve Components to National Guard and Reserve Component Service members and their guests. The survey asks participants whether they learned something useful across key topic areas such as finance, employment, legal matters, medical and mental health, communication, and Department of Veterans Affairs resources. All attendees age 18 and older are encouraged to complete the survey before departing the event.

Survey responses are collected electronically or on paper and processed through an automated system that compiles, analyzes, and prepares the data for reporting. Quarterly quality control checks ensure accuracy and consistency. Results are analyzed and reported quarterly to identify trends and assess program performance.

Performance Outcome:
Learning gains provide an indication of whether the Yellow Ribbon Reintegration Program is meeting its mission to support the well-being of National Guard and Reserve Component Service members and their families by providing useful information and resources throughout the deployment cycle. This metric helps identify trends, inconsistencies, and areas for improvement in program delivery, including the quality and relevance of information and support provided.

Learning gains also demonstrate whether repeated attendance at Yellow Ribbon Reintegration Program events contributes to continued learning for Service members and families who experience multiple mobilizations during their careers. Achieving the program goal of 90 percent learning gains supports improved deployment readiness, resilience, and reintegration outcomes.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Learning gain increase	90 percent	90 percent	90 percent

DSSC - Military-Civilian Transition Office (MCTO)
Military-Civilian Transition Office (MCTO) / SkillBridge

Performance Statement:
The MCTO prioritized elimination of backlogged employer MOU requests. MCTO also conducted an internal programmatic review to develop a baseline understanding of “as is” processes and requirements. That internal assessment did not provide verifiable performance measures. MCTO conducted information gathering sessions and performance evaluation at echelon with multiple governmental and non-governmental entities. MCTO will use the information garnered from those engagements and assessments to develop “to be” performance standards for implementation by beginning FY 2027.

Sexual Assault Prevention and Response Office (SAPRO)
Governance

Performance Statement:
The Sexual Assault Prevention and Response Office provides governance, oversight, and strategic direction for the Department of War’s sexual assault prevention and response program. In accordance with Title 10 U.S. Code Section 1561, the Director oversees implementation of the Department’s comprehensive sexual assault prevention and response policy; serves as the single point of authority and accountability; ensures compliance by the Military Departments and the National Guard; collects and reports data; coordinates with federal and state agencies; develops strategic program guidance; and establishes metrics to assess program effectiveness and compliance. The office also provides subject-matter expertise in support of public affairs, legislative affairs, strategic planning, and research priorities.

Performance Evaluation:
Progress is assessed through engagements that improve stakeholder knowledge and skills, public and legislative affairs activities that advance awareness of the program, and annual policy reviews to ensure alignment with statutory requirements and oversight recommendations.

Performance Outcome:
Governance activities improve stakeholder capability, ensure timely delivery of congressionally mandated reports, and identify policy gaps requiring corrective action. These efforts strengthen program accountability and support compliance across the Department.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate

Target: educational activities with at least 50 people rating the event 3.5 or higher on scale of 5	55 percent	60 percent	65 percent
Target: Deliver the Annual Report on Sexual Assault in the Military and Annual Report on Sexual Harassment and Violence on the directed date established by DoW leadership on time 100 percent of the time.	100 percent	100 percent	100 percent
Target: annual policy reviews conducted within 60 days of NDAA signature	100 percent	100 percent	100 percent

Sexual Assault Prevention and Response Office (SAPRO)
Assessment & Oversight

Performance Statement:
The Sexual Assault Prevention and Response Office conducts assessment and oversight activities to evaluate program execution, identify gaps, and strengthen the Department's sexual assault prevention and response capabilities. These efforts support continuous improvement and contribute to force resilience and readiness.

Performance Evaluation:
Progress is measured by the percentage of oversight program implementation tasks completed within the fiscal year, with a target of 100 percent completion annually.

Performance Outcome:
Assessment and oversight activities establish internal controls that identify vulnerabilities and risks, institutionalize processes to address deficiencies and highlight areas of excellence, and ensure findings are incorporated into program policy and operations. These activities inform the congressionally mandated Annual Report on Sexual Assault in the Military and support continuous program improvement.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Percent of Oversight Program Implementation Tasks Completed Target: 1 year 10 percent	100 percent	100 percent	100 percent

Sexual Assault Prevention and Response Office (SAPRO)
Prevention

Performance Statement:
The Sexual Assault Prevention and Response Office supports sustained reductions in the number of warfighters who report experiencing sexual assault by facilitating prevention activities across the Department. Prevention efforts follow a data-driven process that includes understanding the problem, developing a comprehensive approach, implementing quality prevention activities, and conducting continuous evaluation. The office supports the Integrated Primary Prevention Program by providing technical assistance for planning, implementation, and evaluation.

Performance Evaluation:
Progress is measured by increasing technical assistance hours to prevention stakeholders by 10 percent from baseline each year and by supporting at least three evaluations of prevention-focused activities annually. These evaluations ensure prevention activities follow best practices and provide actionable data to leadership.

Performance Outcome:
Prevention activities strengthen the Department's ability to reduce harmful behaviors and improve readiness. Increasing technical assistance and conducting regular evaluations enhance the quality and effectiveness of prevention efforts and support leadership decision-making.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Increase the number of technical assistance hours to prevention program stakeholders by 10 percent from baseline annually	Baseline	+10 percent from baseline	+20 percent from baseline
Support at least three evaluations of prevention-focused activities annually	100 percent	100 percent	100 percent

Sexual Assault Prevention and Response Office (SAPRO)
Response/Victim Assistance

Performance Statement:
The Sexual Assault Prevention and Response Office strengthens the Department's response and victim assistance capabilities by supporting consistent, professionalized advocacy services across the Military Departments. The office advances policies and initiatives that promote a victim-centered response, reduce barriers to care, and ensure Service members, adult dependents, and eligible members of the Department community receive timely and effective support. These efforts enhance recovery, reduce the risk of revictimization, and support Total Force readiness.

Performance Evaluation:
Progress is measured by the successful implementation of the Sexual Assault Response Workforce across all Military Departments. Key indicators include adherence to transition plans, removal of Sexual Assault Response Coordinators and Victim Advocates from operational reporting chains, and reductions in reliance on collateral-duty personnel. Staffing distribution and workload balance are also evaluated to ensure appropriate workforce alignment.

Performance Outcome:
Implementation of the Sexual Assault Response Workforce improves the Department's capacity to provide recovery-oriented services and strengthens the professionalism and consistency of advocacy support. Reductions in collateral-duty personnel increase the availability of dedicated, trained advocates. Workforce development initiatives enhance service quality, and improved staffing distribution supports equitable access to victim assistance services across the Military Departments and the National Guard.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
Percent of SARW Implementation Objectives completed as described in the Implementation Roadmap for recommendations by Independent Review Commission on Sexual Assault in the Military	40 percent complete	75 percent complete	85 percent complete

U.S. Military Entrance Processing Command (USMEPCOM)
USMEPCOM/Examining

Performance Statement:
The U.S. Military Entrance Processing Command (USMEPCOM) tests all Armed Forces applicants to ensure they meet Department of War and Service-mandated aptitude, medical, and conduct qualification standards. USMEPCOM administers the Armed Services Vocational Aptitude Battery to applicants and high school students, conducts medical examinations, and processes applicants for enlistment during peacetime and induction during mobilization. The command operates 65 Military Entrance Processing Stations and 164 Military Entrance Test sites across the continental United States, Hawaii, Alaska, and Puerto Rico. USMEPCOM supports the quality of the All-Volunteer Force by ensuring each applicant meets established standards prior to accession.

Performance Evaluation:
USMEPCOM monitors essential metrics related to applicant processing, aptitude testing, medical examinations, and recruit shipments to support the accession mission. Key measures include Accession Workload, Production Testing, and Medical Testing, representing actual and projected numbers of enlistments, ASVAB tests, and medical qualification exams performed annually by Service.

Performance Outcome:
USMEPCOM serves as the critical link between recruiting and training the Nation's Armed Forces. By applying Department standards and established qualification requirements, USMEPCOM ensures a steady flow of medically and mentally qualified applicants into the Services, supporting readiness and strengthening national security.

Average Annual Civilian Salary ($ in thousands)	**201.0**	**184.4**	**134.7**	**-16.7**	**-49.7**

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Contractor FTEs (Total)	**2,222**	**1,562**	**1,751**	**-660**	**189**

Personnel Summary Explanations:

Civilian direct workforce overall increase of 1,953 from FY 2026 to FY 2027 reflects the following:

- + 1,937 civilian FTEs for the transfer U.S. Military Entrance Processing Command (USMEPCOM) to DHRA
- + 40 civilian FTEs for USMEPCOM applicant medical consultation support for the Services
- + 13 civilian FTEs for the transfer of the Office of Command Climate and Well Being Integration to DHRA
- +2 FTEs to enhance the Armed Service Vocational Aptitude Battery Career Exploration Program and the Enterprise-Wide Accession Smart Form to strengthen military recruiting operations and expand the pool of eligible candidates
- -26 civilian FTEs for the transfer of the Defense Suicide Prevention Office to the Defense Health Agency
- -13 civilian FTEs for the transfer of DCPAS to the Office of the Assistant Secretary of War for Manpower and Reserve Affairs

Reimbursable workforce remains unchanged.

Military personnel end strength increase of 533 from FY 2026 to FY 2027 reflects the transfer of operational resourcing costs associated with USMEPCOM from the Army.

Contractor FTEs increase of 189 from FY 2026 to FY 2027 reflects: 1) implementation of Zero Trust initiative requirements such as the Identity Credential Access Management; 2) the Defense Travel System modernization to address issues such as audit compliance requirements as well as improving the user experience; 3) support to the Office of Command Climate and Well-Being Integration Realignment from Office of Force Resiliency in USW(P&R); and 4) support to the transition to the Office of Personnel Management Human Resources Information Technology and the rationalization of legacy Defense Business Systems.

Fiscal Year 2027 Budget Estimates

Defense Human Resources Activity Cyber

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DHRA Cyber	39,004	849	6,359	46,212	962	2,437	49,611

I. Description of Operations Financed:
The Defense Human Resources Activity (DHRA) is a field activity under the Under Secretary of War for Personnel and Readiness. DHRA oversees multiple organizations that support the Department of War's human resources mission. These organizations provide essential services to military personnel, veterans, families, and civilian employees. DHRA Mission Support coordinates planning, programming, budgeting, and oversight across all DHRA offices. This ensures that service members, veterans, families, and civilian employees receive timely and fair access to benefits, programs, and policy support.

DHRA's cybersecurity budget supports the secure operation of the information systems used across the organization. These systems enable DHRA to:

- Manage and oversee all assigned programs and resources
- Maintain a central repository of personnel information
- Provide data-driven analysis to support force readiness
- Administer sexual assault prevention and response programs
- Support transition assistance for approximately 200,000 service members each year
- Manage commercial travel for about 2.8 million personnel
- Issue approximately 425,000 identification cards each month
- Verify identity and eligibility for benefits and entitlements
- Support voting assistance for eligible overseas citizens
- Provide assistive technology for employees and service members with disabilities
- Support education and credentialing for service members and veterans

Cybersecurity funding ensures DHRA can protect its networks, systems, and data from unauthorized access, misuse, or loss. Funding supports:

- Defense and protection of systems and networks
- Continuous monitoring tools, including vulnerability and compliance scanners
- Network resilience and reliability
- Cyber incident response

- Cybersecurity policy development and enforcement
- System assessments under the Risk Management Framework
- Cybersecurity architecture guidance for DHRA programs

Narrative Explanation of Changes:

The FY 2027 DHRA budget represents a net programmatic increase of approximately $2.4 million with a price growth of $1.0 million.

Defense Manpower Data Center (DMDC):

The Defense Manpower Data Center (DMDC) manages several major programs that support identity, personnel, and data services across the Department of War. Cybersecurity funding ensures these programs operate securely, protect sensitive information, and maintain system availability. Shared cybersecurity services reduce costs and allow specialized personnel to support multiple systems. DMDC manages the following programs:

- Defense Enrollment Eligibility Reporting System (DEERS)
- Enterprise Data Service (EDS)
- Enterprise Human Resource Information System (EHRIS)
- Identity Credential Management (ICM)
- Personnel Support Program (PSP)

DMDC – Defense Enrollment Eligibility Reporting System (DEERS):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
12,361	12,457	13,248

Cybersecurity funding supports continuous monitoring, cybersecurity tools, audits, incident response, risk reduction analysis, and security engineering for DEERS. These services ensure the system remains secure and available to support identity and eligibility verification across the Department.

DMDC – Enterprise Data Service (EDS):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
10,754	9,128	9,440

Cybersecurity funding supports continuous monitoring, cybersecurity tools, audits, incident response, risk reduction analysis, and security engineering for EDS These services protect personnel support systems and ensure reliable access.

DMDC – Enterprise Human Resource Information System (EHRIS):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
2,185	2,244	2,312

Cybersecurity funding supports continuous monitoring, cybersecurity tools, audits, incident response, risk reduction analysis, and security engineering for EHRIS. These services ensure secure and reliable human resources information management.

DMDC – Identity Credential Management (ICM):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
9,798	15,646	17,826

Cybersecurity funding supports continuous monitoring, cybersecurity tools, audits, incident response, risk reduction analysis, and security engineering for ICM. Funding also ensures that identity credentialing solutions remain secure and resilient.

DMDC – Personnel Support Program (PSP):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
2,358	2,406	2,480

Cybersecurity funding supports continuous monitoring, cybersecurity tools, audits, incident response, risk reduction analysis, and security engineering for PSP. These services protect personnel support systems and ensure reliable access.

Defense Personnel Analytics Center (DPAC) – Office of People Analytics (OPA):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
306	835	859

Cybersecurity funding supports required security audits and cybersecurity services for OPA systems that support testing, surveys, and analytics across the Department.

Defense Support Service Center (DSSC):

The Defense Support Service Center (DSSC) manages programs that provide essential support services to service members, families, veterans, civilian employees, and employers. These programs operate enterprise-wide systems, cloud-based platforms, and nationwide service networks that require strong cybersecurity to protect sensitive personal information and ensure uninterrupted access. Cybersecurity funding supports continuous monitoring, vulnerability scanning, incident response, and system resilience across all DSSC programs. DSSC oversees the following programs:

- Computer/Electronic Accommodations Program (CAP)
- Defense Activity for Non-Traditional Education Support (DANTES)
- Defense Language and National Security Education Office (DLNSEO)
- Defense Travel Management Office (DTMO)
- Employer Support of the Guard and Reserves (ESGR)
- Federal Voting Assistance Program (FVAP)
- Military-Civilian Transition Office (MCTO)

DSSC – Computer/Electronic Accommodations Program (CAP):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
5	120	123

CAP provides assistive technology to civilian employees with disabilities and to wounded, ill, and injured service members. CAP supports approximately 2.8 million eligible personnel and has delivered more than 256,000 accommodations. CAP's enterprise request management platform enables users across all DoW components and several federal agencies to request and track accommodations.

Cybersecurity funding protects CAP's cloud-based system, ensuring secure access for users across the federal government and safeguarding sensitive medical and disability related information.

DSSC – Defense Activity for Non-Traditional Education Support (DANTES):

(Dollars in Thousands)

FY 2025	FY 2026	FY 2027
109	407	350

DANTES supports voluntary education programs for service members worldwide, including testing services, tuition assistance support, and education counseling tools. DANTES systems interface with military services, academic institutions, and testing vendors.

Cybersecurity funding protects these interconnected systems, ensuring secure data exchange with external education partners and maintaining reliable access for service members pursuing education while deployed or stationed overseas.

DSSC – Defense Language and National Security Education Office (DLNSEO):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
218	280	288

DLNSEO supports language readiness and national security education programs, including testing, training, and scholarship systems used across the Department and by academic institutions. These systems store sensitive readiness and proficiency data.

Cybersecurity funding ensures DLNSEO's enterprise platforms remain secure, available, and compliant with federal cybersecurity requirements.

DSSC – Defense Travel Management Office (DTMO):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
255	388	400

DTMO manages commercial travel programs and travel assistance services for approximately 2.8 million personnel. DTMO operates cloud-based platforms such as DTMO Passport and the Travel Assistance Center, which support travelers, travel managers, and commercial travel partners.

Cybersecurity funding protects these systems, ensuring secure access, continuous monitoring, and reliable support for global travel operations.

DSSC – Employer Support of the Guard and Reserve (ESGR):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
243	363	375

ESGR strengthens relationships between employers and National Guard and Reserve members. ESGR's systems support more than 3,000 volunteers nationwide and interface with employers across all 50 states and U.S. territories.

Cybersecurity funding protects ESGR's public-facing web applications, ensuring secure access for service members, employers, and volunteer.

DSSC – Federal Voting Assistance Program (FVAP):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
116	104	107

FVAP helps service members, families, and overseas citizens vote from anywhere in the world. FVAP systems support coordination with state election officials, the Department of State, and the U.S. Postal Service. The FVAP website and online voting assistant are used globally during every federal election cycle.

Cybersecurity funding ensures secure access to voting tools, protects sensitive voter-assistance data, and maintains system reliability during high-traffic election periods.

DSSC – Military-Civilian Transition Office (MCTO):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
100	1,450	1,494

MCTO manages three major programs that support service members and families:

Transition Assistance Program (TAP), authorized in Title 10, U.S. Code, supports approximately 200,000 transitioning service members each year. TAP systems interface with the Department of Veterans Affairs, Department of Labor, and state workforce agencies. Cybersecurity funding protects TAP's multi-agency data exchanges and ensures secure handling of personal and employment-related information.

Yellow Ribbon Reintegration Program (YRRP), authorized in Title 10, U.S. Code, supports National Guard and Reserve members and families throughout the deployment cycle. YRRP's EventPLUS system supports event registration, attendance tracking, and resource delivery across all states and territories. Cybersecurity funding protects EventPLUS and ensures secure access for service members, families, and event providers.

SkillBridge, authorized in Title 10, U.S. Code, connects transitioning service members with civilian employers and training providers. The SkillBridge platform supports thousands of employer partners nationwide. Cybersecurity funding supports system modernization, secure employer access, and protection of personal and employment related data.

Sexual Assault Prevention and Response Office (SAPRO):

(Dollars in Thousands)		
FY 2025	FY 2026	FY 2027
109	299	309

SAPRO oversees programs supporting individuals affected by sexual assault. Two congressionally mandated systems require strong cybersecurity protection:

The Defense Sexual Assault Incident Database (DSAID), required by Section 563 of the National Defense Authorization Act for Fiscal Year 2009, stores sensitive case information used across the Department and by military services.

The Safe Helpline, codified in Public Law 113 291, Section 545, provides confidential crisis support and operates 24/7 worldwide.

Cybersecurity funding ensures both systems remain secure, available, and able to support survivors, program oversight, and congressional reporting requirements.

FY 2026 Normalized Current Estimate $46,212

6. Price Change $962

7. Functional Transfers ..... $-88

a) Transfers In $0

b) Transfers Out ..... $-88

1) Defense Suicide Prevention Office (DSPO) ..... $-88
Transfer funding associated with the Defense Suicide Prevention Office from the Office of the Under Secretary of War for Personnel and Readiness and the Defense Human Resources Activity to the Defense Health Agency.
(FY 2026 Baseline: $85 thousand)

8. Program Increases $2,631

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $2,631

1) DMDC - Defense Enrollment Eligibility Reporting System (DEERS).....$529
Increase funds to support modernization of the DEERS to meet Zero Trust cybersecurity monitoring requirements and to update system authorization boundaries due to changes in the Virtual Lifetime Electronic Record and the Servicemembers Group Life Insurance Online Enrollment System applications.
(FY 2026 Baseline: $12,457 thousand)

2) DMDC - Enterprise Data Service (EDS).....$120
Increase funds to support the deployment, operation, and maintenance of cybersecurity tools needed to meet Department wide Zero Trust requirements.

(FY 2026 Baseline: $9,128 thousand)

3) DMDC - Enterprise Human Resources Information System (EHRIS).....$21
Increase funds to support the deployment, operation, and maintenance of cybersecurity tools needed to meet Department wide Zero Trust requirements.
(FY 2026 Baseline: $2,244 thousand)

4) DMDC - Identity Credential Management (ICM).....$1,854
Increase funds to support the deployment, operation, and maintenance of cybersecurity tools needed to meet Department wide Zero Trust requirements.

(FY 2026 Baseline: $15,646 thousand)

5) DMDC - Personnel Support Program (PSP) $23
Increase funds to support the deployment, operation, and maintenance of cybersecurity tools needed to meet Department wide Zero Trust requirements.
(FY 2026 Baseline: $2,406 thousand)

6) DPAC - Office of People Analytics (OPA) $5
Increase funds to support required cybersecurity compliance activities, including assessments, monitoring, and accreditation needed to maintain secure operation of Office of People Analytics systems.
(FY 2026 Baseline: $835 thousand)

7) DSSC - Computer Electronic Accommodations Program (CAP).....$1
Increase funds to support information technology contract services needed to meet ongoing and emerging cybersecurity requirements.
(FY 2026 Baseline: $120 thousand)

8) DSSC - Defense Activity for Non-Traditional Education Support (DANTES) $48
Increase funds to support anticipated cybersecurity costs for the Defense Support Services Center managed information technology system.

(FY 2026 Baseline: $407 thousand)

9) DSSC - Defense Language and National Security Education Office (DLNSEO) $3
Increase funds to support required cybersecurity testing and validation for National Security Education Program information technology systems.
(FY 2026 Baseline: $280 thousand)

10) DSSC - Defense Travel Management Office (DTMO) $4
Increase funds to support the transition of Defense Travel Management Office systems from a web based environment to a cloud environment.
(FY 2026 Baseline: $388 thousand)

11) DSSC - Employer Support of the Guard and Reserve (ESGR) $4
Increase funds to support cost growth associated with Defense Information Systems Agency services.
(FY 2026 Baseline: $363 thousand)

12) DSSC - Federal Voting Assistance Program (FVAP) $1
Increase funds to support higher cybersecurity service costs for the Defense Manpower Data Center.
(FY 2026 Baseline: $104 thousand)

13) DSSC - Military-Civilian Transition Office (MCTO) $14
Increase funds to support managed information technology services.
(FY 2026 Baseline: $1,450 thousand)

14) SAPRO - Sexual Assault Prevention and Response Office (SAPRO) $4
Increase funds to support cybersecurity requirements for the Safe Helpline system.
(FY 2026 Baseline: $299 thousand)

9. Program Decreases ..... $-106

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-106

1) DSSC - Defense Activity for Non-Traditional Education Support (DANTES) ..... $-105
Decrease funds for services no longer be required once the managed information technology system is fully operational.
(FY 2026 Baseline: $350 thousand)

2) DSSC - Defense Language and National Security Education Office (DLNSEO) ..... $-1
Decrease funds due to reduced cybersecurity support needs as systems transition to the new managed information technology environment.
(FY 2026 Baseline: $288 thousand)

FY 2027 Budget Request $49,611

IV. Performance Criteria and Evaluation Summary:

DMDC – Defense Enrollment Eligibility Reporting System (DEERS)
Defense Enrollment Eligibility Reporting System (DEERS) / Cyber

Performance Statement: Increase the number of Authority to Operate approvals issued for more than one year to reflect reduced system risk.

Performance Evaluation: 85 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate lower system risk and improved cybersecurity posture across the Defense Manpower Data Center and Defense Human Resources Activity networks.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	90 percent	85 percent

DMDC – Enterprise Data Services (EDS)
Enterprise Data Services (EDS) / Cyber

Performance Statement: Increase the number of Authority to Operate approvals issued for more than one year.

Performance Evaluation: 85 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate lower system risk and demonstrate a more secure environment across the Defense Manpower Data Center and Defense Human Resources Activity networks.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	75 percent	90 percent	85 percent

Performance Statement: Increase deployment of cybersecurity monitoring tools across Enterprise Data Services systems.

Performance Evaluation: 95 percent coverage for all cybersecurity monitoring tools.

Performance Outcome: Increased monitoring coverage improves the ability to detect and respond to cybersecurity risks, threats, and vulnerabilities.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	95 percent	95 percent	95 percent

Performance Statement: Increase compliance of privileged user accounts with established account management requirements.

Performance Evaluation: 90 percent of privileged user accounts meeting required account management standards.

Performance Outcome: Privileged user accounts that meet established requirements present lower risk to the network and strengthen the overall cybersecurity posture.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	95 percent	90 percent	90 percent

Performance Statement: Reduce the number of security breaches affecting Enterprise Data Services systems.

Performance Evaluation: No more than one root-level or user-level intrusion.

Performance Outcome: Reducing the number of security breaches protects Department data and networks and supports mission assurance.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	1	1	1

DMDC – Enterprise Human Resource Information Systems (EHRIS)
Enterprise Human Resource Information Systems (EHRIS) / Cyber

Performance Statement: Increase the number of Authority to Operate approvals issued for more than one year.

Performance Evaluation: 85 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate systems that present lower risk to the Defense Manpower Data Center and Defense Human Resources Activity networks and demonstrate a more secure operating environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	87 percent	90 percent	85 percent

DMDC – Identity Credential Management (ICM)
Identity Credential Management (ICM) / Cyber

Performance Statement: Increase the number of Authority to Operate approvals issued for more than one year.

Performance Evaluation: 85 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate systems that present lower risk to the Defense Manpower Data Center and Defense Human Resources Activity networks and demonstrate a more secure operating environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	90 percent	85 percent

DMDC – Personnel Support Programs (PSP)
Personnel Support Programs (PSP) / Cyber

Performance Statement: Increase the number of Authority to Operate approvals issued for more than one year.

Performance Evaluation: 85 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate systems that present lower risk to the Defense Manpower Data Center and Defense Human Resources Activity networks and demonstrate a more secure operating environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	90 percent	85 percent

Defense Personnel Analytics Center (DPAC) – Office of People Analytics (OPA)
OPA / Cyber

Performance Statement: Maintain an active Authority to Operate across all Office of People Analytics accreditation boundaries.

Performance Evaluation: 100 percent of Office of People Analytics accreditation boundaries have an active Authority to Operate.

Performance Outcome: Active Authorities to Operate ensure uninterrupted delivery of recruiting, testing, and analytic support to the Department and indicate lower risk to the Defense Manpower Data Center and Defense Human Resources Activity networks and supported enclaves.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	100 percent	100 percent

DSSC – Computer/Electronic Accommodations Program (CAP)
Computer / Electronic Accommodations Program (CAP) / Cyber

Performance Statement: The Defense Manpower Data Center Cybersecurity Service Provider provides continuous network defense, vulnerability assessment, and incident response services for the Computer/Electronic Accommodations Program. The Cybersecurity Service Provider identifies vulnerabilities in CAP web applications, databases, and public-facing websites and provides monitoring and scanning support to maintain awareness of system vulnerabilities. The Computer/Electronic Accommodations Program supports cybersecurity operations by submitting required scans at established intervals.

Performance Evaluation: Successful Cybersecurity Service Provider certification for the CAP public website and internal management portal, including completion of required web vulnerability scanning to identify and report public-facing web application vulnerabilities.

Performance Outcome: The Defense Manpower Data Center conducts required scans and reports identified vulnerabilities to support remediation and maintain secure operations for the Computer/Electronic Accommodations Program.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	Submit 5 Fortify/Sonatype code assessment scans	Submit 6 Fortify/Sonatype code assessment scans	Submit 6 Fortify/Sonatype code assessment scans
	Submit and/or review 5 Assured Compliance Assessment Solution scans	0	0

DSSC – Defense Activity for Non-Traditional Education Support (DANTES)
Defense Activity for Non-Traditional Education Support (DANTES) / Cyber

Performance Statement: Maintain an active Authority to Operate for systems supporting the Voluntary Education Partnership Memorandum of Understanding.

Performance Evaluation: 50 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate systems that present lower risk to the Defense Activity for Non-Traditional Education Support, Defense Manpower Data Center, and Defense Human Resources Activity networks and demonstrate a more secure operating environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	Decommission DoW Voluntary Education Partnership Memorandum of Understanding legacy system – 1	0	0
	DoW Voluntary Education Partnership Memorandum of Understanding 1.0 (new system) – 0	1	1

DSSC – Defense Language and National Security Education Office (DLNSEO)
Defense Language and National Security Education Office (DLNSEO) / Cyber

Performance Statement: Increase the number of Authority to Operate decisions issued for a period greater than one year.

Performance Evaluation: 50 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate systems that present lower risk to the Defense Language and National Security Education Office and Defense Human Resources Activity networks and demonstrate a more secure operating environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	100 percent	100 percent

FY 2025: Both systems-maintained Authority to Operate approvals greater than one year.
FY 2026: Both systems maintain Authority to Operate approvals greater than one year. The National Security Education Program information technology system will submit its Enterprise Mission Assurance Support Service package for continuance of its Authority to Operate in the fourth quarter of fiscal year 2026.

FY 2027: The National Language Service Corps system will have been decommissioned in fiscal year 2026 and will no longer be tracked. The National Security Education Program information technology system will maintain its Authority to Operate.

DSSC – Defense Travel Management Office (DTMO)
Defense Travel Management Office (DTMO) / Cyber

Performance Statement: Sustain Authority to Operate approvals in accordance with the Risk Management Framework to maintain a secure environment and achieve three-year Authority to Operate decisions.

Performance Evaluation: 100 percent of Authority to Operate approvals issued for a duration greater than one year.

Performance Outcome: Longer-duration Authority to Operate approvals indicate systems that present lower risk to supported networks and demonstrate a more secure operating environment.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	2	0	0

Remarks:
FY 2025: The Defense Travel Management Office achieved a three-year Authority to Operate for the Passport Oracle Cloud Infrastructure environment through May 12, 2025. The Oracle Service Cloud external validation was completed, and a three-year Authority to Operate was granted through March 21, 2025.
FY 2026: The Defense Travel Management Office will sustain the two three-year Authority to Operate approvals achieved in fiscal year 2025.
FY 2027: No new Authority to Operate approvals are expected. The next Authority to Operate cycle will occur in fiscal year 2028.

DSSC – Employer Support of the Guard and Reserve (ESGR)
Employer Support of the Guard and Reserve (ESGR) / Cyber

Performance Statement: The Cybersecurity Service Provider vulnerability analysis and assessment activities support identification of vulnerabilities in ESGR web applications and public facing websites. These assessments provide situational awareness of ESGR's web application vulnerability posture and help correlate identified vulnerabilities to potential threats.

Performance Evaluation: Provide web vulnerability scanning support to assist Employer Support of the Guard and Reserve with identifying vulnerabilities in approved public facing websites.

Performance Outcome: Required scans are conducted, and identified vulnerabilities are reported. Employer Support of the Guard and Reserve receives scan results and coordinates with appropriate offices to address identified issues.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	2	2	2

DSSC – Federal Voting Assistance Program (FVAP)
Federal Voting Assistance Program (FVAP) / Cyber

Performance Statement: The Cybersecurity Service Provider conducts continuous network defense, vulnerability assessments, and incident response services for the Federal Voting Assistance Program. These activities support identification of vulnerabilities in FVAP web applications and public-facing websites and provide situational awareness of the organization's vulnerability posture.

Performance Evaluation: Successful Cybersecurity Service Provider certification for the FVAP Portal and Procurement Indefinite Delivery/Indefinite Quantity Portal, including completion of required web vulnerability scanning to identify and report public-facing web application vulnerabilities.

Performance Outcome: Required scans are conducted, and identified vulnerabilities are reported to support remediation and maintain secure operations for the Federal Voting Assistance Program.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	2	2	2

Performance Statement: The contractor and government lead develop and maintain required Risk Management Framework documentation, including the system security plan, security design, network architecture, hardware and software inventory, plans of action and milestones, risk assessments, security controls, contingency planning, patch management plans, incident response plans, continuous monitoring plans, security categorization, and associated control correlation identifiers.

Performance Evaluation: Establish administrative, technical, and physical safeguards to protect nonpublic government data and ensure confidentiality, integrity, and availability consistent with the Federal Voting Assistance Program Portal security classification.

Performance Outcome: Required documentation is uploaded and validated against security control requirements within the Enterprise Mission Assurance Support Service.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	100 percent	100 percent

DSSC – Military-Civilian Transition Office (MCTO):

- Transition Assistance Program (TAP)

- Yellow Ribbon Reintegration Program (YRRP)
- SkillBridge

The Military Civilian Transition Office provides full spectrum program management to support the design, delivery, and continuous improvement of information, services, and resources for transitioning and reintegrating Service members and their families worldwide.

MCTO oversees the Transition Assistance Program, Yellow Ribbon Reintegration Program, and SkillBridge, providing program management functions including research, strategy, policy development, program design, budget and contract management, grant management, curriculum development, program evaluation, program assessment, program compliance, information technology support, public affairs, strategic communications, and outreach. MCTO ensures a consistent level of support across all Military Departments and components for eligible Service members and their families at more than 200 locations globally.

DSSC – Military-Civilian Transition Office (MCTO)
Transition Assistance Program (TAP) / Cyber

Performance Statement: The Defense Manpower Data Center Cybersecurity Service Provider conducts continuous network defense, vulnerability assessments, and incident response services for the Transition Assistance Program. These activities support identification of vulnerabilities in TAP information technology systems, including web applications, databases, and public facing websites, and provide situational awareness of the program's vulnerability posture.

Performance Evaluation: Successful Cybersecurity Service Provider certification for TAP information technology systems, including completion of required web vulnerability scanning to identify and report public facing web application vulnerabilities.

Performance Outcome: Required scans are conducted, and identified vulnerabilities are reported to support remediation and maintain secure operations for the Transition Assistance Program.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	100 percent	100 percent

DSSC – Military-Civilian Transition Office (MCTO)
Yellow Ribbon Reintegration Program (YRRP) / Cyber

Performance Statement: The Cybersecurity Service Provider conducts continuous network defense, vulnerability assessments, and incident response services for the Yellow Ribbon Reintegration Program's EventPLUS system. These activities support identification of vulnerabilities in EventPLUS web applications and public facing websites and provide situational awareness of the system's vulnerability posture.

Performance Evaluation: Successful Cybersecurity Service Provider certification for EventPLUS, including completion of required web vulnerability scanning to identify and report public facing web application vulnerabilities.

Performance Outcome: Required scans are conducted, and identified vulnerabilities are reported to support remediation and maintain secure operations for the Yellow Ribbon Reintegration Program.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	100 percent	100 percent

Performance Statement: The contractor and government lead develop and maintain required Risk Management Framework documentation for EventPLUS, including the system security plan, security design, network architecture, hardware and software inventory, plans of action and milestones, risk assessments, security controls, contingency planning, patch management plans, incident response plans, continuous monitoring plans, security categorization, and associated control correlation identifiers.

Performance Evaluation: Establish administrative, technical, and physical safeguards to protect nonpublic government data and ensure confidentiality, integrity, and availability consistent with the EventPLUS security classification.

Performance Outcome: Required documentation is uploaded and validated against security control requirements within the Enterprise Mission Assurance Support Service.

Benchmarks	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
	100 percent	100 percent	100 percent

DSSC – Military-Civilian Transition Office (MCTO)
SkillBridge / Cyber

Sexual Assault Prevention and Response Office (SAPRO)
DoW Safe Helpline (SHL) / Cyber

Performance Statement: Conduct annual security assessments to maintain the security posture of the Safe Helpline system, including compliance with Security Technical Implementation Guides, documentation of required actions in the plan of action and milestones, and maintenance of authorization evidence such as the system security plan, security assessment report, and authorization decision documentation. These activities support the Safe Helpline in achieving and sustaining its Authority to Operate.

Performance Evaluation: Assess security controls to ensure effectiveness, maintain system configurations, apply patches, and comply with Information Assurance Vulnerability Management requirements. Maintain adherence to Security Technical Implementation Guides and document

all actions in the plan of action and milestones. Use validation tools and Risk Management Framework documentation to support ongoing cybersecurity compliance. Progress is measured by the percentage of oversight program implementation tasks completed.

By FY 2025: Complete and validate all Annual Security Review 1 and 2 actions, begin reauthorization activities, and prepare for audit. Maintain a monthly uptime percentage of 100 percent.
By FY 2026: Complete all reauthorization activities for the three-year Authority to Operate renewal. Maintain a monthly uptime percentage of 100 percent.
By FY 2027: Complete and validate all Annual Security Review 1 actions. Maintain a monthly uptime percentage of 100 percent.
Performance Outcome: Deliver cybersecurity services that support Risk Management Framework assessment and authorization processes to achieve and maintain an Authority to Operate, ensuring the Safe Helpline web application remains secure, compliant, and operational twenty-four hours a day, seven days a week.

Benchmarks	FY 2025 Estimate	FY 2026 Estimate	FY 2027 Estimate
Ensure ongoing compliance with Authority to Operate, by conducting 100 percent scan completions and validation of documentation.	100 percent	100 percent	100 Percent
Ensure that information technology systems remain operational and accessible twenty-four hours a day, seven days a week, with a monthly uptime percentage of 100 percent. Performance is acceptable with a monthly uptime percentage of at least 99 percent.	100 percent	100 percent	100 Percent

I. Description of Operations Financed:

The Defense Information Systems Agency (DISA) is a critical combat support agency that delivers, operates, and assures the foundational Command and Control, information sharing capabilities, and global enterprise information infrastructure essential for joint warfighters, national-level leaders, and coalition partners across the full spectrum of operations.

The DISA Next Strategy directly drives combat support priorities and initiatives, ensuring the delivery of essential capacity and capability for warfighting information systems. Through planning, engineering, acquisition, testing, fielding, operation, and assurance, DISA develops and maintains robust information-sharing capabilities, Command and Control solutions, and a global enterprise infrastructure supporting the Department of War (DoW) and national leadership.

DISA drives innovation and fosters collaboration to align capabilities with evolving threats. The agency is integral to achieving the Secretary of War's priorities: rebuilding the military, reestablishing deterrence, and defending the homeland. By embodying core principles of readiness, campaigning, continuous modernization, and establishing lethality, DISA ensures the military remains agile and adaptable, capable of rapidly incorporating new technologies and tactics to counter evolving threats.

In support of the President’s 2025 National Security Strategy, DISA continuously modernizes its network infrastructure and cyber defenses to outpace evolving threats and drive technological advancements. This ensures a resilient, secure, and scalable network for forces at home and forward-deployed Combatant Commands (CCMDs). These efforts are crucial to maximizing resilience against foreign adversaries and enabling seamless interoperability between the Department of War and its allies.

Serving the President, Vice President, Secretary of War, Joint Chiefs of Staff, CCMDs, and other DoW Components, DISA provides essential networks, computing infrastructure, and enterprise services. These resources enable critical information sharing and decision-making for the nation's warfighters and their support elements, directly contributing to national defense. Committed to advancing technology, DISA strengthens the security and resilience of networks and systems, thereby enhancing current and future U.S. military advantages over adversaries. Key priority areas include Cybersecurity, National Leadership Command Capability, and White House support.

Four strategic imperatives guide DISA’s efforts:

Strategic Imperative #1: Operate and Secure the DISA Portion of the DoW Information Network
This imperative demands fortifying foundational infrastructure, continuously innovating processes, dedicating critical resources, and deploying relevant, modern enterprise and business tools. A resilient and redundant Defense Information Systems Network (DISN) backbone is essential to ensure robust data transport security across the DoW Information Network.

Strategic Imperative #2: Support Strategic Command, Control, and Communications
DISA's critical function is to develop, provision, and operate secure Command, Control, and Communications solutions. Key goals include fully operationalizing cloud capabilities, building an accessible hybrid cloud environment, and strengthening data management standards. These innovations will empower warfighters with the scope and scale of data access needed for modern combat operations, ensuring agility and adaptability against emerging threats.

Strategic Imperative #3: Optimize the Network
Optimizing the DoW Information Network encompasses both enhancing security and improving adaptability. This means innovating the network's infrastructure to instill confidence in its resilience while ensuring a seamless user experience and actively minimizing technical debt. Achieving an unconstrained DoW Information Network and consolidating efforts across Defense Agencies and Field Activities and CCMDs are pivotal goals guiding this imperative.

Strategic Imperative #4: Operationalize Data
Leveraging data to empower warfighters with a strategic advantage over adversaries is paramount to maintaining competitive superiority. This requires aligning culture, conduct, and capabilities to drive innovation in data operationalization. Modernizing the coordination capabilities of the National Leadership Command Capability and enhancing joint warfighting tools will significantly strengthen the collaborative process of putting data into action.

DISA aligns its program resource structure across six mission areas. These mission areas reflect the DoW's national defense priorities and represent DISA's focus on executing its lines of operations:

Transition to Data-Centric Environment: Create and strengthen a trusted network environment to facilitate seamless DoW information sharing by making data continuously available. Cultivate and rapidly integrate emerging technologies into the military's arsenal to maintain a decisive technological edge over adversaries.

Eliminate Bandwidth Constraints: Build and sustain a resilient DoW Information Network transport infrastructure that eliminates bandwidth constraints and rapidly surges to meet demands, whenever and wherever needed.

DoW Information Network Operations and Defense: Operate, protect, defend, and sustain the enterprise infrastructure and information sharing services, enabling critical Command and Control. Support CCMDs by providing advanced cybersecurity and network operations to the edge of conflict.

Exploit the DoW Information Network for Improved Decision Making: Build DoW enterprise-wide capabilities for communities of interest, such as command and control and combat support, that leverage the DoW Information Network for improved decision-making. This enables enhanced collaboration, joint military exercises, intelligence sharing, and strategic planning for deterrence.

Deliver Capabilities Effectively/Efficiently: Deliver capabilities, based on established requirements, more effectively, economically, and efficiently than currently achieved.

Special Mission Area: Execute special missions to provide essential communications support required by the President, including day-to-day management, fielding, operation, and maintenance of critical communications and information technology.

DISA continues to use the Cost Allocation Model to assign shared services costs to products and services. The Cost Allocation Model identifies the total cost of a program and avoids unintended subsidies to the Defense Working Capital Fund), provides visibility into the cost and consumption of shared services, and identifies efficiencies.

Mission Area: Transition to Data-Centric Environment (FY 2027: $526,607 thousand)

1. DoW Information Network Engineering Services - (FY 2027: $179,363 thousand): DISA ensures the performance, cost-effectiveness, and interoperability of the DoW Information Network enterprise by applying technical architecture, integration engineering, updated interface standards, and modeling and simulation services. This initiative also maintains critical engineering standards across the DoW, Services, and Agencies. DISA continually enhances its technical engineering capabilities and strives to update essential Command and Control standards every two years. These advancements are crucial for rapidly integrating emerging technologies into the military's arsenal, thereby supporting national defense priorities and maintaining a technological edge over adversaries.

   Ongoing DoW Information Network Engineering Services efforts supported include:

   - Promoting centralized technology policy, standards, and leadership through extensive technology outreach, including weekly Technical Exchange Meetings with the DoW Chief Information Officer, federal agencies, and industry. These Technical Exchange Meetings identify best practices, material solutions, mature capabilities, and enterprise services.
   - Conducting security engineering and product accreditation within the Technology Analysis Center lab environment. The Technology Analysis Center lab provides flexible, rapidly reconfigurable environments for real-time or near real-time assessment of emerging technologies, accelerating the delivery of leading-edge capabilities to warfighters and mission partners.
   - Providing seamless engineering and technical support for technology solutions as they transition to operations and maintenance.
   - Delivering cutting-edge network monitoring for Non-classified Internet Protocol Router Network (NIPRNet) and Secret Internet Protocol Router Network (SIPRNet). This includes maintaining network sensors and developing advanced algorithms to interpret sensor data.

- Implementing a comprehensive SIPRNet Endpoint Management solution to enhance security, enabling the DoW to monitor connected devices and uniformly apply security settings across the network.

Modeling and simulation services provide insightful analyses that inform DoW infrastructure services and applications. These services ensure capabilities are planned, implemented, and assessed cost-efficiently to meet performance objectives. They offer predictive analysis, systems engineering, and End-to-End analytical assessments that guide design and investment recommendations. Concurrently, integration engineering confirms that all capabilities are seamlessly integrated to collectively meet warfighter mission requirements. These combined capabilities are crucial for adapting boundary defenses to changing conditions. Boundary defenses must constantly evolve with traffic demands and new solutions like commercial cloud services, thereby strengthening continuous warfighter readiness.

2. Data-Centric Enterprise Services - (FY 2027: $160,123 thousand): DISA, through Data-Centric Enterprise Services, delivers a comprehensive suite of enterprise collaboration services. These services are vital for an agile and adaptable warfighter support network and directly empower Warfighters, intelligence personnel, and other enterprise users across both SIPRNet and NIPRNet. This strategic alignment with national defense priorities enhances information sharing and operational effectiveness.

   The Data-Centric Enterprise Services collaboration portfolio provides:

   - Collaborative Connectivity: Enabling over two million authorized DoW users to seamlessly collaborate across CCMDs, Services, the Joint Staff, and various Agencies via web-accessible tools.
   - Secure & Resilient Infrastructure: A robust and flexible foundation for secure information sharing, critical for mission success.
   - Decoupled Information Exchange: An enterprise messaging service that allows producers to publish perishable and non-perishable data without specifying recipients, while consumers subscribe to mission-critical information, enhancing efficiency and relevance.
   - Flexible Data Access: Secure access to web and application content, warfighter intelligence, and critical data, with the flexibility to integrate services as needed.
   - Cloud-Enabled Modernization: Supports application rationalization by prioritizing legacy systems for modernization and facilitating their secure transition to commercial and DoW on-premises cloud environments.
   - SIPRNet Modernization: Crucial support for SIPRNet modernization initiatives, including department-wide upgrades to Microsoft 365 (M365) Impact Level 6 licenses.

   The Defense Enterprise Office Solution provides unified communication, collaboration, and productivity services. It delivers a secure, cost-efficient, and accessible platform through the Microsoft 365 suite across both unclassified (DOW365-J) Impact level 5 Tenant and classified (DOW365-SEC) Impact level 6 networks. By optimizing support for military operations, streamlining information access, strengthening cybersecurity, and simplifying the DoW's Information Technology (IT) footprint, Defense Enterprise Office Solution transcends legacy office productivity and collaboration tools. By offering a unified suite of tools and services, Defense Enterprise Office Solution aims to enhance mission effectiveness across the DoW, promoting collaboration and efficiency across various agencies and CCMDs.

Complementing Defense Enterprise Office Solution, Enterprise Messaging enables users to communicate across applications on both NIPRNet and SIPRNet. Leveraging a publish-subscribe model, Enterprise Messaging dramatically reduces the complexity of peer-to-peer integrations. Its modernization has delivered a cloud-based transport solution built on open and lightweight protocols, promoting easier and more flexible enterprise-wide integration.

3. DoW Enterprise Cloud Computing Ecosystem - (FY 2027: $187,121 thousand): DISA delivers industry-leading cloud hosting and computing capabilities to the DoW, the Joint Force, and ultimately, the warfighter. These advanced cloud capabilities enable DoW personnel and warfighters to securely and efficiently access mission-critical data from any location. Through its DoW Enterprise Cloud Computing Ecosystem program, DISA drives readiness and innovation by providing best-value hybrid cloud offerings. These enhancements in cloud computing fortify a critical technological edge over adversaries. Current key offerings include the Joint Warfighting Cloud Capability and Cloud Accelerators.

   The Joint Warfighting Cloud Capability is the portfolio's primary offering. This multi-vendor, enterprise-wide acquisition vehicle empowers the DoW to directly procure commercial cloud services from leading Cloud Service Providers. The Joint Warfighting Cloud Capability delivers a first-of-its-kind capability, encompassing the needs of the entire enterprise across all classification levels, including dedicated top-secret cloud environments. As the first enterprise contract vehicle available DoW-wide, the Joint Warfighting Cloud Capability extends the power of commercial cloud directly to the warfighter. This capability is key for critical initiatives such as Combined Joint All-Domain Command and Control and Zero Trust, significantly enhancing the Department's operational effectiveness. Furthermore, once a DoW customer selects a commercial cloud option, the Joint Warfighting Cloud Capability provides integrated layers of monitoring and cybersecurity.

   Cloud Accelerators equip mission partners with innovative tools designed to streamline cloud adoption. These products simplify and expedite the ordering, provisioning, onboarding, securing, and management of cloud services, ensuring maximum efficiency and cost-effectiveness in procurement. Current capabilities include:

   - DoW Cloud Infrastructure as Code: Leverages automation and accredited baselines to rapidly build and deploy secure cloud environments, significantly reducing setup times for faster cloud adoption.
   - Account Tracking and Automation Tool: A cloud provisioning tool that automates the creation of accounts across multiple cloud vendors and classification levels, while tracking expenditures against task orders.
   - DISA Acquisition Package Preparation System: A web-based interview tool that guides mission owners in developing comprehensive acquisition packages, streamlining the DoW acquisition process and expediting Joint Warfighting Cloud Capability task order awards.
   - Joint Operational Edge: Delivers commercial Infrastructure as a Service and Platform as a Service to Mission Partners via on-premises, interconnected edge computing platforms installed at DoW locations. In FY 2027, DISA is adding artificial intelligence acceleration hardware to existing Joint Operational Edge sites, putting powerful artificial intelligence tools directly in the hands of tactical mission partners.

- Joint Unmanaged Landing Zones: In FY 2027, DISA is installing landing zones, which will function as accredited, pre-approved security boundaries with corresponding network gateways on SIPRNet, for all four Joint Warfighting Cloud Capability providers.

DISA is expanding cloud computing capabilities in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. Cloud computing contributes to Mission Network as a Service by providing a secure and high-powered cloud environment to access applications and perform complex analysis using artificial intelligence. Cloud computing expansion and enhancement directly support the Secretary of War's priorities by rebuilding the overseas digital infrastructure, restoring readiness by giving forward troops faster access to data and artificial intelligence, and reestablishing deterrence by deploying leading technology to the tactical edge.

Mission Area: Eliminate Bandwidth Constraints (FY 2027: $967,085 thousand)

1. Defense Information Systems Network Enterprise Activities - (FY 2027: $682,928 thousand): The Defense Information Systems Network is DoW's consolidated, worldwide telecommunications infrastructure. It provides critical, end-to-end Command, Control, Communications, Computers, and Intelligence information transport for warfighters and Combatant Commanders. Seamlessly spanning terrestrial to space and strategic to tactical domains, the Defense Information Systems Network delivers the interoperable connectivity essential for planning, implementing, and supporting all operational missions, anytime, anywhere. Continuous enhancement of the Defense Information Systems Network is crucial to providing warfighters with the superior network resources needed to maintain strategic advantage against evolving adversarial threats. In FY 2027, DISA is refreshing the Defense Information Systems Network's Internet Protocol and Optical capabilities. By operationalizing a state-of-the-art, all-Internal Protocol and optical core, the Defense Information Systems Network will be faster and more secure with embedded in-flight encryption and capable of handling operations at multiple classification levels.

   Major Defense Information Systems Network capabilities include the following:

   Airborne Intelligence, Surveillance & Reconnaissance: Airborne Intelligence, Surveillance & Reconnaissance supports Combatant Commanders, Services, and Agencies by collecting, analyzing, and disseminating critical sensor data to globally dispersed strategic, operational, and tactical customers. This timely and assured delivery of fused intelligence is crucial for achieving information superiority, directly supporting Counterterrorism, Theater Campaign Plans, and Contingency Operations. Airborne Intelligence, Surveillance & Reconnaissance funding sustains the vital capabilities required for end-to-end transport and tailored dissemination of this data, ensuring it reaches DoW and Mission Partners precisely when and where it's needed.

   Resilient Ground Infrastructure: Airborne Intelligence, Surveillance & Reconnaissance Ground Entry Points deliver sensor data from unmanned and manned airborne platforms directly to deployed warfighters, enhancing their effectiveness and lethality. The ground infrastructure requires robust, redundant ground entry points across diverse frequency bands and sites to ensure continuous support for U.S. Warfighting forces, even if individual ground entry points become unavailable.

The criticality of this infrastructure prompted the DoW CIO to commission the Gateway Optimization and Resiliency Study. Completed and accepted in July 2022, the Gateway Optimization and Resiliency Study comprehensively assessed the resiliency of the entire DoW satellite communication Enterprise's ground infrastructure. In response to Gateway Optimization and Resiliency, Airborne Intelligence, Surveillance & Reconnaissance Resilient Ground Infrastructure will strengthen the ground entry points, guaranteeing the assured delivery of critical Intelligence, Surveillance & Reconnaissance data to globally dispersed CCMDs and engaged forces. This directly improves their ability to negate adversary maneuver and achieve decisive victory by increasing capacity, resiliency, and geographic diversity. Reliable communications, intelligence access, and battlespace awareness are paramount to the Secretary of War’s priorities of readiness and lethality. O&M covers essential equipment operations, maintenance, and sustainment.

Defense Red Switch Network: The Defense Red Switched Network provides a highly secure, multi-level SECRET to Top Secret/Sensitive Compartmented Information voice and conferencing capability. It enables rapid, ad-hoc communications for the President, Secretary of War, Services, CCMDs, their subordinate organizations (military and civilian), and coalition allies. The Defense Red Switched Network is essential for meeting Nuclear Command and Control Communications requirements and for supporting emergency conference protocols. Sustainment funding is critical for the continued operation and reliability of this vital network

Classified Voice and Video: DISA has developed the Classified Voice and Video capability, an Internet Protocol-based capability enabling secure communication across multiple classification levels on a single platform. Classified Voice and Video will be in sustainment in FY 2027: DISA will sustain the initial capability, including a pre-production environment, three geographically disbursed sites in Region 1 (East), an Initial Operating Capability Network Operations Center and an Initial Operating Capability Security Operations Center (SOC). DISA will deploy Classified Voice and Video to three additional sites to expand the capability to Region 2 (Central). Classified Voice and Video is critical for supporting the nation's Nuclear Command Control Communications system, which demands resilient command and control of U.S. nuclear forces under all circumstances, including during and following a nuclear or non-nuclear attack. Resilient Nuclear Command Control Communications capabilities are fundamental for nuclear operations mission assurance. As a key modernization program, Classified Voice and Video enhances DoW secure conferencing, meeting National and Military leadership's essential Command and Control and Decision-Making functions, and addressing evolving technology and security requirements.

Enhanced Pentagon Capability/Survivable Emergency Conferencing Network: The Enhanced Pentagon Capability/Survivable Emergency Conferencing Network delivers vital, highly classified communication for senior national and military leadership. It strictly adheres to the Nuclear Technical Performance Criteria, guaranteeing continuous, optimal performance that is critical for strategic command and control.

DoW Mobility: The DoW Mobility Program provides comprehensive, secure mobile communications, enabling both unclassified and classified access through the following critical service platforms:

- **DoW Mobility Unclassified Capability:** Delivers unclassified mobile device access to DoW Information Network and commercial information services for Senior Leaders, Defense Agencies and Field Activities, and CCMDs. DISA has begun migrating new devices to the Microsoft InTune mobile security capability and will expand to devices across all Defense Agencies and Field Activities. InTune promotes rapid delivery and utilization of secure mobile capability, leveraging commercial mobile technologies to enable an agile deployment environment for new and innovative applications to support evolving Warfighter requirements.
- **DoW Mobility Classified Capabilities Secret:** Enables government-owned mobile devices to access Classified Secret DoW Information Network telephony and information services.
- **DoW Mobility Classified Capabilities Top Secret:** Provides mobile device access to Top Secret Collateral DoW Information Network telephony services.

Funding for the Mobility Program sustains essential gateway and infrastructure support, along with critical program management.

Interoperability and Internet Protocol Enabling: The DoW Network Information Center is central to the planning, management, and sustainment of Domain Name System capabilities for the global Internet, the classified SECRET and unclassified CUI Defense Information Systems Network. DISA's role extends to facilitating the delivery of voice, video, and data services across an interoperable, secure, and highly available Internet Protocol (IP) network infrastructure.

DISA's IP Enabling function provides comprehensive management and registration of all DoW IP number resources, serving as the recognized DoW agent for IP number management by external internet governance organizations. It also offers "Who Is" query capabilities for IP number registrations and .MIL domain information, directly benefiting DoW and intelligence community organizations.

To enhance these capabilities, DISA is actively converting to a global converged infrastructure through IP version 6. This enables superior fault isolation and dynamic routing of network traffic, ensuring enhanced service delivery and preventing critical service interruptions for the warfighter and end user.

DISN Resiliency: Defense Information Systems Network Resiliency enhances the resiliency and reliability of the Defense Information Systems Network Core infrastructure and supports CCMDs warfighting Command, Control, Communications, Computers, and Intelligence capabilities by procuring infrastructure to eliminate vulnerabilities that would have debilitating impacts on these capabilities. Funding supports capabilities associated with the Global Defense Information Systems Network Resiliency Program.

Senior National Leadership Communications - Communications with Other Nations: Senior National Leadership Communications - Communications with Other Nations provides secure voice, video, and data communications between U.S. senior leaders and their international counterparts. These critical links are essential for fostering cooperation, de-escalating tensions, and advancing nuclear reduction initiatives. Key components sustained by this funding include:

- **Washington-Moscow Direct Communications Link:** A highly secure, dedicated communication pathway (terrestrial and satellite) connecting senior Russian leadership directly with the President of the United States (POTUS), SECWAR, Chairman of the Joint Chiefs of Staff (CJCS), and the State Department's Nuclear Risk Reduction Center for critical data, voice, and video exchanges.
- **Defense Telephone Link:** Facilitates secure voice and video interactions between U.S. Senior Leaders (e.g., SECWAR, CJCS, CCMDs, Policy Directors) and their counterparts in approximately 40 allied and partner nations.
- **Equivalent Value Exchange Memorandum of Understanding:** Governs and sustains robust, long-standing communications interoperability and strategic data/resource sharing between the DoW and its Five Eyes partners (United States, United Kingdom, Canada, Australia, New Zealand). This Memorandum of Understanding also ensures continuous data exchange with the Israel Defense Forces across information technology infrastructure, data, and voice platforms.

Proliferated Low Earth Orbit: A network of satellites that creates a reliable communications network for the warfighter. Proliferated Low Earth Orbit securely connects DoW users of Proliferated Low Earth Orbit with Defense Information Systems Network Core Infrastructure services. The Proliferated Low Earth Orbit network is a layer of satellites that allow ground stations and satellites to connect. The network consists of many redundant and overlapping smaller satellites, eliminating the risk of having a network with a single point of failure.

The Proliferated Low Earth Orbit is crucial for DISA operations because it provides lower latencies in transmissions between users, provides a transmission platform with multiple redundancies in the case of satellite failure or foreign adversary action, and is less expensive to insert in the operating environment.

DISA is deploying five Proliferated Low Earth Orbit/Software-Defined Wide Area Network enabled deployable Defense Information Systems Network nodes. The Proliferated Low Earth Orbit Defense Information Systems Network Software-Defined Wide Area Network nodes provide resilient connectivity to classified and unclassified voice, video, and data services, allowing the Warfighter to connect to the Defense Information Systems Network anywhere in the world. They are portable and can be shipped to emerging global hotspots, enabling the warfighter to connect to the Defense Information Systems Network before permanent infrastructure is available reliably.

Critical Time Dissemination: Success in the modern, contested battlespace depends on coordinated and reliable timing across all DoW mission systems. The critical time dissemination program delivers a critical capability by distributing precise, Coordinated Universal Time (UTC)-traceable Timing & Frequency signals across the DoW Information Network. This supports the full spectrum of DoW missions, from tactical to enterprise, at sites throughout the Continental United States and Outside the Continental United States, addressing the Warfighter's growing need for robust and precise synchronization. In partnership with other DoW organizations, DISA has deployed 46 major Defense Regional Clock and 30 Timing and Synchronization System Capability suites globally. Ongoing efforts are focused on enhancing the program's Monitoring and Control capabilities and establishing a resilient infrastructure. This robust timing infrastructure directly supports the Secretary of War's priority of Reestablishing Deterrence by ensuring our defense mechanisms are prepared to protect the homeland. DISA is developing Critical Time Dissemination capabilities in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. Critical Time Dissemination contributes to Mission Network as a Service by proving the

Combined Joint Force with precision timing when using Defense Information Systems Network and Command and Control services to conduct sensitive targeting operations.

2. Defense Spectrum Organization - (FY 2027: $56,412 thousand): Access to the Electromagnetic Spectrum is essential for modern military operations and national security. DISA delivers Electromagnetic Spectrum Operations capabilities through specialized software, engineering, and analytical services. These capabilities enable U.S. and coalition forces to operate effectively, mitigating harmful Electromagnetic Spectrum interference and securing decisive advantages in contested and congested electromagnetic spectrum environments. As the primary provider for many of the DoW's Electromagnetic Spectrum Operations requirements, DISA delivers seamless spectrum access for data links and decision-making across all DoW levels.

   DISA develops critical spectrum capabilities through programs like Electromagnetic Battle Management-Joint, the DoW's Joint Electromagnetic Spectrum Command and Control system vital for Combined Joint All-Domain Command and Control. The Global Electromagnetic Spectrum Information System provides enterprise-wide tools for spectrum supportability, host nation coordination, and maintains the authoritative Joint Spectrum Data Repository. Additionally, DISA facilitates Dynamic Spectrum Sharing with interagency partners.

   In FY 2027, DISA is moving its spectrum capabilities to a common platform – Maven Smart Systems so they are easily accessible on a secure, modern, cloud-based platform.

   DISA's spectrum mission is integral to information operations, electronic warfare, and other Joint Staff initiatives. Specifically, DISA:

   - Enhances Joint Electromagnetic Spectrum Battle Management for CCMDs and Joint Task Forces, improving Electromagnetic Spectrum Situational Awareness and Command and Control.
   - Delivers Comprehensive Situational Awareness with data services and analytics, enabling timely decision-making within the Combined Joint All-Domain Command and Control framework.
   - Improves DoW spectrum data quality to enable Artificial Intelligence/Machine Learning applications and mitigate interference.
   - Manages Interference Resolution through the Joint Spectrum Interference Resolution program, providing engineering services for critical national defense systems.
   - Guides Future Capability Development by creating architectural products that ensure interoperability and support national spectrum sharing initiatives.

3. Defense Information Systems Network Infrastructure Services - (FY 2027: $27,927 thousand): These resources fund DISA's consumption of critical DISN enterprise services from the DISA Defense Working Capital Fund. The Defense Information Systems Network provides essential infrastructure services for warfighter IT functionality, enhancing mission readiness with secure voice, video, and data services. These secure voice and video capabilities operate across classified and unclassified networks, integrating unique military security requirements into

commercially competitive solutions. The Defense Information Systems Network's capabilities are crucial for delivering continuous, reliable, and secure voice, video, and data services at mission speed.

4. DoW Teleport Program - (FY 2027: $87,960 thousand): The DoW satellite communications ground infrastructure provides crucial connection points for deployed U.S. Warfighting forces to access the DoW Information Network. The DoW Information Network access enables warfighters to coordinate maneuver and logistics, and to tap into the extensive information held by U.S. military and intelligence agencies. Without this critical information, deployed warfighters would face increased uncertainty regarding adversarial forces and reduced operational effectiveness.

   The DoW Teleport program acquires and modernizes the ground infrastructure for DoW satellite communications. This infrastructure connects deployed U.S. Warfighting forces to the DoW Information Network's fixed elements, granting them access to critical DISN services such as SIPRNet, NIPRNet, the Defense Red Switch Network, the Defense Switched Network, Video Teleconference, and other classified systems. Teleport thus enables U.S. Warfighters to leverage the DoW Information Network for communication across theaters, regions, and globally.

   The DoW Teleport program is an Acquisition Category III combined program, which acquires and modernizes satellite communications capabilities, providing diverse communication interfaces between Defense Information Systems Network terrestrial and tactical satellite communications assets through a single point of presence. It provides deployed warfighters with multiband, multimedia, and worldwide reach-back capabilities to Defense Information Systems Network services, ensuring interoperability between multiple satellite communications systems and deployed warfighter tactical networks. These Joint satellite communications Teleports serve as a vital dissemination interface between deployed warfighters and the terrestrial DoW Information Network, connecting them with U.S. installations and depots and providing access to Defense Information Systems Network services and DoW Information Network information.

   The Teleport Resilient Ground Infrastructure initiative is increasing the capacity, resilience, and geographic diversity of DISA-managed satellite communications ground infrastructure to support deployed Warfighting forces. Reliable and resilient communications, access to intelligence data, and battlespace awareness are critical for supporting the Secretary of War's priorities of maintaining readiness and enhancing lethality.

   The DISA satellite communications Joint Management Tool, formerly known as satellite communications Ordering, Management & Situational Awareness Tools, provides a common operating environment for the DoW’s Enterprise Satellite Communications Management and Control. It also forms the foundation of the U.S. Space Force’s satellite communications vision and Force Design, enabling the rapid integration of military, commercial, and partnered satellite communications network services through automated resource allocation and mitigation of adversarial spectrum activity. Joint Management Tool is also one of the most critical elements of Combined Joint All-Domain Command and Control technical modernization. It consolidates multiple legacy offerings to streamline the processes for ordering and providing satellite resources to the warfighter, thereby ensuring mission-critical satellite communications capabilities remain available in an era of great power competition. In the United States Indo-Pacific Combatant Command theater alone, approximately 920 hours per year were spent correcting satellite communications resource allocation requests prior to JMT. The Joint Management Tool centralizes and automates fragmented, time-intensive processes for requesting, managing, and allocating mission-critical satellite communications bandwidth. The Joint management Tool

will be in sustainment in FY 2027; funding will sustain and enhance Joint management Tool to meet ongoing DoW satellite resource, cybersecurity, and data management requirements.

5. DoDNet /Combatant Command Network Optimization / 4th Estate Network Optimization - (FY2027: $111,858 thousand): DISA is designated as the single service provider of common-use IT for Defense Agencies and Field Activities and is consolidating commodity IT local area networks and service desks across 16 Defense Agencies and Field Activities. The goal is to migrate disparate organizational networks to a single DoDNet. Post-migration, each DAFA will use DoDNet as its primary network in a common IT environment. This migration to DoDNet facilitates cost savings by adopting enterprise IT delivery models.

   Migration to DoDNet promotes Zero Trust compliance, as DAFAs will gain Zero Trust capabilities via DISA's Thunderdome program. DISA expects ten DAFAs to be fully operational on DoDNet in FY 2027 with the remaining six DAFAs completing network infrastructure migration during FY 2027. Adopting the single-service-provider framework will significantly strengthen DAFAs' cybersecurity, drive uniform adoption of IT enterprise services, reduce duplicative IT, and simplify network administration, resulting in an advanced, safeguarded, and consolidated network with integrated, state-of-the-art Zero Trust capabilities.

   Beginning in FY 2027, DISA will migrate 11 CCMDs from their legacy networks into a single network for their core IT that leverages DoDNet’s infrastructure: Combatant Command Network Optimization. Combatant Command Network Optimization implements DoW's Zero Trust architecture at the operational level, ensuring that each CCMD gains immediate access to advanced cybersecurity protection through DISA's Thunderdome program. By eliminating 11 separate network perimeters and standardizing security protocols, DISA can concentrate defensive cyber operations, deploy patches and upgrades instantaneously across the enterprise, and achieve a level of network visibility impossible to attain with fragmented systems.

   DISA is developing Combatant Command Network Optimization in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. Combatant Command Network Optimization contributes to Mission Network as a Service by providing the network infrastructure the Combined Joint Force will use to access Defense Information Systems Network and Command and Control services.

Mission Area: DoW Information Network Operations and Defense (FY 2027: $220,071 thousand)

1. Field Commands and Field Offices - (FY 2027: $125,426 thousand): The DISA FC/FO ensures the DoW Information Network's voice, video, and data services align with the Joint Cyber Warfighting Architecture and fulfill global warfighter needs across all conflict phases. These FC/FOs support Combatant Command staff and facilitate the integration of DISA services within Joint All Domain Operations Operational Plans.

   The Field Commands and Field Offices assist the DoW in deterring aggression and prevailing in conflict when necessary, prioritizing pacing threats in regionally challenged areas. Sustaining a resilient Joint Force and defense ecosystem demands ongoing IT services, facility/space

accommodations, and programmatic operational support worldwide at eleven CCMDs and National Military Command Center HQ locations. These Field Commands and Field Offices also align effective, on-site strategic Command and Control and situational awareness among the CCMDs, Military Departments, Defense Agencies and Field Activities, and deployed forces, supporting National Security by:

- Preparing and publishing DISA support plans for all Combatant Command Theater Campaign Plans, global campaign plans, and contingency plans.
- Reviewing and recommending DISA service improvements to more than 50 Operational Plans annually.
- Providing customer service support and requirements advocacy to all stakeholders subscribing, or planning to subscribe, to DISA's existing or emerging information products and services.
- Enabling effective coordination and information exchange in support of services, policy, planning, and new capabilities.
- Sustaining Combined Joint All-Domain Command and Control/DoW Information Network services by assigning DISA Field Commands and Field Offices employee specialists worldwide to each CCMDs HQ facility.
- Developing solutions for specific warfighting capability gap requirements identified in the Integrated Priority Lists for the Chairman of the Joint Chiefs of Staff.
- Defending the DoW Information Network by assuring system and network availability, information delivery, and information protection across strategic, operational, and tactical boundaries in support of the DoW, CCMDs, Military Departments, Defense Agencies and Field Activities, and the Joint Staff.
- Actively participating in Joint and coalition exercises.
- Conducting assessments of threat, hazards, vulnerability, and risk to DoW-owned Defense Critical Infrastructure and the inter/intra-dependencies required to execute critical DoW missions without fail, in accordance with DoW Directive 3020.40, DoW Policy and Responsibilities for Critical Infrastructure.
- Assessing critical Command, Control, Computer, Communication, Intelligence, Surveillance, and Reconnaissance (C4ISR) components and capabilities during combat operations, even under service delivery constraints. This work occurs via the Critical Infrastructure Program, which identifies, labels, and prioritizes the DoW Information Network sector and DISA assets.
- Developing Continuity of Operations plans and exercises to ensure essential functions and operations continue throughout various threats, contingency operations, and humanitarian disasters.

Additional missions include:

- Working with United States Indo-Pacific Combatant Command coalition partners and North Atlantic Treaty Organization (NATO) Field Offices to ensure U.S./Indo-Pacific/NATO partnership consideration in all planning and design efforts to facilitate C4ISR interoperability. The program is prepared to deter aggression and overcome conflict in the Indo-Pacific.
- Providing support to Indo-Pacific coalition partners and NATO Ministry of Communications and Information Technology for transforming Information and Communication Technology in support of business stabilization, while encouraging strategic economic growth in other areas of operational responsibility.

2. Network (DoW Information Network) Operations - (FY 2027: $64,324 thousand): DISA ensures that the DoW Information Network (spanning voice, video, and data services) capabilities, access points, and boundary protections meet critical DoW mission requirements. DISA leads technical refresh, configuration control, and sustainment to improve service delivery to the warfighter, achieving end-to-end interoperability and increasing competitive strength over adversaries.

   DISA provides continuous DoW Information Network operational service delivery in 42 countries at 3,800 locations worldwide, serving CCMDs, Military Departments, Defense Agencies and Field Activities, and Joint Staff centers across U.S. global military operations. It delivers continuous situational awareness, ensures DoW Information Network resilience, and conducts intelligence activities to identify and assess network threats. It also develops threat assessments, drawing on intelligence from the Defense Intelligence Enterprise, to inform decision-making for both fielded and developing systems and capabilities. By fulfilling these duties, it mitigates service interruptions, anticipates threats, develops alternate configurations, and provides enhanced mission support for no-fail services.

   DISA also supports the United States Cyber Command (USCYBERCOM) mission to provide secure, interoperable, and reliable operations across the DoW Information Network within the JCWA. DISA's primary tasks in this capacity are:

   - Operating and defending the DoW Information Network, enabling DoW Enterprise services support to the USCYBERCOM internal and external Cyberspace Operations, DoW Cyber Operations Forces, Defensive Cyber Operations, and DoW Information Network Operations.
   - Enabling and conducting the actions necessary to provide certification, threat identification, intrusion prevention, intrusion detection, and incident response/recovery for the NIPRNet and the SIPRNet.
   - Providing the Command and Control, situational awareness, and defense of the DoW Information Network and Enterprise services across all levels of command: strategic, operational, and tactical boundaries in contested battlespace.
   - Supporting the DoW's full spectrum of war fighting, to include support for intelligence and business missions.

   DISA executes its Command and Control mission to plan, direct, coordinate, integrate, and synchronize DoW Information Network Operations and Defensive Cyber Operations globally. DISA specifically:

   - Manages and executes approximately 200 million managed network assets, over 50,000 Telecommunications Service Orders and circuit actions, 40,000 servers hosting 870 user applications, 17,000 circuits, 55 Satellite Communication gateways, 38 petabytes of storage, 4.5 million DoW identities, 1.6 million to 4.5 million enterprise users, and 1 million to 4.5 million mobility/voice/video/data over IP users.
   - Reports blockage and/or tracking of an average of 380 million malicious events monthly.

Increasing cybersecurity threats have expanded the program's Cyberspace Operations mission, necessitating broader defenses (including Enterprise Services) and greater depth in the DoW Information Network Operations / Defensive Cyber Operations mission space. DISA supports USCYBERCOM's mission to direct, synchronize, and coordinate cyberspace planning and operations to defend and advance national interests in collaboration with domestic and international partners. DISA can meet this expanded need by leveraging its existing enterprise infrastructure.

3. Joint Staff Support Center - (FY 2027: $30,321 thousand): The Joint Staff Support Center provides 24/7 operational and communications support for Command and Control, Nuclear Command and Control, and National Military Command and Control .It supports the President, Secretary of War, CJCS, Joint Staff, Combatant Commanders, and other National-level leaders through global maintenance of Joint C2 and NC2 systems and cybersecurity oversight. In accordance with CJCS Operating Order (OPOR) 6-19 and CJCS Instruction 3280.01E "National Military Command System," the Joint Staff Support Center Director provides operational direction to create a mission-capable National Military Command Center. These efforts enable the NMCC to perform the National Military Command System's seven mission essential functions and twenty-five mission essential tasks. The Joint Staff Support Center oversees a critical decision support system for the National Military Command Center and the National Joint Operations-Intelligence Center in the Pentagon and at alternative locations. By deterring strategic attacks against the U.S., Allies, and partners through 24/7 support, the Joint Staff Support Center advances and safeguards vital national defense priorities.

   The Joint Staff Support Center provides 24/7 monitoring of the National Military Command Center and alternate National Military Command Center locations. It also provides support for nuclear operations for Command and Control, communications, computing, and intelligence systems, enabling worldwide situational monitoring, rapid decision-making, and force direction. These services support strategic threat warning, crisis management, situational awareness, course of action development, and national senior leadership decision-making. Joint Staff Support Center sustains these capabilities through the Global Command and Control System-Joint, the Processing and Display System-Migration, the Nuclear Planning and Execution System, and other systems for the Pentagon and an alternative location to ensure continuity of operations. Joint Staff Support Center prioritizes providing a secure, reliable, and effective nuclear command, control, and communication system by building a resilient, cohesive warfighter support network that overcomes evolving threats.

   The Joint Staff Support Center also provides full-service television production and multimedia support to the Secretary of War, CJCS, Joint Staff, and other DoW agencies upon request from Pentagon organizations. This includes remote video and audio recordings, electronic graphics, video teleconferencing guidance, and National Military Command Center secure television system operation. Additionally, the Joint Staff Support Center provides tactical, operational, strategic, and collaborative planning support for various JS IT initiatives, including the National Military Command Center IT Working Group and the Joint Staff IT migration. Personnel also assist the Joint Staff Hampton Roads, Joint Staff Pentagon, and other regional mission partners in transitioning their IT services into DISA-based offerings.

Mission Area: Exploit the DoW Information Network for Improved Decision Making (FY 2027: $1,343,275 thousand)

1. Joint Service Provider - (FY 2027: $597,943 thousand): The Joint Service Provider (J6 Pentagon) is the exclusive IT service provider for over 30 facilities and a wide variety of DoW personnel throughout the Pentagon Reservation and National Capital Region. Serving over 55,000 customers spanning the Office of the Secretary of War (OSW), Washington Headquarters Services, Army, Joint Staff, and additional onboarded customers, Joint Service Provider employees operate and defend DoW cyber terrain by building, sustaining, supporting, and protecting mission-critical integrated IT systems to “Enable. Every. Mission." Joint Service Provider 's comprehensive services include infrastructure network support, application support, data storage management, defensive cyber operations, cybersecurity compliance, and customer service support to critical DoW facilities.

   The Joint Service Provider IT program provides end-user computing capabilities essential for fulfilling component missions. It includes DoW local area networks, computer servers, network storage subsystems, workstations, and desktop applications, processing information at all classification levels across over 110,000 end-user devices. By maintaining IT infrastructure for all key facilities and personnel, the Joint Service Provider enables maximum mission effectiveness for all DoW IT users throughout the National Capital Region. The Joint Service Provider enables cutting-edge IT capabilities, helping warfighters maintain their competitive advantage against emerging threats.

   Joint Service Provider also encompasses the Secretary of War Communications Office (SECWARCOMS). The SECWARCOMS serves as the authoritative source for operational and strategic communication requirements supporting the Secretary and Deputy Secretary of War. In accordance with DoW Policy, the Secretary of War must have resilient communication and situational awareness capabilities at the Pentagon, along with access to fully equipped alternative operating facilities and mobile communications during transit. SECWARCOMS provides the SECWAR with these capabilities, enabling the Secretary of War and the Immediate office to coordinate national defense in every scenario.

2. Senior Leadership Enterprise /Logistics Support Activities - (FY 2027: $340,939 thousand): Details are submitted in appropriately classified exhibits.

3. Combined Advanced Applications - (FY 2027: $102,549 thousand): The Compartmented Enterprise Services Office provides an accredited Special Access Program IT system, enabling users who operate within a Special Access Program environment to work and communicate. It also facilitates secure cloud communication among executive leaders and mission partners across the DoW and Intelligence Community. Compartmented Enterprise Services Office provides users with email, file storage, wiki, federated search, and print services, while also operating and sustaining the Joint Access Database Environment, an authoritative source for verifying the identity of individuals and programs to networks and systems. Funding sustains Compartmented Enterprise Services Office capabilities and supports incremental improvements based on customer feedback and Special Access Program CIO concurrence.

   The Enterprise Financial Accounting System is a Top Secret-Sensitive Access Required Sensitive Compartmented Information financial management system, designed for Sensitive Activities and Special Access Program requirements across the DoW. Funding supports the Enterprise Financial Accounting System’s operations and maintenance, licenses, network sustainment, Cybersecurity Service Provider services, and backbone connectivity telecom support. Enterprise Financial Accounting System helps the DoW achieve a clean audit opinion through standardizing processes for recording, reporting and managing financial resources

4. Global Command and Control System-Joint - (FY 2027: $27,287 thousand): The Global Command and Control System-Joint is the Joint Command and Control system of record and an essential component for warfighting situational awareness. It provides an integrated, near real-time picture of the battlespace to support joint and multinational operations across U.S. and coalition networks. Global Command and Control System-Joint displays air, maritime, ground, space, and cyber tracks to aid decision-making. It also provides applications for missile warning, intelligence, targeting, and imagery exploitation. Key strategic, national, theater, and operational decision-makers rely on Global Command and Control System-Joint

   The Global Command and Control System-Joint supports Combined Joint All-Domain Command and Control, the modernized military decision-making approach that promotes inter-Service information sharing. Combined Joint All-Domain Command and Control achieve agile and resilient Command and Control across the Services through integrated and synchronized capability development. These Combined Joint All-Domain Command and Control capabilities enable the connection of distributed sensors, intelligence, information, data, and effects from all Services to decision-makers at mission speed. Global Command and Control System-Joint also directly supports building a resilient Joint Force and defense ecosystem, fostering enhanced collaboration and innovative technological integration. It incorporates the core planning and assessment tools for CCMDs, their subordinates, and Joint Task Force Commanders, supporting the readiness of Service requirements and warfighter capabilities. It also provides critical Command and Control capabilities to the Commander-in-Chief, Secretary of War, National Military Command Center, CCMDs, Joint Force Commanders, and Service Component Commanders. Global Command and Control System-Joint users include decision-makers at strategic, national, theater, and operational levels, as well as all CCMDs, worldwide.

   The Global Command and Control System-Joint:

   - Provides a Common Operational Picture with ground, air, maritime, cyber, and space tracks of U.S., coalition, and enemy forces.
   - Provides tactical decision aids and other applications for common operational picture management and situational awareness.
   - Functions as the system of record for Theater Missile Warning, which provides alerts and displays for real-time missile events.
   - Displays launch points, missile locations, threat fans, and projected impact points.
   - Provides intelligence support to Command and Control operators with national and tactical intelligence data from Defense Intelligence Agency’s 's Modernized Integrated Database, still and motion imagery, and other intelligence sources.

   The Joint Staff Support Center provides 24/7 support to DoW components around the globe. Support efforts include:

   - Global Tier II technical support to over 660 sites.
   - Operational monitoring and reporting of 51 critical sites.
   - Global Common Operational Picture technical support and management of National Capital Region Global Common Operational Picture servers.

5. Joint Planning and Execution Services - (FY 2027: $33,743 thousand): DISA, via the Joint Planning and Execution Services Program Management Office provides information technology capabilities supporting DoW's Joint Planning Process. These capabilities support force planning, deployment planning, allocation of forces, execution, and Global Force Management processes for military operations, integral to the Joint Command & Control mission.

   The Joint Planning and Execution Services program maintains and sustains two operational systems:

   Joint Capabilities Requirements Manager: The Joint Capabilities Requirements Manager is a web-based application and database that facilitates the Global Force Management Allocation Plan. It enables CCMDs to draft, staff, store, and submit force requirements for ongoing and emerging military operations, contingency plans, and military exercises worldwide. Joint Capabilities Requirements Manager is vital for managing complex global force requirements and tracking the distribution of U.S. military forces among the CCMDs, thereby fulfilling its mission.

   Joint Planning and Execution Services: The Joint Planning and Execution Services is the critical Joint Command & Control system, providing automated force planning and execution capabilities necessary for simultaneous and resource-informed planning activities. Joint Planning and Execution Services is a collection of capabilities supporting joint policies, processes, procedures, and reporting structures, backed by communications and information technology used by the Joint Planning and Execution Community. Joint Planning and Execution Community leverages these capabilities to monitor, plan, and execute mobilization, deployment, employment, sustainment, redeployment, and demobilization activities for joint operations and exercises.

6. Mission Partner Environment - (FY 2027: $216,692 thousand): The Mission Partner Environment portfolio supplies the foundational technology for the DoW to collaborate effectively with a wide range of Mission Partners during all phases of operations. These partners can include other federal agencies, state and local governments, private entities, allies, and organizations supporting multi-national treaties. As the primary operating framework for Command and Control, the Mission Partner Environment enables seamless information sharing for planning and execution across the full spectrum of military operations. Mission Partner Environment capabilities are specific technologies that support the overall framework. Successful recent applications of the Mission Partner Environment include coordinating communications for allied forces in support of Ukraine and establishing a common information-sharing environment for the United States, Canada, and Mexico during the World Cup.

   Sustained Mission Partner Environment operations are vital to ensuring combined Command and Control of coalition forces, secure information sharing, and the effective use of military power in an increasingly complex global security environment. Some of the specific Mission Partner Environment capabilities DISA supports include:

   - **Pegasus:** Provides a means for disseminating classified information between Five Eye nations. It includes operationalized Five Eye services, including web browsing, email with attachments, chat, SharePoint, and voice.

- **Combined Federated Battle Laboratories Network:** A testing network environment used to facilitate the resolution of interoperability issues between the U.S. and coalition partner systems.
- **Five Eye C41 Service Operations Group**: Manages and tracks the end-to-end lifecycle of incidents including but not limited to, reviewing incident records to ensure they include all the necessary information. Five Eye C41 Service Operations Group: also assigns tasks to the nations' National Networks Operation Centers for incident investigation, diagnosis, and resolution.
- **Coalition Information Environment:** Coalition Information Environment is the full build out of the Joint Operational Edge – Coalition Environment concept for both Command and Control and collaboration capabilities. Joint Operational Edge – Coalition Environment was a prototype for secure, cloud-based Command and Control coalition capabilities, focused on USINDOPACOM. Joint Operational Edge – Coalition Environment leveraged security from Thunderdome and Enterprise Identity, Credential, and Access Management to grant appropriate access to infrastructure and the Maven Smart Systems artificial intelligence platform.

  During FY 2027, DISA is undergoing a major effort to operationalize and sustain Coalition Information Environment. Coalition Information Environment will provide a secure, unified hybrid cloud environment for both Command and Control and collaboration at the Secret and below levels. Coalition Information Environment will include core compute and transport infrastructure, provider functionality, and end user applications. Coalition Information Environment is replacing the Air Force's Secret and Below Releasable Environment for collaboration capabilities and building out the Joint Operational Edge – Coalition Environment Command and Control capabilities. DISA is currently determining the prioritization for global scaling across USEUCOM, USCENTCOM, and USSOUTHCOM.

  The Coalition Information Environment is built on a resilient, three-tiered architecture to ensure data availability from the enterprise to the tactical edge:

  1. Enterprise Core (Strategic): The global backbone providing centralized services and data synchronization for the entire coalition.
  2. Theater: Powerful, in-theater data centers that support a specific Combatant Command (e.g., INDOPACOM) and are designed to operate independently for resilient Command and Control.
  3. Regional (Edge): Lightweight, mobile hardware that extends the network to forward-deployed warfighters, enabling real-time data processing in potentially disconnected environments.

  DISA is executing the Coalition Information Environment in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. Coalition Information Environment contributes to Mission Network as a Service by providing a cloud-based central hub for conducting Command and Control and collaboration activities with Mission Partners.
- **Global Network Operations and Security Center:** The Global Network Operations and Security Center is the single authority for the Coalition Information Environment program's operations, security, and maintenance, providing a unified service desk for all coalition partners. Global Network Operations and Security Center operations stretch across incident and problem management, change and

configuration management, cybersecurity defenses, and general service management, ensuring maximal availability, resilience, and security.

As a critical enabler of mission success, the DoW Mission Partner Environment program is constantly evolving. DISA continues to refine and expand these capabilities to meet the demands of a complex operational landscape and to advance the Secretary of War's priority of reestablishing deterrence through allied coordination. Ultimately, the Mission Partner Environment strengthens the DoW's alliances, enhances its competitive edge, and improves its ability to achieve mission objectives in joint and combined operations.

7. Other Programs - (FY 2027: $24,122 thousand): These funds cover the infrastructure and support costs for DISA's interoperability facility in the National Capital Region, including facility operations, utilities, business management, and IT support. This investment enables the DISA interoperability facility to operate more efficiently and effectively in pursuit of national defense priorities.

Mission Area: Deliver Capabilities Effectively/Efficiently (FY 2027: $195,525 thousand)

1. Shared Services Units/Program Executive Offices - (FY 2027: $124,295 thousand): This activity provides essential operational support to DISA worldwide, enabling the agency to deliver critical capabilities to its programs and business areas. It funds foundational elements such as financial management, information technology, strategic planning, personnel security, facilities, logistics, and acquisition support. DISA is modernizing its internal operations by deploying advanced technical solutions for software licensing (DoW365), contract provisioning, human resources, and financial management. These improvements strengthen readiness by ensuring continuous, reliable operational capabilities and enabling DISA to effectively support the Warfighter. Key efforts include:

    - **Commodity IT Support:** Funding DISA's internal network operations, maintenance, and sustainment; connectivity to NIPRNet and SIPRNet via DoDNet; global service desk support; Microsoft 365 licensing; and other services necessary to maintain a securely connected and productive workforce.
    - **Data Management and Governance:** Managing DISA's evolving data architecture, data governance, metadata collection, data platform design, systems design, and interface design. This includes enforcing data management disciplines and enhancing data quality to enable digital transformation and outmaneuver adversaries in the digital battlespace.
    - **Compliance and Oversight:** Managing records declassification, IT commodity tracking, policy oversight, and compliance reviews.
    - **Human Resources Support:** Operating and maintaining human resources systems that track employee attendance, ensure continuity of operations, and facilitate compliance with personnel security requirements and the Executive Order on Return to In-Person Work.
    - **Financial Management:** Operating and maintaining financial systems crucial for prudent resource management, auditability, preventing improper payments, and providing leadership with data for efficient agency management. This includes performing critical oversight functions to mitigate fraud, waste, and abuse, reduce costs, and strengthen internal controls. DISA is aggressively working

toward a clean financial statement audit to ensure resource accountability, aligning with the Secretary of War's priority of rebuilding the military.

- **Training and Certification:** Managing Information Technology/Cyber, financial management, acquisition, and congressionally mandated trainings and certifications.
- **Facilities and Logistics:** Efficiently administering real property services, assets, and logistical processes to provide a safe, sustainable, and optimized environment, including maintaining secure office space at DISA Headquarters and Joint Service Provider leased facilities to support the Executive Order on Return to In-Person Work.

The FY 2027 request for Shared Services includes $124,295 thousand of discretionary

2. Management Headquarters - (FY 2027: $38,859 thousand): This funding supports key oversight organizations that provide guidance and direction for DISA's acquisition, financial, and personnel activities. Command and executive staff sustain DISA's continuous operation and secure the reliability of its global enterprise, directly supporting the joint warfighter, national-level leaders, and mission and coalition partners across the full spectrum of operations.

   Management Headquarters provides critical support to military, civilian, and contractor personnel across twenty-five states, the District of Columbia, and eight countries worldwide. Headquarters personnel develop and administer financial and human resources policy, conduct audits and reviews to safeguard agency resources and processes, and provide legal counsel to ensure DISA operates in accordance with its statutory authorities. They are actively identifying savings and organizing the agency to comply with Presidential Executive Orders promoting efficient operations and preparing the agency for a clean audit opinion.

3. Pentagon Reservation Maintenance Revolving Fund - (FY 2027: $32,371 thousand): Section 2674 of title 10, U.S. Code, established the Pentagon Reservation Maintenance Revolving Fund. This fund authorizes the Secretary of War to set rates, collect charges, and make payments for facilities-related services (space, protection, maintenance, construction, repairs, and alterations) provided at the Pentagon Reservation. This activity funds DISA's utilization of Pentagon Reservation Maintenance Revolving Fund services.

Mission Area: Special Mission Area (FY 2027: $620,659 thousand)

1. White House Communications Agency - (FY 2027: $589,474 thousand): The White House Communications Agency is a joint service military agency under White House Military Office operational control, operating per the 2006 NDAA, Public Law 109-163. It provides 24/7 worldwide classified and unclassified information services to the POTUS, VPOTUS, White House Military Office, and others as directed by the President through the White House Director of Technology. Operating primarily in the National Capital Region, White House Communications Agency also supports Presidential Information Technology Community networks at Camp David, second residences, worldwide travel sites, Executive Office of the President and White House Military Office offices, vehicles, aircraft, alternate Continuity of Operations and Continuity of Government, the Signal Support Element, and other Head of State services. Through four core mission areas—Information Systems Services,

Customer Service, Deployable Communications, and Visual Information Services— White House Communications Agency ensures unified communications at all classification levels, enabling the President to communicate with anyone, anywhere, under any condition. This secure communication capability is crucial for ensuring warfighters can respond to emerging threats in real time under the Commander-in-Chief's leadership.

In FY 2027, 1.White House Communications Agency will be addressing limitations in White House Communications Agency and DoW communications systems. Details are classified and available on request.

2. White House Situation Support Staff - (FY 2027: $29,638 thousand): White House Situation Support Staff is responsible for providing financial and personnel resources to support and manage critical information technology, audiovisual, and communications functions within the National Security Council, including those performed by the White House Situation Room.

   The White House Situation Room provides 24/7 global situational awareness, crisis management facilitation, secure conference facilities, emergency actions support, and executive communications directly for the President as Commander-in-Chief, Head of State, and Chief Executive, while also supporting the Vice President, National Security Advisor, National Security Council staff, and select senior White House staff. The funding sustains operations including applications and tools for White House Situation Room watch floor operations and National Security Council decision making, telecommunications systems operations and maintenance at White House Situation Room locations (including Continuity of Operations and Continuity of Government , support), global forward deployment for special mission travel, facility sustainment, and the budgeting, acquisition, logistics, and administrative activities required to execute these critical responsibilities

3. Communications Management Control Activity - (FY 2027: $1,547 thousand): The Communications Management Control Activity provides communications support to the United States Secret Service for Presidential campaigns, dignitary protective duties, and National Special Security Events, as well as supporting the Joint Staff/J3, Joint Chiefs of Staff Special Events, and Joint Directorate of Military Support for special events. Under Public Law 106-544, the United States Secret Service coordinates, plans, exercises, and implements security for National Special Security Events, while DoW Directive 3025.13 mandates DISA support to the Communications Management Control Activity.

The FY 2026 spend plan amount for O&M includes $2,955,565 thousand of discretionary and $53,000 thousand of mandatory (reconciliation) for a total of $3,008,565 thousand.

The FY 2027 request for O&M Non-Cyber includes $3,873,222 thousand of discretionary $12,385,145 thousand of mandatory for a total of $16,258,367. The mandatory funds the DISA are funding to address the critical infrastructure capability gaps required to support Sovereign Artificial Intelligence across the DoW and critical deferred maintenance projects including, but not limited to, mechanical, plumbing, structural, architectural, fire alarm/suppression and Sensitive Compartmented Information Facility upgrades. The FY 2027 funds are different from the FY 2026 mandatory funds that support Enterprise Financial Accounting System and White House Communication Agency Classified support.

II. Force Structure Summary:
N/A

III. Financial Summary ($ in Thousands)

		FY 2026				
			Congressional Action			
A. BA Subactivities	FY 2025 Actuals	Budget Request	Amount	Percent	Current Enacted	FY 2027 Request
1.Transition to Data-Centric Environment	$336,759	$483,201	$-52,416	-10.85%	$430,785	$526,607
2.Eliminate Bandwidth Constraints	$422,952	$721,834	$-32,928	-4.56%	$688,906	$967,085
3.DoWIN Network Operations & Defense	$197,558	$214,767	$1,350	0.63%	$216,117	$220,071
4.Exploit the DoWIN for Improved Decision Making	$1,056,235	$1,064,272	$-6,935	-0.65%	$1,057,337	$1,343,275
5.Deliver Capabilities Effectively/Efficiently	$278,963	$210,637	$3,800	1.80%	$214,437	$195,525
6.Special Missions	$343,169	$347,848	$135	0.04%	$347,983	$620,659
Total	**$2,635,636**	**$3,042,559**	**$-86,994**	**-2.86%**	**$2,955,565**	**$3,873,222**

B. Reconciliation Summary	Change FY 2026/FY 2026	Change FY 2026/FY 2027
BASELINE FUNDING	**$3,042,559**	**$2,955,565**
Congressional Adjustments (Distributed)	30,000	
Congressional Adjustments (Undistributed)	-97,255	
Adjustments to Meet Congressional Intent	0	
Congressional Adjustments (General Provisions)	-19,739

Less: Supplemental	0	
NORMALIZED CURRENT ESTIMATE	**$2,955,565**	**$3,873,222**

FY 2026 President's Budget Request (Amended, if applicable) $3,042,559

1. Congressional Adjustments ..... $-86,994

    a) Distributed Adjustments $30,000

        1) Program increase - 4ENO transition costs $23,000

        2) Program increase - JSC consolidation $7,000

    b) Undistributed Adjustments ..... $-97,255

        1) Historical Unobligated Balances ..... $-97,255

    c) Adjustments to Meet Congressional Intent $0

    d) General Provisions ..... $-19,739

        1) Sec. 8136 Savings from Efficiencies ..... $-19,739

FY 2026 Appropriated Amount $2,955,565

2. Supplemental Appropriations $0

    a) Supplemental Funding $0

3. Fact-of-Life Changes $0

    a) Functional Transfers $0

    b) Technical Adjustments $0

c) Emergent Requirements.....$0

FY 2026 Baseline Funding.....$2,955,565

4. Reprogrammings (Requiring 1415 Actions).....$0

a) Increases.....$0

b) Decreases.....$0

Revised FY 2026 Estimate.....$2,955,565

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings.....$0

a) Less: Supplemental Funding.....$0

FY 2026 Normalized Current Estimate.....$2,955,565

6. Price Change.....$51,638

7. Functional Transfers.....$134,509

a) Transfers In.....$134,509

1) Chief Digital and Artificial Intelligence Office (CDAO) to DISA Mission Partner Environment Transfer.....$6,000
Increase due to non-pay funding being transferred from the Chief Digital and Artificial Intelligence Office to DISA to support the Mission Partner Environment. Following a consensus recommendation to the Deputy Secretary, the DoW Chief Information Officer has directed the transfer of responsibilities for Mission Partner Environment operations, sustainment, and development from the CDAO to the DoW Chief Information Officer (CIO) and DISA.
(FY 2026 Baseline: $0 thousand)

2) Department of the Air Force to DISA Mission Partner Environment Transfer.....$128,509

$126,715 thousand increase due to non-pay funding being transferred from the Department of the Air Force to DISA to support the Mission Partner Environment. Following a consensus recommendation to the Deputy Secretary, the DoW CIO has directed the transfer of responsibilities for Mission Partner Environment operations, sustainment, and development from the Department of the Air Force to the DoW CIO and DISA. This increase will enable DISA to sustain existing capabilities, including Pegasus, the Combined Federated Battle Laboratories Network, and the Five Eye C41 Service Operations Group, and develop new capabilities as needed. Capability development in FY 2027 centers on the Coalition Information Environment, which will provide both the Command and Control capabilities developed during the Joint Operational Edge-Coalition Environment pilot and collaboration partners to coalition forces. The requested funding for FY 2027 will ensure the Mission Partner Environment remains a secure, interoperable, and effective platform for mission partner collaboration.

$1,794 thousand, nine Full-Time Equivalents (FTEs) increase to support Mission Partner Environment. This increase is the result of funding being transferred from the Department of the Air Force to DISA to support the Mission Partner Environment. Following a consensus recommendation to the Deputy Secretary, the DoW CIO has directed the transfer of responsibilities for Mission Partner Environment operations, sustainment, and development from the Department of the Air Force to the DoW CIO and DISA.
(FY 2026 Baseline: $0 thousand; +9 FTEs)

b) Transfers Out $0

8. Program Increases $900,167

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $900,167

1) Fourth Estate Network Operations Non-Pay $72,000
$72,000 thousand increase to support the critical planning and design work required to migrate the 11 CCMDs from their legacy networks onto a single network for their core IT that leverages DoDNet's infrastructure: Combatant Command Network Optimization (CCMDNet). The migration of CCMDs to CCMDNet will follow the same pattern as the migration of DAFAs to DoDNet. DISA will first conduct site surveys to assess the status of the IT equipment at each Combatant Command. Then DISA will identify the specific IT equipment required for successful connection of each Combatant Command to CCMDNet.

Centralized funding for planning and design will expedite work and help DISA achieve FY 2028 CCMDNet migration targets.

DISA is developing CCMDNet in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. CCMDNet contributes to Mission Network as a Service by providing the network infrastructure the Combined Joint Force will use to access DISN and Command and Control services.
(FY 2026 Baseline: $145,667 thousand)

2) DoW Teleport Program Non-Pay.....$27,958
$17,958 thousand increase for sustainment of the Resilient Ground Infrastructure initiative; primarily, the installation, warranty, and maintenance activities of Medium Earth Orbit Integration, the installation and warranty of hundreds of Enterprise Satellite Communications Modems, and additional Joint Satellite Communications Teleport - Satellite Communications Enterprise expansion nodes. Operational support is necessary to sustain Teleport's expanded satellite communications infrastructure, which now includes more sites and enhanced capabilities. Expanding the redundancy of the Teleport directly supports key Secretary of War priorities by modernizing infrastructure, ensuring reliable global connectivity for operational forces, and strengthening deterrence with resilient, secure communications.

$10,000 thousand increase for critical enhancements for the Joint Management Tool, upgrading it to incorporate advanced commercial Satellite Communications providers, including proliferated Low Earth Orbit constellations, and the U.S. Space Force’s new Protected Tactical Waveform capability. These upgrades will provide worldwide anti-jam communications for tactical warfighters and enable the efficient provisioning of new Satellite Communications options, significantly improving readiness and rapid deployment. The project also includes integrating the Joint Management Tool with regional communication hubs, such as the Naval Computer and Telecommunications Area Master Station, to further diversify Satellite Communications resources. Finally, DISA will develop a new Impact Level 5 instance for the Automated Resource Assignment and Automated Resource Requests capabilities to securely provision Satellite Communications resources to mission partners and allies, directly supporting the SECWAR's priority of reestablishing deterrence by working closely with international allies and partners to mitigate adversarial aggression.
(FY 2026 Baseline: $55,103 thousand)

3) Global Command and Control System - Joint Non-Pay $108
Increase due to higher operational and sustainment costs as the Common Operational Picture capability is sustained within the Global Command and Control System - Joint web platform. The Common Operational Picture provides a comprehensive, unified view of the operational environment by fusing and displaying the geographic locations of friendly, hostile, and neutral forces with real-time intelligence and environmental

data.
(FY 2026 Baseline: $10,378 thousand)

4) Management Headquarters Non-Pay.....$397
Increase for oversight efforts implemented by the Director's Office to identify and eliminate wasteful or redundant practices within its personnel operations. This initiative will enable the Department to allocate resources more efficiently and better support the warfighter.
(FY 2026 Baseline: $10,607 thousand)

5) Other Programs Non-Pay.....$668
Increase for increasing information technology, acquisition, and logistics support costs. These are required to maintain a cutting-edge lab environment which fosters rapid innovation, experimentation, and development of advanced technologies.
(FY 2026 Baseline: $15,907 thousand)

6) Joint Service Provider Non-Pay.....$10,100
$4,300 thousand increase supports services for additional users and rapid capability delivery to special interest panels, initiatives and sites outside the National Capital Region that operate on behalf of the Secretary of War and Deputy Secretary of War that require remote site support to extend both DISA and non-DISA network connectivity extensions up to the Top-Secret classification level.

$4,100 thousand increase provides additional Technical Surveillance Countermeasures Support for hold rooms and travel. By presidential directive, SECWARCOMs must deliver uninterrupted communications capabilities to all Secretary of War and Deputy Secretary of War locations 24/7 regardless of location or classification. New mandates call for SECWARCOMs to deploy sensitive countermeasures equipment not just to hotels communications rooms but also to temporary Hold Rooms in forward deployed locations. Technical Surveillance Countermeasures Support personnel must deploy with the advanced team and cleared Hold Rooms must remain under 24/7 watch until released back to host. Additionally, increased requirement of establishing Top Secret/Sensitive Compartmented Information voice, video, and data in secondary locations while on travel has driven an increase for desktop telecommunication services previously limited to centralized comms rooms.

$1,700 thousand increase sustains an increase of licenses across the SWC catalog for new users, all-hazards readiness efforts that include uninterrupted mobile communications capabilities and continuity site requirements to ensure SECWAR operational readiness to continue Primary Mission Essential Functions regardless of threat or location.
(FY 2026 Baseline: $518,571 thousand)

7) Defense Information Systems Network Infrastructure Services Non-Pay $3,303
Increase due to coverage of the DISA CIO portion of DISN IS, which enables continued use of Defense Information Systems Network circuits. Defense Information Systems Network Infrastructure Services is the bill Defense Information Systems Agency pays for these circuits. The funding covers services such as Global Content Delivery Services, Global Video Services, Low Speed Time Division Multiplex, and Enhanced Mobile Satellite Services.
(FY 2026 Baseline: $24,624 thousand)

8) Joint Planning and Execution Services Non-Pay $3,741
Increase in support of Joint Planning and Execution Services artificial intelligence enablement, which will integrate artificial intelligence to create a robust, data-driven solution for Global Force Management. An artificial intelligence capability will analyze vast datasets to optimize logistics, enhance data-driven force planning, improve threat detection, and reduce operational costs. By driving automation and efficiency, this initiative will significantly strengthen the DoW's ability to rapidly plan, deploy, and sustain forces, ultimately bolstering national security and improving system flexibility and cybersecurity.
(FY 2026 Baseline: $24,379 thousand)

9) Data-Centric Enterprise Services Non-Pay $5,702
Increase for the Defense Emergency Services IP Network, which is introducing a modern, highly reliable, and secure data network for all its emergency communications, much like a private, military-grade version of the system states use for 911 calls. DISA is piloting Defense Emergency Services IP Network in FY 2027. Funding will support the core network infrastructure and support needed for one pilot enclave, which includes contract labor support, security services, and the operational cost of the pilot program. By adopting an Emergency Services IP Network, the DoW can significantly enhance its communication infrastructure by moving from legacy systems to a more resilient, reliable, and scalable IP-based network. The Defense Emergency Services IP Network will enable seamless, real-time data sharing and interoperability across all agencies and jurisdictions, from field operations to command centers, improving coordination and response times during crises or disasters across different bases and branches.
(FY 2026 Baseline: $134,168 thousand)

10) White House Situation Support Staff Non-Pay $7,164
Increase due to sustainment requirements for White House Situation Room IT infrastructure following significant renovation. Dedicated funding supports modernized operations providing Senior Leadership with uninterrupted, secure, and high-speed communication. Additionally, this infrastructure enables informed and timely decision-making in response to evolving foreign policy and military challenges.
(FY 2026 Baseline: $19,229 thousand)

11) Combined Advanced Applications Non-Pay $30,493

$3,575 thousand increase to support the Compartmented Enterprise Services Office in providing an accredited Special Access Program IT system. This system enables users to work and communicate securely within a Special Access Program environment. The funding sustains CESO capabilities and supports incremental improvements based on customer feedback and Special Access Program CIO concurrence.

$26,918 thousand increase for the Enterprise Financial Accounting System, which will be operational in FY 2027 for DISA and the Missile Defense Agency. The Enterprise Financial Accounting System marks a significant advancement in modernizing the DoW's financial operations, enhancing security of classified information, and supporting the DoW's FY 2028 clean audit objectives. As a Top Secret-Sensitive Access Required Sensitive Compartmented Information financial management system, the Enterprise Financial Accounting System is designed for Sensitive Activities and Special Access Program requirements across the DoW. This increase provides DISA with a stable funding profile to manage the Enterprise Financial Accounting System program as additional DoW Agencies migrate to the Enterprise Financial Accounting System. The funding supports the system's operations and maintenance, licenses, network sustainment, Cybersecurity Service Provider services, and backbone connectivity telecom support. Migration to the Enterprise Financial Accounting System facilitates the retirement of legacy systems and helps the DoW achieve a clean audit opinion through standardizing processes for recording, reporting and managing financial resources.
(FY 2026 Baseline: $66,553 thousand)

12) Defense Spectrum Organization Non-Pay $10,094
Increase to operationalize and sustain modernized Electromagnetic Spectrum capabilities as they are deployed. Electromagnetic Spectrum Modernization involves transitioning legacy Electromagnetic Spectrum applications across the DoW to one foundational platform architecture to enable real-time processing, automation, Artificial Intelligence/Machine Learning , and dynamic spectrum sharing. Electromagnetic Spectrum Modernization will improve management, frequency assignments, situational awareness, decision support, and Command and Control of the Electromagnetic Spectrum assets to accelerate superiority on the battlefield. Electromagnetic Spectrum Modernization will also enable CCMDs and other DoW components to conduct joint planning, coordination, and control of the Electromagnetic Spectrum. The Joint Operational Edge (JOE) capability will ensure resilient Electromagnetic Spectrum operations in Denied, Degraded, Intermittent, and Limited (DDIL) environments, which have low bandwidth, high latency, and limited connectivity.
(FY 2026 Baseline: $31,034 thousand)

13) DOW Information Network Operations Non-Pay $10,109

Increase for realignment of resources from other DISA portfolios to consolidate the financial management of the Global Solutions Management Operations contract and other network operations support. The Global Solutions Management Operations contract provides operations, planning and execution services, and cybersecurity services, ensuring the DoW has the right people and processes in place to manage its global network effectively. Funding is realigned from Field Commands and Field Offices ($8,331 thousand) and Shared Services ($1,778 thousand).
(FY 2026 Baseline: $33,912 thousand)

14) Senior Leadership Enterprise Non-Pay.....$12,556
This program/mission is classified. Details provided for this program are submitted in appropriately classified DoW exhibits.
(FY 2026 Baseline: $313,457 thousand)

15) Civilian Compensation.....$17,825
$7,192 thousand, 30 FTEs increase for the White House Communications Agency to address critical manning and resourcing shortfalls due to sustained increase in operational tempo including higher volume of travel, expanded user base and evolving capabilities in support of White House travel.

$6,075 thousand increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long term capability for the Department.

$2,764 thousand, ten FTEs increase to support the creation of the White House Military Office of Technology. Five of these FTEs are specialized Headquarters Equivalents (HQEs) to meet highly sensitive White House needs and thus more expensive than the FY 2027 DISA AAR. This program/mission is classified. Details are available on request.

$1,794 thousand, nine FTEs increase for Critical Time Dissemination to support the DoW Information Network's precision timing network. These personnel deploy globally to inspect, operate, and upgrade the 46 Defense Regional Clocks and 30 Timing and Synchronization System Capability suites, staff a perpetual test lab to ensure system optimization and integrate advanced technologies. A dedicated team also maintains a watch-floor presence, monitoring and coordinating timing for mission-critical assets to guarantee a secure and resilient network.
(FY 2026 Baseline: $447,735 thousand; 2,239 FTEs; +49 FTEs)

16) DoW Enterprise Cloud Computing Ecosystem Non-Pay.....$101,114

$5,000 thousand increase supports the installation of dedicated, high-bandwidth circuits to connect to the Joint Warfighting Cloud Capability and for the build-out of secure floor space to host Cloud Service Provider Points of Presence. This investment is critical to enabling the DoW to fully leverage the capabilities of the Joint Warfighting Cloud Capability, a multi-vendor, multi-cloud enterprise solution designed to provide warfighters with secure and resilient cloud services from the headquarters to the tactical edge.

$13,600 increase supports DISA installing Joint Unmanaged Landing Zones for all four Joint Warfighter Cloud Contract hyperscale Cloud Service Providers at the Impact Level Six level. These landing zones will function as accredited, pre-approved security boundaries with corresponding network gateways on SIPRNet. This will standardize how cloud applications are secured, eliminating the need for slow and costly individualized security deployments for each new application. This environment will provide the cloud providers with an accelerated connection to the warfighter network and enable communications between them, creating a true hybrid solution.

$82,514 thousand increase supports DISA adding artificial intelligence acceleration hardware to existing Joint Operational Edge sites overseas, putting powerful artificial intelligence tools directly in the hands of tactical mission partners. This hardware will include Graphics Processing Units , a specialized electronic circuit designed for rapidly handling complex processes for artificial intelligence workloads. Unlike Central Processing Units , Graphics Processing Units use thousands of smaller cores to process multiple tasks simultaneously, making them essential for AI, machine learning, and high-performance computing. These combined enhancements will directly strengthen the warfighter by dramatically expanding their ability to process information and make key decisions within their area of responsibility. This initiative will directly support the Secretary of War's priorities by rebuilding the overseas digital infrastructure, restoring readiness by giving forward troops faster access to data and artificial intelligence, and reestablishing deterrence by deploying cutting-edge technology to the tactical edge.
(FY 2026 Baseline: $83,422 thousand)

17) Mission Partner Environment Non-Pay $82,183
Increase to operationalize and sustain the Coalition Information Environment. Coalition Information Environment provides a secure, unified hybrid cloud environment for sharing information at the Secret and below levels with mission partners. It is replacing the Air Force’s legacy Secret and Below Releasable Environment for collaboration capabilities and fully building out the Command and Control capabilities developed by the Joint Operational Edge -Coalition Environment pilot. Coalition Information Environment is starting at the SECRET level with plans to expand to unclassified communication levels. Funding supports the following activities: creating the operational/technical baseline to include automation and infrastructure as code, integrating multiple existing commercial-off-the-shelf capabilities; deploying and sustaining five nodes that deliver capability across theater and enterprise; establishing and operating the Global Network

Operations and Security Center to provide centralized monitoring, cybersecurity, and management for the entire environment; and establishing and operating fully functioning tiered support. DISA is executing Coalition Information Environment in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. Coalition Information Environment contributes to Mission Network as a Service by providing a cloud-based central hub for conducting Command and Control and Collaboration activities with Mission Partners.
(FY 2026 Baseline: $0 thousand)

18) White House Communications Agency Non-Pay $247,222
Increase to support a White House initiative to address limitations in White House Communications Agency and DoW communications systems. This program/mission is classified. Additional details are available on request.
(FY 2026 Baseline: $278,901 thousand)

19) Defense Information Systems Network Enterprise Activities Non-Pay.....$257,429
$96,272 thousand increase to eliminate critical technical debt across the DoW Information Network. Over time, DISA has accumulated tech debt related to critical Defense Information Systems Network components and the network still include legacy Time-Division Multiplexing systems. Time-Division Multiplexing networks face obsolescence as vendors are ending support. This funding will accelerate transition to a modern, all Internet Protocol and optical core, mitigating security risks and performance limitations. This includes delivery of new service delivery nodes that will extend the Defense Information Systems Network directly to the warfighter and DISA mission partners at strategic locations. Components being upgraded include nodes, routers, switches, controllers, security devices, and terminals. O&M funding will cover maintenance, repair, warranties, components below the procurement threshold, and the execution of necessary site, power, and infrastructure upgrades. This modernization strengthens the Defense Information Systems Network by guaranteeing the communications backbone is always available for the warfighter, preventing mission failure due to network outages.

$57,512 thousand increase to purchased communications (non-fund) for Defense Information Systems Network Resiliency. This program/mission is classified. Additional details are available on request.

$46,920 thousand increase for enhancement and sustainment of INDOPACOM IP Networks. DISA will be conducting optical and Internet Protocol tech refresh and modernization, which includes extending the modern, high-speed network directly to warfighters by deploying new Service Delivery Nodes, which are the core IP and optical infrastructure of Defense Information Systems Network. DISA is building out the network's footprint and placing this advanced hardware in strategic locations, with a primary emphasis on the Pacific theater. This ensures that the advanced capabilities of the modernized Defense Information Systems

Network are not just confined to the core network but are accessible at the tactical edge where missions are executed. This effort strengthens the DoW by providing forward-deployed forces and mission partners with the robust, high-bandwidth connectivity required for data-intensive, multi-domain operations. It directly supports the Secretary of War's priority to Rebuild the Military by fielding tangible, cutting-edge infrastructure to critical regions and helps Reestablish Deterrence by creating a physically resilient and technologically superior network presence in the Pacific, signaling a credible and enduring commitment to the region. Funding will purchase warranties, system components below the procurement threshold, planning and design and ongoing maintenance and repair.

$20,379 thousand increase for continued sustainment of the initial operating capability of Classified Voice and Video. Classified Voice and Video provides communication across multiple classification levels on a single platform, supporting the nation's Nuclear Command, Control, and Communications system. The nation's Nuclear Command, Control, and Communications system is critical for maintaining the readiness of U.S. nuclear forces under all circumstances, including during and after nuclear or non-nuclear attacks. The increase will sustain the initial capability, which includes a pre-production environment, three geographically dispersed sites, a network operations center, and a security operations center, and will also fund the deployment of Classified Voice and Video to three additional sites to expand the capability.

$15,852 thousand increase for the Critical Time Dissemination program will provide dedicated funding to sustain and enhance the DoW's timing infrastructure, directly supporting national defense priorities. This funding will sustain 46 Defense Regional Clocks and 30 Timing and Synchronization System Capability suites and establish and operate a permanent test lab for system optimization and security compliance. The investment also enables upgrades with anti-spoofing technologies, central monitoring, GPS-independent time-holding capabilities, and expands the infrastructure to meet growing demand for precision time. Ultimately, this ensures a resilient time distribution capability across the DoW Information Network enterprise. DISA is developing Critical Time Dissemination capabilities in accordance with the Mission Network as a Service framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. Critical Time Dissemination contributes to Mission Network as a Service by proving the Combined Joint Force with precision timing when using Defense Information Systems Network and Command and Control services to conduct sensitive targeting operations.

$12,007 thousand increase for Resilient Ground Infrastructure sustainment. As DISA expands the Airborne Intelligence Surveillance and Reconnaissance footprint, it requires increased sustainment funds to keep the equipment operational to facilitate the Airborne Intelligence Surveillance and Reconnaissance data transport to the warfighter. The Resilient Ground Infrastructure initiative aims to expand the reach, resiliency, and redundancy of Airborne Intelligence Surveillance and Reconnaissance by constructing additional Ground stations that support the transmittal of Airborne Intelligence Surveillance and Reconnaissance -compatible

frequencies. Airborne Intelligence Surveillance and Reconnaissance allows for cross-functional communication in direct support of CCMDs and boots on the ground efforts.

$8,487 thousand increase for the deployment of Outside the Continental United States (OCONUS) Classified Mobility Gateways. The deployment of these gateways will enhance network accessibility and improve the user experience, as well as enable DISA's infrastructure to meet new Commercial Solutions for Classified Continuous Monitoring Annex requirements. To sustain a secure environment, these Gateways incorporate Mobile Access Capability Package controls into the network architecture.
(FY 2026 Baseline: $388,037 thousand)

9. Program Decreases .....$-168,657

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-168,657

1) Joint Service Provider (JSP) Non-Pay .....$-7,591
Decrease due to a reduction in the technical debt funding profile following completion of several technical refresh initiatives. Technical debt funding is being used to invest in hardware, software, and IT infrastructure in FY 2026. Specifically, this funding is purchasing cables and switches that improve Pentagon facilities and support infrastructure modernization.
(FY 2026 Baseline: $518,571 thousand)

2) Civilian Compensation.....$-5,122
$1,766 thousand decrease to reflect updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department’s required contributions for both Revised Annuity Employees (RAE) and Further Revised Annuity Employees). The decrease aligns funding with current long term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government wide retirement funding requirements.

$1,623 thousand, eight FTEs decrease due to a transfer to O&M Cyber for workforce rebalancing. As DISA completes workforce optimization, DISA determined that additional Cyber FTEs are important to mission success and rebalanced its FTEs alignment between Cyber and Non-Cyber. Growing mission requirements

in the areas of Perimeter Defense, Zero Trust, and Identity, Credential, and Access Management necessitate additional FTEs in the Cyber domain.

$922 thousand decrease to realize anticipated cost savings to executive, general and special schedules and benefits for current employees. DISA anticipates achieving cost savings in Non-Cyber Pay due to the impact of Deferred Resignation Program departures on Non-Cyber workforce composition.

$811 thousand, four FTEs decrease is due to rightsizing to account for the ongoing impacts of the departures. Since departures extend into FY 2026, DISA expects its FTE levels to decline slightly in FY 2027 before rising to meet DISA's approved Defense Comprehensive Review levels in FY 2028.
(FY 2026 Baseline: $447,735 thousand; 2,239 FTEs; -12 FTEs)

3) Shared Services Non-Pay.....$-17,935
$11,503 decrease due to decline in allocation for Facilities, Sustainment, Restoration, and Modernization. FY 2026 funding enabled DISA to complete deferred facilities maintenance and address outstanding projects at multiple sites. DISA will address fewer projects using discretionary funding in FY 2027.

$4,654 thousand decrease due to a reduction in funding for Defense Finance and Accounting Service (DFAS) financial and human resource services. DISA purchases both finance and human resources services from DFAS. Reductions are due to expected efficiencies from 1) transitioning the DISA General Fund to the same accounting system used for DISA Working Capital Fund activities and 2) reduced processing of human resources transactions due to staffing reductions.

$1,778 thousand due to the realignment of funding for the Global Solutions Management Operations contract from Shared Services to Network DoW Information Network Operations. DISA is consolidating financial management of the Global Solutions Management Operations contract to ensure a unified approach to managing day-to-day delivery support required to operate and defend the DoW Information Network.
(FY 2026 Baseline: $105,840 thousand)

4) Joint Staff Support Center (JSSC) Non-Pay .....$-105
Decrease due to diminished requirements for Information Technology Support Services contract support.
(FY 2026 Baseline: $17,216 thousand)

5) Pentagon Reservation Maintenance Revolving Fund (PRMRF) Non-Pay.....$-3,564
Decrease to Pentagon Reservation Maintenance Revolving Fund Purchases due to reduced requirements to support the Raven Rock Mountain Complex. Details are classified and available upon request.
(FY 2026 Baseline: $35,128 thousand)

6) Field Commands and Field Offices Non-Pay .....$-12,601
$8,331 thousand decrease due to realignment of funding for the Global Solutions Management Operations contract and other network operations from Field Commands and Field Offices to Network DoW Information Network Operations. DISA is consolidating financial management of the Global Solutions Management Operations contract and other network operations to ensure a unified approach to managing day-to-day delivery support required to operate and defend the DoW Information Network. Global Solutions Management Operations provides subject matter expertise for the development, operations, and sustainment of network capabilities across the DoW in cyber, data, and information mission areas at the DoW Information Network and Warfighter levels. Global Solutions Management Operations ensures that the DoW has the right people and processes in place to manage its global network effectively.

$4,270 thousand decrease due to efficiencies gained from effective alignment and integration of voice, video, and data services across the Joint Cyber Warfighting Architecture, resulting in diminished sustainment costs.
(FY 2026 Baseline: $45,911 thousand)

7) DoWIN Engineering Services Non-Pay.....$-12,871
Decrease due to the reduced requirement for NIPRNet and SIPRNet sensors that support operations, defense and resiliency in support of DoW and Combatant Command (CCMD) Operations with a focus on the European Theatre.
(FY 2026 Baseline: $149,294 thousand)

8) Fourth Estate Network Operations Non-Pay.....$-108,868
Decrease due to the planned completion of Defense and Field Activities (DAFAs) onboarding to DoDNet, supported by FY 2026 funds. Sustainment support to DAFAs is significantly less expensive than the initial planning, design, and migration efforts. Migrating DAFAs to DoDNet is a key element of the DoW Zero Trust initiative. Migration provides Zero Trust protection through DISA's Thunderdome program (funded in the DISA Cyber OP-5) upon migration.
(FY 2026 Baseline: $145,667 thousand)

FY 2027 Budget Request $3,873,222

IV. Performance Criteria and Evaluation Summary:

Metric Description	2025 Actuals	2026 Plan	2027 Plan
Department of War Information Network Engineering Services (DoWIN ES):			
1. Percentage of spare capacity maintained to allow for provisioning of unforeseen requirements and rerouting under outages (minimum 25 percent).	1. ≥ 25%	1. ≥ 25%	1. ≥ 25%
2. Number of technical studies of future architectures and enterprise services evaluated for acquisition or technical refresh decisions.	2. 4	2. 4	2. 4
3. Number of Microsoft Defender licenses. Provides secure and compliant software access for end users, enhancing productivity and data protection.	3. 21,000	3. 500,000	3. N/A
4. Number of systems/tools modified/enhanced to modernize DISA's cybersecurity and network architecture to accommodate a Zero Trust Environment.	4. 12	4. 8	4. 4
5. Number of Defense Information Systems Network (DISN) Secret Internet Protocol Router Network (SIPRNet) and Non-Classified Internet Protocol Router Network (NIPRNet) boundary points with monitoring capabilities to ensure consistent performance across key network points.	5. 14	5. 14	5. 14
Data-Centric Enterprise Services (DCES):			
6. Percentage of endpoints protected across DISA classified systems. Endpoints are protected when Data Loss Prevention (DLP) migrations are completed.	6. 25%	6. 50%	6. 75%
7. Number of Azure Virtual Desktop (AVD) migrations completed. The metric measures the total number of CCMDs, Military Services, and	7. 3	7. 3	7. 3

Metric Description	2025 Actuals	2026 Plan	2027 Plan
Agencies (CC/S/As) that have migrated to AVD within the classified environment.			
8. Number of SIPRNet migrations completed. The metric measures the total number of CCMDs, Military Services, and Agencies locations migrated or adopted SIPR capabilities to meet DoW CIO zero-trust objectives.	8. 60	8. 60	8. 60
9. Percentage of Australia, United Kingdom, and United States (AUKUS) Working Group members from different countries leveraging a single collaboration solution.	9. 0%	9. 30% from AUS & UK	9. 30% from AUS & UK
10. Number of 365-Joint connections to other IL5 (Impact Level) DoW tenants.	10. 18	10. 21	10. 24
11. Number of mailboxes migrated each day to the Tenant-to-Tenant Defense Enterprise Office Solution (DEOS).	11. 350	11. 300	11. 300
12. Number of military users supported by the change of station data transfer.	12. 0	12. 50,000	12. 50,000
13. Operational Availability of DoW Emergency Services IP Network (D-ESINet) pilot.	13. N/A	13. N/A	13. 100%
<u>DoW Enterprise Cloud Computing Ecosystem:</u>			
14. Number of commercial cloud service providers.	14. 4	14. 4	14. 4
15. Number of Joint Operational Edge (JOE) locations operational.	15. 5	15. 6	15. 6
16. Number of Joint Unmanaged Landing Zones installed at JWCC cloud service providers.	16. N/A	16. N/A	16. 4
17. Number of JOE sites with AI acceleration hardware installed.	17. N/A	17. N/A	17. 6
<u>Defense Information Systems Network (DISN) Enterprise Activities (EA):</u>			

Metric Description	2025 Actuals	2026 Plan	2027 Plan
18. Percentage of time the NIPRNet access circuit is available.	18. 98.80%	18. 98.50%	18. 98.50%
19. SIPRNet Latency (measurement of network delay) in the Continental United States (in milliseconds).	19. 50	19. ≤ 100	19. ≤ 100
20. Number of Internet Protocol (IP) enabling servers / IT components.	20. 241	20. >220	20. >220
21. Number of sites that utilize the Senior National Leadership Communications (SNLC) Gateway/Enclave.	21. 37	21. 37	21. 42
22. Number of Enhanced Pentagon Capability/Survivable Emergency Conferencing Network - Digitalized (EPC/SECN) sites supported.	22. 4	22. 4	22. 5
23. Number of Airborne, Intelligence, Surveillance & Reconnaissance /Unified Video Dissemination System (AISR/UVDS) hubs supported.	23. 7	23. 7	23. 7
24. Number of AISR/Tactical Relays operational.	24. 58	24. 58	24. 58
25. Number of Proliferated Low Earth Orbit (pLEO) Software-Defined Wide Area Network (SD/WAN) enabled deployable DISN nodes available for deployment to global hot spots.	25. N/A	25. 5	25. 5
26. Number of Defense Red Switch Network (DRSN) sites supported.	26. 43	26. 43	26. 43
27. Number of Defense Regional Clocks (DRC) supporting Critical Time Dissemination (CTD)	27. 46	27. 46	27. 47
28. Number of Timing and Synchronization System Capability (TSSC) supporting Critical Time Dissemination (CTD)	28. 30	28. 30	28. 33
<u>Defense Spectrum Organization (DSO):</u>			
29. Number of Electromagnetic Battle Management-Joint (EMBM-J) iterative releases.	29. 5	29. 4	29. 4

Metric Description	2025 Actuals	2026 Plan	2027 Plan
30. Operational availability of Global Electromagnetic Spectrum Information System (GEMSIS).	30. 99.7%	30. 99.7%	30. 99.7%
31. Number of Electromagnetic Spectrum (EMS) Functions transitioned to modernized EMS IT environment	31. 0	31. 0	31. 2
DoW Teleport Program:			
32. Number of Teleport sites.	32. 14	32. 16	32. 34
33. Number of successful Joint Management Tool (JMT) sustainment tool sprints.	33. 15	33. 15	33. 15
4th Estate Network Optimization (4ENO):			
34. Number of users operational on DoDNet.	34. 23,772	34. 103,840	34. 167,129
35. Number of Defense Agencies and Field Activities (DAFAs) operational on DoDNet.	35. 4	35. 10	35. 16
36. Number of CCMDs completing planning and design phases (including site surveys) for migration to Combatant Command Network Optimization (CCMDNet).	36. N/A	36. N/A	36. 11
Field Commands and Field Offices:			
37. Percentage of spare capacity maintained to allow for provisioning of unforeseen requirements and rerouting under outages (minimum 25 percent).	37. ≥ 25%	37. ≥ 25%	37. ≥ 25%
38. Number of DISA service support plans, Theater Campaign Plans (TCP), and Operational Plans (OPLANs) reviewed.	38. 31	38. 52	38. 52
39. Number of assessments of threat, vulnerability, and risk to the Combatant Command (CCMD) Theater Critical Assets.	39. 70	39. 70	39. 74

Metric Description	2025 Actuals	2026 Plan	2027 Plan
40. Number of assessments of Command, Control, Computer, Communication, Intelligence, Surveillance, and Reconnaissance (C4ISR) readiness, service constraints, and delivery.	40. 22	40. 24	40. 22
41. Number of U.S./Indo-Pacific/NATO DISA C4ISR Interoperability Reviews.	41. 8	41. 8	41. 8
Network (DoWIN) Operations (NetOps):			
42. Average number of DISN service interruptions mitigated per month.	42. 26,500	42. 60,000	42. 37,000
43. Average number of malicious DISN cyber events blocked and/or mitigated per month.	43. 940 million	43. 1,000 million	43. 1,100 million
44. Number of DISN NetOps network assets managed.	44. 190 million	44. 190 million	44. 190 million
45. Number of Command and Control (C2) Service Telecommunications Service Orders (TSO) and circuit actions processed.	45. 42,300	45. 49,000	45. 39,000
Joint Staff Support Center (JSSC):			
46. Percentage of incidents resolved. Note: JSSC provides over 250 thousand patches per year for Nuclear Command and Control (NC2) and Command and Control (C2) Systems and 12,000 patches per year for Video, Graphic, Intel, and Video Teleconference (VTC) products. JSSC elevates incidents to the program manager as required.	46. 100%	46. 100%	46. 100%
47. Percentage of IT Support availability for over 1,000 Nuclear Decision Conferences and over 600 Worldwide Global Command and Control System – Joint/Joint Planning and Execution Services (GCCS-J/JPES) sites. Target is to maintain 99 percent global availability of critical sites world-wide and 24x7 monitoring and reporting of and National Military Command Center Command and Control System (NCCS) status, and operational impacts.	47. 100%	47. 100%	47. 100%
Joint Service Provider (JSP):			

Metric Description	2025 Actuals	2026 Plan	2027 Plan
48. Percentage of asset visibility for compliance through continuous monitoring on the Non-classified Internet Protocol Router Network (NIPRNet).	48. 95%	48. 90%	48. 90%
49. Percentage of credentialed scan rate for every asset (minimum 95 percent). JSP scans every asset once per week.	49. 99%	49. 95%	49. 95%
50. Percentage of data availability for enterprise applications and replicated data for unclassified and classified transport networks (minimum 99 percent).	50. 99%	50. 99%	50. 99%
51. Percentage of availability for all JSP-managed systems and services, including but not limited to Virtual Desktop Infrastructure (VDI), Active Directory, File/Print, and Elastic Sky X (ESX) Infrastructure (minimum 99 percent).	51. 99%	51. 99%	51. 99%
52. Percentage of incident tickets resolved within eight business hours of the incident report (minimum 90 percent).	52. 99%	52. 90%	52. 90%
53. Percentage of time-advanced mission-tolerant infrastructure, systems, and support are available to the Immediate Office of the Secretary of War for a high-availability, workstation-based, computer network. (Critical Infrastructure)	53. 99%	53. 99%	53. 99%
54. Percentage of time communications, Information Technology (IT), and physical security are available to maintain full-scope Information Assurance (IA), Computer Network Defense (CND), and Incident Response (IR). (Security Operations)	54. 99%	54. 99%	54. 99%
55. Percentage of time communications systems and support services to the Immediate Office of the Secretary of War are available. (Communications Support)	55. 99%	55. 99%	55. 99%
56. Percentage of time that SECWARCOMs is available as the single point of contact for all Secretary of War, Immediate Office of Continuity			

Metric Description	2025 Actuals	2026 Plan	2027 Plan
of Operations/Continuity of Government (COOP/COG) and continuity of the Presidency matters. (COOP/COG)	56. 99%	56. 99%	56. 99%
Joint Planning and Execution Services (JPES):			
57. Operational availability of Joint Operation and Planning Execution System (JOPES). Metric is relevant until the JPES modernization effort is operational, and JOPES is sunset.	57. 100%	57. 100%	57. N/A
58. Operational availability of JPES. Metric is relevant following JPES go-live.	58. N/A	58. 100%	58. 100%
Mission Partner Environment (MPE):			
59. Number of operational Coalition Information Environment nodes.	59. 0	59. 0	59. 5
60. Number of existing MPE capabilities transferred from the Department of the Air Force (DAF) and sustained by DISA.	60. 0	60. 0	60. 3
Shared Services Units/Program Executive Offices:			
61. Percentage of DISA's Data Management Assessments completed. Note: This assessment will help establish a baseline of DoW's maturity level of its overall data program and environment. It is not an inspection or an audit; it is a tool, and the shared understanding derived from the results will enable DoW Chief Data Officer (CDO) to help improve overall data maturity and establish guidance and targets for the Department to achieve the goals of the DoW Data Strategy.	61. 100% Monthly	61. 100% Monthly	61. 100% Monthly
62. Percentage of the DISA Data Catalog (DISA-DC) completed. The DISA-DC is a metadata repository that provides DISA visibility and understanding of its data assets through metadata exposure. The Agency's centralized authoritative repository catalogs business and technical metadata for all DISA data assets.	62. 100% Monthly	62. 100% Monthly	62. 100% Monthly

Metric Description	2025 Actuals	2026 Plan	2027 Plan
63. Percentage of the DISA Data Catalog connecting to DISA data sources.	63. 100%	63. 100%	63. 100%
64. Percentage of Data Governance Assessments completed.	64. 50%	64. 50%	64. 50%
65. Percentage of DISA data interfaces, data payloads, data dictionaries, and Application Program Interface (API) versions registered in the DISA Data Catalog.	65. 25%	65. 100%	65. 100%
66. Percentage of declassification reviews and required determinations completed for all referrals for equity within a 60-day period.	66. 100% Quarterly	66. 100% Quarterly	66. 100% Quarterly
67. Percentage of End User Software Licenses (Microsoft, Adobe, etc.,) validated to ensure that the user accounts of DISA employees are licensed legally and accurately.	67. 100% Monthly	67. 100% Monthly	67. 100% Monthly
White House Communications Agency (WHCA):			
68. Percentage of Secure Unclassified and Classified Presidential Information Technology Community (PITC) Network uptime availability. This is the uptime availability of all PITC networks in support of the President and Vice President of the United States.	68. 99.99%	68. 99.99%	68. 99.99%
69. Percentage of COOP and COG Facilities' uptime. Network uptime for COOP and COG facilities.	69. 99.99%	69. 99.99%	69. 99.99%
70. Percentage of deployable team requirements met for POTUS, VPOTUS, and FLOTUS events.	70. 99.99%	70. 99.99%	70. 99.99%
White House Situation Support Staff (WHSSS):			
71. Percentage of mission support activities for the White House Situation Room (WHSR) sustained without disruption.	71. 99%	71. 99%	71. 99%
Communications Management Control Activity:			

Metric Description	2025 Actuals	2026 Plan	2027 Plan
72. Percentage of time the information and orders dissemination tool is available to the authorized users.	72. 99%	72. 99%	72. 99%

V. Personnel Summary:

Contractor FTEs (Total)	**3,370**	**4,469**	**4,862**	**1,099**	**393**

Personnel Summary Explanations:

FY 2026 - FY 2027 is (+46) FTEs ($s are in Thousands).

DISA has an overall O&M non-cyber increase of +46 civilian FTEs.

There is an increase of 58 FTEs for critical mission needs. These are new FTEs to support White House Communication Agency as it addresses serious deficiencies in its communications environment, the Critical Time Dissemination Program, and the Mission Partner Environment (transfer from Department of the Air Force to DISA).

Decrease of -12 FTEs reflects workforce re-balancing. As part of rebalancing, eight FTEs are transferring to cyber and four are being eliminated. DISA continues to reevaluate its workforce to deploy personnel the most mission sensitive areas and achieve cost-savings through prudent utilization of FTEs.

Post-Departure Workforce Rebalancing (-12 FTEs, -8 transfer to Cyber and -4 overall decrease):
+15 FTEs to DISN EA
+12 FTEs to Network DoW Information Network Operations
+6 FTEs to Field Commands and Field Offices
+4 FTEs to Joint Planning and Execution Services
+4 FTEs to Data-Centric Enterprise Services
+3 FTEs to Global Command and Control System - Joint
+2 FTEs to DoW Cloud Computing Enterprise

+2 FTEs to White House Situation Support Staff
+1 FTE to Communication Management Control Activity
+1 FTE to Senior Leadership Enterprise
-1 FTE from Defense Spectrum Organization
-2 FTEs from DoW Teleport Program
-3 FTEs from Joint Service Provider
-3 FTEs from Combined Advanced Applications
-3 FTEs from Management Headquarters
-8 FTEs from Joint Staff Support Center
-10 FTEs from Shared Services
-32 FTEs from DoW Information Network Engineering Services

Increases for Critical Missions (+58 FTEs):
+40 FTEs to WHCA (includes 10 FTEs for the White House Military Office of Technology)
+9 FTEs to DISN EA
+9 FTEs to Mission Partner Environment (transfer from Department of the Air Force)

FY 2025 - FY 2026 is (-238) FTEs ($s are in Thousands).

The DISA has an overall decrease of -238 civilian FTEs to optimize the workforce in compliance with Executive Order 14210, “Implementing the President’s Department of Government Efficiency Workforce Optimization Initiative.”

VI. OP 32 Line Items as Applicable (Dollars in thousands):

			Change from FY 2025 to FY 2026			Change from FY 2026 to FY 2027		
		FY 2025 Program	Price Growth	Program Growth	FY 2026 Program	Price Growth	Program Growth	FY 2027 Program

Several of the changes on the Defense Information Systems Agency's OP-32 from FY 2026 to FY 2027 represent reclassifications of existing costs rather than program growth. True non-pay program growth is concentrated on Line 922 Equipment Maintenance by Contract.

- The increase on Line 647 DISA Enterprise Computing Centers, Line 671 DISA Defense Information Systems Network Subscription Services, and Line 677 DISA Telecommunication Services - Reimbursable represents reclassifications from Line 914 Purchased Communications (non-fund) and Line 922 Equipment Maintenance by Contract. These changes were made to properly classify the Defense Information Systems Agency's purchases of its working capital fund services and bring classification in line with execution.
- The increase on Line 914 Purchased Communications (non-fund) represents reclassifications from Line 922 Equipment Maintenance by Contract for Defense Information Systems Network Enterprise Activities (Transport) and Line 989 Other Services for White House Communications Agency requirements.
- The increase on Line 922 Equipment Maintenance by Contract is true program growth offset by the reclassifications to Line 647 DISA Enterprise Computing Centers, Line 671 DISA Defense Information Systems Network Subscription Services, Line 677 DISA Telecommunication Services – Reimbursable, and Line 914 Purchased Communications (non-fund).
- The decrease on Line 989 Other Services represents a reclassification to Line 914 Purchased Communications (non-fund) for the White House Communications Agency.

Fiscal Year 2027 Budget Estimates

Defense Information Systems Agency Cyber

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DISA Cyber	489,914	10,891	38,608	539,413	10,488	52,116	602,017

I. Description of Operations Financed:

The Defense Information Systems Agency (DISA) is a critical combat support agency that delivers, operates, and assures the foundational command and control, information sharing capabilities, and global enterprise information infrastructure essential for joint warfighters, national-level leaders, and coalition partners across the full spectrum of operations.

The DISA Next Strategy directly drives combat support priorities and initiatives, ensuring the delivery of essential capacity and capability for warfighting information systems. Through planning, engineering, acquisition, testing, fielding, operation, and assurance, DISA develops and maintains robust information-sharing capabilities, command and control solutions, and a global enterprise infrastructure supporting the Department of War (DoW) and national leadership.

DISA drives innovation and fosters collaboration to align capabilities with evolving threats. The agency is integral to achieving the Secretary of War's priorities: rebuilding the military, reestablishing deterrence, and defending the homeland. By embodying core principles of readiness, campaigning, continuous modernization, and establishing lethality, DISA ensures the military remains agile and adaptable, capable of rapidly incorporating new technologies and tactics to counter evolving threats.

In support of the President’s 2025 National Security Strategy, DISA continuously modernizes its network infrastructure and cyber defenses to outpace evolving threats and to drive technological advancements. This ensures a resilient, secure, and scalable network for forces at home and for forward-deployed combatant commands. These efforts are crucial to maximizing resilience against foreign adversaries and enabling seamless interoperability between the Department of War and its allies.

Serving the President, Vice President, Secretary of War, Joint Chiefs of Staff, Combatant Commands, and other DoW Components, DISA provides essential networks, computing infrastructure, and enterprise services. These resources enable critical information sharing and decision-making for the nation's warfighters and their support elements, directly contributing to national defense. Committed to advancing technology, DISA strengthens the security and resilience of networks and systems, thereby enhancing current and future U.S. military advantages over adversaries. Key priority areas include Cybersecurity, National Leadership Command Capability, and White House support.

Four strategic imperatives guide DISA’s efforts:

Strategic Imperative #1: Operate and Secure the DISA Portion of the DoW Information Network
This imperative demands fortifying foundational infrastructure, continuously innovating processes, dedicating critical resources, and deploying relevant, modern enterprise and business tools. A resilient and redundant Defense Information Systems Network backbone is essential to ensure robust data transport security across the DoW Information Network.

Strategic Imperative #2: Support Strategic Command, Control, and Communications
DISA's critical function is to develop, provision, and operate secure command control and communications solutions. Key goals include fully operationalizing cloud capabilities, building an accessible hybrid cloud environment, and strengthening data management standards. These innovations will empower warfighters with the scope and scale of data access needed for modern combat operations, ensuring agility and adaptability against emerging threats.

Strategic Imperative #3: Optimize the Network
Optimizing the DoW Information Network encompasses both enhancing security and improving adaptability. This means innovating the network's infrastructure to instill confidence in its resilience while ensuring a seamless user experience and actively minimizing technical debt. Achieving an unconstrained DoW Information Network and consolidating efforts across Defense Agencies and Field Activities and Combatant Commands are pivotal goals guiding this imperative.

Strategic Imperative #4: Operationalize Data
Leveraging data to empower warfighters with a strategic advantage over adversaries is paramount to maintaining competitive superiority. This requires aligning culture, conduct, and capabilities to drive innovation in data operationalization. Modernizing the coordination capabilities of the NLCC and enhancing joint warfighting tools will significantly strengthen the collaborative process of putting data into action.

To reflect the Department of War's national defense priorities, the DISA) aligns its cyber program resource as Cyberspace Operations, which focuses on defending DoW networks, proactively identifying threats, and championing the implementation of Zero Trust throughout the department.

DISA continues to use the Cost Allocation Model to assign shared services costs to products and services. The cost allocation Model identifies the total cost of a program and avoids unintended subsidies to the Defense Working Capital Fund, provides visibility into the cost and consumption of shared services, and identifies efficiencies.

Mission Area: Cyberspace Activities - (FY 2027: $602,017 thousand)

Information Systems Security Program (FY 2027: $602,017 thousand): The Information Systems Security Program mission delivers enterprise-wide cybersecurity solutions across all DoW components, ensuring critical mission execution in contested cyber environments. Information Systems Security Program data security enhancements strengthen the Department's ability to detect and prevent malicious traffic through expanded break-and-inspect functionality and refined data discovery, classification, and protection measures. Additional zero-trust

capabilities deter zero-day attacks, phishing, and other cyber threats while streamlining defense tools. These capabilities are essential for maintaining DoW's secure and resilient cyber footprint.

Information Systems Security Program provides solutions to harden the network and secure data by:

- Reducing exposed attack surfaces and gaps that adversaries exploit to disrupt communications. This includes deploying perimeter defenses at the border between DoW and the internet. These defenses protect over five million users through state-of-the-art measures that mitigate viruses, exfiltrate data, and identify emerging cyber threats.

- Deploying a secure protocol, decryption, and re-encryption mechanism to protect communications through the Internet Access Points. This is an advanced technological capability integrated network wide.

- Providing vital situational awareness to senior decision-makers and network defenders that enables attack detection and diagnosis. Real-time situational awareness is crucial for deterring emerging threats.

- Supporting safe information sharing with allies and mission partners by expanding enterprise services that enable secure access and data transfer between networks of differing classification levels. By utilizing cyber identity credentials and expanding this capability on Secret Internet Protocol Router Network (SIPRNet), DISA is driving anonymity out of the networks.

- Enabling authentication of the user and device, end-to-end encryption, micro-segmentation of traffic, and dynamic networking, while providing enhanced cyber situational awareness solutions with end-to-end visibility, monitoring, and automation.

- Providing a joint DoW Routing-Only and Transport Infrastructure for the remaining Joint Regional Security Stacks customers.

- Providing oversight of Information Assurance programs, projects, and initiatives from requirements management through implementation and sustainment.

- Providing advanced technological capabilities training to DoW civilians by continuing to generate information assurance and Network Operations training used throughout the Department using web-enabled tools.

- Federating all Identity Credential and Access Management solutions across the Department and sustaining federated capabilities. Application Program Interface Gateways improve security and access control and support Zero Trust user and device pillars by enabling publishing, maintaining, monitoring, securing, and operating Application Program Interfaces, thus reducing vulnerabilities in one of the largest cybersecurity vectors.

- Ensuring only authorized users have access to data sources, that those authorizations are automatically updated based on user attributes, and that only authorized credentials are accepted to authenticate users. The Identity Credential and Access Management solution leverages a Fed Hub that bridges and enables the interoperability of the various DoW Identity Credential and Access Management s. The use of the Identity Credential and Access Management federation hub on the Non-classified Internet Protocol Router Network (NIPRNet) and on SIPRNet, where all DoW users can rely on a single Identity Credential and Access Management capability, supports Joint Operations by enabling members of one Component to access applications in other Components with a single identity. DISA is executing Identity Credential and Access Management in accordance with the Mission Network as a Service (MNaaS) framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. The Identity Credential and Access Management capability contributes to MNaaS by providing robust, multi-method user authentication and authorization to include role-based and attribute-based access controls.

- Implementing requirements for Internal Controls over Financial Reporting applications to leverage centralized Identity Credential and Access Management solutions with automated account provisioning in support of “passing a financial audit”. Identity Credential and Access Management supports the SECWAR’s priority to Rebuild the Military by enhancing the Department’s audit posture.

- Continuing implementation of a Zero Trust Architecture (under the concept of least privileged access) as part of the Thunderdome Capability. Zero Trust is a data-centric security model that eliminates the idea of trusted or untrusted networks, devices, personas, or processes and shifts to multi-attribute-based confidence levels that enable authentication and authorization policies under the concept of least privileged access. The Zero Trust approach to security helps the warfighter remain ahead of evolving threats and adversaries.

- Providing Continuous Compliance Monitoring for all DoW mission partners’ containerized applications, which cover all the Development, Security, and Operations (DevSecOps) pillars via DevSecOps Operational Container Scanning. The DevSecOps Operational Container Scanning process provides Continuous Compliance Monitoring for all DoW mission partners’ containerized applications and provides Security Technical Implementation Guide (STIG) automation via Compliance as Code files. The STIG capabilities include automated STIG compliance monitoring for popular software technologies, a comprehensive user dashboard for continuous monitoring, and the ability for users to send data to Enterprise Mission Assurance Support Service for increased system status visibility.

- Publishing cybersecurity guidelines and assessing compliance. DISA is changing the STIGs to enable better automation of the DoW’s configuration and supply chain risk management requirements and reporting processes. Maintaining a robust risk management strategy increases transparency and confidence in the warfighter support network.

- Supporting the Cleared Defense Contractor Gateway, which is critical to the cybersecurity architecture deployed to protect the SIPRNet. The Cleared Defense Contractor Gateway is designed to secure communications between defense contractor facilities (i.e., Defense Industrial Base mission partners) and the DoW SIPRNet. The focus is on cybersecurity enhancements and supporting operations and sustainment for a lab and two production sites.

- Designing and operating a User Activity Monitoring Solution, a Commercial-off-the-shelf solution as a service that provides Combatant Commands s and Defense Agencies and Field Activities with the capabilities required to observe and record activities on endpoints device accessing DoW information.

c) Emergent Requirements	$0
FY 2026 Baseline Funding	**$539,413**

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $539,413

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $539,413

6. Price Change $10,488

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $52,938

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $52,938

1) Civilian Pay $2,257
$634 thousand increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent

that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long term capability for the Department.

$1,623 thousand, 8 full-time equivalents (FTEs) increase is due to the transfer of FTEs from non-cyber to cyber. DISA completed workforce optimization, determined that additional Cyber FTEs are important to mission success, and rebalanced its FTEs alignment between Cyber and Non-Cyber. Growing mission requirements in the areas of Perimeter Defense, Zero Trust, and Identity, Credential, and Access Management necessitate additional FTEs in the Cyber domain. There is no net gain in DISA O&M FTEs. (FY 2026 Baseline: $45,911 thousand; 222 FTEs; +8 FTEs)

2) ISSP Non-Pay $50,681
$28,481 thousand increase to support the Identity, Credential, and Access Management capability across the Combatant Commands and Services. DISA is executing Identity, Credential, and Access Management in accordance with the Mission Network as a Service (MNaaS) framework, which aims to deliver a unified, secure, and agile Secret environment for the Combined Joint Force. The Identity, Credential, and Access Management capability contributes to MNaaS by providing robust, multi-method user authentication and authorization to include role-based and attribute-based access controls. MNaaS will ensure every user, device, and non-person entity is uniquely identified and authenticated. Multi-factor Authentication will be standard, significantly reducing the risk of account compromise. By ensuring seamless identity synchronization, security, policy enforcement, and auditing, Identity, Credential, and Access Management enforces Zero Trust principles across MNaaS. Identity, Credential, and Access Management strengthens a Combatant Commander's ability to operate even when regionally isolated from the Continental United States. The solution's federated architecture allows for the secure and flexible integration of foreign mission partners, significantly improving multi-national deterrence. Automating integration with existing Secret-level U.S. Identity, Credential, and Access Management s reuses secure identity data to prevent errors and inefficiencies. Identity, Credential, and Access Management increase also supports enabling support to enable a smooth transition to advanced public key infrastructure cryptographic standards. Enabling support will protect against extended lockouts from DoW facilities and systems.

$22,200 thousand increase is required to fund the User Activity Monitoring (UAM) technology refresh and standardization initiative. DISA is consolidating an array of Combatant Commands and DAFA UAM capabilities into a common Commercial-Off-The-Shelf solution to reduce duplication and provide a uniform standard to observe and record endpoint activities. To enable successful adoption of this UAM uniform solution, a technology refresh of the current UAM equipment across the DoW is necessary. This funding will support the technology refresh of agency UAM equipment, along with required warranties, bandwidth and storage upgrades, software licenses, and implementation support for all UAM activities. Defense Agencies

and Field Activities and Combatant Commands will have access to DISA's UAM solution as part of DoDNet/Combatant Command Network Optimization migration and are transitioning to DISA's common UAM architecture as they prepare for migration.
(FY 2026 Baseline: $493,502 thousand)

9. Program Decreases ..... $-822

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-822

1) Civilian Pay, Deferred Resignation Efficiencies ..... $-635
Reduction to realize anticipated cost savings. DISA anticipates achieving cost savings. DISA anticipates achieving cost savings in Cyber Pay due to the impact of departures on Cyber workforce composition.
(FY 2026 Baseline: $45,911 thousand; 222 FTEs)

2) Civilian Pay, Federal Retirement System – Agency Contribution Rates ..... $-187
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $45,911 thousand; 222 FTEs)

FY 2027 Budget Request $602,017

IV. Performance Criteria and Evaluation Summary:

Metric Description	2025 Actuals	2026 Plan	2027 Plan
Information Systems Security Program (ISSP):			
1. Number of Continuous Monitoring and Risk Scoring (CMRS) user accounts created.	1. NIPR 894 SIPR 419	1. NIPR 938 SIPR 440	1. NIPR 985 SIPR 462
2. Number of User Activity Monitoring (UAM) classes provided. DISA provides onsite engineering expertise, training classes, and software licensing/maintenance to support the UAM capability in countering insider threats at ten Combatant Commands (CCMDs) and 11 Defense Agencies and Field Activities (DAFAs).	2. 9 Classes	2. 9 Classes	2. 9 Classes
3. Number of DoW Applications integrated with the Defense Enterprise Identity Credential and Access Management (ICAM) Identity Provider (IdP) and Automated Account Provisioning (AAP).	3. IDP 361 AAP 111	3. IDP 130 AAP 34	3. IDP 130 AAP 34
4. Number of ICAM Federations (NIPR/SIPR).	4. NIPR 3 SIPR 0	4. NIPR 4 SIPR 2	4. NIPR 1 SIPR 1
5. Number of known systems newly protected on NIPR/SIPR.	5. NIPR 428 SIPR 63	5. NIPR 637 SIPR 70	5. NIPR 324 SIPR 45
6. Percentage of applications behind the Web Application Firewall (WAF). DISA's objective is to protect 100 percent of internet facing, Defense Enterprise Computing Center (DECC) hosted, applications with the Web Application Firewall.	6. 90%	6. 90%	6. 90%
7. Number of Deployable Security Orchestration and Automation Response (DESOAR) analytics developed or substantially revised.	7. 1 (SOAR deployed in July 2025)	7. 20	7. 25
8. Number of prevented Zero Hour phishing attempts by the Heat Shield.	8. N/A	8. N/A	8. 7,920

Metric Description	2025 Actuals	2026 Plan	2027 Plan
9. Total number of files generated by Threat Intelligence System (TIS).	9. 4,473	9. 4,200	9. 4,380
10. Percentage of DoW Cyber Exchange tickets completed. DoW Cyber Exchange content requests are tracked in a ticketing system and 95% will be completed within the terms of the Service Level Agreement (SLA).	10. 95%	10. 95%	10. 95%
11. Percentage of inbound traffic decrypted by the DoW Enterprise Perimeter-Break and Inspect at the ten DISA Internet Access Points (IAP).	11. 30%	11. 40%	11. 50%
Thunderdome:			
12. Number of sites where Thunderdome Migrations were completed.	12. 119	12. 80	12. 80
13. Percentage of DISA users defended by data loss prevention and data protection capabilities.	13. N/A	13. 99%	13. 99%
Cloud Support:			
14. Number of annual assessments of DoW authorized cloud service providers/cloud service offerings.	14. 37	14. 140	14. 165
15. Number of DoW Continuous Monitoring reports received, reviewed, and filed in a secure repository.	15. 814	15. 1,680	15. 1,980
Connection Approval Program:			
16. Number of connection approval packages processed per month. DISA processes up to 650 monthly connection approval packages to support Combatant Commands / Services / Agencies / Field Activities (CC/S/A/FA) requirements for Defense Information Systems Network (DISN) connections.	16. 650 Monthly	16. 650 Monthly	16. 650 Monthly
17. Number of Defense Security/Cybersecurity Authorization Working Group (DSAWG) meetings conducted annually. Note: DISA conducts one DSAWG meeting monthly and processes eVotes as required for those decisions made outside the DSAWG meeting.	17. 12 Annually	17. 12 Annually	17. 12 Annually

Metric Description	2025 Actuals	2026 Plan	2027 Plan
18. Number of Cross Domain Technical Advisory Board (CDTAB) meetings conducted per month. Note: DISA processes up to 60 cross-domain actions per month, including eVotes.	18. 2 Monthly	18. 2 Monthly	18. 2 Monthly
19. Number of Ports Protocols Service Management (PPSM) Configuration Control Board/Technical Advisory Group (CCB/TAG) meetings conducted per month. Note: DISA processes up to 160 monthly PPSM actions as required by Combatant Commands / Services / Agencies / Field Activities (CC/S/A/FA) submissions.	19. 1 Monthly	19. 1 Monthly	19. 1 Monthly
20. Number of Connection Approval document reviews, Computer-Based Training (CBTs), and SME analyses provided. Target: Provide four document reviews, produce two CBTs, and provide four SME analyses per month to support Connection Approval Program requirements.	20. 10 Monthly	20. 10 Monthly	20. 10 Monthly
21. Percentage of registered Cloud Service Offerings that have DoW Provisional Authorizations (PAs) (Impact Level 4, 5, and 6) or Combatant Commands / Services / Agencies / Field Activities / ADD / Authorizations to Operate (CC/S/A/FA/ADD/ATOs) (Impact Level 2).	21. 100%	21. 100%	21. 100%
22. Percentage of registered Cloud Information Technology IT Project connection approval requests submitted by Combatant Commands / Services / Agencies / Field Activities (CC/S/A/FA) processed.	22. 100%	22. 100%	22. 100%
<u>Insider Threat User Activity Monitoring:</u>			
23. Number of DISA classified networks with User Activity Monitoring (UAM) implemented per month.	23. 2 Monthly	23. 2 Monthly	23. 2 Monthly
24. Percentage of comprehensive detection programs recommended by the Committee on National Security Systems Directive 504 Annex B implemented. Target: Implement six of the eleven programs listed in Annex B, Table 1 of Committee on National Security Systems Directive 504.	24. 100% (11 Monthly)	24. 100% (11 Monthly)	24. 100% (11 Monthly)
25. Number of Fourth Estate SIPRNet networks covered by the DISA UAM solution.	25. 13	25. 13	25. 13

Metric Description	2025 Actuals	2026 Plan	2027 Plan
Security Technical Implementation Guides:			
26. Number of Security Technical Implementation Guides updated.	26. 477	26. 260	26. 260
27. Number of Security Technical Implementation Guide trouble ticket responses completed.	27. 1,609	27. 804	27. 804
28. Number of vendor Security Technical Implementation Guides developed and published.	28. 29	28. 20	28. 20
29. Number of updates to existing Windows Security Technical Implementation Guides developed and published.	29. 2	29. 2	29. 2
30. Number of automated benchmarks typically delivered with quarterly release.	30. 58	30. 52	30. 52
31. Number of compliance and enforcement automated remediation tools used by DISA.	31. 5	31. 5	31. 5
Cyber Management:			
32. Percentage of compliance with Cybersecurity Workforce Professional and Certification requirements. A quarterly review is conducted to determine whether Information Assurance (IA) positions (civilian, military and contractor support personnel) have the appropriate DoW Baseline Certification to perform their assigned duties.	32. 100% Quarterly	32. 100% Quarterly	32. 100% Quarterly
33. Percentage of Cyber Hygiene Scorecard completion. DISA is reporting agency compliance per the required reporting cadence.	33. 100% Quarterly	33. 100% Quarterly	33. 100% Quarterly
34. Number of Privacy deliverables completed annually.	34. 12	34. 12	34. 12

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Active Military End Strength (E/S) (Total)	**106**	**93**	**93**	**-13**	**0**
Officer	63	57	57	-6	0
Enlisted	43	36	36	-7	0
Civilian End Strength (Total)	**392**	**367**	**375**	**-25**	**8**
U.S. Direct Hire	228	224	232	-4	8
Total Direct Hire	**228**	**224**	**232**	**-4**	**8**
Reimbursable Civilians	164	143	143	-21	0
Active Military Average Strength (A/S) (Total)	**106**	**93**	**93**	**-13**	**0**
Officer	63	57	57	-6	0
Enlisted	43	36	36	-7	0
Civilian FTEs (Total)	**348**	**364**	**372**	**16**	**8**
U.S. Direct Hire	214	222	230	8	8
Total Direct Hire	**214**	**222**	**230**	**8**	**8**
Reimbursable Civilians	134	142	142	8	0
Average Annual Civilian Salary ($ in thousands)	**201.4**	**206.8**	**206.4**	**5.4**	**-0.4**
Contractor FTEs (Total)	**847**	**970**	**960**	**123**	**-10**

Personnel Summary Explanations:

FY 2026 - FY 2027 is (+8) FTEs. As DISA completes workforce optimization, it determined that additional Cyber FTEs are important to mission success and rebalanced its FTE alignment between Cyber and Non-Cyber. Growing mission requirements in the areas of Perimeter Defense, Zero Trust, and ICAM necessitate additional FTEs in the Cyber domain. There is no net gain in overall DISA O&M FTEs.

FY 2025 - FY 2026 is (+8) FTEs. +7 FTE increase for ICAM personnel. A sufficiently resourced ICAM program is necessary to support the High Impact Zero Trust - Identity Credentialing Access Management (ICAM) Capability and build the FedHubs to enable the DoD to have Federated

ICAM protection. +1 FTE increase to conduct Cloud Provisional Authorizations. As DoD systems increasingly transfer to the cloud; workload has tripled since this program’s inception.

VI. OP 32 Line Items as Applicable (Dollars in thousands):

			Change from FY 2025 to FY 2026			Change from FY 2026 to FY 2027		
		FY 2025 Program	Price Growth	Program Growth	FY 2026 Program	Price Growth	Program Growth	FY 2027 Program

Several of the changes on the Defense Information Systems Agency's OP-32 from FY 2026 to FY 2027 represent reclassifications of existing costs rather than program growth. True non-pay program growth is concentrated on Line 922 Equipment Maintenance by Contract.

- The increase on Line 647 DISA Enterprise Computing Centers and Line 677 DISA Telecommunication Services - Reimbursable represents reclassifications from Line 922 Equipment Maintenance by Contract. These changes were made to properly classify Defense Information Systems Agency's purchases of its working capital fund services and bring classification in line with execution.

- The increase on Line 922 Equipment Maintenance by Contract is true program growth offset by the reclassifications to Line 647 DISA Enterprise Computing Centers and Line 677 DISA Telecommunication Services – Reimbursable.

Fiscal Year 2027 Budget Estimates

Defense Logistics Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in Thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DLA	402,728	9,689	2,656	415,073	7,645	162,892	585,610

I. Description of Operations Financed:
The following is a description of the Defense Logistics Agency's (DLA) Operation and Maintenance (O&M) activities:

Administration and Service-Wide Activities: Includes contracts, supplies, equipment maintenance, communications, personnel costs, travel, and training. The two sub- categories are Department of War (DoW) Programs and Headquarters (HQ) DLA Programs:

DoW Programs – These include program offices under the Office of the Secretary of War direction for which DLA provides budget administration support. Assigned personnel work exclusively on their respective programs. The activity group, described below, includes:

1. Business Process Reengineering Center (BPRC)
2. Logistics Support Activities (LSA)
3. Enterprise Logistics Management System (ELMS)
4. Defense Standardization Program Office (DSPO)
5. Defense Business Systems Support Office (DBSSO)
6. Logistics Transformation
7. Property & Equipment Policy (P&EP)
8. DoW Enterprise Business Systems (DEBS)
9. Pacific Disaster Center (PDC)

1. Business Process Reengineering (BPR) Center (BPRC): BPRC focuses on a management analysis discipline that redesigns processes, organizations, and the culture of DoW activities through functional leaders who apply improvement tools and techniques. The BPR technique of redesign can be radical or incremental to achieve dramatic improvements. BPRC achieves results by analyzing processes through a cross-functional, integrated analysis of multiple activities or functions. BPRC is chartered to support the Office of the Under Secretary of War for Acquisition & Sustainment (OUSW (A&S)), and includes services to carry out activities such as:
   - Strategic planning, outlining vision and goals;
   - Activity modeling of current and future processes, including cross-functional and integration analyses;
   - Data modeling (including data standardization) associated with activity modeling;
   - Benchmarking to identify and evaluate best practices and their application to DoW;
   - Development of functional economic analyses;

- Planning for BPR implementation and assessment;
- Analysis leading to the selection of migration systems following BPR; and,
- Development and identification of BPR tools.

2. Logistics Support Activities (LSA)/Classified Program: In accordance with DoD Directive 5111.1 and DoD Directive 5111.13, the Defense Continuity & Mission Assurance (DC&MA) was established to consolidate continuity-related policy and oversight activities within DoW in order to ensure the Secretary of War, the Deputy Secretary of War and their senior and supporting staffs, and the DoW Components in coordination with the Chairman of the Joint Chiefs of Staff can perform their mission essential functions under all circumstances.

   The DC&MA provides the DoW with policy, plans, oversight of crisis management and Continuity of Operations (COOP). The DC&MA's primary mission is to support the continued execution of the Department's mission essential functions across the full spectrum of threats. The threats range from major natural disasters to weapons of mass destruction in major metropolitan areas, as well as large-scale terrorist attacks. The DLA Chief of Staff in coordination with the Deputy Assistant Secretary of War (DASW) for the DC&MA oversees the implementation of Defense continuity policy and associated activities.

3. Enterprise Logistics Management System (ELMS): The ELMS currently supports 60 million assets worth $181 billion. The ELMS is used as the DoW Enterprise Solution for tracking government furnished equipment and accountable general equipment in accordance with the DoW Instruction (DoDI) 4140.73, DoDM 4500.36, DoDI 5000.64 and DoDI 5000.76 which provides accounting and accountability of DoW property and equipment for the Army, Air Force, Navy, Marine Corps, and 26 Defense Agencies. The ELMS provide compliance statistics on multiple business requirements such as the Item Unique Identification (IUID) registry usage, Non-Tactical Vehicle Fleet Management Information to include zero emission vehicle migration, inventory frequency and compliance with industry standards, capital asset reporting, and audit capabilities during all stages of the assets life cycle. The ELMS interfaces with other DoW enterprise business systems, such as the Procurement Integrated Enterprise Environment (PIEE) modules. The interface with the PIEE/Wide Area Workflow (WAWF) is used to create initial accountable records from Defense Logistics Management Standards (DLMS) transactions, and the ELMS also interfaces with the PIEE/Government Furnished Property (GFP) module. Additionally, the ELMS programmers have established an initial interface for financial reporting to War Data Platform (WDP), which is currently being expanded to report all asset level detail for asset visibility, readiness, and accountability/audit.

4. Defense Standardization Program Office (DSPO): The DSPO is made up of the Defense Standardization Program (DSP) and the Government Industry Data Exchange Program (GIDEP) functions.

   a) DSPO operates under the authority of 10 U.S.C. §§ 2451-2457 and DoDI 4120.24, which governs the Defense Standardization Program (DSP) within the Department of War. The DSPO's responsibilities include preparing and maintaining DoW policy and procedures for the DSP. This includes managing the development and use of military specifications and standards through its online database, ASSIST, overseeing the DoW's adoption of non-government standards, addressing Diminishing Manufacturing Sources and Material Shortages (DMSMS), administering the Government-Industry Data Exchange Program (GIDEP), and handling various related standardization issues. Furthermore, the DSPO represents the Department in interactions with other federal agencies, international partners, and the private sector, providing tools, training, and outreach with materiel standardization products and services. These efforts enhance and facilitate

understanding, communication, and coordination to enhance interoperability and logistics readiness and reduce total ownership costs. The DSPO also represents the United States on North Atlantic Treaty Organization (NATO) life cycle management and materiel standardization policy committees.

b) GIDEP is a part of DSPO. GIDEP executes a critical mission: facilitating the exchange of technical information between government agencies (including the DoW, Department of Energy (DoE), and National Aeronautics and Space Administration (NASA)) and industry partners. The information exchanged focuses on nonconforming parts (including counterfeits), obsolescence management, product changes, engineering, reliability/maintainability, and metrology. GIDEP members contribute this data to the central database through a web interface and custom reports, creating a collaboration designed to increase systems safety, reliability, and readiness while significantly reducing development, production, and ownership costs. GIDEP's role is officially mandated by both the Office of Management and Budget (OMB) and the Department of War. OMB Policy Letter 91-3 designates GIDEP as the U.S. government's central database for nonconforming products and materials, including suspected counterfeits. Concurrently, the DoW recognizes it as the centralized database for sharing crucial Diminishing Manufacturing Sources and Material Shortages (DMSMS) information. To date, GIDEP supports approximately 2,000 organizations, which have reported a remarkable $2 billion in savings and cost avoidance using this vital information exchange.

5. Defense Business Systems Support Office (DBSSO): The DBSSO program develops, implements, sustains, and optimizes mission-critical Department of War (DoW) Procure-to-Pay capabilities provided to the military Services and 4th Estate Agencies. These capabilities reside within the Procurement Integrated Enterprise Environment (PIEE) Common Operating Environment (COE), which currently includes 35 integrated procurement sub-systems. The COE leverages advanced automation technologies, enterprise data standards, and single sign-on (SSO) capabilities to deliver secure, efficient, and transparent procurement processes. By advancing critical acquisition tools, DBSSO ensures reliable, secure, and timely procurement operations that sustain global operational readiness. These efforts integrate AI-driven logistics, reduce vulnerabilities in legacy systems, and address inefficiencies, security gaps and interoperability challenges that can hinder Department of War's (DoW) mission success. Program Management is overseen by Defense Logistics Agency (DLA) with functional sponsorship provided by the Office of the Assistant Secretary of War-Acquisition (ASW-A) Defense Pricing, Contracting and Acquisition Policy (DPCAP).

6. Logistics Transformation: The program facilitates efforts to develop and implement effective supply chain management and logistics processes in the Department, from sources of supply to operational customers, and from early acquisition planning through sustainment and disposal.

7. Property & Equipment Policy (P&EP): P&EP office is the lead OUSW(A&S) office for equipment accountability, policy, and audit readiness. P&EP office mission areas include:
   - Working to improve equipment life-cycle visibility from initial acquisition through final disposition processing;
   - Examining Department policies and establishing improvement plans to obtain a higher degree of asset visibility;
   - Establishing requirements for Accountable Property Systems of Record (APSR);
   - Managing Federal fleet management requirements as implemented within the Department;
   - Setting Internal Use Software (IUS) accountability requirements; and
   - Leveraging Proper Financial Accounting Treatment for General Equipment (PFAT4GE) contract structuring with the use of Wide Area Workflow (WAWF) and the Item Unique

Identification (IUID) Registry to collect valuable equipment information.

In addition, P&EP is the responsible office for DoDI 5000.64, "Accountability and Management of DoW Equipment and Other Accountable Property," which sets accountability policy for equipment, special tools, special test equipment, or other accountable property, and DoDI 5000.76, "Accountability and Management of Internal Use Software," which provides accountability requirements for IUS as a subset of General PP&E.

8. DoW Enterprise Business Systems (DEBS): Department of War Enterprise Business Systems (DEBS) Infrastructure provides oversight and support across all DEBS programs while ensuring the modernization supports human performance goals across multiple business areas such as Business Capability Management via ServiceNow deployment. This gives business leaders the ability to reimagine processes and outcomes prior to IT selection and provides a robust application rationalization process that will standardize and quantify the business value and technical fit of IT assets. It will also provide an Enterprise Capability Management process that drives continuous improvement in delivering business enabling IT solutions through a holistic view of enterprise capabilities, ensuring alignment with evolving business needs. Currently, the three systems and DEBS Infrastructure are managed under the DEBS portfolio as follows:

   a) Defense Agencies Initiative (DAI): The Defense Agencies Initiative (DAI) is a financial management system of nine integrated business processes that provides real time, web-based access for over 120 thousand personnel records, auditors, and other DoW employees including over 80 thousand users who make sound business decisions in support of the Warfighter. The DAI Program Management Office (PMO) supports these business processes at 30 DoW organizations. The primary goal is to deploy a standardized system solution to improve overall financial management and comply with Business Enterprise Architecture (BEA), Standard Financial Information Structure (SFIS)/Standard Line of Accounting (SLOA), and Office of Federal Financial Management (OFFM) requirements.

      Common business functions within budget execution include: Budget to Report (B2R); Procure to Pay (P2P) with enhancements facilitating SFIS/SLOA and DoW procurement data standards and direct Treasury disbursing; Acquire to Retire (A2R) (real property lifecycle accounting only); Hire to Retire (H2R) (Time and Labor reporting and absence management only); Order to Cash (O2C); Proposal to Reward (P2R) (Grants financial management and accounting only); a phased implementation of Governance, Risk, and Compliance (GCR) capabilities supporting audit readiness; Defense Working Capital Fund accounting; and Re-Sale Accounting (for Defense Commissary Agency (DeCA).

      During FY 2026, DAI successfully transitioned their application from an on-premises DISA-hosted environment to a commercial cloud hosting environment. DAI completed this migration ahead of schedule in February 2026. This transition provides improved system performance and enables cost-effective scalability to respond to future customer growth. For FY 2026 and beyond, DAI will also continue to develop and deploy Departmental initiatives to include G-Invoicing and Identity Credential Access Management (ICAM).

   b) DoW Enterprise Business System (DEBS) Infrastructure: This consolidated support provides key skill sets that can be shared among the DEBS programs reducing overall unique program costs and using standard and repeatable processes to manage programs throughout all phases of the acquisition life cycle. DEBS provide operational guidance and support to the PEO and J62 staff to achieve objectives,

plans, priorities, and assignments for executing the PEO's mission and functions. It also promotes leading acquisition processes and innovative practices in the development, delivery, operation and sustainment of information technology capabilities across the spectrum of operations for the DLA and DoW Enterprises.

c) Joint Contingency Contract System (JCCS): The Joint Contingency Contracting System (JCCS) is the Department of War's (DoW) premier web-based platform for expeditionary and contingency contracting, providing essential capabilities to ensure mission success in conflict zones worldwide. JCCS enables host nation vendor registration in multiple languages (English, Arabic, and French), vendor vetting and past performance tracking, and facilitates electronic proposal submission and retrieval for centralized solicitation posting. As the primary source of vendor information for 21 countries in CENTCOM and 53 countries in AFRICOM, JCCS plays a pivotal role in host nation vendor management, offering combatant commands a single source of data for vendor management, invoicing, payments, mission spend analysis, strategic sourcing, and staffing requirements. Additionally, JCCS supports Warfighters in theaters of operation by enabling safe in-country travel, cash transaction management, and the ability to award and monitor expeditionary contracts.

The JCCS capabilities support integrated deterrence by enabling effective logistical responses across contested environments, enhancing data transparency, meeting audit and accountability goals, and providing essential visibility and operational control in austere conditions. By generating detailed contract and financial reports, JCCS enhances acquisition forecasting and operational oversight, ensuring commanders and their teams have the tools and data necessary to sustain mission success across the continuum of conflict.

As a web-based platform, JCCS delivers seamless integration with contingency business applications critical to expeditionary logistics and contracting operations. The 3in1 Next Generation system provides automated contract-writing for on-the-spot purchases, enhancing cash management visibility and reducing field risk. The ACSA-Global Acquisition Tracking Reporting Tool (AGATRS) serves as the worldwide database for Acquisition and Cross-Servicing Agreements (ACSAs), helping the Office of the Secretary of War and joint staff monitor logistics transactions. The Civilian Army Authorization Management System (CAAMS) automates contractor arming approval processes, while Theater Business Clearance (TBC) and Government Furnished Life Support Validation (GFLSV) Automation tools standardize workflows for contingency contracting, acquisition management, and personnel oversight, ensuring operational efficiency in challenging environments.

d) Standard Procurement System (SPS): The Standard Procurement System (SPS) is the Department of War's (DoW) enterprise contract writing solution, streamlining the end-to-end procurement process for over 500 contracting offices globally and supporting nearly 24,000 DoW procurement professionals across the Services and 19 Defense Agencies. SPS supports the Warfighter by providing a standardized, automated business system that ensures compliance with Federal Acquisition Regulation (FAR) and Defense Federal Acquisition Regulation (DFAR) contract rules while enhancing audit readiness through validated data and evidentiary standards. By delivering Procurement Data Standards (PDS) compliant contract data, SPS facilitates interoperability and transparency across the end-to-end Procure-to-Pay (P2P) lifecycle, meeting operational and audit control requirements.

The SPS Joint Program Management Office (JPMO) is executing the OSW-A directed strategic initiative to deploy the Enterprise Contract Writing Module (ECWM) as the modern, cloud-hosted replacement for Procurement Desktop-Defense (PD2). ECWM, hosted on AWS

GovCloud, will integrate seamlessly with the DoW's Procurement Integrated Enterprise Environment (PIEE) to enhance data interoperability, auditability, and operational readiness. The JPMO also provides help desk services, deployment support and integration assistance to its customers. While PD2 remains available to military services, for a fee during the migration, the SPS program is targeting a full migration for 4th Estate agencies and the PD2 sunset by FY 2026.

The Defense Logistics Agency (DLA) Program Executive Officer (PEO) serves as the SPS Milestone Decision Authority (MDA), while the functional proponent is Office of the Undersecretary of War-Acquisition (OSW-A) Defense Pricing, Contracting and Acquisition Policy (DPCAP).

9. Pacific Disaster Center (PDC): The PDC is an applied science and technology center and global leader in risk intelligence, hazard monitoring, disaster early warning, and advanced analytics. PDC and its DisasterAWARE hazard monitoring platform – including RAPIDS, a customized CUI version for the Department of War (DoW) – deliver several unique capabilities for global situational awareness and decision support to DoW, the State Department, other U.S. government (USG) agencies, and international partners. Harnessing the power of artificial intelligence, PDC provides customized updates that inform real-time response to natural and man-made hazards (e.g. extreme weather, civil disorder, biological threats, etc.) that could harm the American people or disrupt the American economy. Multiple components within the Office of the Secretary of War (OSW), the Joint Staff, Combatant Commands (CCMDs), Services, and other USG agencies rely on PDC capabilities to execute a broad range of mission assurance, humanitarian assistance and disaster response (HA/DR), and defense support of civil authorities objective, including advanced analytics for joint planning, risk intelligence, strategic competition, impact modeling, and strategic material/critical mineral analysis. PDC is a longstanding DoW Program of Record and a Congressional interest item initiated by the late Senator Daniel Inouye in 1992.

HQ DLA Programs includes programs associated with the DLA logistics mission as well as Departmental programs. DLA provides budget administrator support and is responsible for program oversight and policy guidance for these programs, described in the paragraphs that follow:

1. Audit Readiness
2. Contingency Logistics
3. Continuing Health
4. Data Loss Prevention (DLP)
5. Defense Critical Infrastructure Program (CIP)
6. Defense Finance and Accounting Service (DFAS)
7. Defense Information System Network (DISN)
8. Disability Compensation
9. Homeless Blankets
10. Law Enforcement Support Office (LESO)
11. Logistics and Manufacturing Technology
12. Managerial Support
13. Mapping
14. Military Global Positioning System (GPS) User Equipment (MGUE):

15. Morale, Welfare and Recreation (MWR)
16. Unemployment Compensation
17. Warstopper
18. Zero Trust

1. Audit Readiness: This funding supports the audit activities of the DLA General Fund appropriations. This includes: 1) Audit readiness support; 2) Business Process Controls (BPC) support to include Process Cycle Memorandum Review, BPC identification and testing, Corrective Action Plans (CAP), Request for Change (RFC) and CAP validation and documentation remediation; 3) Service provider support which will include updated Memorandum of Agreements, Memorandum of Understanding, or Service Level Agreements and Defense Information Systems Agency (DISA) support; and 4) Other systems and micro applications, CAPs, RFCs, CAP validation and update System Assertion Work Products.

2. Contingency Logistics: The Contingency Logistics program supports military unique (DoW-Mandated) tasks, such as readiness support, that a commercial distribution company would not experience. Contingency Logistics helps to keep the DLA's prices competitive with those of the private sector, which do not include overhead for DoW unique costs. For example, a commercial operation would either dispose of inventory demanded only in wartime (War Reserve Materiel) or charge the customer for the costs of retaining this inventory. By funding the cost of retaining this inventory outside customer prices, DLA can reduce the materiel surcharge (Cost Recovery Rate) to achieve more comparable pricing. The baseline the following programs: Department's hazardous and ozone depleting substances, Generalized Emulation of Microcircuits (GEM), Hazardous Materials Information Management System (HMIRS)/ Hazardous Materials Management System (HMMS), Shelf-Life and Demilitarization.

3. Continuing Health: The Continuing Health program provides coverage for DLA employees affected by reductions-in-force and Base Realignment and Closure (BRAC) actions.

4. Data Loss Prevention (DLP): The Data Loss Prevention program provides enterprise-wide stewardship for the warfighters' and government employees' Personal Identifiable Information (PII) to minimize the risk of loss, theft or being compromised within information systems operated by the DLA. This program complies with statutory and regulatory requirements which direct the implementation of a risk reduction strategy using DLP technologies, which will detect and protect unsecured PII on shared drives, e-mails, websites, and throughout the information lifecycle of records.

5. Defense Critical Infrastructure (DCI): Defense Critical Infrastructure (DCI) is a critical line of effort supporting Mission Assurance (MA) by identifying, assessing, and managing risk to capabilities and assets essential for executing Department of War (DoW) mission-essential functions (MEFs). In accordance with DoDD 3020.40 DoDI 3020.45, the MA Construct provides a synchronized, DoW-wide process to protect and ensure the resilience of these capabilities. This framework enables risk-informed decisions by identifying and prioritizing Task Critical Assets (TCAs) and Defense Critical Assets (DCAs), ensuring mission owners can execute strategic missions. This vital analysis informs senior leaders regarding physical and cyber assets whose compromise could impact mission success. Through the MA process, associated risks from all hazards are identified, mitigated, and remediated across all systems and networks. Information on DoW-wide logistics and other critical assets is shared with Combatant Commands, Services, and Agencies via the Mission Assurance Risk Management System (MARMS), the designated MA system of record, to facilitate integrated risk management. This process enables the prioritization of scarce Component resources for remediating

infrastructure vulnerabilities, mitigating incident impacts, and reconstituting capabilities essential to projecting and sustaining military forces in global operations.

6. Defense Finance and Accounting Service (DFAS): These funds reimburse DFAS for accounting services provided to the General Fund activities (DoW Programs and HQ DLA Programs).

7. Defense Information System Network (DISN): These funds reimburse DISA for the DISN services. DISA publishes their rates in advance. They were mandated to change those rates for FY 2026, so DLA's reimbursement was increased to make up for the un-announced change.

8. Disability Compensation: This program provides required funding for disability compensation claims for qualified personnel formerly employed at the DLA Clothing Factory (Troop Support) which closed in 1993.

9. Homeless Blankets: The Stewart B. McKinley Homeless Assistance Act of 1987 enables DLA to provide blankets to qualified US 501(C)3 organizations working with the homeless. Homeless shelters request blankets, which are issued on a first-come, first-served basis up to the amount of funding.

10. Law Enforcement Support Office (LESO): The Secretary of War is authorized in accordance with reference (a) to transfer to Federal and State Law Enforcement Agencies (LEAs), personal property that is excess to the needs of the DoW, including small arms and ammunition, that the Secretary determines is suitable to be used by such agencies in law enforcement activities, with preferences for counter-drug/counter-terrorism, disaster-related emergency preparedness or border security activities, under such terms prescribed by the Secretary. The SecWar delegated program management and oversight to the DLA in 1995. The DLA LESO administers the program in accordance with 10 USC § 2576a. LESO Program provides information and training on the process and procedures of the excess property program to Federal and State agencies annually in accordance with 10 USC § 280. Since inception, the LESO Program has transferred $7.5 billion in equipment to participating LEAs. Over 6,700 LEAs from 52 States and U.S. Territories participate in this highly visible program that enhances law enforcement capabilities while saving taxpayer dollars. LESO has consultation and coordination of authority with the OSW, Department of Justice (DoJ), and the Office of National Drug Control Policy (ONDCP) in an effort to aide in the National Military Strategy and the National Drug Control Strategy.

11. Logistics and Manufacturing Technology: Program funds DLA Headquarters Research, Development, Technology, and Evaluation (RDT&E) expenses for standard and repeatable program management oversight as required by the Financial Management Regulation (FMR) and transitional sustainment of successful R&D projects for operational use until sponsoring organization's funding (O&M or DWCF) is available, thereby avoiding the "valley of death" for R&D projects.

12. Managerial Support: Program funds Director's coins, interest, investigative support, Official Representation Funds, and expenses incurred against inactive programs.

13. Mapping: DLA serves as the DoW Integrated Materiel Manager and Distributor of approximately 220,669,000 map items. DLA provides a unified world-wide tailored distribution system for all geospatial products. Map products are no longer strictly hard copy but also include a wide variety of

classified and unclassified hydrographic, topographic, and aeronautical maps in digital form, as well as charts and various publications required to support the warfighter.

14. Military Global Positioning System (GPS) User Equipment (MGUE): MGUE (Increment I) are GPS cards capable of receiving a modernized GPS signal known as military code (M-code); they will be installed in all military equipment items and critical weapon systems/platforms requiring GPS capability. In 2019, the trusted foundry responsible for the production of the Application-Specific Integrated Circuits (ASICs), critical subcomponents integrated into MGUE, provided end-of-life notification to the Department of War. The DLA was tasked via Tri-Service memo to conduct the end-of-life procurement of three ASIC configurations, and to provide oversight for their storage and distribution. The execution will provide a stable supply of circuits to the Military Services or until the next incremental ASIC is fielded, originally anticipated to occur in CY2030. The O&M funding covers contractor support services for ASIC storage, and DLA costs to manage the project as the material is free issue to the Services.

15. Family and Morale, Welfare and Recreation (FMWR): The FMWR delivers mission-critical programs that strengthen readiness and resilience across the Department of War, the Whole of Government, and an extensive population of other of authorized patrons—including Warfighters, Warfighter Sustainers, families, civilians, retirees, and veterans. Our services support DLA personnel locally and worldwide, enhancing the mental, physical, and emotional well-being of more than 26,000 individuals who enable the Agency's global mission. Through family services, child and youth programs, recreation and sports, business operations, and community activities, FMWR provides essential quality-of-life capabilities that directly contribute to operational effectiveness. Funding aligns with program requirements and DoW standards to ensure consistent, high-impact support across all installations and around the world.

16. Unemployment Compensation: The DLA pays the Unemployment Compensation bill for all Defense Agencies.

17. Warstopper Program: The Warstopper Program implements industrial preparedness measures and preserves critical industrial capabilities to support the Department's readiness requirements and meets requirements of the Defense Production Act of 1950, Section 103 of Executive Order 13603, and the NDAA 1992-1993 Conference Report requirements directing DLA to maintain industrial readiness for critical "War stopper" items. These industrial readiness measures are applied to vulnerable industrial base items within the DLA supply chains such as chemical protective suits, nerve agent antidote auto-injectors, meals-ready-to eat, aging aircraft spares, specialty fuels, the nuclear enterprise, and some specialty steels. Peacetime demand for these items is inadequate to sustain an industrial base sufficient to meet mobilization requirements. DLA uses a rigorous business case evaluation to obtain a return on investment that maximizes warfighter benefits. The Warstopper Program is the single Agency program for the preservation of essential production capability. It provides the means to invest in improving industry responsiveness, typically without purchasing finished goods inventory. The Warstopper Program has led to cumulative DoW inventory, War Reserve Materiel, costs avoidance of nearly $7 billion through the investment of approximately $1 billion over the program's lifetime (1993).

18. Zero Trust: DLA is implementing a Zero Trust architecture prioritizing data security by assuming no user or device is inherently trusted. It implements strict identity verification, least privilege access, and continuous monitoring across all networks and resources. Adopting a Zero Trust architecture across the enterprise is a DoW mandate, driven by Executive Order 14028 and the National Defense Authorization Act (NDAA) of

2022, to modernize cybersecurity defenses. This proactive approach significantly reduces the attack surface and limits the impact of potential breaches, bolstering overall cybersecurity posture and protecting sensitive information.

The FY 2027 request for Defense Logistics Agency, O&M includes $585,610 thousand of discretionary and $143,000 thousand of mandatory for a total of $728,610 thousand.

The 2027 mandatory funds add necessary resources to reduce material readiness gaps as critical set by expanding the Warstopper program to increase industrial readiness and buy down manufacturing lead times. (U) The Warstopper Program implements industrial preparedness measures and preserves critical industrial capabilities to support the Department's readiness requirements and meets requirements of the Defense Production Act of 1950, Section 103 of Executive Order 13603, and the NDAA 1992-1993 Conference Report requirements directing DLA to maintain industrial readiness for critical "War stopper" items. The program seeks to obtain industrial capability for go-to-war material where industry does not have a business case to provide for DoW readiness levels. These industrial readiness measures are applied to vulnerable industrial base items within the DLA supply chains such as Fire-Resistant Combat Uniforms, Body Armor, Combat Helmets, nerve agent antidote auto-injectors, meals-ready-to eat, airfield damage repair (ADR), aging aircraft spares, specialty fuels, the nuclear enterprise, and specialty metals. Peacetime demand for these items is inadequate to sustain an industrial base sufficient to meet mobilization requirements or item characteristics are such that procuring end items is not feasible. The Program identifies industrial base vulnerabilities through in-depth risk analysis and implements risk response strategies to sustain a healthy and robust supplier base furthering Global Resiliency. A modified Lean Six Sigma approach is used to study, analyze, and recommend the rough order of magnitude to mitigate the identified risks.

The FY 2027 funds are different from the FY 2026 mandatory funds that the 2026 funds are for Cyber Security (20006) - Defense Agencies Initiative Modernization. Improved asset management and accounting standardization, Develop/deploy new Construction in Progress/Asset Management Accounting functionality, Enable USSGL 6.6 compliance to improve financial reporting accuracy and consistency.

The FY 2026 spend plan amount for Defense Logistics Agency, O&M includes $415,073 thousand of discretionary and $5,000 thousand of mandatory (reconciliation) for a total of $420,073 thousand.

The FY 2025 spend plan amount for Defense Logistics Agency, O&M includes $402,728 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $402,728 thousand.

NORMALIZED CURRENT ESTIMATE	**$415,073**	**$585,610**

FY 2026 President's Budget Request (Amended, if applicable) $401,513

1. Congressional Adjustments $13,560

    a) Distributed Adjustments $22,000

        1) Classified Adjustment $20,000

        2) Program Increase - Supply Chain Authentication and Security Analysis $2,000

    b) Undistributed Adjustments ..... $-5,648

        1) Historical Unobligated Balances ..... $-3,057

        2) Undistributed Projected Under execution of Civilian Compensation ..... $-2,591

    c) Adjustments to Meet Congressional Intent $0

    d) General Provisions ..... $-2,792

        1) General Provision - Section 8136 - Efficiencies Savings ..... $-2,792

FY 2026 Appropriated Amount $415,073

2. Supplemental Appropriations $0

    a) Supplemental Funding $0

3. Fact-of-Life Changes $0

    a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $415,073

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $415,073

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $415,073

6. Price Change $7,645

7. Functional Transfers $140,900

a) Transfers In $140,900

1) Permanent Change of Station (PPA) $140,900
Provides civilian FTE and associated resources for the Defense Logistics Agency to establish the Personnel Property Activity. Directs the Army, Navy, Marine Corps, Air Force and Space Force to allocate resources to DLA. Services will reassign their shipping office functions, personnel and other support elements to assist DLA.
(FY 2026 Baseline: $140,900 thousand; 926 FTEs)

b) Transfers Out $0

8. Program Increases $69,837

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 .....$69,837

1) Business Process Reengineering Center $550
The requested funds are needed to maintain normal program operations in FY 2027, including personnel, service delivery, and essential program activities.
(FY 2026 Baseline: $1,963 thousand; 9 FTEs)

2) Civilian Pay Awards $433
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long term capability for the Department.
$52 thousand - Business Process Reengineering Center
$57 thousand - Defense Agencies Initiative
$39 thousand – Defense Standardization Program Office
$10 thousand – Joint Contingency Contract System
$50 thousand – Law Enforcement Support Office
$178 thousand – Logistic Support Activities (LSA) G2-DXM-HQ
$31 thousand – Logistic Support Activities (LSA) G2-DXTE
$16 thousand – Standard Procurement System

3) Contingency Logistics $739
The increase in the program budget is primarily attributed to rising raw material costs necessary to sustain the Generalized Emulation of Microcircuits (GEM) program. This program supports a range of military-unique tasks that are critical to operational readiness, including command and control functions, hazardous material management, and other mission-essential activities. These tasks require specialized resources and materials. The budget adjustment ensures continued support for these high-priority functions and maintains

the programs ability to meet evolving readiness requirements without compromising safety, compliance, or mission effectiveness.
(FY 2026 Baseline: $35,904 thousand)

4) Defense Agencies Initiative $4,273
Increase provides funding for Defense Logistics Agency (DLA) to support USTRANSCOM's transition to Defense Agencies Initiative (DAI) and resource additional system sustainment activities necessary for the Department to achieve a clean audit opinion.
(FY 2026 Baseline: $94,673 thousand; 21 FTEs)

5) Law Enforcement Support Office $4,073
Provides funding to the DLA for the LESO program in support of execution and implementation of EO 14288, "Strengthening and Unleashing America's Law Enforcement to Pursue Criminals and Protect Innocent Citizens." Specifically, Section 4 directs the DoW to increase the provision of equipment to law enforcement. These funds will be used to migrate the LESO Accountability Property System of Record (APSR) from a USDA based system to a DoW server providing critical flexibility needed to adapt and quickly respond to future Executive Orders and other regulatory changes. Maintaining this system access will ensure accurate inventory, reducing compliance risks and directly benefiting law enforcement agencies, enhancing the agility and effectiveness of critical functionality for detailed tracking of accountable property to more than 6,000 Law Enforcement Agencies. This modernized platform will ensure accurate inventory, reduce compliance risks and directly support the intent of EO 14288.
(FY 2026 Baseline: $2,897 thousand; 23 FTEs)

6) Logistic Support Activities (LSA) - DXM-CP $1,649
This is a classified program, details available at higher level classification.
(FY 2026 Baseline: $54,356 thousand)

7) Logistic Support Activities (LSA) G2-DXM-HQ $725
This is a classified program, details available at higher level classification.
(FY 2026 Baseline: $13,482 thousand; 54 FTEs)

8) Logistic Support Activities (LSA) G2-DXTE $212
This is a classified program, details available at higher level classification.
(FY 2026 Baseline: $2,081 thousand; 9 FTEs)

9) MilMove $30,000
Increase supports modifications to the MilMove system that will allow it to interface with the Defense Personal Property Program (DP3) move management systems; and continued MilMove sustainment by the

Permanent Change of Station (PCS) Joint Task Force, until the implementation of a single system solution that allows service members to manage and track all required PCS shipments including non-temporary storage, Privately Owned Vehicle shipments, and unaccompanied baggage.

MilMove was developed as a government-owned system to provide a single entry point for Service members to manage personal property moves. MilMove was intended to allow Military members to interact with the HomeSafe Connect backend software as a single point for all customers registration, onboarding, shipment requests, Ordering, invoicing, and quality assurance oversight.
(FY 2026 Baseline: $30,000 thousand; 0 FTEs)

10) Permanent Change Station - PPA.....$26,600
Increase supports the establishment of the Personal Property Activity to provide global household goods and vehicle shipment, storage-in-transit, and non-temporary storage services to DoW personnel and their families. Directs the Army, Navy, Marine Corps, Air Force and Space Force to allocate resources to DLA. Services will reassign their shipping office functions, personnel and other support elements to assist DLA.
(FY 2026 Baseline: $26,600 thousand; 130 FTEs)

11) Unemployment Compensation $583
The DLA pays the unemployment compensation bill for all the Defense Agencies. Requirements have been trending upward and this trend is projected to continue.
(FY 2026 Baseline: $3,659 thousand)

9. Program Decreases .....$-47,845

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-47,845

1) Audit Readiness .....$-509
This decrease is due to a reduction in customer rates charged by Defense-Wide Working Capital Fund agencies for goods and services based on identified efficiencies and realigns resources to support higher DoW strategic priorities.
(FY 2026 Baseline: $3,334 thousand)

2) Blankets.....$-540

Decrease is driven by a temporary reduction in requests from authorized organizations that provide blankets to homeless individuals. Demand for this item is highly sensitive to adverse weather conditions. While unit costs and long-term needs continue to rise, blanket distribution is constrained by available funding, leading to a reduced requirement for this budget year.
(FY 2026 Baseline: $3,528 thousand; 0 FTEs)

3) Contingency Logistics .....$-2,229
Decrease reduces available resources for Demilitarization program courses and slows support for manual data calls and daily information required to move property within the Hazardous Materials Information Management System (HMIRS) and Hazardous Materials Management System (HMMS). The reduction to the Aviation and Distribution Ozone Depleting Substances (ODS) and Hydrofluorocarbon (HFC) Repository further limits the ability to dispose of excess ODS and decreases available warehouse capacity.
(FY 2026 Baseline: $35,904 thousand)

4) Data Loss Prevention .....$-109
Decreases funding for Data Loss Prevention (DLP) contractual services and software licensing. This reduction limits the ability to maintain required monitoring, reporting, and protection capabilities that safeguard sensitive data across the enterprise. Lower funding levels reduce contractor support hours and diminish the capacity to sustain system updates, threat detection, and compliance activities.
(FY 2026 Baseline: $2,021 thousand)

5) Defense Agencies Initiative .....$-18,628
Decrease due to a strategic shift in how contract services are utilized, leading to a review and reprioritization of planned activities. This adjustment ensures continued support for essential mission requirements.

Additional decreases due to completion of the DAI cloud migration in FY 2026 eliminates the need for DISA on-premises hosting in FY 2027.
(FY 2026 Baseline: $94,637 thousand; 21 FTEs)

6) Defense Critical Infrastructure Program .....$-148
Decrease limits the program’s ability to carry out the originally planned DCIP support activities. Funding was intended to sustain scheduled infrastructure assessments, risk analyses, and routine mission-assurance services. Unanticipated increases in service demand have outpaced available resources, resulting in deferred assessments and reduced capacity to meet planned mission-assurance requirements.
(FY 2026 Baseline: $1,037 thousand)

7) Defense Finance & Accounting Service .....$-499

Decrease reflects lower estimated workloads provided by DFAS, resulting in reduced contract support requirements. As workload volumes decline, fewer contractor labor hours are needed for financial processing, reconciliation, and reporting activities, which lowers overall contract costs for the period..
(FY 2026 Baseline: $3,131 thousand)

8) Defense Information System Network.....$-408
Decrease of funding creates a realignment of contract service activities. DLA is responsible for paying Defense-wide DISN bills. The adjustment results in a realignment of contract support activities to ensure resources remain available for this must-pay requirement.
(FY 2026 Baseline: $5,736 thousand)

9) Defense Standardization Program Office (DSPO).....$-807
The decrease reflects a strategic shift in how contract services are utilized, resulting in a review and reprioritization of planned activities to ensure continued support for essential mission requirements. With the transfer of the ASSIST program into DSPO, responsibilities and workload increased while associated contract support requirements were realigned. This transition reduces the level of DSPO's previously planned contract service efforts and shifts certain costs to the Military Services as DSPO assumes new program functions. As a result, some planned activities must be scaled back or deferred to accommodate the updated organizational structure and mission priorities.
(FY 2026 Baseline: $8,847 thousand; 11 FTEs)

10) DoW Enterprise Business Systems Infrastructure .....$-1,264
Decrease reflects efficiencies gained through the adoption of innovative practices in the development, delivery, operation, and sustainment of information technology capabilities. These improvements reduce the level of funding required to perform planned IT support activities.
(FY 2026 Baseline: $8,339 thousand)

11) Enterprise Logistics Management System.....$-2,463
The funding decrease reduces the level of development support available to assist the Services with implementing the Enterprise Logistics Management System as their accountable property system of record. As a result, critical software enhancements necessary to meet audit requirements for the Defense Services and Agencies will be delayed. The reduction further limits the program's capacity to address emerging operational needs and to integrate new customer groups identified through ongoing Financial Audit activities.
(FY 2026 Baseline: $17,869 thousand)

12) Family and Morale, Welfare & Recreation.....$-3,081

Decrease reflecting in part due to discretionary travel and funding Child Care workforce initiative to implement redesigned child care provider compensation, reduce staff to child ratios, and add special needs coordinators from FY 2026 to FY 2027.
(FY 2026 Baseline: $27,929 thousand)

13) Federal Employees Retirement System (FERS).....$-184
The reduction reflects updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department's required contributions for FERS regular, Revised Annuity Employees (RAE) and Further Revised Annuity Employees (FRAE). The decrease aligns funding with current long term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government wide retirement funding requirements.
-$27 thousand - Business Process Reengineering Center
-$39 thousand - Defense Agencies Initiative
-$15 thousand – Defense Standardization Program Office
-$6 thousand – Joint Contingency Contract System
-$86 thousand – Logistic Support Activities (LSA) G2-DXM-HQ
-$11 thousand – Standard Procurement System

14) Joint Contingency Contract System .....$-71
Decrease reduces the support of Joint Contingency Contract System to configuration management, sustainment, training, and functional support for in-theater vendor data.
(FY 2026 Baseline: $1,725 thousand; 3 FTEs)

15) Logistic Support Activities (LSA) - DXM-CP.....$-2,837
Decrease associated with operational realignment. This is a classified program, further details available at higher level classification.
(FY 2026 Baseline: $54,356 thousand)

16) Logistics & Manufacturing Technology .....$-2,788
The reduction in the Logistics and Manufacturing Technology program led to the reallocation of Additive Manufacturing R&D funds. These funds were redirected to enhance and sustain the operational requirements of the Joint Additive Manufacturing Model Exchange (JAMMEX). Additionally, resources were reprogrammed to Logistics and Manufacturing Technology R&D to ensure adequate funding for contract management activities at the DLA Contract Support Office in Philadelphia, supporting Program Management Office contracts.
(FY 2026 Baseline: $7,773 thousand)

17) Mapping.....$-1,122
This decrease in funding is due to DLA Map Catalog program reduced travel, software licenses, and further development of new tools/services to customers. Mapping program provides geospatial intelligence to the warfighter which makes this nation stronger. This reduction slows down modernization efforts to make map ordering easier for customers.
(FY 2026 Baseline: $26,265 thousand)

18) Military Global Positioning System (GPS) User Equipment (MGUE).....$-457
Decreases the level of support available to manage MGUE ASICs. While the ASICs themselves are provided as free-issue material, resources are still required to support their receipt, storage, accountability, and issuance to the Services. Reduced funding constrains these core logistics functions and limits timely distribution.
(FY 2026 Baseline: $4,694 thousand)

19) Pacific Disaster Center .....$-682
Decrease to Pacific Disaster Center is driven by changes in contract service needs. This creates a delay to maintain operational viability to supports RAPIDS platform. Although PDC continues to deliver a global, mission-critical capability, the reduced level of resource delays planned system software upgrades, technology refresh actions, high-availability improvements, and required cybersecurity maintenance.
(FY 2026 Baseline: $5,029 thousand)

20) Standard Procurement System .....$-5,857
The decrease from FY 2026 to FY 2027 within the SPS program is attributable to cost savings realized through the modernization of the 4th Estate contract writing system. This modernization effort involves replacing the outdated Procurement Desktop – Defense (PD2) application with the cloud-based Enterprise Contract Writing Module (ECWM), eliminating the need for any further funding to support PD2 after FY 2026. The PD2 application will be sunset at the end of FY 2026, and the remaining forecast incorporates the anticipated sustainment costs for the ECWM application.
(FY 2026 Baseline: $13,999 thousand; 5 FTEs)

21) Sustainment Transformation .....$-923
Decrease driven by changes in planned contract service needs, leading to a reprioritization of activities. This adjustment ensures continued support for essential mission requirements. Decrease limits the level of support originally planned to provide comprehensive governance across the full supply chain. As a result, activities intended to strengthen transparency, resilience, and cost-effective sustainment cannot be executed at the previously planned scope. This adjustment reduces the capacity to fully optimize materiel availability and support timely delivery of critical capabilities to the warfighter.

(FY 2026 Baseline: $7,532 thousand)

22) Warstopper.....$-1,543
Decrease reflecting updated organizational priorities, which required revisiting and modifying planned contract service activities. The funding decrease limits the resources available to support planned energy fuels activities across the enterprise. This adjustment ensures continued support for essential mission requirements.
(FY 2026 Baseline: $48,359 thousand)

23) Zero Trust .....$-696
Decrease resulting from adjustments in the scope of contract services, prompting a reassessment of planned activities. This limits the ability to complete the full set of planned Zero Trust program requirements. Prior plans called for realigning resources to support implementation activities, strengthen security controls, and ensure long-term program sustainability. With fewer resources available, several scheduled enhancements and system adjustments must be reprioritized or delayed, reducing the scope of planned efforts while maintaining essential Zero Trust functions. This adjustment ensures continued support for essential mission requirements.
(FY 2026 Baseline: $4,915 thousand)

FY 2027 Budget Request $585,610

IV. Performance Criteria and Evaluation Summary:

All DoW Programs and HQ DLA Programs have performance evaluations primarily based on funding execution. Monthly Obligation Plans (MOP) are developed and actual execution is reported each month. Programs that are three percent off plan must provide an explanation to senior management and a corrective action plan with a projected completion date. The following programs have additional metrics for performance evaluations:

Business Process Reengineering Center (BPRC): BPRC proposes redesign of processes, organizations, and culture to streamline functions and reduce inefficiencies across the Department. Metrics include execution of the planned redesign and streaming functions to reduce inefficiencies in OUSW (A&S).

Enterprise Logistics Management System (ELMS) (Formerly DPAS): The ELMS currently supports 60 million assets worth $181 billion. The ELMS is used as the DoW Enterprise Solution for tracking government furnished equipment and accountable general equipment in accordance with the DoDI 4140.73, DoDM 4500.36, DoDI 5000.64 and DoDI 5000.76 which provides accounting and accountability of DoW property and equipment for the Army, Air Force, Navy, Marine Corps, and 26 Defense Agencies. The ELMS provide compliance statistics on multiple business requirements such as the Item Unique Identification (IUID) registry usage, Non-Tactical Vehicle Fleet Management Information to include zero emission vehicle migration, inventory frequency and compliance with industry standards, capital asset reporting, and audit capabilities during all stages of the assets life cycle. The ELMS interfaces with other DoW enterprise business systems, such as the Procurement Integrated Enterprise Environment (PIEE) modules. The interface with the PIEE/Wide Area Workflow (WAWF) is used to create initial accountable records from Defense Logistics Management Standards (DLMS) transactions, and the ELMS also interfaces with the PIEE/Government Furnished Property (GFP) module. Additionally, the ELMS programmers have established an initial interface for financial reporting to War Data Platform (WDP), which is currently being expanded to report all asset level detail for asset visibility, readiness, and accountability/audit.

Defense Standardization Program (DSP) Office (DSPO): DSPO develops policies, procedures, and guidance ensuring standardized policy across the Military Departments and Defense Agencies. The qualitative performance indicators for the DSPO are:

- Effectiveness of the DSP as a single source for information exchange and coordination of all defense standardization efforts, measured by increased number of organizations participating in information exchange, and increased customer satisfaction based on survey results; and
- Success in institutionalized development and use of performance and Non-Government Standards (NGSs) in the DoW, measured by increased usage of performance and NGSs, and decreased usage of military-unique specifications and standards.

Sustainment Transformation: Sustainment Transformation performance is measured by the Department's sustainment readiness to improve the Department's ability to prepare and oversee execution of a rigorous "To-Be" Capability Roadmap, in coordination with the Joint Staff, Military Departments, Combatant Commands, and Defense Agencies. The ability to monitor and enhance the Department's logistics performance and resource application, through continuous process improvement for the end-to-end value chain, will provide a cost-effective logistics and materiel readiness program. These metrics will provide the basis to issue, validate, and revise policy.

DoW Enterprise Business Systems (DEBS): Monthly program reviews are held with the DEBS programs' functional sponsors and the Program Executive Officer (PEO), along with semi-annual PEO Business Systems Reviews (BSR), under the assigned Acquisition Portfolio, to provide updates on the delivery of business capabilities for the respective programs within the agreed upon cost, schedule and performance parameters. Metrics include meeting Key Performance Parameters (KPP) for development programs; executing less than 10 percent rework on delivered capability releases, remaining within the established system availability goals and the DLA Information Operations standard ticket resolution rates. These forums also provide an opportunity to communicate extenuating circumstances that affect cost, schedule or performance to the PEO, and to leverage the applicable instructions and regulations, such as DoDI 5010.43 (Continuous Process Improvement Program) and the Defense Federal Acquisition Regulation Supplement (DFARS) and Procedures, Guidance, and Information (PGI) 216.104 in the execution of Continuous Process Improvements; the Better Buying Power (BBP) initiatives, and DoDI 5000.75 Business Systems Requirements and Acquisition.

Law Enforcement Support Office (LESO): This high visibility program retains focus on inventory control and accountability through Annual Physical Inventory, conducting biennial Federal Program Compliance Reviews (PCR) on participating states; identifying and implementing enhancements to the Accountable Property System of Record (APSR) Federal Excess Property Management Information System (FEPMIS), and requiring participating states to conduct annual PCRs on participating LEAs. On average, the LESO program conducts 26 Federal PCRs each year; during the Law Enforcement Agencies (LEAs) compliance visits 100 percent of all high visibility property (small arms, aircraft, tactical vehicles) are inventoried, and a minimum of 15 percent of general property is inventoried (tools, night vision, gym equipment, etc.).

Family and Morale, Welfare & Recreation (FMWR): The FMWR performance metrics track readiness support as it relates to family support programs (e.g., relocation assistance, deployer support, etc.), child development programs and recreational activities to include physical fitness centers. Non-Appropriated Fund (NAF) accountability and reinvestment; and customer service provided in the areas of recreation activities such as lodging, pools, dining facilities and information, ticketing and reservations are monitored through the FMWR One Fund Governance process which includes an agency wide Investment Review Board. Monthly program reviews using Specific, Measurable, Achievable, Relevant and Time-Bound (SMART) metrics are conducted which monitor operations to ensure Key Performance Indicators (KPI) are on target with annual projections and in line with regulation. Administrative standards are set to ensure the fiduciary responsibility of NAF resources and prevention of loss or theft through Business Program Controls (BPC). FMWR conducts monthly reviews of financial statements and performs annual internal controls inspections as part of the Manager's Internal Controls Program (MICP). The FMWR One Fund as the DLA Non-appropriated Fund Instrumentality (NAFI) governing body is subjected annually to an external audit conducted by an independent entity in cooperation with Army IMCOM G-9, in accordance with Generally Accepted Accounting Principles (GAAP). These standards are set forth by the Government Auditing Standards issued by the US Comptroller General.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

Contractor FTEs (Total)	**374**	**342**	**320**	**-32**	**-22**

Personnel Summary Explanations:
Changes in FY 2026 to FY 2027 Increase of 1,056 Direct FTE and 3 Reimbursable.

Transfer of 1,056 Direct FTEs into DLA as part of the Permanent Change of Station for the Joint Task Force Personal Property Activity. This action realigned civilian FTEs and associated resources from the Army, Navy, and Air Force to DLA.
Additional Reimbursable (3) FTEs were transferred to O&M DLA in support of Defense Standardization Program Office from DWWCF Distribution Services, DLA as part of the ASSIST transfer.

Fiscal Year 2027 Budget Estimates

Defense Legal Services Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DLSA	190,176	3,940	-39,181	154,935	1,994	-9,309	147,620

I. Description of Operations Financed:
The Defense Legal Services Agency (DLSA) provides legal advice, services, and support to the Defense Agencies, the Department of War (DoW) Field Activities, and, as assigned, other organizational entities within the DoW.

DLSA supports litigation involving the Department and other inquiries and requests involving a high volume of documents requiring review. Among other legal services, the DLSA administers the DoW Standards of Conduct Program; supports and assists the Assistant Secretary of War for Legislative Affairs in developing the DoW Legislative Program, to include drafting legislation and comments; negotiating on behalf of the DoW clients with private entities and other Government agencies; ensuring proper use of Government funds and property; providing opinions and counseling on legal compliance issues; and participating in contractual matters.

The Defense Office of Hearings and Appeals (DOHA) is the largest component of the DLSA, and is responsible for:

- Adjudicating personnel security clearance cases for contractor personnel performing classified work for DOHA-serviced DoW Components and 30 other Federal Agencies and Departments;
- Conducting personal appearance hearings, and issuing decisions in security clearance and sensitive national security position cases for DOHA-serviced DoW civilian and military personnel;
- Providing legal reviews, approving statements of reasons, conducting hearings, and issuing decisions in cases under DOHA jurisdiction requiring trustworthiness decisions for contractor performance of sensitive duties; and,
- Implementing the administrative due-process requirements of Executive Order 10865 (Safeguarding Classified Information Within Industry) on behalf of the DoW, which serves as the executive agent for the entire Federal Government's implementation of the National Industrial Security Program.

The Office of Military Commissions (OMC), established by the Secretary of War on March 21, 2002, under the DLSA, handles the trials of enemy combatants pursuant to the Military Commissions Act of 2009. There are currently 12 detainees with active charges pending before military commissions, most notably 5 defendants allegedly involved with the September 11th attacks as well as an alleged United States Ship (USS) Cole bomber. Notably, the trial for the alleged USS Cole Bomber is firmly scheduled to begin on June 1, 2026, and is anticipated to run until some time in December 2026. Funding for this trial was previously removed from the DLSA budget due to under execution resulting from significant trial delays. The current request fortifies DLSA's ability to complete this trial in FY 2027, and continue continue concurrent hearings and other efforts associated with the other detainees' cases.

The DLSA FY 2027 President's Budget request includes funding for civilian pay and allowances, contract support, interagency reimbursable agreements (e.g., U.S. Marshals Service), reimbursable costs for the DoW components providing support to detainee efforts (e.g., document declassification and information security), rent, temporary duty travel costs, supplies, furniture, training, information technology support, telecommunications, and security. In support of DLSA's mandate, and in accordance with broader Department-level digital transformation initiatives, DLSA requests increases to assist in utilizing superior legal software such as eDiscovery, which assists with consistent document management and analyses related to voluminous discovery in litigation, the Freedom of Information Act, and other investigative proceedings, and enables the reduced costs in other sections of DLSA's FY 2027 budget. Additionally, as previously stated, this request includes realignments that fortify DLSA's ability to complete the trial of the alleged USS Cole Bomber, as well as undertake digital transformation initiatives which will greatly impact the efficiency of the DLSA enterprise.

FY 2026 Normalized Current Estimate $154,935

6. Price Change $1,994

7. Functional Transfers ..... $-855

a) Transfers In $0

b) Transfers Out ..... $-855

1) USSOUTHCOM Manpower Transfer ..... $-855
Transfers 5 FTEs from Operation and Maintenance, Defense wide to the Operation and Maintenance, Army appropriation to appropriately align manpower to the U.S. Southern Command.
(FY 2026 Baseline: $70,315 thousand; 291 FTEs; -5 FTEs)

8. Program Increases $4,049

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $4,049

1) Compensation and Benefit - Awards $803
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

(FY 2026 Baseline: $1,279 thousand)

2) Compensation and Benefits - Civilian Average Annual Compensation $688
Each year, civilian compensation rates are developed based on detailed execution and cost factor analyses. These rates are created and implemented with the paramount purpose of accurately forecasting cost estimates for the civilian workforce. The average annual rate (AAR) change is the product of rate changes combined with fluctuations in the composition of civilian pay types.
(FY 2026 Baseline: $70,315 thousand)

3) Mission Support - Increased Miscellaneous Requirements $17
Increase reflects increased requirements for commercial transport (common carrier freight), legal practice insurance costs, dividend payments, postal services, and rental payments to the General Services Administration.
(FY 2026 Baseline: $335 thousand)

4) Mission Support - Information Technology Contract Support, Equipment, and Utilities $470
The funding increase is due to the expanding use of the eDiscovery software in FY 2027 (originally acquired in FY 2026) to assist with consistent document management and analyses related to voluminous discovery in litigation, the Freedom of Information Act, and other investigative proceedings. eDiscovery software streamlines legal investigations by automating the identification, collection, and review of electronic data, significantly reducing costs and increasing accuracy. Key benefits include faster document analysis via artificial intelligence, enhanced security through secure storage, improved collaboration, and better management of large, complex, digital datasets.

The funding increase also provides support for information technology contract support, equipment, and increased utilities costs associated with utilizing eDiscovery in lieu of traditional contract services, travel of

persons, office supplies, and other services associated with these functions in the past.
(FY 2026 Baseline: $7,373 thousand)

5) Realignment - Military Justice Review Panel.....$2,071
The funding increase is due to the realignment from the Office of Military Commissions to establish a budgetary baseline for the Military Justice Review Panel.
(FY 2026 Baseline: $78,020 thousand)

9. Program Decreases .....$-12,503

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-12,503

1) Efficiency - Contract Services .....$-8,782
The reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $46,779 thousand; 0 FTEs; +0 FTEs)

2) Efficiency - Supplies and Materials .....$-247
Reduces funding for supplies and materials to align with historical execution levels and ensure alignment with the priorities of the Secretary of War to improve the efficiency and effectiveness of our mission and business operations.
(FY 2026 Baseline: $1,422 thousand)

3) Efficiency - Travel Budget .....$-349
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
(FY 2026 Baseline: $1,320 thousand)

4) Federal Retirement System - Agency Contribution Rates.....$-291
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions,

workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $8,600 thousand)

5) Mission Support - Operational Requirements .....$-763
Decrease reflects reduced requirements for purchased communications, rents, facilities sustainment, restoration, and modification, and other services across DLSA operations, resulting from digital modernization initiatives.
(FY 2026 Baseline: $23,997 thousand; 0 FTEs; +0 FTEs)

6) Realignment - Military Justice Review Panel .....$-2,071
Realignment of funds, transferring funding from OMC to establish a budgetary baseline for the Military Justice Review Panel in FY 2027 and beyond.
(FY 2026 Baseline: $5,136 thousand)

FY 2027 Budget Request $147,620

IV. Performance Criteria and Evaluation Summary:

The DLSA is evaluated based on the quality of its many services; adherence to appropriate standards of professional conduct and the DoW ethical and adjudicative standards; the professional independence, impartiality and competence exhibited by DLSA attorneys, and the overall responsiveness to the needs of clients.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

Fiscal Year 2027 Budget Estimates

Department of War Information Activity

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DWIA	240,978	4,799	-27,876	217,901	3,024	-13,374	207,551

FY 2025 includes $3,500 thousand in Overseas Operations Costs (OOC) Actuals. FY 2026 includes $3,500 thousand in OOC Enacted. FY 2027 includes $3,500 thousand for the OOC Estimate. Overseas Operations Costs (OOC) are those financed with former Overseas Contingency Operations (OCO) funding.

I. Description of Operations Financed:

The Department of War Information (DWIA, formerly Defense Media Activity (DMA)) is a Department of War (DoW) mass media organization that creates and distributes DoW content across a variety of media platforms to audiences around the world and provides joint-service training for the public affairs and visual information career fields. As listed in DoW Directive 5105.74, DWIA:

A. Provides consolidated public-facing website hosting service within a central program to leverage enterprise-level purchasing power,

B. Provides DoW Public Affairs and Visual Information common core training and education,

C. Provides and operates a digital asset management system to afford DoW and American public access to publicly released imagery depicting current U.S. military activities and operations,

D. Provides central receipt, retrieval, and storage of DoW publicly released Visual Information per the National Archives and Records Administration records schedule,

E. Produces DoW-wide and Component-unique audio-visual productions supporting objectives of DoW leadership to support and improve quality of life and morale, promote situational awareness, provide force protection information, and sustain readiness,

F. Provides U.S. radio and television programming and integrated command information to authorized audiences serving outside of the U.S., its territories, or possessions, and

G. Administers the Stars and Stripes news service, which respects the editorial independence in accordance with the First Amendment of the U.S. Constitution.

The FY 2027 request for Department of War Information Activity (DWIA, formerly Defense Media Activity) includes $207,551 thousand of discretionary and $37,115 thousand of mandatory (reconciliation) for a total of $244,666 thousand.

The mandatory funds provide an increase in facilities sustainment, restoration, and modernization which addresses the deteriorating state of DWIA facilities by providing an enhanced level of sustainment for facilities as well as specifically targeting the restoration and modernization of facilities to provide serviceable, quality housing to all servicemembers and DWIA workforce. This is restoring Warrior Ethos by investing in readiness of our facilities and improving the quality of life of our servicemembers, students, and support staff.

II. Force Structure Summary:

7. Functional Transfers.....$0

a) Transfers In.....$0

b) Transfers Out.....$0

8. Program Increases.....$14,472

a) Annualization of New FY 2026 Program.....$0

b) One-Time FY 2027 Increases.....$0

c) Program Growth in FY 2027 ..... $14,472

1) American Forces Network Now Video Services $2,950
The funding increase is due to the directed acceleration of the Armed Forces Network Broadcast Center functions migration to Fort Meade and the closure of the Riverside facility. This increase will provide the first full year of operational sustainment for Armed Forces Network's cloud-based television playout and associated digital distribution infrastructure. Armed Forces Network is modernizing its television broadcast architecture by transitioning from a legacy, facility-based broadcast center in Riverside, CA to a software defined, cloud-based playout and distribution environment to be operated from Fort Meade, MD. This modernization replaces aging broadcast hardware and facility infrastructure with a scalable and resilient cloud architecture that improves long term operational efficiency and reliability for global Armed Forces Network television services.

(FY 2026 Baseline: $57,147 thousand)

2) Fourth Estate Network Optimization $7,822
The funding increase is due to the DWIA Fourth Estate Network Optimization program evolving from the migration planning and design phase to the execution phase. During this phase, DISA-managed seat rates provide for 1,500 NIPR standard users, 60 SIPR standard users, and 34 premium very important person users. The increase provides additional resources to DISA to continue implementing the Fourth Estate Network Optimization effort and to provide common-use information technology services and capabilities including Tier II Support. By migrating DWIA to a common information technology infrastructure, the Department of War Network advances the administration's goal of an efficient, enterprise-wide delivery of a standardized information technology environment, while strengthening cybersecurity and improving performance.

(FY 2026 Baseline: $36,876 thousand)

3) National Design Studio $3,700
The funding increase supports the establishment of the National Design Studio as directed by Executive Order 14338, "Improving Our Nation Through Better Design", providing centralized human-centered design capability and to standardize and modernize public-facing digital services (+9 contractor FTEs). This investment enables enterprise design consistency, reduces duplicative development costs, and accelerates compliance with federal digital service mandates, including the 21st Century Integrated Digital Experience Act. Without this funding, the Department will continue to operate in a fragmented design environment, increasing long-term costs, delaying modernization timelines, and limiting its ability to meet Executive Order-directed outcomes and deliver accessible, high-quality digital services to the American public.

(FY 2026 Baseline: $16,888 thousand; 35 Contractor FTEs)

9. Program Decreases ..... $-27,846

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-27,846

1) American Forces Network Audio/Video Services ..... $-2,631
The funding decrease is due to the elimination of audio/video information technology contract support services in support of the Armed Forces Network program resulting from the transfer of functions from the DMA Broadcast Center at March Air Reserve Base to DWIA Headquarters. (-18 Contractor FTEs)

(FY 2026 Baseline: $57,147 thousand; 73 Contractor FTEs)

2) Efficiency – Contract Services ..... $-24,706
The reduction in funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.

(FY 2026 Baseline: $107,752 thousand; 361 Contractor FTEs)

3) Efficiency - Travel Budget ..... $-334
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.

(FY 2026 Baseline: $1,642 thousand)

4) Efficiency – Workforce Optimization ..... $-175
The funding decrease reduces the civilian personnel full-time equivalents (-1 FTE) and funding to optimize the workforce in compliance with Executive Order 14210, "Implementing the President's Department of

Government Efficiency Workforce Optimization Initiative." This also accounts for the reduction in funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities. This is offset by an increase in funding for awards which strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

(FY 2026 Baseline: $80,860 thousand; 465 FTEs)

FY 2027 Budget Request $207,551

IV. Performance Criteria and Evaluation Summary:

The Department of War Information Activity (DWIA) supports the DoW priorities through four DWIA Strategic Priorities:

- Support the Warfighter
- Expand DoW's capability to engage in the Information Environment
- Modernize and expand our digital and emerging technology capabilities
- Strengthen Partnerships and Collaboration

In Fiscal Year 2027, DWIA plans to execute several initiatives within our operations that focus on these priorities. These initiatives seek to improve our mission functions while supporting the Department's priorities in the National Defense Strategy.

- Transform information activities that directly support the Secretary of War and senior leaders' communication with the American public
- Refocus and streamline the DoW Public Web program to meet the requirements of Executive Order 14338, "Improving Our Nation Through Better Design" and 21st Century Integrated Digital Experience Act (IDEA) (Public Law 115-336)
- Establish the Visual Information Operations Center to support warfighter requirements for more expeditious visual information planning
- Modernize the American Forces Network to be a more expeditionary information force supporting commanders' information needs
- Improve space management by vacating an underutilized facility and consolidating functions to Fort Meade, Maryland to improve operations and force protection
- Begin migration of all administrative information technology to the Department of War Network (DOWNET)
- Integrate Artificial Intelligence (AI) into DWIA operations to support acceleration as outlined in the DoW AI Strategy.

We will evaluate these against standard project performance metrics that include scope, schedule, cost, and resource utilization as well as other technical metrics as required.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

Enlisted	675	800	800	125	0
Civilian FTEs (Total)	**526**	**528**	**527**	**2**	**-1**
U.S. Direct Hire	472	465	464	-7	-1
Total Direct Hire	**472**	**465**	**464**	**-7**	**-1**
Foreign National Indirect Hire	54	63	63	9	0
Average Annual Civilian Salary ($ in thousands)	**162.4**	**157.0**	**157.5**	**-5.4**	**0.5**
Contractor FTEs (Total)	**383**	**367**	**252**	**-16**	**-115**

Personnel Summary Explanations:

Explanation of changes in Active Military End Strength (E/S): There were no changes from FY 2026 to FY 2027.

Explanation of changes in Civilian End Strength: The decrease from FY 2026 to FY 2027 (-1) is due to reduction of civilian personnel full-time equivalents and funding to optimize the workforce in compliance with Executive Order 14210, “Implementing the President’s Department of Government Efficiency Workforce Optimization Initiative."

Explanation of changes in Active Military Average Strength (A/S): There were no changes from FY 2026 to FY 2027.

Explanation of changes in Civilian FTEs: The decrease from FY 2026 to FY 2027 (-1) is due to the reduction of civilian personnel full-time equivalents and funding to optimize the workforce in compliance with Executive Order 14210, “Implementing the President’s Department of Government Efficiency Workforce Optimization Initiative."

Explanation of changes in Contractor FTEs: The decrease from 2026 to 2027 (-115) is due to a reduction in funding for contract services is undertaken in direct support of the President’s executive order, which prioritizes cost efficiency, transparency, and the consolidation of services (-124). This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness. This was offset by an increase in contractors supporting the National Design Studio (+9).

Fiscal Year 2027 Budget Estimates

DoW Dependents Education

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DoWDE	3,547,352	69,161	-11,562	3,604,951	48,484	-160,203	3,493,232

1/The Department of War Dependents Education (DoWDE) program includes the Department of War Education Activity (DoWEA) and the Family Assistance (FA)/Family Advocacy Program (FAP).

I. Description of Operations Financed:
The Department of War Education Activity (DoWEA) provides schooling for children of U.S. military families stationed around the world. DoWEA's purpose is to ensure students receive a consistent, high-quality education that prepares them to succeed as responsible citizens. DoWEA operates under the Department of War and includes the overseas school system, the domestic school system, Management Headquarters, and Consolidated School Support.

The overseas school system educates 44,779 students in 106 schools across 11 countries: Bahrain, Belgium, Cuba, Germany, Italy, Japan, Korea, the Netherlands, Spain, Turkey, and the United Kingdom. These schools provide a full Pre-K through 12th-grade program and oversee the Department's Virtual High School, which offers online courses to support academic and career goals. Performance is measured through student achievement, graduation rates, and the ability to maintain continuous school operations in overseas environments.

The domestic school system serves 21,591 students in 53 schools across seven states—Alabama, Georgia, Kentucky, New York, North Carolina, South Carolina, and Virginia—as well as Guam and Puerto Rico. The program also manages Special Arrangement contracts that fund tuition and transportation for 1,195 students in locations where the Department does not operate its own schools. These agreements, authorized under Title 10, U.S. Code § 2164, allow local public school districts to educate eligible military-connected students. Current Special Arrangement locations include Delaware, Massachusetts, New York, and Puerto Rico. Performance is tracked through accurate enrollment, timely tuition payments, and continuity of student services.

The Non-DoW Schools Program supports 4,999 students whose families serve in remote overseas areas without Department-run schools. Eligible students receive tuition assistance and other required educational support. The program operates under statutory authority in Title 20, U.S. Code § 926(b). Performance is measured through timely tuition processing, verification of student eligibility, and compliance reviews to ensure students receive appropriate educational services.

Management Headquarters provides system-wide oversight and ensures all schools follow a consistent Pre-K through 12 curriculum. Funding supports curriculum development, professional development for educators, program evaluations, and monitoring of student performance. Performance is assessed through accreditation results, curriculum implementation milestones, and educator training completion rates.

Consolidated School Support provides the operational services needed to run the school system, including financial management, contracting, human resources, information technology, and facility support. These functions ensure schools have the staff, materials, and infrastructure required to operate effectively. Performance is measured through hiring timelines, contract execution rates, information technology system reliability, and completion of facility projects.

The Educational Partnership Program supports public school districts that serve large numbers of military-connected students. Approximately 80 percent of military children—about 1.2 million—attend public schools. Funding helps districts improve academic continuity for students who frequently relocate. Performance is measured through grant execution, district participation, and improvements in student transition outcomes.

To maintain high levels of student achievement, DoWEA establishes clear, measurable goals; monitors performance against defined benchmarks; and strategically aligns resources to support continuous improvement. This disciplined approach strengthens teaching and learning, reinforces a rigorous core curriculum, raises expectations for excellence, and ensures accountability for results across all schools. DoWEA is committed to transparency with parents and stakeholders by clearly communicating curriculum standards, academic expectations, assessment outcomes, and improvement initiatives to build trust and shared responsibility for student success.

DoWEA schools operate in complex and demanding environments, particularly overseas, where geography, host-nation requirements, national interests, and security conditions can affect daily operations. Sustained and targeted funding supports DoWEA's ability to deliver consistent, high-quality education worldwide and to execute its strategic plan to:

- Strengthen high school programs by expanding access to advanced and honors coursework, improving college and career counseling, increasing distance-learning options, and investing in educator professional development to ensure instructional excellence.
- Provide specialized equipment, instructional materials, and furnishings for students with moderate to severe disabilities, consistent with the Individuals with Disabilities Education Act (IDEA), and maintain a highly trained special education workforce to meet diverse student needs.
- Expand and effectively integrate technology in classrooms to enhance instruction, support personalized learning, and strengthen distance-learning capabilities for students affected by mobility or geographic isolation.
- Maintain and enhance the fully accredited Virtual School, ensuring continuity of learning for students who relocate frequently, including through the 21st Century Military Child Initiative, which expands both synchronous and asynchronous learning options and supports academic stability.
- Use student performance data systematically to maintain academic rigor, evaluate program effectiveness, and continuously improve instructional quality, while openly sharing relevant performance information with parents and stakeholders.
- Support continuous, job-embedded professional development so educators are equipped to implement the core curriculum with fidelity, adapt instruction based on student needs, and improve learning outcomes.
- Provide a consistent, standards-aligned core curriculum across all schools to minimize academic disruption caused by frequent moves, deployments, and other military-related transitions, ensuring equitable educational experiences regardless of location.
- Implement and monitor strategic goals and performance metrics that drive sustained improvements in student achievement, promote organizational accountability, and reinforce DoWEA's commitment to educational excellence and transparency.

Family Assistance (FA): The Family Assistance program provides support, resources, and outreach to Active Duty and Reserve Component personnel, their families, and survivors. These programs are authorized under Title 10, U.S. Code, Chapter 88, which covers Military Family Programs and Military Child Care. Funding supports services that are more effectively managed at the Department level, including the Military OneSource contact center and website; the Military and Family Life Counseling Program; and spouse education and career programs such as spouse licensure portability, My Career Advancement Account tuition assistance, and the Military Spouse Career Accelerator Program. Funding also supports Child Development Program initiatives, including community based fee assistance, the Child Care In Your Home pilot, public private childcare partnerships, and program oversight. Additional services include youth and teen development programs, morale and recreation support, and assistance to states. These programs reach families both on and off installations, including those who are geographically dispersed.

Military OneSource serves as the Department's primary entry point for information and support. It provides 24/7 access to vetted resources, tools, and assistance that help Service members and families manage relocation, deployments, childcare, emergency family needs, and participation in programs such as the Exceptional Family Member Program. Performance is measured through call center response times, website usage, counseling participation, and user satisfaction.

Family Advocacy Program (FAP): The Family Advocacy Program provides funding to the Military Services to operate installation level programs that prevent and respond to domestic abuse, child abuse and neglect, and serious harmful behaviors between children and youth. The program supports a coordinated community response that includes military and civilian partners. FAP delivers prevention services and clinical intervention programs that address adult initiated abuse and child initiated harmful behaviors. The program includes the New Parent Support Program, which provides home visitation services to help parents build healthy parenting skills and support families identified as at risk for child abuse or neglect. Domestic abuse victim advocates provide confidential safety planning, risk assessments, and information about available resources. Clinical staff provide evaluation and treatment services for domestic abuse and child abuse cases.

The program also addresses serious harmful behaviors between children and youth on military installations, including problematic sexual behavior. This work includes collaboration with civilian experts and maintaining a database that tracks incidents at the installation level. Performance is measured through timely case management, completion of required assessments, delivery of prevention services, and coordination with installation and community partners.

Funding supports Department level data collection, analysis, and reporting required by law. This includes developing and maintaining a central database that captures information on domestic abuse incidents reported to commanders, law enforcement, legal authorities, or Family Advocacy Program staff. Funding also supports training for service providers, commanders, chaplains, and others who work with military families; research efforts; and monitoring of Service level implementation of standardized assessment tools. Additional support includes developing screening instruments for problematic sexual behavior between children and youth and implementing training platforms that promote trauma informed care and evidence based practices.The Family Advocacy Program budget also supports Department level fatality review efforts, including the annual fatality review summit and the required certification, accreditation, and inspection processes established by Congress. Funding addresses staffing needs, inflation, and additional responsibilities assigned through the National Defense Authorization Act and Government Accountability Office requirements.

Financial Readiness: The Financial Readiness program is part of the Office of Military Compensation and Financial Readiness, formed in 2025 by merging the Office of Financial Readiness with the Office of Military Compensation Policy. The program is based on the principle that financial stability directly supports mission readiness. When Service members are financially secure, they are better able to focus on their duties and maintain operational effectiveness.

Funding supports the Department's responsibilities under Title 10, U.S. Code, Section 992, which requires financial literacy education, training, and counseling at key points throughout a Service member's career. The program also leads Department efforts to implement and enforce the Military Lending Act, authorized under Title 10, U.S. Code, Section 987, which protects Service members and their families from predatory lending practices. To meet these requirements, the Financial Readiness program provides centralized accredited financial counselors, online learning tools, and targeted communication to help Service members and families build financial skills. Performance is measured through participation in financial education, counseling usage, and improvements in financial readiness indicators.

Voluntary Education: The Department supports voluntary, off-duty education programs that help Service members develop professional and personal skills and prepare for transition to the civilian workforce. These programs operate under statutory authorities in Title 10, U.S. Code, Sections 2005, 2006a, and 2007, which outline the conditions under which the military may provide financial assistance for academic and skill-based education.

The Officer and Enlisted Personnel Management office oversees policy and program execution to ensure compliance with these statutes and with appropriations law. Performance is measured through program participation, successful course completion, credential attainment, and support for Service members preparing for civilian employment.

The FY 2026 spend plan for Operations and Maintenance includes $3,604,951 thousand in discretionary funding and $110,000 thousand in mandatory funding, for a total of $3,714,951 thousand.

The FY 2027 request includes $3,493,232 thousand in discretionary funding and $1,650,716 thousand in mandatory funding, for a total of $5,143,948 thousand. The mandatory funding supports Warrior Ethos initiatives that improve quality of life for Service members and strengthen resilience, readiness, and force development across the Department. The request includes $869,542 thousand for the Department of War Education Activity to provide School Choice vouchers for active-duty dependents, consistent with Executive Order 14191, "Expanding Educational Freedom and Opportunity for Families," issued on January 29, 2025. The request also includes $781,174 thousand to repair poor and failing Department of War Education Activity facilities to support warfighting readiness, improve resilience, enhance quality of life for Service members and families, and reduce future replacement costs.

The FY 2027 mandatory funding differs from FY 2026 mandatory funding, which supported Department of War Impact Aid payments to local educational agencies ($100,000 thousand) under Title 10, U.S. Code, Section 2008, and military spouse professional licensure support ($10,000 thousand) under Title 10, U.S. Code, Section 1784.

NORMALIZED CURRENT ESTIMATE	**$3,604,951**	**$3,493,232**

FY 2026 President's Budget Request (Amended, if applicable) $3,600,175

1. Congressional Adjustments $4,776

a) Distributed Adjustments $45,843

1) Historical Unobligated Balances ..... $-39,157

2) Program Increase - Impact Aid $50,000

3) Program Increase - Impact Aid for children with disabilities $20,000

4) Program Increase - World language advancement and readiness grants $15,000

b) Undistributed Adjustments ..... $-25,224

1) Projected Underexecution of Civilian Compensation ..... $-25,224

c) Adjustments to Meet Congressional Intent $0

d) General Provisions ..... $-15,843

1) Sec. 8136 Management Efficiencies ..... $-15,843

FY 2026 Appropriated Amount $3,604,951

2. Supplemental Appropriations $0

a) Supplemental Funding $0

3. Fact-of-Life Changes $0

a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $3,604,951

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $3,604,951

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $3,604,951

6. Price Change $48,484

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $25,762

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 .....$25,762

1) Enhanced Performance Award $10,242
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

(FY 2026 Baseline: $22,068 thousand; 11,035 FTEs)

2) Facilities Operations $6,202
Increased funding is needed to keep facilities operating as material, preventive maintenance, and repair costs continue to rise. This funding allows facilities to continue operating at current service levels.
(FY 2026 Baseline: $163,592 thousand)

3) Purchased Utilities $2,150
Increased funding is required to support purchased utilities due to higher provider rates and elevated costs associated with global energy market conditions. Funding supports the continuation of current purchased utilities at existing service levels.
(FY 2026 Baseline: $48,483 thousand)

4) Student Transportation $6,565
Increased funding is required to support student transportation due to higher fuel prices driven by global energy market conditions and increased contractor costs. Funding supports the continuation of current student transportation services at existing service levels.
(FY 2026 Baseline: $95,610 thousand)

5) Suicide Prevention and Response Independent Review Committee (SPRIRC) Civilian Compensation $603
The increase funds the civilian personnel pay costs for +3 FTEs to implement the SPRIRC recommendation to address stigma and other barriers to care by implementing targeted strategies to use non-medical

counseling programs.
(FY 2026 Baseline: $27,014 thousand; 6 FTEs; +3 FTEs)

9. Program Decreases ..... $-185,965

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases ..... $-86,785

1) Impact Aid ..... $-51,050
Decrease reflects FY 2026 congressional add for Impact Aid and inflation.

(FY 2026 Baseline: $50,000 thousand)

2) Impact Aid for Children with Disabilities ..... $-20,420
Decrease reflects FY 2026 congressional add for Impact Aid for Children with Disabilities and inflation.

(FY 2026 Baseline: $20,000 thousand)

3) World Language Grants ..... $-15,315
Decrease reflects FY 2026 congressional add for World Language Grants and inflation.

(FY 2026 Baseline: $15,000 thousand)

c) Program Decreases in FY 2027 ..... $-99,180

1) Classroom Supplies & Equipment ..... $-8,387
Reduces funding for supplies and materials to align with historical execution levels and ensure alignment with the priorities of the Secretary of War to improve the efficiency and effectiveness of mission and business operations.
(FY 2026 Baseline: $71,922 thousand)

2) Contract Services Reductions ..... $-84,981
The reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure

represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $1,521,690 thousand)

3) Defense Logistics Agency (DLA) Document Services .....$-1,523
This decrease adjusts funding to planned FY 2027 execution, removing a one-time increase for services in FY 2026.
(FY 2026 Baseline: $5,409 thousand)

4) Disability Compensation.....$-8
The decrease reflects an adjustment to align funding with anticipated Disability Compensation billing requirements. The reduction ensures resources are matched to projected obligations and eliminates excess funding above forecasted billings.
(FY 2026 Baseline: $3,131 thousand)

5) Federal Employee Retirement System - Agency Contribution Rates.....$-4,270
The reduction reflects updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department's required contributions for FERS regular, Revised Annuity Employees (RAE) and Further Revised Annuity Employees (FRAE). The decrease aligns funding with current long-term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government-wide retirement funding requirements.
(FY 2026 Baseline: $162,711 thousand)

6) Permanent Change of Station .....$-11
The decrease reflects a modest reduction in projected civilian Permanent Change of Station (PCS) moves due to improved workforce stability and refined staffing alignment across DoWEA's global footprint. Recent workforce management initiatives in select locations have reduced the number of relocations required to meet mission needs. This adjustment realigns PCS resources with updated execution trends while ensuring sufficient funding remains available to support mission-essential relocations.
(FY 2026 Baseline: $3,805 thousand)

FY 2027 Budget Request $3,493,232

IV. Performance Criteria and Evaluation Summary:
Enrollment and Number of Schools:

DoWDE Enrollment:	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Special Education	761	715	546
Sure Start	94	82	54
Pre-Kindergarten	4,531	5,208	4,448
Kindergarten	5,785	5,758	5,528
Grades 1 through 12	56,183	55,295	55,794
Total DoWDE	**67,354**	**67,058**	**66,370**
*Non-DoW Schools Program	4,395	4,900	4,999
*Special Arrangements	1,213	1,146	1,195
*Virtual School	2,624	2,914	2,979

Note: Special Education enrollment reflects students enrolled in Pre-school Children with Disabilities and other self-contained special education programs only. Kindergarten through Grade 12 enrollment includes special education students educated in the least restrictive age-appropriate classroom environment.
*Non-DoW Schools Program, Special Arrangements and Virtual School enrollment included for informational purposes only.

Number of Schools:	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate

Virtual School	1	1	1

Funding Levels	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Sustainment	86,472	125,360	131,327
Restoration and Modernization	29,142	13,029	22,000
Demolition	0	0	0
Total	115,614	138,389	153,327
DoWEA Sustainment Rate	65%	90%	90%
Department Sustainment Goal for DoWEA	90%	90%	90%

DoWEA

Performance Criterion: Deliver a rigorous, coherent education that emphasizes academic excellence, classical learning, civic responsibility, and an appreciation of American constitutional principles, while supporting the unique needs of military-connected students worldwide.

Goal 1 for FY 2027: Reinforce Core Academic Excellence Through Classical Learning

Strengthen instruction in foundational disciplines to ensure students master essential knowledge and skills.
DoWEA will prioritize a content-rich, standards-aligned curriculum grounded in classical academic principles, with a strong emphasis on reading, writing, mathematics, science, and history. Instruction will focus on knowledge acquisition, critical thinking, logical reasoning, and clear communication, ensuring students are academically prepared for college, careers, military service, and lifelong learning.

Intended Outcomes:
- Stronger literacy and numeracy outcomes at all grade levels
- Improved mastery of foundational knowledge across disciplines
- Increased instructional coherence across schools and regions

Goal 2 for FY 2027: Promote Civic Literacy and Patriotic Understanding

Ensure students develop a clear understanding of American civic institutions, constitutional principles, and the responsibilities of citizenship. DoWEA will strengthen instruction in civics, U.S. history, and government to foster informed, engaged, and responsible citizens. Curriculum and instruction will emphasize the ideals of liberty, rule of law, service, and respect for democratic institutions, while recognizing the contributions of military families to national security and public service.

Intended Outcomes:
- Improved student knowledge of U.S. history and civics
- Greater student understanding of citizenship, duty, and service
- Increased respect for democratic processes and constitutional governance

Goal 3 for FY 2027: Ensure Curriculum Coherence and Continuity for Mobile Students

Provide a consistent core curriculum that minimizes disruption caused by frequent relocations. DoWEA will maintain clearly defined learning progressions and curriculum alignment across all schools to support academic continuity for students who move due to military assignments. This consistency ensures that students experience minimal academic gaps and are able to transition smoothly between schools and grade levels.

Intended Outcomes:
- Reduced instructional disruption for transitioning students

- Clear academic expectations across all DoWEA schools
- Improved student confidence and academic stability

Goal 4 for FY 2027: Strengthen Instructional Quality Through Professional Excellence

Support educators in delivering rigorous, knowledge-based instruction grounded in best instructional practices.
DoWEA will sustain a professional development framework focused on subject-matter expertise, effective pedagogy, classroom management, and curriculum implementation. Educators will be equipped to deliver structured, engaging instruction that reinforces high academic standards and student accountability.

Intended Outcomes:
- Improved instructional consistency and quality
- Stronger alignment between curriculum and classroom practice
- Increased teacher effectiveness and retention

Goal 5 for FY 2027: Foster Character, Responsibility, and Respect for Service

Support the development of student character consistent with the values of responsibility, perseverance, respect, and service.
DoWEA will reinforce positive school cultures that promote personal responsibility, respect for others, and an appreciation for the sacrifices and service of military families. These principles support student success both academically and personally, preparing students to contribute meaningfully to their communities.

Intended Outcomes:
- Strengthened student character reflecting responsibility, perseverance, respect, and service
- Positive and consistent school cultures that reinforce personal accountability and mutual respect
- Increased student appreciation for military service and civic duty

Goal 6 for FY 2027: Expand and evaluate school choice voucher options to support academic continuity and standards-aligned outcomes for eligible students.

The Department will implement and monitor school choice voucher programs for eligible students, ensuring participating schools align with approved academic standards and accountability requirements. Performance will be measured through enrollment trends, parent satisfaction, academic continuity indicators, and student achievement outcomes, with results used to assess program effectiveness and inform future policy and funding decisions.

Intended Outcomes: Expanded access to high-quality educational options for military-connected students, supporting family school choice and sustaining mission readiness.

Family Assistance

Performance Criterion: Support force readiness and quality of life through programs that strengthen the well-being of Service members and their families.

Goal 1 for FY 2027: Provide continuous access to information, assistance, and non-medical counseling through Military OneSource and related platforms.

Results: In FY 2024, Military OneSource achieved 100 percent customer satisfaction, with more than 14 million page views and 284,000 tax returns completed. Military and Family Life Counselors provided non-medical counseling to more than 10.7 million participants and outreach to 13.6 million, identifying approximately 1,700 Duty-to-Warn cases. Nearly 90 percent of participants reported reduced problem severity.

Goal 2 for FY 2027: Provide military spouses with education and career support, including My Career Advancement Account tuition assistance.

Results: In FY 2024, the Spouse Education and Career Opportunities Career Center conducted more than 132,000 coaching sessions with a 99 percent satisfaction rate. More than 950 employers have joined the Military Spouse Employment Partnership, resulting in over 360,000 spouse hires since 2011. More than 9,400 spouses received My Career Advancement Account assistance.

Goal 3 for FY 2027: Expand access to quality, affordable child care and youth programs.

Results: The Department serves more than 172,000 children annually. Child care fee assistance participation increased 72 percent over four years. Military Child Care in Your Neighborhood-PLUS expanded to 18 states and two counties, adding 5,088 eligible providers. The Child Care in Your Home pilot expanded to Alaska. Direct-care staffing increased 12.5 percent, employing 8,000 military spouses. Staff completed more than 560,000 hours of professional development, and off-installation providers completed 493,000 hours through the Virtual Lab School.

Goal 4 for FY 2027: Improve services for families with special medical and educational needs through the Exceptional Family Member Program.

Results: Approximately 105,700 Service members are enrolled, representing 137,000 family members. In FY 2024, the Department implemented a new outcomes and accountability model. Survey results showed 83 percent of needs were somewhat met and 43 percent satisfaction with the overall program. Twenty-five percent of respondents indicated the program positively influenced retention.

Goal 5 for FY 2027: Provide on-demand access to digital library resources and communication tools for deployed Service members.

Results: In FY 2024, the digital library delivered more than 157,000 tutoring sessions and enabled 37.5 million database views, 4.2 million e-book and audiobook accesses, and 7.9 million periodical accesses. Global Internet Connect Platforms supported more than 1.17 million sessions and 117 million minutes of online access.

Goal 6 for FY 2027: Strengthen support for military families through state-level policy engagement.

Results: In FY 2024, the Defense-State Liaison Office supported passage of 140 bills in 41 states, reducing barriers associated with frequent relocations and supporting recruitment and retention.

Family Advocacy

Performance Criterion: Deliver prevention, advocacy, and clinical intervention programs addressing domestic abuse, child abuse and neglect, and problematic sexual behavior in children and youth.

Goal for FY 2027: Continue evidence-based prevention, advocacy, and clinical services, including public awareness, training for key personnel, New Parent Support Program home visits, treatment and case management, victim advocacy, and multidisciplinary review processes. Maintain intervention and prevention programming for problematic sexual behavior in children and youth, support the Independent Review Committee on Sexual Assault in the Military, and advance coordinated community response efforts, including pilot programs at four installations.

Results: In FY 2023, clinical staff served more than 11,500 victims of domestic abuse, and victim advocates supported more than 13,400 victims. New Parent Support Program staff conducted more than 43,000 home visits to over 50,000 families. Programming for problematic sexual behavior in children and youth became further institutionalized, and the associated database was implemented across the Military Services.

Financial Readiness

Performance Criterion #1: Oversee, operate, and improve programs that support the financial readiness of Service members and their families.

Goal for FY 2027: Deliver a financial training and counseling program that meets the requirements of 10 U.S.C. 992. Strengthen oversight through improved monitoring tools, updated learning outcomes, refreshed curriculum resources, and new content informed by usability and feedback. Expand financial readiness communications through digital and print products, enhanced websites, and targeted outreach. Provide professional development for Personal Financial Managers. Coordinate with Federal agencies and industry partners to support consumer protections under the Military Lending Act (10 U.S.C. 987; 32 CFR 232) and the Service members Civil Relief Act, and maintain support for the Military Lending Act database.

Results: In FY 2024 and FY 2025, the program developed new training resources on the Basic Needs Allowance, Dependent Care Flexible Spending Account, and Health Care Flexible Spending Account, and updated the Sen$e app. Technology and interagency collaboration delivered tools to help Service members assess financial well-being and identify risks such as food insecurity. Personal finance professionals earned 7,669 continuing education credits through monthly webinars in FY 2025. Online content for military spouses expanded through the MilSpouse Money Mission website. Outreach increased through refined eNewsletter strategies and expanded paid media. Digital content and targeted campaigns were developed for junior enlisted and transitioning Service members. Financial tools, including Sen$e, calculators, worksheets, and the Financial

Well-Being Assessment, were promoted across platforms. Website updates improved navigation, mobile compatibility, and search engine optimization. Oversight processes were expanded, a research study developed measures of effectiveness for financial literacy training, and curriculum materials were updated and deployed through a Department-wide Learning Resources Library. Website usability research informed future content development.

Performance Criterion #2: Provide high-quality personal financial counseling through the Personal Financial Counselor Program.

Goal for FY 2027: Sustain capabilities to deliver qualified financial counseling services. Ensure Personal Financial Counselors are credentialed, trained, and compliant with industry standards. Implement conflict-of-interest and financial disclosure requirements in Section 524 of the FY 2024 National Defense Authorization Act.

Results: In FY 2024 and FY 2025, the program deployed approximately 300 accredited counselors worldwide and supported more than 750 on-demand events. Counseling services were provided at more than 1,500 continental U.S. locations and over 120 overseas locations. The network was refined to improve efficiency as Service programs matured. Across FY 2024 and FY 2025, the program delivered more than 1,464,785 direct client contacts and facilitated more than 35,614 financial readiness training milestones, briefings, and presentations.

Performance Criterion #3: Assess the financial readiness of the force to evaluate programs and identify educational needs.

Goal for FY 2027: Develop, deploy, and analyze a financial literacy and preparedness assessment within the annual Status of Forces Survey, in accordance with 10 U.S.C. 992(d). Use results to meet Congressional reporting requirements, update training, and target resources.

Results: The annual Status of Forces Survey includes a financial well-being and education section aligned with Federal survey standards, enabling comparisons with civilian populations. Results from the 2024 survey were submitted to Congress in May 2025 and informed updates to training and policy. An improved survey instrument was developed for FY 2025. The active-duty and Reserve Component survey was administered from November 2024 to April 2025. The Office of People Analytics briefed results to each Military Service, and analysis is underway for reporting to Congress in early FY 2026.

Voluntary Education

Performance Criterion #1: Enhance a risk-based compliance program to enforce adherence to the Principles of Excellence (Executive Order 13607) and Department policies among higher education institutional partners, and oversee Service compliance with Tuition Assistance policies and procedures.

Goal for FY 2027: Sustain an efficient Institutional Compliance Program that encourages institutions to provide Service members clear information on cost and quality, strong academic and support services, and protection from deceptive practices. Identify best practices for a Service-level compliance program and pilot the model with at least one Military Service.

Results: Enhanced risk-based analysis and data-enabled oversight improved the efficiency and effectiveness of program delivery and strengthened monitoring of institutions receiving Tuition Assistance funds. Best practices for Service-level Tuition Assistance compliance were identified, improving consistency in funding utilization and creating better opportunities for Service members.

Performance Criterion #2: Modernize Voluntary Education information and data systems to improve stability, security, and data integrity, availability, and usability.

Goal for FY 2027: Implement a redesigned DoWMOU.com and begin modernization of other Voluntary Education systems, including Tuition Assistance DECIDE, the Postsecondary Education Complaint System, and the Voluntary Education Management Information System, within a compatible platform environment.

Results: Implemented a Voluntary Education information systems ecosystem that supports analytic tools to assess Tuition Assistance usage, trends, outcomes, and other key program investments.

Performance Criterion #3: Direct and oversee policies, programs, and systems that strengthen workforce development through enhanced career counseling resources, ensuring a life-cycle approach that supports in-Service needs and prepares Service members for post-Service careers.

Goal for FY 2027: Develop or modernize a career counseling tool for Service members using Tuition Assistance and transition all counseling to outcomes-based sessions that align education and training with military and industrial base skill requirements.

Results: A career counseling tool integrated with an analytics platform was implemented in prior years, enabling data-driven insights into Service member interests and aligning them with evolving skill requirements. This life-cycle approach supports a more skilled Department workforce and improves employability for Service members transitioning to civilian careers.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

I. Description of Operations Financed:
The Defense Prisoners of War/Missing in Action Accounting Agency provides families and the Nation with the fullest possible accounting of personnel missing from past conflicts. Taxpayer funding supports global search and recovery missions, scientific identification of remains, and direct communication with families. The agency accounts for those missing from World War II, the Korean War, the Cold War, the Vietnam War, the Persian Gulf War, the Iraq Theater of Operations, and other conflicts as designated by the Secretary of War. The agency also works with partner nations, supports U.S. delegations, and strengthens international cooperation to improve accounting outcomes.

Research and Analysis Line of Effort : Research and Analysis is the foundation of every accounting action and relies heavily on coordination across the agency and with external partners. This work includes building case files, preparing information for families, identifying potential investigation and recovery sites, and supporting scientific analysis. Research and Analysis collaborates directly with the agency's laboratories and the Armed Forces Medical Examiner System by providing the historical, archival, and case-specific information needed for forensic and anthropological examinations. Coordination with federal agencies, foreign archives, and academic institutions improves data accuracy and expands access to historical records. These efforts, combined with improvements to the Case Management System, support the agency's goal of accounting for more than 200 personnel each year.

Accounting Line of Effort: Accounting activities focus on increasing the number of personnel identified and returned home, with priority on Vietnam War losses. This work depends on extensive coordination with U.S. embassies, foreign governments, local authorities, and non-governmental organizations to secure access to sites, obtain permits, and gather information. Taxpayer funding supports investigations, disinterments, recoveries, and scientific identifications. Even when an individual identification is not possible, families receive all available information.

Two specialized laboratories are central to the Accounting Line of Effort. These laboratories conduct forensic and anthropological analysis of remains and artifacts and work closely with the Armed Forces DNA Identification Laboratory and Service Casualty Offices to collect and analyze DNA samples. Coordination between laboratories, researchers, and field teams ensures that scientific findings are integrated with historical and investigative information, enabling accurate, science-based identifications and returning loved ones home.

Key projects within the Accounting Line of Effort strengthen the agency's ability to resolve cases and support coordinated operations. These include developing accessible personnel files for each missing person as required by 10 U.S.C. § 1509, completing the digitization of Individual

Deceased Personnel Files dating back to World War II, maintaining the official list of unaccounted-for personnel by conflict, and conducting archival research, data analysis, witness interviews, and loss investigations. These projects ensure that information from multiple agencies, nations, and historical sources is preserved, searchable, and usable to support identifications and family communications.

Communications and Engagement Line of Effort: Communications and Engagement ensures families receive timely and accurate information about their missing loved ones and strengthens the relationships needed to carry out the mission. This work includes coordination with partner nations, veterans' organizations, family groups, and other federal agencies to maintain access to loss sites, share information, and support mission requirements. Under 10 U.S.C. § 1501, the Department must inform families, Congress, veterans' organizations, military service organizations, family support groups, and the public about missing personnel and recovery efforts.

The agency conducts four Family Member Update meetings and two annual Government Briefings, reaching approximately 1,800 family members each year. The Government Briefings in Washington, D.C. provide detailed updates to families of those missing from the Vietnam War and the Korean/Cold War. Communications and Engagement also manages the transfer of historical records to the Library of Congress and the National Archives, ensuring long-term public access to information. The agency responds to information requests, manages document declassification, and maintains a public website with accounting information.

Business Enterprise Line of Effort: Business Enterprise strengthens the agency's workforce, processes, and capabilities so it can carry out its mission effectively. This includes coordination across directorates to align personnel, improve decision-making structures, evaluate facility needs, expand training, and encourage innovation. Business Enterprise also ensures that the Case Management System and partner capabilities are fully leveraged, enabling seamless information sharing and collaboration across the agency and with external partners.

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $7,529

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $7,529

1) Compensation and Benefits $5,245

Funds increased labor costs to account for special pay rates for forensic anthropologists and to right size average annual civilian salary costs in accordance with historical execution.

(FY 2026 Baseline: $53,671 thousand)

2) Enhanced Performance Award $2,284
This increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $1,300 thousand)

9. Program Decreases .....$-16,375

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-16,375

1) Efficiency - Contract Services .....$-11,400
Reduces contracts for Advisory and Assistance Services to promote efficiencies and advance the policies of the Administration in alignment with Executive Order 14222, "Implementing the President's Department of Government Cost Efficiency Initiative."
(FY 2026 Baseline: $84,397 thousand)

2) Efficiency - Supplies and Materials .....$-4,482
Reduces funding for supplies and materials to align with historical execution levels and ensure alignment with the priorities of the Secretary of War to improve the efficiency and effectiveness of our mission and business operations.
(FY 2026 Baseline: $14,000 thousand)

3) Efficiency - Transportation.....$-106
Reflects an adjustment to transportation requirements resulting from increased utilization of MILAIR in support of mission activities. Greater reliance on MILAIR reduces the need for commercial travel, allowing

the Department to realign transportation funding while maintaining full mission execution and travel support.
(FY 2026 Baseline: $5,000 thousand)

4) Efficiency - Travel.....$-210
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
(FY 2026 Baseline: $10,000 thousand)

5) Federal Retirement System - Agency Contribution Rates.....$-177
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shits, and revised projections of retirement liabilities.
(FY 2026 Baseline: $53,671 thousand)

FY 2027 Budget Request $160,358

Fiscal Year 2027 Budget Estimates

Defense Security Cooperation Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 04: Administration & Servicewide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DSCA	10,932,000	271,607	-7,549,650	3,653,957	74,463	52,337	3,780,757

I. Description of Operations Financed: The Defense Security Cooperation Agency (DSCA), in coordination with the Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S)) and the Office of the Under Secretary of War for Policy (OUSW(P)), leads the security cooperation enterprise in delivering effective, enduring, and timely solutions that support national security, defense strategic guidance and mutual U.S. and partner interests.

Consistent with the 2026 National Defense Strategy (NDS), the FY 2027 President's Budget request continues to align and deliver security cooperation programs and efforts in accordance with priorities of the President of the United States and Secretary of War's (SecWar) priorities. These efforts include the day-to-day operations of the DSCA headquarters, the Defense Security Cooperation University (DSCU), the Department of War (DoW) Regional Centers for Security Studies, and the Defense Security Cooperation Service (DSCS). Under the provisions of the Title 10 U.S.C. Chapter 16, the FY 2027 budget request will continue to support the execution of a Department-wide framework for the assessment, monitoring, and evaluation of security cooperation activities and continue to implement a workforce development program targeting all DoW professionals supporting security cooperation efforts. The DSCA will continue to execute Department of State security assistance programs and activities in accordance with the Foreign Assistance Act and the Arms Export and Control Act. Additionally, the DSCA budget request supports program management and administration of the Humanitarian Assistance, Foreign Disaster Relief, and Humanitarian Mine Action programs funded within the Overseas Humanitarian, Disaster and Civic Aid appropriation.

The DSCA plans, directs, implements, administers, and provides guidance for the execution of assigned security cooperation programs and activities and facilitates the planning, implementation, monitoring, and evaluation of security cooperation activities funded through the DSCA. The DSCA activities encourage and enable foreign partners to responsibly act in support of U.S. national security objectives. Security cooperation activities are often complex and span the phases of conflict from shaping the environment to enabling civil authority activities. The DSCA collaborates closely with the interagency, geographic combatant commands (CCMD), industry, and partner nations to execute security cooperation activities. Moreover, the DSCA seeks to maximize security cooperation program effectiveness.

CAPACITY BUILDING

European Capacity Building
European Capacity Building funds security cooperation programs and activities that build the military capacity of European partners, including Ukraine, to address shared national security challenges, enhance interoperability among partner forces, and enable European allies and partners to take on greater responsibility for their own security challenges. These efforts would support U.S. national security and defense strategic objectives.

Taiwan Drawdown Stock Replacement
The Taiwan Drawdown Stock Replacement is intended to support the replacement of defense articles and services transferred to Taiwan from DoW stocks through the Presidential Drawdown Authority or the Taiwan Security Cooperation Initiative. Funds bolster Joint Force readiness and enable new procurements to replace equipment and services provided to Taiwan.

Taiwan Security Cooperation Initiative (TSCI)
Section 1323 of the National Defense Authorization Act (NDAA) for FY 2025 enacted the TSCI. The Department intends to use TSCI to strengthen Taiwan's self-defense capabilities. The TSCI complements Taiwan's increasing defense investments and other U.S. security assistance and security cooperation authorities. The DoW incorporates security cooperation assessments, design, planning, and monitoring best practices while implementing this initiative.

Ukraine Security Cooperation Initiative (USAI) Authority in Support of the Prioritized Ukraine Requirements List (PURL)
USAI is designed to increase Ukraine's ability to defend against Russian aggression, develop Ukraine's combat capability to defend its sovereign territory, and enhance interoperability with the North Atlantic Treaty Organization (NATO) and Western forces. In direct alignment with the Administration's focus on increasing burden-sharing with allies and partners, the Department is leveraging USAI authority to support the Prioritized Ukraine Requirements List (PURL) initiative. Through the PURL initiative, NATO countries contribute funds for the delivery of critical U.S.-origin defense articles and services to Ukraine. NATO funds enable new procurements to replace defense articles drawn down and delivered to Ukraine and for new procurements in furtherance of the PURL initiative.

International Security Cooperation Programs (ISCP)
The ISCP account funds security cooperation programs and activities that build the military capacity of partner forces to address shared national security challenges and to operate in tandem with or in lieu of U.S. forces. The ISCP-funded activities implement the 2026 NDS, including by deterring Chinese aggression, reducing the flow of illicit goods through the Southwest border, buying down risk to forward deployed U.S. warfighters, and shifting the burden for regional security by enabling allies and partners to take on greater responsibility for their own security challenges. These efforts include train-and-equip programs enabling partners to operate across a range of mission areas, institutional capacity building (ICB) to strengthen governance and absorptive capacities necessary for full spectrum capability development, and other activities to advance NDS implementation with certain countries. The ISCP's initiative-based planning supports the Department's efforts to conduct assessment, monitoring, and evaluation of security cooperation activities to ensure programs yield a return on U.S investments. Authorities funded from amounts appropriated for ISCP generally include Title 10 U.S.C. §. 332, 333 and 335, Public Law 117-263 section 1208, and the Indo-Pacific Maritime Security Initiative from Section 1263 of the NDAA for FY 2016, though may on occasion be implemented through any Title 10 U.S.C. authority.

SUPPORT TO OPERATIONS

Border Security

Section 1226 of the NDAA for FY 2016, as amended, provides support to key allies and partner nations on a reimbursable basis for expenses incurred to increase security and sustain increased security along their borders adjacent to conflict areas. This assistance serves to degrade the free movement of the Islamic State of Iraq and Syria (ISIS) and other violent extremist organizations, illicit weapons, and narcotics as well as other forms of smuggling, preventing these regional threats from reaching the U.S. homeland.

Lebanese Armed Forces
In accordance with Section 8034 of the DoD Appropriations Act, FY 2026, the DSCA, in coordination with the Secretary of State, will aid the Lebanese Armed Forces across five congressionally mandated lines of effort to include: advanced training and equipment; comprehensive logistics and sustainment; infrastructure modernization; and the provision of critical personnel stipends. These investments are vital to maintaining the Lebanese Armed Forces as a professional, institutional counterweight to non-state actors and ensuring regional stability.

MANAGEMENT, INFRASTRUCTURE, AND WORKFORCE DEVELOPMENT

Assessment Monitoring, and Evaluation (AM&E)
The AM&E program is a statutory requirement for the Department to establish an enterprise-wide view of security cooperation and enable strategic decision making. In accordance with 10 U.S.C. § 383 and OUSW(P) on AM&E, the Department must execute a comprehensive program to assess, monitor, and evaluate security cooperation programs and activities. The funding requested for this activity provides for Department-wide assessments and monitoring of security cooperation programs and activities as well as the identification of trends, challenges, and lessons learned to improve security cooperation planning and execution.

Defense Security Cooperation Service (DSCS)
The DSCS was established in accordance with the NDAA for FY 2024 (10 U.S.C. § 384 c.4.) to ensure that the security cooperation organization (SCO) at U.S. embassies is appropriately staffed, trained, and equipped to achieve national security cooperation objectives, assist in the maintenance of theater security readiness, and advance the Administration's priorities to enhance global military partnerships. The global SCO workforce, now called U.S. Military Groups (MILGP), is comprised of civilian, military and locally employed security cooperation professionals with deep knowledge of partner nations, theater security strategies, and DoW policies and objectives. Achieving national security objectives effectively and efficiently for the American taxpayer requires a dedicated MILGP workforce with the right training to advise and assist allies and partners to develop capabilities that address shared security challenges. The DSCS provides the workforce and CCMDs with improved security cooperation workforce capabilities and capacity by: streamlining best practices and maximizing resources; enhancing MILGP training; right sizing MILGP manpower to align with national security priorities and security cooperation workload at each MILGP; improving support for partners and allies' access to U.S. security cooperation programs and activities; fully meeting DSCA statutory and regulatory responsibilities and roles as the Department's lead for all security cooperation program execution and administration consistent with 10 U.S.C. § 382; and placing an increased emphasis on supporting CCMD efforts in achieving national and theater strategic objectives.

Defense Security Cooperation University
Pursuant to 10 U.S.C. § 384, the DSCU was established to improve the quality and professionalism of the security cooperation workforce who directly support the effectiveness of security cooperation activities necessary to increase burden-sharing with U.S. allies and partners, reinforcing

deterrence while simultaneously supercharging the U.S. defense industrial base (DIB). The NDAA for FY 2024 codified the DSCU in statute and further defined its mission to include: education, training, development, and management of the workforce; management of ICB services and international military training and education activities executed by the DoW; as well as advancement of the security cooperation profession through research, data collection, analysis, publication, and learning.

Strategic Evaluations
In accordance with 10 U.S.C. § 383, the OUSW(P) commissions independent evaluations, funded through the Strategic Evaluation account. Strategic evaluations provide data to inform security cooperation decision making, assess progress towards desired results, and increase security cooperation efficiency and effectiveness.

EDUCATION AND TRAINING

Regional Defense Fellowship Program (RDFP)
The RDFP, authorized in the NDAA for FY 2004 (10 U.S.C. § 2249c), provides foreign military officers and government security officials with strategic and operational education to enhance partner capacity to combat terrorism. In the NDAA for FY 2019, irregular warfare (IW) was added to the authority, and the program was redesignated the Regional Defense Combating Terrorism and IW Fellowship Program (10 U.S.C. Chapter 16, § 345). The RDFP is a key tool for CCMDs to foster regional and global cooperation in the war on violent extremism and terrorism. The RDFP enhances the U.S. Government's efforts to provide non-lethal IW and combatting terrorism assistance. The program supports mobile and resident institutional courses tailored to the specific needs of key regions and countries to advance broader U.S. Government objectives. All personnel are thoroughly vetted consistent with legal requirements regarding human rights issues. Funding for the RDFP: builds and strengthens a global network of experts and practitioners at the operational and strategic levels; builds and reinforces the IW and combating terrorism capabilities of partner nations through operational and strategic-level education; contributes to IW and counterterrorism ideology efforts; and provides the DoW with a flexible and proactive program that can respond to emerging IW and combatting terrorism requirements.

Irregular Warfare Center (IWC)
The IWC is a DoW functional center that was authorized in the NDAA for FY 2021. The IWC serves as the central mechanism for developing the IW knowledge of the DoW and advancing the understanding of IW concepts and doctrine, in collaboration with key partners and allies to enhance integrated deterrence against hybrid threats below the threshold of conflict. The IWC is the battle lab for operationalizing ideas and validating strategic concepts to enhance readiness. The IWC global network serves as a force multiplier and coordinator of functional IW progress for the Department and beyond. The Center provides cutting-edge research and mobile education tailored to the specific needs of specific organizations and key regions and countries to advance broader U.S. Government objectives. Funding for the IWC: (1) builds and strengthens a domestic and global network of IW experts and practitioners at the operational and strategic levels; (2) builds and reinforces the IW capabilities of partner nations through operational and strategic-level education; (3) contributes to IW efforts; and (4) provides the DoW with an agile and innovative approaches that can respond to emerging IW challenges.

Irregular Warfare Center (Center of Excellence)

This contract, also known as the IWC Academic Research Contract, is the primary foundational pillar supporting the Center of Excellence's entire operational and intellectual enterprise. This contract provides the IWC with dedicated, structured access to the nation's leading academic institutions and subject matter experts who specialize in fields directly relevant to irregular warfare, such as political science, anthropology, economics, information theory, and regional studies.

Regional Centers (RC) for Security Studies
The DoW RCs conduct academic, research, and outreach activities to promote common perspectives on regional security and promote shared responses to transnational threats. Through these programs and resulting alumni networks, the RCs expand both the will and capability of partners to fulfill roles and take actions that support mutual security and defense goals, consistent with U.S. objectives. The RC are an executive-level, Title 10 authorized strategic complement to traditional invitational professional military education, extending beyond the Ministry of Defense space to influence a broader range of security and defense stakeholders. Participants in RC programs are generally senior (O-5/GS-14 equivalent and above), multilateral, and inter-ministerial, including security and defense stakeholders from ministries of foreign affairs, justice, law enforcement, and parliamentarians. Title 10 U.S.C § 342 authorizes the following RCs: the George C. Marshall European Center for Security Studies (Garmisch-Partenkirchen, Germany); the Daniel K. Inouye Asia-Pacific Center for Security Studies (Honolulu, Hawaii); the William J. Perry Center for Hemispheric Defense Studies (Washington, D.C.); the Africa Center for Strategic Studies (Washington, D.C.); the Near East-South Asia Center for Strategic Studies (Washington, D.C); and the Ted Stevens Center for Arctic Security Studies (Anchorage, Alaska). The DSCA is the designated Executive Agent for all Regional Centers.

In FY 2027, RC programming will be aligned to support the 2026 NDS focusing on defending the homeland, deterring China in the Indo-Pacific, increasing burden-sharing with U.S. allies and partners, and supercharging the U.S. defense industrial base.

ADMINISTRATIVE SUPPORT OPERATIONS

DSCA Headquarters
The DSCA Headquarters funds the salaries and operating expenses of the DSCA workforce providing program and financial management support to DoW-funded security cooperation programs. Additionally, this account funds the Defense Finance and Accounting Services (DFAS) costs, support for enterprise resource systems, and operational and information technology system costs for the Partner Outreach and Collaboration Support (POCS) systems and Socium platforms such as the Regional Center Personnel & Activity Management System (RCPAMS) and GlobalNET.

The POCS provides common information technology platforms (RCPAMS and GlobalNET) to improve international partner outreach, promoting collaboration and resource sharing among the RCs for Security Studies, the Partnership for Peace, other DoW educational institutions and communities, and international partners.

The RCPAMS is DSCA’s primary tool for recording, reporting, and managing student logistics and training related to international Security Cooperation practitioners and is utilized to build the Foreign Military Training Report (22 U.S.C. § 2416 and P.L. 110-161). The GlobalNET exists

to improve international partner outreach by providing community-based education, collaboration, outreach, and professional networking tool for the RC students, alumni, their cohorts, and subject matter experts—an international community of approximately 85,000 users.

The FY 2027 request for the Defense Security Cooperation Agency, 0100D, includes $3,780,757 thousand of discretionary and $1,681 thousand of mandatory for a total of $3,782,438 thousand. The mandatory funds will support repair of existing facilities and expansion of leasing capacity for unaccompanied personnel. The FY 2027 funds are different from the FY 2026 mandatory funds ($850,000 thousand) which support the Taiwan Drawdown Authority Stock Replacement for the replacement of defense articles that the U.S. Government draws down in support of Taiwan.

FY 2026 President's Budget Request (Amended, if applicable) $2,864,252

1. Congressional Adjustments $789,705

a) Distributed Adjustments $809,205

1) Program Increase - Baltic Security Initiative $200,000

2) Program Increase - European Capacity Building $400,000

3) Program Increase - George C. Marshall Center for Security Studies $4,000

4) Program Increase - International Security Cooperation Programs - Bahrain $10,000

5) Program Increase - International Security Cooperation Programs - Jordan $15,000

6) Program Increase - International Security Cooperation Programs - Philippines $40,000

7) Program Increase - Irregular Warfare Center $3,205

8) Program Increase - Lebanon $35,000

9) Program Increase - P..L. 115-68 implementation $1,000

10) Program Increase - P.L. 114-92 Section 1226 ..... $75,000

11) Program Increase - Ted Stevens Center for Arctic Security Studies $5,000

12) Program Increase- Irregular Warfare Center of Excellence $6,000

13) Transfer from CTEF for Lebanese Armed Forces $15,000

b) Undistributed Adjustments ..... $-23,714

1) Historical Unobligated Balances ..... $-23,714

c) Adjustments to Meet Congressional Intent $0

d) General Provisions $4,214

1) Sec. 8065 USAFRICOM Allies and Partnerships $25,000

2) Sec. 8136 Savings from Efficiencies ..... $-20,786

FY 2026 Appropriated Amount $3,653,957

2. Supplemental Appropriations $0

a) Supplemental Funding $0

3. Fact-of-Life Changes $0

a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $3,653,957

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $3,653,957

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $3,653,957

6. Price Change $74,463

7. Functional Transfers ..... $-8,727

a) Transfers In $0

b) Transfers Out ..... $-8,727

1) Defense Security Cooperation Service ..... $-8,727
This is a transfer to the DSCA Family Housing O&M, Defense Wide appropriation for Defense Security Cooperation Service. Funds for the Defense Security Cooperation Service Family Housing O&M, Defense Wide appropriation were erroneously transferred to the DSCA O&M, Defense Wide appropriation during FY 2026 Program Budget Review cycle. This transfer properly aligns the funds to the correct appropriation in FY 2027 through FY 2031.
(FY 2026 Baseline: $59,516 thousand)

8. Program Increases $965,483

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $965,483

1) Assessment, Monitoring, and Evaluation $6,110
Increases funds in management professional support services (+$5,422 thousand) and Other Intra-governmental Purchases ($688 thousand) to support the Global Assessment, Monitoring, and Evaluation program, support costs, including data collection trips and software, that are required to produce legally mandated assessment and monitoring products.
(FY 2026 Baseline: $8,140 thousand; 0 FTEs; +0 FTEs)

2) Border Security.....$4,038
Increases funds to support reimbursement to key allies and partner nations for expenses incurred to enhance and sustain security along their borders adjacent to conflict areas.
(FY 2026 Baseline: $267,298 thousand; 0 FTEs; +0 FTEs)

3) Defense Security Cooperation Service $23,630
Increases funds in Other Intra-governmental purchases supports the increasing costs of International Cooperative Administrative Support Services cost-sharing system and the urgent need to bolster accountability of U.S.-origin defense articles, build the institutional capacity of our partners to resist malign influence, and modernize the underlying information technology required to manage a global security cooperation enterprise. This investment is critical to ensuring security cooperation remains a durable, asymmetric advantage for the United States.

MILGPs execute U.S. Security Cooperation and partner capacity-building programs and serve as the primary in-country representatives engaging partner nations to strengthen defense institutions and military capability. Adequate ICASS funding and support sustains MILGP operations at U.S. embassies worldwide. This support is foundational to the effective execution of Security Cooperation missions that support U.S. national security objectives.
(FY 2026 Baseline: $59,516 thousand; 143 FTEs)

4) Defense Security Cooperation University $14,076
Increases funds for contract support ($13,788 thousand) and facilities sustainment (+$288,000) to support essential course design and research to address critical professionalization gaps such as technical knowledge, training, and capabilities to integrate security cooperation with strategic competition.

(FY 2026 Baseline: $39,676 thousand; 122 FTEs)

5) DSCA Headquarters.....$11,565

+$3,847 thousand increase in funds for IT Contract Support Services advances key IT modernization initiatives, including RCPAMS modernization and the implementation of DoW Zero Trust and ICAM frameworks. These efforts are critical to strengthening cybersecurity, improving access controls, enhancing system interoperability, and creating a more secure, cloud-aligned enterprise environment.

+$4,728 thousand increase in funds for DFAS financial operations support. This increase is driven by the expansion in International Security Cooperation Program activities resulting in higher transaction volumes and financial reporting requirements.

+$2,990 thousand increase in funds for Management Professional Services supports ongoing financial statement audit remediation, strengthening internal controls, and improving financial data integrity to support the NDAA mandate to achieve an unmodified audit opinion by 2028.
(FY 2026 Baseline: $33,348 thousand; 81 FTEs)

6) International Security Cooperation Program (ISCP).....$27,310
The additional funding addresses the high transportation costs in delivering Building Partner Capacity program capabilities to recipient Allies and Partners as well as enhanced interoperability, and counter malign influence to uphold strategic objectives. The ISCP is critical in building the capacity of Allies and Partners, an essential component of the National Defense Strategy to counter China and preserve U.S. preeminence in the Western Hemisphere.

(FY 2026 Baseline: $1,499,808 thousand)

7) Irregular Warfare Center (IWC).....$6,137
Increases funds to expand the infrastructure of the National Defense University College of International Security Affairs and expand the IWC program of education. Specifically, this funding will provide additional professors to teach IWC education, and provide tuition and lodging for students from partner nations to support a 30 percent increase in student throughput.
(FY 2026 Baseline: $12,000 thousand; 7 FTEs; +0 FTEs)

8) Regional Centers for Security Studies.....$4,719
Increases funds in foreign national direct hire compensation (+$251,000), other costs (+$465,000), and other intra-governmental purchases (+$4,003 thousand) to prioritize administrative and medical care costs for personnel, intensified program planning, and accelerated course scheduling.
(FY 2026 Baseline: $82,540 thousand; 326 FTEs)

9) Regional Defense Fellowship Program (RDFP).....$16,231

Increases funds to support a 100% expansion of education and training for partner nation defense officials, directly furthering U.S. national security interests. The additional funds will expand engagement with priority countries across all combatant commands.

Funding will provide additional seats in high-demand master's programs at the National Defense University and the Naval Postgraduate School, while also increasing training throughput at RDFP network schools (JSOU, Regional Centers, ISG, etc.). The focus will be on critical areas including irregular warfare, homeland defense, special operations, combating terrorism, and cybersecurity.
(FY 2026 Baseline: $14,492 thousand)

10) Strategic Evaluations $1,667
Increases funds for other support to conduct additional evaluations pursuant to Title 10, Section 383 statutory requirements.
(FY 2026 Baseline: $1,075 thousand; 0 FTEs; +0 FTEs)

11) Taiwan Drawdown Stock Replacement.....$850,000
The Taiwan Drawdown Stock Replacement is intended to support the replacement of defense articles transferred to Taiwan from DoW stocks through the Presidential Drawdown Authority or the Taiwan Security Cooperation Initiative. Funds bolster Joint Force readiness and enable new procurements to replace equipment and services provided to Taiwan. Funds support DoW efforts in FY 2027 to strengthen Taiwan's self-defense capabilities while ensuring that assistance does not decrement Joint Force readiness. In FY 2026, a one-time provision of $850,000 thousand in mandatory funding was enacted in Public Law 119-21 supporting the DoW's $1,000,000 thousand request. In FY 2027, the discretionary increase is necessary replace the one-time mandatory funding and continue fully supporting this critical support to Taiwan.

(FY 2026 Baseline: $150,000 thousand)

9. Program Decreases .....$-904,419

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases .....$-834,205

1) Program Increase - Baltic Security Initiative.....$-200,000
Decrease is attributed to a one-time congressional add in FY 2026.

2) Program Increase - European Capacity Building .....$-400,000

Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $400,000 thousand)

3) Program Increase - George C. Marshall European Center for Security Studies.....$-4,000
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $9,000 thousand)

4) Program Increase - International Security Cooperation Programs - Bahrain.....$-10,000
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $266,000 thousand)

5) Program Increase - International Security Cooperation Programs - Jordan .....$-15,000
Decrease is attributed to a one-time congressional add in FY 2026.

6) Program Increase - International Security Cooperation Programs - Philippines.....$-40,000
Decrease is attributed to a one-time congressional add in FY 2026.

7) Program Increase - Irregular Warfare Center.....$-3,205
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $3,205 thousand)

8) Program Increase - P.L. 114-92 Section 1226.....$-75,000
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $75,000 thousand)

9) Program Increase - P.L. 115-68 implementation.....$-1,000
Decrease is attributed to a one-time congressional add in FY 2026.

10) Program Increase -Ted Stevens Center for Arctic Security Studies .....$-5,000

11) Program Increases - Irregular Warfare Center (Center of Excellence).....$-6,000
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $6,000 thousand)

12) Program Increases - Lebanon.....$-35,000
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $50,000 thousand)

13) Sec. 8065 USAFRICOM Allies and Partnerships.....$-25,000
Decrease is attributed to a one-time congressional add in FY 2026.
(FY 2026 Baseline: $25,000 thousand)

14) Transfer from CTEF for Lebanese Armed Forces.....$-15,000
Decrease is attributed to a one-time congressional add in FY 2026.

c) Program Decreases in FY 2027 .....$-70,214

1) DSCA Headquarters .....$-3,519
Decreases funds for administrative and lease costs as the direct result of a strategic initiative to optimize the real estate footprint, which includes a planned consolidation and reduction of headquarters facilities.
(FY 2026 Baseline: $33,348 thousand)

2) Efficiency - Contract Services .....$-44,800
The reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness. This reduction is allocated to the DSCA Headquarters $-441,000; ISCP $-38,958 thousand; IWC $-635,000; Regional Centers -$1,283 thousand; Regional Defense Fellowship Program $-351,000; AM&E $-646,000; DSCS $-1,545 thousand; DSCU $-817,000; and Strategic Evaluations $-124,000.
(FY 2026 Baseline: $3,392,441 thousand)

3) Efficiency - Supplies and Materials .....$-16,950
Reduces funding for supplies and materials to align with historical execution levels and ensure alignment with the priorities of the Secretary of War to improve the efficiency and effectiveness of our mission and business operations. This reduction is allocated to the DSCA Headquarters $-327,000; ISCP $-15,732 thousand; Regional Centers $-281,000; Regional Defense Fellowship Program $-260,000; and DSCU $-350,000.
(FY 2026 Baseline: $28,641 thousand)

4) Efficiency - Travel Budget .....$-2,841
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force. This reduction is allocated to the DSCA Headquarters $-109,000; ISCP $-2,382 thousand; AM&E $-21,000; and DSCU $-329,000.
(FY 2026 Baseline: $13,912 thousand)

5) Federal Retirement System – Agency Contribution Rates .....$-2,104
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities. This reduction is allocated to the DSCA HQ $-334,000; IWC $-32,000; Regional Centers -$999,000; DSCS $-313,000; and DSCU $-426,000.
(FY 2026 Baseline: $114,275 thousand)

FY 2027 Budget Request $3,780,757

IV. Performance Criteria and Evaluation Summary:

Performance measures support oversight, planning, and implementation of the defense strategy and combatant commanders' theater security cooperation strategies. These programs enable the DoW to strengthen and deepen partnerships across the globe both to address the dynamic security environment, as no country alone can address the globalized challenges we collectively face, and to help manage fiscal realities. The Department must continue to coordinate planning to optimize the contributions of our allies and partners to their own security and to DoW combined activities.

CAPACITY BUILDING

European Capacity Building

A. FY 2025 PRIOR YEAR ASSESSMENT

- N/A

B. FY 2026 CURRENT YEAR ASSESSMENT

- Pursuant to the authorities granted under P.L. 119-75, the Department will sustain and expand critical security cooperation initiatives and utilize ECB funding to resource activities that stabilize the European theater. These investments prioritize interoperability with allies and partners, directly supporting the Administration's defense objectives in the region

C. FY 2027 PLANS AND OBJECTIVES

- N/A

Taiwan Drawdown Stock Replacement (TDSR)

A. FY 2025 PRIOR YEAR ASSESSMENT

- In FY 2025, there was no request for TDSR funds. .

B. FY 2026 CURRENT YEAR ASSESSMENT

- TDSR is intended to support the replacement of defense articles and services transferred to Taiwan from DoW stock through the Presidential Drawdown Authority or TSCI. Funds will bolster Joint Force readiness and enable new procurements to replace equipment provided to Taiwan. In FY 2026, DoW is using TDSR to replace equipment transferred to Taiwan via drawdown. Funds ensure that Taiwan assistance does not decrement DoW readiness.

C. FY 2027 PLANS AND OBJECTIVES

- The DoW will continue to use TDSR in FY 2027 to continue high impact, priority programs.

Taiwan Security Cooperation Initiative (TSCI)

A. FY 2025 PRIOR YEAR ASSESSMENT

- The TSCI was enacted in the NDAA for FY 2025 and provides the DoW another security cooperation authority to address Taiwan defense requirements. The TSCI authority is modeled off the Ukraine Security Assistance Initiative and provides a mechanism to more flexibly support Taiwan defense acquisitions.
- In FY 2025, the DoW supported TSCI-funded programs to include coastal defense, training, support equipment and services. The U.S. Army and Navy are implementing the programs, which will have a significant and positive impact on Taiwan's defense readiness.

B. FY 2026 CURRENT YEAR ASSESSMENT

- In FY 2026, the DoW is using TSCI to address critical Taiwan defense requirements. The TSCI complements Taiwan's increased defense investments and other security cooperation and security assistance authorities.
- The DoW intends to use FY 2026 TSCI to fully fund and expand FY 2025 programs as well as support new programs that address Taiwan's most critical defense requirements.

C. FY 2027 PLANS AND OBJECTIVES

- The DoW will continue to use TSCI in FY 2027 to continue high impact, priority programs.

Ukraine Security Assistance Initiative (USAI) Authority in Support of PURL

A. FY 2025 PRIOR YEAR ASSESSMENT

- USAI continued to build Ukraine's capacity to defend its sovereignty and territorial integrity and support institutional transformational initiatives.

B. FY 2026 CURRENT YEAR ASSESSMENT

- In support of the Administration's prioritization of increased burden-sharing with allies and partners, USAI authority is being leveraged to support NATO-provided contributions for the PURL initiative.

C. FY 2027 PLANS AND OBJECTIVES

- In support of the Administration's prioritization of increased burden-sharing with allies and partners, USAI authority will continue to be leveraged to support NATO-provided contributions for the PURL initiative.

International Security Cooperation Programs (ISCP)

A. FY 2025 PRIOR YEAR ASSESSMENT

- The DSCA continues to stride in capacity building for allies and partners and take lead for regional security challenges, focusing resources on those threats that present strategic risk to the U.S. As part of the Department's foreign assistance review, all ISCP

activities were evaluated to ensure alignment with and advancement of Administration priorities. In FY 2025, the DSCA received $78 million above the President's Budget request, including $56 million from General Provision Sec. 8066 for U.S. Southern Command activities to expand and accelerate key partner capability milestones in addressing threats to the U.S. along the southwest border.

B. FY 2026 CURRENT YEAR ASSESSMENT

- The ISCP account remains the SecWar's primary tool to build partner capacity, reduce risk to U.S. forces, and enhance deterrence through increased partner lethality. In FY 2026, the DSCA fully utilizes Socium as the system of record, integrating AM&E efforts to maximize program effectiveness. Historically, ISCP funding has supported Women, Peace, and Security (WPS) initiatives that emphasize the critical role of women in peacebuilding and conflict resolution, advocating for their full participation in decision-making processes related to peace and security. The DoW directs WPS funding for the following countries within the USINDOPACOM area of responsibility: Bangladesh, Bhutan, Fiji, Indonesia, Laos, Malaysia, Maldives, and the Philippines to encourage full, equal, and meaningful participation of women at all levels of peacebuilding, security, and decision-making processes is essential to achieving sustainable global peace and security as required by the NDAA for FY 2023. Congressional adds in FY 2026 will ensure sustainment of WPS objectives.

C. FY 2027 PLANS AND OBJECTIVES

- The FY 2027 ISCP funding request will continue to enhance deterrence through increased partner lethality and prioritize security cooperation activities that directly deter attacks against the United States. The ISCP will continue to serve as a critical mechanism to support WPS-related efforts, aligning with U.S. defense priorities and congressional mandates. The request emphasizes the integration of AM&E frameworks to ensure accountability, maximize program impact, and deliver higher returns on U.S. investments. The DoW directs WPS funding for the following countries within the INDOPACOM AOR: Bangladesh, Bhutan, Fiji, Indonesia, Laos Malaysia, Maldives, and the Philippines to bring full, equal, and meaningful participation of women at all levels of peacebuilding, security, and decision-making processes is essential to achieving sustainable global peace and security as required by the NDAA for FY 2023.

SUPPORT TO OPERATIONS

Border Security

A. FY 2025 PRIOR YEAR ASSESSMENT

- In FY 2025, the program addressed emergent operational support requirements of eligible partners in the U.S. Central Command and U.S. Africa Command's areas of responsibility to increase security and sustain increased security along portions of their respective borders. The program enabled partner nations to defend their borders, counter ISIS, and other violent extremist organization operations globally, and help allies and partners degrade the flow of hostile fighters.

B. FY 2026 CURRENT YEAR ASSESSMENT

- In FY 2026 the program continues to address emergent operational support requirements of eligible partners in the U.S. Central

Command and U.S. Africa Command areas of responsibility to increase security and sustain increased security along portions of their respective borders. The program is enabling partner nations to defend their borders, counter ISIS and other violent extremist organization operations globally, and helping allies and partners degrade the flow of hostile fighters. In alignment with the President's priorities and the need to increase burden-sharing with allies and partners, the Department requested a smaller border security program in FY 2026.

C. FY 2027 PLANS AND OBJECTIVES

- In FY 2027, the program will continue to address emergent operational support requirements of eligible partners in the U.S. Central Command and U.S. Africa Command areas of responsibility to increase security and sustain increased security along portions of their respective borders. The program will enable partner nations to defend their borders, counter ISIS, and other violent extremist organization operations globally, and help allies and partners degrade the flow of hostile fighters. In alignment with the President's priorities and the need to increase burden-sharing with allies and partners, the Department will continue to seek a smaller border security program in FY 2027 compared to FY 2025 and prior years.

Lebanese Armed Forces

A. FY 2025 PRIOR YEAR ASSESSMENT

- There was no program for this in FY 2025.

B. FY 2026 CURRENT YEAR ASSESSMENT

- In FY 2026, the Lebanese Armed Forces Fund will provide assistance through training, equipment, logistics support, supplies and services, stipends, infrastructure repair and renovation, and sustainment for the Lebanese Armed Forces while aligning with U.S. defense priorities and congressional mandates.

C. FY 2027 PLANS AND OBJECTIVES

- Funding for the Lebanese Armed Forces in FY 2027 is requested in the Counter-ISIS Train and Equip Fund justification materials and will continue to provide assistance on identified capability gaps to further stabilize the state of Lebanon in accordance with U.S. defense priorities.

MANAGEMENT, INFRASTRUCTURE, AND WORKFORCE DEVELOPMENT

Assessment, Monitoring, and Evaluation (AM&E)

A. FY 2025 PRIOR YEAR ASSESSMENT

- In FY 2025, the DSCA Office of Administration/Performance, Improvement, and Effectiveness (ADM/PIE) revised the AM&E product

review process to incorporate additional layers of feedback prior to sending out the products for stakeholder review, improving quality and clarity of analysis. The ADM/PIE completed 137 AM&E products in FY 2025 in support of the Significant Security Cooperation Initiative (SSCI) process, including 35 Initial Assessments, 32 Performance Monitoring Plans, 9 Performance Monitoring Reports, and 61 Unit Snapshots, meeting 100% of the products requested. The ADM/PIE implemented its analytical reporting tool in several pilot countries, including Guatemala, Peru, Lithuania, and Lebanon. To align AM&E analysis with planning cycles and to support decision-making, ADM/PIE created 30+ summaries of AM&E findings and recommendations to systematically inform building partner capacity (BPC) proposals and Training and Equipment List (TEL) reviews, worked with OUSW(P)-Global Partnership to review 50+ FY 2025 Performance Monitoring Plans for SSCI process, and published the Quarterly Monitoring Report and Recommendations Review, which has provided an overview of trends in 149 recommendations since the 4th quarter of FY 2023.

B. FY 2026 CURRENT YEAR ASSESSMENT

- In FY 2026, ADM/PIE anticipates completing 115 assessment and monitoring products in support of the SSCI cycle, meeting 100% of the requirements given to the program by the CCMDs. The ADM/PIE has and will continue to work with the CCMDs to strategically prioritize assessment and monitoring of high-priority countries and programs. The program is exploring cost-effective software license options and alternative data collection methods to find efficiencies and maintain our ability to quantify program effectiveness. The ADM/PIE has systematically quantified the impact of AM&E recommendations on security cooperation programming (e.g., dollars saved due to AM&E input) via the FY 2027 BPC proposal and TEL reviews. The ADM/PIE also participated in the FY 2027 SSCI Feasibility Reviews by examining 116 SSCIs and contributing more than 300 AM&E-related comments on security cooperation program design and identifying potential risks to execution, sustainment, and effectiveness across five CCMDs. The ADM/PIE has also integrated measures of performance for security cooperation (alignment between delivery timelines, budget, scope, etc.) by country-SSCI into AM&E products, including the Quarterly Recommendations Review and Quarterly Monitoring Report.

C. FY 2027 PLANS AND OBJECTIVES

- The ADM/PIE anticipates being able to complete 110 products in FY 2027 and will work with the CCMDs to strategically prioritize assessment and monitoring of high-priority countries and programs. To ensure program success, ADM/PIE will continue to explore cost-effective software license options and alternative data collection methods to find efficiencies and maintain our ability to quantify program effectiveness. The ADM/PIE will integrate quantitative data on change in capability development overtime and trends in equipment delivery into the Quarterly Recommendations Review and Quarterly Monitoring Report. ADM/PIE will provide country-SSCI specific summaries for the FY 2028 BPC proposal and TEL Reviews and ongoing parts of the SSCI process.

Defense Security Cooperation Service (DSCS)

A. FY 2025 PRIOR YEAR ASSESSMENT

- This program did not exist in FY 2025.

B. FY 2026 CURRENT YEAR ASSESSMENT

- The DSCS achieved full operational capability effective 1 October 2025 as authorized by the NDAA for FY 2024 (10 U.S.C. § 384). Full administrative oversight responsibility for approximately 1,500 employees and their families at 136 SCOs worldwide was assumed from the CCMDs. This includes MILGP management functions at DSCS headquarters, DSCS forward support teams at each CCMD, and MILGPs in partner nations. It includes functions for MILGP human resources, both military and civilian, manpower, policy, family support, staff assistance, security, budget, training management and certification, and logistics to ensure MILGPs are appropriately staffed and resourced to accomplish their missions and secure U.S. national security interests. The DSCS also provides administrative support to the Ministry of Defense Advisors program that selects, trains, and partners detailed senior DoW civilian experts with foreign counterparts to build institutional capacity in key areas and with strategic partners - such as cyber, maritime domain awareness, acquisition and logistics, personnel and readiness, strategy and policy, human resource, and financial management.

C. FY 2027 PLANS AND OBJECTIVES

- In FY 2027 the DSCS will build upon the efficiencies gained in FY 2026 through becoming fully operational and consolidation of the security cooperation workforce. The DSCS will continue to provide administrative support and training to the global SCO workforce, deepen the USG's capacity to validate manpower needs, and ensure that funding authorities are properly aligned with MILGP workload and theater needs. Through the Security Cooperation Certification Program 2.0 standards, the DSCS will work closely with the CCMDs to ensure MILGPs are properly trained to a unified standard.
- Through the Security Cooperation Manpower Validation Process and deep knowledge of security cooperation operations, the DSCS is well positioned to strategically inform human and financial resource allocations in support of the security cooperation mission-set; theater security plans and strategies; military readiness; and U.S. foreign policy and U.S national security interests.
- The DSCS will also continue to work closely with the CCMDs to monitor security cooperation and administrative policy compliance by conducting thorough monitoring and evaluation staff assistance visits – ensuring that resources and manpower are maximized for the American taxpayer, and advance Administration and national security priorities.

Defense Security Cooperation University (DSCU)

A. FY 2025 PRIOR YEAR ASSESSMENT

- In FY 2025, the DSCU and its component organizations at the time —DSCU Operations, the Institute for Security Governance (ISG), the Defense Institute of International Legal Studies (DIILS), and the Defense Resources Management Institute (DRMI)—made significant progress in enhancing security cooperation effectiveness through ICB abroad and professionalization of the U.S. security cooperation workforce. These accomplishments, enabled by congressional funding, demonstrated DSCU's support to national security objectives through strategic workforce development and ICB. DSCU's FY 2025 programming met mission objectives internationally, via ICB, and domestically via the SCWDP and the Human Capital Initiative (HCI). Progress in workforce development and ICB positioned DSCU for continued support to national security priorities.
- DSCU Operations focused on professionalizing the security cooperation workforce and establishing a comprehensive management framework. Key achievements included developing and implementing security cooperation workforce Certification 2.0, incorporating core competencies, functional areas, and proficiency levels. DSCU identified and coded approximately 17,000 security cooperation workforce

positions across the DoW in accordance with 10 U.S.C. § 384. DSCU initiated the HCI assessment—senior leader interviews, focus groups, and a department-wide security cooperation workforce survey—and established an interim approach to collect and analyze security cooperation workforce composition pending development of a permanent security cooperation workforce management information system. DSCU developed security cooperation workforce courses and curricula in preparation for full-scale delivery of certification curriculum in FY 2026. DSCU's Defense SCO Institute completed its first year of programming in the National Capital Region, graduating 820 students and providing pre-deployment training for U.S. Military Group (MILGP) personnel serving at U.S. embassies worldwide.

- DSCU's Brigadier General Charles Young Research, Analysis, and Lessons Learned Institute created a system to develop, analyze, and integrate evidence into DSCU curriculum and security cooperation practice to support workforce professionalization. The institute contributed to the field of security cooperation by executing twelve research and development grants using FY 2025 appropriations and other funds available to DSCA in support of Section 384. In addition to providing a rich source of demand signals, the lessons learned program collected observations, conducted analyses and contributed to institutionalization of best practice with stakeholders across the security cooperation enterprise. The fourth annual Security Cooperation Conference brought together practitioners, researchers, and policymakers to identify lessons from history, supporting the integration of new evidence into practice.
- DSCU's ISG implemented Section 332 ICB activities as part of the notified FY 2025 ISCP programs. ISG conducted over 40 in-person advising activities, over 60 virtual activities, and numerous additional hybrid activities with global partners, strengthening defense management institutional foundations. DSCU focused on ICB planning review, producing ICB narratives and support plans for 85 countries, and supported U.S. Space Command and the DSCA Space Working Group in forming the Space Security Cooperation discipline with complementary ICB approaches.
- DSCU's DIILS executed strategically aligned engagements in support of evolving security cooperation priorities. DIILS conducted approximately 200 mobile ICB and Rule of Law/Human Rights engagements across the CCMDs and completed 8 multi-week resident courses involving more than 200 partner-nation participants. Activities supported integrated deterrence through mobile legal ICB efforts, Rule of Law/Human Rights education and training seminars, and multi-week in-person resident legal education courses. In response to a Government Accountability Office inquiry into DoW Human Rights training, DIILS initiated a curriculum redevelopment and expansion project intended to tailor future 10 U.S.C. § 333 training.
- DSCU's DRMI delivered professional education to strengthen defense governance and institutional capacity. DRMI educated more than 600 students through in-residence, virtual, and mobile courses; conducted mobile training and planned courses for bilateral delivery across the globe. Its flagship Senior International Defense Management Course annually hosted 40 senior leaders from 26 countries to address global security and resource management challenges. DRMI faculty also supported DSCU's development of Certification 2.0 courses to professionalize the security cooperation workforce.

B. FY 2026 CURRENT YEAR ASSESSMENT

- In FY 2026, DSCU is implementing plans to further enhance security cooperation effectiveness internationally and domestically. Supported by congressional funding, these activities demonstrate DSCU's continued commitment to national security through strategic workforce development and ICB. A central focus remains professionalizing the security cooperation workforce to improve the quality and speed of security cooperation programming and partner-facing activities, including foreign military sales (FMS). ICB remains critical to

bolstering allied and partner capability and enabling greater burden-sharing.

- DSCU is executing SCW Certification 2.0. All certification courses are available for registration, and the University continues to develop and deliver offerings to meet the needs of more than 17,000 security cooperation professionals across three proficiency levels in nine functional areas. DSCU is developing faculty expertise across the university to meet knowledge and skills gaps throughout the security cooperation workforce. The HCI is implementing technological solutions to stand up a management information system to manage the workforce and interface with learning platforms. DSCU's Defense SCO Institute is improving MILGP professional development and training and is on track to graduate more students than any prior year as it meets demand for pre-deployment training and effectively contributing to the speed and delivery of FMS. DSCU's Charles Young Research, Analysis, and Lessons Learned Institute is managing over 20 sponsored research projects, formalizing oversight procedures for research generation, and issuing grants and cooperative agreements in accordance with 10 U.S.C. § 384.
- DSCU is collaborating across the ICB community to refine program design and monitoring and to apply best practices for ICB planning in support of SSCI-funded priorities. DSCU faculty and staff are implementing and monitoring approximately 500 activities in over 80 countries. The ICB team is refining assessment and monitoring approaches and seeking greater integration with departmental, agency, and CCMD assessment, evaluation, and monitoring efforts. The team responsible for international advising and ICB implementation are also contributing to security cooperation workforce professionalization efforts by developing ICB modules for DSCU security cooperation workforce curriculum.
- DSCU is developing and implementing legal security cooperation engagements aligned with DoW strategic priorities and policy. DSCU is executing validated and resourced legal ICB plans developed with DSCA, the CCMDs, and other U.S. Government and partner-nation stakeholders, along with Rule of Law/Human Rights training requirements. DSCU is expanding its multinational legal education resident programs and reinvigorating traditional mobile education programs. DSCU is also tailoring 10 U.S.C. § 333 Rule of Law/Human Rights curriculum and training to achieve greater programmatic integration across all mission areas. DSCU legal experts provide unique knowledge on Rule of Law and Human Rights training required by 10 U.S.C. § 333 when the United States equips partners.
- In accordance with 10 U.S.C. § 384(f), DSCU is on track to fully operationalize its role as the Department's FMS Center of Excellence across regular operations, providing a focal point for FMS expertise and support. Medium-term impacts include more efficient, prioritized delivery of defense articles and services through FMS, support to the U.S. DIB, and expanded burden-sharing by allies and partners.

C. FY 2027 PLANS AND OBJECTIVES

- In FY 2027, DSCU will continue its mission of improving the quality and professionalism across the approximately 17,000 security cooperation workforce positions and advancing the study of security cooperation. DSCU will operate under a streamlined model for consolidated management and implementation of U.S workforce and partner-facing missions, deliver on its human capital mission, enable the delivery of DOW international military training and education, and enhance applied research activities.
- DSCU will continue to develop and deliver in-person, hybrid, and online instructor-led courses to professionalize the approximately 17,000-position security cooperation workforce, aligned to four proficiency levels and nine functional areas, and responsive to mission requirements.
- As the FMS Center of Excellence, DSCU will provide a focal point for FMS expertise and support. The program will prioritize integrated training and education to drive efficient, prioritized delivery of defense articles and services through FMS, support to the U.S. DIB, and

expanded burden-sharing by allies and partners. DSCU will also refine lessons-learned efforts to ensure research and analysis advance the NDS, inform real-world impacts, and institutionalize improvements in how the U.S. government conducts security cooperation.

- DSCU will expand collaborations and partnerships within the inter-agency and with external partners to elevate the study and practice of security cooperation and to ensure current, effective approaches. This includes continued development of cooperative programs and deepening the knowledge base of security cooperation professionals worldwide.
- DSCU's consolidated partner-facing ICB approach will enable DSCU to continue to serve as DoW's international training, education, and advising focal point and will enable partners to develop effective defense capabilities; ensuring foundational capacity building efforts support full-spectrum security cooperation objectives aligned with U.S. national security and defense priorities; and inform CCMD strategic plans while supporting SSCI development and planning. While funding for direct execution costs of security cooperation programs and SSCIs is provided through the ISCP program, DSCU's partner-facing request provides the U.S. government manpower, administrative support, and infrastructure necessary for implementation, management, and oversight of ICB programs.

Strategic Evaluations

A. FY 2025 PRIOR YEAR ASSESSMENT

- In FY 2025, the Department funded five strategic evaluations, the AM&E Symposium, and technical AM&E support that updates the AM&E Guidebooks. These Guidebooks are used by the global AM&E community, as supplementary guidance to DoD I 5132.14, "AM&E Policy for the Security Cooperation Enterprise." One example of how the Department leveraged evaluations to increase security cooperation effectiveness was to commission a formative evaluation developing a repository of indicators to help security cooperation practitioners monitor the effectiveness of programs and the return on investment of security cooperation initiatives. The Department utilized and disseminated strategic evaluation findings and recommendations with security cooperation stakeholders. The Department shared the results in different ways: 1) As required by law, OUSW(P) posted strategic evaluation public summaries on opendefense.gov to demonstrate transparency (to date, 19 public summaries have been posted online); 2) OUSW(P) leads validation workshops to review findings, refine recommendations, and identify specific actions for improvement; and 3) OUSW(P) shares evaluation reports with security cooperation stakeholders to include uploading reports to Socium, the SCDM program of record.

B. FY 2026 CURRENT YEAR ASSESSMENT

The Department plans to continue the strategic evaluation program in FY 2026 pursuant to Title 10, Section 383 requirements. Evaluations align with international and U.S. inter-agency evaluation standards, including Office of Management and Budget evaluation guidelines. For FY 2026, OUSW(P) will commission studies about regional security exporters and their role in promoting burden-sharing.

C. FY 2027 PLANS AND OBJECTIVES

- The Department intends to continue the strategic evaluation program in FY 2027 pursuant to Title 10, Section 383 requirements. OUSW(P) will prepare the strategic evaluation prioritization list. Findings and recommendations will be disseminated across the security cooperation enterprise.

EDUCATION AND TRAINING

Regional Defense Fellowship Program (RDFP)

A. FY 2025 PRIOR YEAR ASSESSMENT

- RDFP programmed the training of 1,500 mid and senior international military and security defense officials from 90 priority engagement countries in 2025: 80% in-residence students; 20% mobile education and training students to included 56 Master of Arts in Strategic Security Studies students: 29 at the College of International Security Affairs at National Defense University (College of International Security Affairs, Ft. McNair DC); 5 at the John F, Kenedy Special Warfare Center and School (Joint Special Operations Master of Arts Program, Ft. Bragg NC) and 22 at the Naval Postgraduate School's Special Operations Irregular Warfare Master of Science, Combating Terrorism Policy and Strategy Master of Arts and Information Strategy and Political Warfare Master of Science (Naval Postgraduate School, Monterey CA). The 90-day Security Assistance pause (January – April 2025) and the Foreign Assistance Review (March – June 2025) effectively reduced the number of international students eligible to participate in Security Assistance funded activities going forward, directing cease of assistance to all 30 previously engaged countries in EUCOM and 25 countries in AFRICOM. Additionally, the 2026 NDS and the DoW Comprehensive Review prioritized - defense of homeland, increase burden sharing from allies and partners; and deterrence of China, identifying INDOPACOM as the priority AOR. The program coordinated with the CCMDs and the Military Departments to implement those mission objectives and ensure critical regional strategic posture and mandated priorities are met.

B. FY 2026 CURRENT YEAR ASSESSMENT

- Executing the 2026 NDS, the RDFP prioritizes IW as its primary mission while maintaining a critical focus on Counterterrorism. Building on FY 2025's progress, the RDFP will train and educate approximately 1,000 mid- and senior-level international security officials from 60-70 priority countries, including 50 Master's degree candidates. The program's strategic focus is the U.S. Indo-Pacific Command region, directly addressing the threat posed by the Chinese Communist Party (CCP). Concurrently, it sustains essential activities in U.S. Southern Command and U.S. Central Command, improves security cooperation in Central Asia, and strengthens a trans-regional alumni network. The curriculum is tailored to modern threats, emphasizing adversary subversion, coercion, and weaponized information. To sharpen strategic decision-making, the RDFP is expanding. its investment in immersive tools like strategic gaming. CT efforts remain integrated with IW, concentrating resources on the most imminent Violent Extremist Organizations threats and building partner capacity in critical areas like border security to stem foreign fighter flows. Through enhanced online offerings and data-driven course design, the program ensures its training is targeted, effective, and directly aligned with U.S. defense objectives and congressional mandates.

C. FY 2027 PLANS AND OBJECTIVES

- In FY 2027, the RDFP will directly execute the 2026 NDS lines of effort – Defending the Homeland by Combatting foreign terrorist organizations and transnational criminal organizations, Deferring China in the Indo-Pacific and increasing burden share with allies and partners, by championing IW as its primary mission, while maintaining a critical focus on Counterterrorism against Violent Extremist

Organizations. To advance this strategy, the program will train and educate 1,600-1,800 students, including 80 master's degree candidates from priority partner nations. The curriculum is designed to counter adversary subversion, coercion, and weaponized information by applying IW principles to campaigning and integrated deterrence, utilizing immersive learning like strategic gaming to sharpen strategic decision-making. Engagements will be prioritized in the U.S. Indo-Pacific Command region to counter the CCP's malign activities, with sustained, targeted activities in the U.S. Southern Command and U.S. Central Command areas of responsibility. Counterterrorism programming will concentrate resources on degrading high-priority Violent Extremist Organizations threats through whole-of-government approaches, building partner capacity in border security, cybersecurity, and other IW-relevant skills. These efforts will be amplified by maintaining and expanding the RDFP's operational network of 7,000 global policymakers and IW practitioners to advance shared defense objectives against asymmetric, transnational threats.

Irregular Warfare Center (IWC)

A. FY 2025 PRIOR ASSESSMENT

- In FY 2025, the IWC remained an invaluable tool for the DoW IW education and research and supported U.S. efforts to encourage burden-sharing with partner nations and allies through capacity-building. Education and training programs continued to prove to be an effective strategic tool in the struggle against global concerns that threaten U.S. interests, both domestically and abroad. The IWC conducted over 200 high-impact events focused on Defense of the Homeland, countering China, and advancing IW activities in the U.S. Indo-Pacific Command among other topics with inter-agency stakeholders, academia, and over 80 allies and partners. The center served as the central mechanism for developing IW knowledge within the DoW and inter-agency, including as a leader of IW education. The IWC worked close with select allies and partners through its tailored resilience, resistance, and comprehensive defense programs intended to promote capacity-building, integrated deterrence, and whole-of-government security architectures.

B. FY 2026 CURRENT YEAR ASSESSMENT

- The FY 2026 program plans will maintain the initiatives of previous years and expand the global network of professionals through tailored education events centered around theater specific needs. The program will further amplify, illuminate, and address SecWar priorities in Defense of the Homeland, countering China, and advancing IW activities in the U.S. Indo-Pacific Command and promoting burden sharing with strategic allies and partners Included in the plan is to work closely with select allies and partners to outpace and counter foreign aggression through cost imposition, denial, and resilience, disrupting competitors' objectives through integrated deterrence maximizing collective actions of allies, partners, and other U.S. departments and agencies promoting a whole-of-government security architecture. The IWC will continue to provide IW core and tailored education and training efforts in the continental United States (CONUS) and outside the continental United States (OCONUS). The center will continue to expand its reach within the inter-agency and build out civil programs to enhance national security and reduce irregular threats to Department global crisis response

C. FY 2027 PLANS AND OBJECTIVES

- The FY 2027 program plan will build on the previous years' efforts and support the NDS key lines of effort: Defend the Homeland, deter China in the Indo-pacific, and increase burden-sharing with allies and partners. The IWC will prioritize comprehensive IW education and

engagement across U.S. government agencies, academia, and industry to address evolving IW challenges for the DoW, expanding its global network of IW professionals. The IWC will continue to provide IW education and understanding for key U.S. stakeholders to increase national resiliency in defending the homeland against irregular adversarial threats. The Center will also emphasize efforts and engagements within the Indo-Pacific, cooperating with allies and partners to address complex IW problems and the PRCs malign influence that challenges U.S. strategic interests in the region. Finally, the IWC will focus efforts and engagements on priority countries through co-hosted events and engagements to strengthen their defenses while freeing up the U.S. warfighter to better meet the nation's priority threats.

Irregular Warfare Center (Center of Excellence)

A. FY 2025 PRIOR YEAR ASSESSMENT

- The Academic Research Contract expanded and operated the global network of professionals through tailored research and educational events centered around theater specific needs and efforts within the inter-agency, CONUS and OCONUS.

B. FY 2026 CURRENT YEAR ASSESSMENT

- Research is focused on the Department's priorities of homeland defense, and countering China globally.

C. FY 2027 PLANS AND OBJECTIVES

- Research will focus on medical support to IW, cognitive warfare education, countering China and protecting Taiwan, and integration of IW into homeland defense.

Regional Centers for Security Studies

A. FY 2025 PRIOR YEAR ASSESSMENT

Africa Center for Strategic Studies (ACSS)

- In FY 2025 ACSS advanced African security by expanding understanding, providing a trusted platform for dialogue, building enduring partnerships, and catalyzing strategic solutions. ACSS utilized both in-person, virtual, and hybrid programs, blending the advantages of both environments, allowing the Center to reach the maximum number of participants possible. During FY 2025, ACSS executed eight virtual academic programs and 16 planned in-person programs focused on leadership, PME, military security development, maritime security, and over-the-horizon security challenges. Additionally, the center hosted both the U.S. Africa Command Strategic Dialogue in support of the Commander's theater objectives and participated in 10 U.S. Africa Command theater events. ACSS also responded to specific demand signals supporting 7 bilateral efforts promoting National Security Strategy Development, and PME enhancements in several countries, sustained a vibrant alumni network with chapters in 30+ countries, and contributed more than 46 analyses for use by U.S. and African security officials.

Daniel K. Inouye Asia-Pacific Center for Security Studies (DKI APCSS)

- During FY 2025, DKI APCSS completed three Comprehensive Security Cooperation courses, two Indo-Pacific Orientation Courses including one conducted in the National Capital Region, and two Transnational Security Cooperation courses equipping 650 security practitioners with critical insights and networks to tackle priority Indo-Pacific security challenges related to China and domains of consequence. In partnership with the OUSW(P), DKI APCSS facilitated the establishment of the Partnership for Indo-Pacific Industrial Resilience and initiated the Multinational Armaments Resilience Seminar to strengthen the U.S. DIB through collaboration. DKI APCSS leveraged its network of 16,000 Alumni and served as a platform for the SecWar's first speech to the Indo-Pacific region. DKI APCSS engaged Pacific Island partners to shape National Security Strategy development and implementation, convened the Indo-Pacific region on whole of society resilience to malign actors, and conducted an Indo-Pacific Senior Enlisted Leader Subject Matter Expert Exchange in coordination with U.S. Indo-Pacific Command to build more capable warfighters.

William J. Perry Center for Hemispheric Defense Studies (WJPC)

- In FY 2025, security and defense governance, countering transnational threats, cybersecurity policy, the rule of law, maritime security policy, and strategic planning remained the top priority for WJPC. WJPC's academic offerings supported responsiveness to changing political and diplomatic conditions and the development of tailored programs to ensure the advancement of OUSW(P)'s global and regionally specific goals, as delineated in the 2026 NDS, Secretary memorandums, and Executive Orders. In FY 2025, WJPC conducted 18 courses and 1 seminar for 959 participants from 22 countries. The programs included: Caribbean Security & Defense, Countering Hybrid Threats in the Americas, Strategic Implications of Human Rights and Rule of Law, Cyber Policy Development and Defense Artificial Intelligence Applications, Combating Transnational Organized Crime: Borderlands, Governance & Strategy for Security & Defense, Maritime Security Policy, Brazilian Defense Educational Enhancement Program (mobile courses), and Strategy & Defense Policy. Short-term special courses included the Washington Security and Defense Seminar, Quarterly Webinars, Sustained Regional Engagements, Faculty Outreach Seminars, National Security Planning Workshops, and "KRISIS!" tabletop exercises. Additionally, WJPC promoted research and publication of independent studies on governance, along with short bilateral and sub-regional seminars on defense governance, which were programmed in response to partner nation requests and guidance from OUSW(P) and U.S. Country Teams. WJPC built and leveraged communities of practice in accordance with Department guidance, cultivating them as venues for transnational cooperation, forums for DoW strategic messaging, and contributors to and repositories of a growing knowledge base in Defense Governance activities. WJPC developed programs that addressed regional security needs in the cyber domain, with academic programs on cybersecurity and defense remaining among the top requests from partner nation counterparts.

George C. Marshall European Center for Security Studies (GCMC)

- In FY 2025, GCMC quickly pivoted in response to updated policy and budgetary guidance to reduce costs and deliver programming aligned with the President's America First policy and commitment to achieving peace through strength. From October 2024 through August 2025, GCMC built partner capacity and a global network of security professionals by conducting 10 resident courses with 692 participants from 108 countries and graduating 401 participants from 33 countries in 21 Partner Language Training Center Europe courses. For non-resident activities, GCMC conducted 11 outreach events that included 225 participants from 35 countries; 9 alumni events with 146 participants from 16 countries; and 59 Partnership for Peace Consortium events with 866 participants from 54 countries. GCMC developed and initiated an AM&E program for implementation in FY 2026.

Near East South Asia Center for Strategic Studies (NESA)

- In FY 2025, NESA Center continued to implement the Department's Cross-cutting Policy Guidance for enhancing regional partners' capabilities by integrating our efforts through strategic-level education and training. NESA Center focused areas of emphasis supported DoW functional areas: Territorial and Maritime Security, Transnational and Asymmetric Threats, and Defense Sector Governance. The Center conducted professional military and civilian strategic education and training programs. Those programs created a long-term culture of communication and coordination with OUSW(P), Central Command, U.S. Africa Command, U.S. Indo-Pacific Command, U.S. European Command, United States government agencies, and other regional partners to achieve DoW objectives. NESA Center continued its FMS case efforts with the United States Military Training Mission to Saudi Arabia, the Ministry of Defense, Kingdom of Saudi Arabia, and DSCA to assist the Kingdom of Saudi Arabia in transforming its PME system to a self-sustaining institution that can support coalition warfighting capabilities. NESA continued working with the SCOs of Jordan, Lebanon, Armenia, the United Arab Emirates, Nepal, and Oman, on assisting them in transforming their PME system. Additionally, in coordination with the Office of Security Cooperation-Iraq and DSCA, NESA executed an FMF case to assist Iraq in developing a self-sustaining PME program through their National Defense University and Capstone programs. NESA Center continued coordination as a listening post network with the Institute of Middle East Options, the University of Ottawa, the Middle East Institute, and the International Institute for Strategic Studies, covering strategic international challenges such as the impact of the establishment of diplomatic relations between the Arab countries, South Asian Regional Security, Middle East-North Africa Security, and the India-Pakistan Military to Military Relationship. NESA Center completed 64 programs/events with 1,703 participants, producing 1,091 alumni from 96 countries.

Ted Stevens Center for Arctic Security Studies (TSC)

- In FY 2025, the TSC conducted activities in the areas of executive education, research and analysis, and strategic engagement, focused on informing and advancing Arctic deterrence, Arctic operational analysis, warfighter preparations for the high latitudes, and contending and confronting Chinese and Russian malign activities across the Arctic region. Through these activities, which included in-person and virtual courses, seminars, workshops, video content and podcasts, research presentations and publications, and alumni engagement, TSC addressed specific strategic and policy interests of the Office of the SecWar and CCMDs, specifically related to the SecWar's listed priorities as stated to improve lethality, warfighting, and readiness as main lines of effort for DoW.

B. FY 2026 CURRENT YEAR ASSESSMENT

Africa Center for Strategic Studies

- ACSS's activities in FY 2026 will prioritize supporting the U.S. Warfighter, countering terrorist threats that pose a threat to the U.S. homeland, deterring China's malign activities in Africa, enhancing partnerships related to critical minerals, and burden-sharing with African partners and other external actors in support of the FY 2025 NDS and America First priorities. ACSS will retain flexibility to meet African demand signals using those opportunities to support and promote the NDS security objectives. ACSS will continue to support and prepare the U.S. Warfighter for deployments or future operations in Africa and complement the U.S. Africa Command theater strategy and operational activities of its component commands and other DoW entities. ACSS plans to execute 13 in-person programs

and 12 virtual programs in FY 2026 and anticipates supporting up to 4 requested bilateral events. The Center will again host the U.S. Africa Command Strategic Dialogue in support of theater objectives and inter-agency cooperation with a focus on expanding access to critical minerals in Africa.

Daniel K. Inouye Asia-Pacific Center for Security Studies

- The DKI APCSS's FY 2026 implements the Center's FY 2026-2030 strategy and prioritizes U.S. homeland defense, deterrence of China, and burden- sharing with allies and partners through programming that contributes to DoW priorities of protecting the homeland, deterrence in the Indo-Pacific, burden sharing, and supercharging the industrial base. DKI APCSS activates its 16,000 strong alumni base to cooperate on key challenges; and build consensus among regional security practitioners and with U.S. allies and partners. Programs including Multilateral Armaments Resiliency Seminar, the Comprehensive Security Cooperation Fellow Project program, Whole-of-Society Resilience Workshop, and the India Defense Industrial Cooperation Workshop will develop solutions to regional and functional security challenges. Center courses, workshops, and engagements with key stakeholders including the Young Civilian Defense Leaders/Emerging Defense Leaders Program and alumni seminars will build relationships among the U.S. and its regional allies and partners and leverage them to address DoW priorities. DKI APCSS will also enable warfighters through developing the revised Indo-Pacific focused Joint PME II course with U.S. Indo-Pacific Command and National Defense University. Targeted regional engagements will shape regional narratives on security issues in the Indo-Pacific and counter the CCPs messaging while providing key regional insights to DoW stakeholders.

William J. Perry Center for Hemispheric Defense Studies

- In FY 2026, WJPC maintains its focus on security and defense governance, countering transnational threats, cybersecurity policy, and maritime security policy as top priorities, aligning academic programs with the 2026 NDS, Secretary memorandums, and Executive Orders. WJPC is delivering eight in-residence courses that address key regional and global security challenges: Border Security and Homeland Defense; Caribbean Security and Defense Course; Countering Hybrid Threats in the Americas; Cyber Policy Development and Artificial Intelligence Applications for Defense; Governance and Strategy for Security and Defense; International Relations and the Inter-American System; Maritime Security Policy; and Space Policy and Strategy. Our virtual offerings expand access and strengthen capacity-building efforts, with courses such as the Defense Education Pedagogy and the Cybersecurity Fundamentals Asynchronous Course. Mobile courses extend WJPC's reach to partner nations through Countering Hybrid Threats, Maritime Security Policy, the Mexico Education Enhancement Program, Space Policy and Strategy, and Strategy and Defense Policy. In addition to these core programs, the Perry Center executes a range of high-impact activities that reinforce defense governance networks and strategic dialogue. These include the Alumni Day/Annual International Security Conference, Alumni Leaders' Summit, the Conference of Defense Ministers of the Americas Working Group, and the Ibero-American Defense Colleges Association Summit. We also conduct National Security Planning Workshops and "KRISIS!" tabletop exercises, participate in U.S. Southern Command conferences such as Caribbean Nations Security Conference, Central American Security Conference, and South America Defense Conference, and deliver several Sustained Regional Engagements. WJPC advances strategic partnerships through events such as the Transatlantic Maritime Security Symposium with the ACSS and the Washington Security and Defense Seminar. Webinar series and targeted faculty outreach continue to provide timely professional development opportunities and advance Departmental strategic objectives. Across all activities, WJPC cultivates enduring Communities of Practice, strengthens hemispheric partnerships, and delivers programs that address the most

pressing security and defense governance challenges in the Americas and beyond.

George C. Marshall European Center for Security Studies

- In line with the 2025 National Security Strategy and the 2026 NDS, the GCMC has developed and implemented all new programs and activities to advance a strategy of denial by enabling European allies to assume primary responsibility for the conventional defense of Europe, requiring allies to invest in a responsive and resilient transatlantic DIB capable of producing materiel at the scale and speed required for a protracted conflict. GCMC's FY 2026-2027 program plan is designed to advance the following U.S. priorities: (1) ensure combat-credible European-led deterrence and defense: achieved through increased burden-sharing, greater defense institutional capacity, combat-focused interoperability and (2) preserve U.S. strategic influence: by leveraging our network to ensure allied defense policies and capability development align with U.S. priorities for deterring aggression in Europe and freeing U.S. resources to focus on our primary theater. Program plan highlights include (1) Gap analysis: identifying and addressing critical gaps related to European capabilities, strategic alignment, and defense management to drive the programmatic efforts that ensure European allies are ready to lead a combat-credible deterrence and defense; (2) four in-region workshops: convening subject-matter experts, policymakers, and defense industry leaders in key European partner countries to expand on identified strategic gaps through practical implementation-focused training, linked virtual seminars, and policy shaping engagements; (3) four modular skills- and outcomes-based resident programs: informed by real-time gap analysis and in-region workshop findings to build strategic knowledge, shared frameworks, and trusted relationships that advance European-led defense, burden-sharing, and national defense management; (4) Gap Dialogue: high-level dialogue convening senior stakeholders—including policymakers, military leaders, industry executives, and innovators—to showcase successful models, disseminate strategic insights, and provide a platform for coordinating messaging that aligns national strategies and reinforces U.S and allied defense priorities; (5) Foreign Area Officer and Language Training and Interoperability Programs: warfighter-focused training and interoperability programs aligned with U.S. strategic priorities and NATO standardization to enhance warfighter effectiveness, regional expertise, and allied interoperability in support of European-led deterrence and defense; and (6) Defense Partnerships: strategic collaboration with U.S. DoW Regional Centers and PME institutes to amplify engagement reach, enhance policy resonance, and reinforce transatlantic alignment. To ensure GCMC programs are advancing U.S. priorities, the GCMC will implement an AM&E program that assesses partner capability and programmatic risks, monitors implementation of program and activities, and evaluates efficiency and effectiveness to ensure programs and activities achieve desired outcomes.

Near East South Asia Center for Strategic Studies

- In FY 2026, the NESA Center's FY 2026-2027 program plan comports with direction from the OUSW(P), the NDS, National Military Strategy (NMS) and Cross-cutting Policy Guidance and supports warfighters in four U.S. CCMD areas of responsibility: U.S. Central Command, U.S. Africa Command, U.S. Indo-Pacific Command, and U.S. European Command. It prioritizes burden-shifting among regional partners and allies, deters the CCP's influence in critical supporting subregions of Eurasia, seeks to counter terrorism directed at the U.S. homeland from those same regions, and exercises broad and deep networks of national security leaders to maintain strategic situational awareness. Critical to our mission planning is maintaining our ability to respond to a surge in requests, since October 2025, from regional partners, via U.S.C.T SCOs, for mid/senior-level officer training and consults for major defense and security transformation initiatives (Jordan, Oman, Azerbaijan and Kingdom of Saudi Arabia). The NESA Center is continuing its FMS case efforts with the United

States Military Training Mission to Saudi Arabia, the Ministry of Defense, Kingdom of Saudi Arabia, and DSCA to assist the Kingdom of Saudi Arabia in transforming its PME system to a self-sustaining institution that can support coalition warfighting capabilities. NESA Center continues to provide support to and prepares U.S. warfighters for deployments or future operations in our region and complement the Service's foreign area officer/specialist training and education. NESA provides subject matter experts to Combatant Commands and other USG agencies. The NESA Center intends to deliver actionable outcomes that contribute positively to DoW objectives, NDS, NMS and Cross-cutting Policy Guidance:

Shift Burdens. NESA will focus on strengthening and improving coalitions that are able to deter through strength without U.S. direct support. The following outcomes are expected:

- Developing strategic planning for own national defense
- Aligning warfighting capability and doctrine to U.S. combat standards
- Maintaining English as the language of coalition warfare
- Promoting U.S. military capability and American combat system
- Developing Concept of Operations to enhance regional collective defense
- Maintaining interoperability among Abraham Accord signatories

Deter China. NESA will conduct programs designed to create and strengthen maritime domain awareness networks. The following outcomes are expected:

- Expanding public-private partnerships in the maritime domain
- Developing multi-lateral networks promoting regional defense

Defend the Homeland. NESA will conduct programming designed to expand cooperation to counter terrorism, violent extremist organizations, and transnational crime directly responsible for funding terrorism. The following outcome is expected:

- Conducting exercises that counter terrorism and transnational threats

Alumni Networks. NESA will continue to expand and reinforce a robust alumni network of over 15,000 alum that can serve as strategic listening posts in the region as resources align to the Pacific to counter China. The following outcome is expected:

- Expanding regional early warning listening networks

Ted Stevens Center for Arctic Security Studies

- In the FY 2026, the TSC maintained its focus on deterrence, operational analysis, warfighter preparation, and countering Chinese and Russian malign activities to achieve peace through strength in the region. Realigned with the 2026 NDS, the TSC provides the education, knowledge, intellectual foundation, and allied network required to secure U.S. interests in the Arctic through its core lines of effort: warrior-focused education, problem-solving applied research, and clear-eyed engagement and dialogue. TSC programmatic activities are explicitly mapped to the NDS Lines of Effort (LOE), using five TSC Enduring Conditions (EC) as the primary mechanism for execution: TSC directly supports the U.S. Homeland (LOE 1) by advancing Arctic awareness (EC 1) and advancing Arctic priorities (EC 2) to secure the homeland’s northern approaches. Through effective support to deterrence (EC 4), TSC enables DoW effort to counter

China's Arctic initiatives and campaigning in the Indo-Pacific (LOE 2). TSC enables the Increase in burden-sharing with U.S. Allies (LOE 3) by forging a cohesive allied front willing to take primary responsibility for their own defense (EC 3), which underpins a credible deterrent posture (EC 4). TSC supports the mission to advance the U.S. Defense Industrial Base (LOE 4) and identify the Arctic resources and supply chain risks vital to our national mobilization (EC 5). This programming ensures every activity is a purposeful and efficient investment in rebuilding our nation's military power, capability, and capacity.

C. FY 2027 PLANS AND OBJECTIVES

- For FY 2027, DoW Regional Center programs will align to support the 2026 NDS and remove course content that focuses on Diversity, Equity, and Inclusion, gender, and Women, Peace, and Security, and climate change. The Regional Centers will employ their inter-regional networks and activities for stakeholder engagements to address common national security interests, especially in defense of the homeland and deterring China. Academic programs will include in-residence, virtual, and in-region courses conducted with partner institutions that cover the strategic priorities for each region. The Regional Centers will also develop programs and activities that support the CCMD theater engagement strategies and other CCMD efforts.

Africa Center for Strategic Studies

- ACSS's activities in FY 2027 will continue to prioritize support to the U.S. Warfighter through the training and education of U.S. military personnel serving in the African operating environment. Activities will focus on countering terrorist threats to the U.S. homeland and countering the CCP's malign activities in Africa that negatively affect U.S. military interests. Moreover, a cross-cutting theme underpinning all ACSS efforts will continue to focus on increasing the burden-sharing capability of African partners to ultimately achieve burden-shifting to respond to security crises and prevent terrorist organizations from posing a threat to the United States. The Center will enhance partnerships related to security-related critical minerals objectives and retain flexibility to adjust programming to align with changes in strategic guidance. ACSS's program will focus on continued engagement through a combination of in-person and virtual programs and will continue to support U.S. Africa Command's theater campaign plan.

Daniel K. Inouye Asia-Pacific Center for Security Studies

- The DKI APCSS FY 2027 program operationalizes the Center's FY 2026-2030 Strategy, which is in direct support of the 2026 NDS and Indo-pacific security assistance and USINDOPACOM priorities for the Center. The Center's efforts are centered on defending the U.S. homeland, deterring China, increasing burden-sharing with allies and partners, and supercharging the defense industrial base. In coordination with Indo-pacific security assistance, priority themes identified for FY 2027 include maritime security/maritime domain awareness; cybersecurity; defense industrial base; India engagement; leveraging civil-military relations for access, basing and overflight; strategic messaging to the Indo-Pacific region; and security cooperation coordination. These themes are infused into recruiting priorities, topical focus of programs, and curriculum. FY 2027 programs will empower security practitioners to advance solutions to Indo-Pacific security challenges, convene allies and partners to collaborate more effectively with the United States and each other, and will shape and articulate Indo-Pacific perspectives to impact strategic assessments of the security environment. Programs include the Multilateral Armaments Resilience Seminar, Comprehensive Security Cooperation and its Fellow Project program, Transnational Security Cooperation, Indo-Pacific Orientation Course, Whole-of-Society Resilience Workshop, and the Young Civilian Defense

Leaders/Emerging Defense Leaders Program. The FY 2027 plan allows the Center the flexibility to address emerging priorities and challenges identified by OUSW(P) and U.S. Indo-Pacific Command. Internally, the Center will continue to align resources, optimize processes, leverage technology, and invest in infrastructure to deliver outcomes effectively and efficiently to DKI APCSS stakeholders.

William J. Perry Center for Hemispheric Defense Studies

- In FY 2027, WJPC will focus on strategic guidance from the 2026 NDS which elevated the Western Hemisphere as the Department's top priority. We will focus on improving partners burden-sharing posture and readiness in ways that enable them to independently respond to regional threats such as illegal migration and narcotics and allow the United States to set the conditions for peace through strength.
- WJPC will ensure that it expends resources in line with the President's America First and Peace Through Strength policies. We will deliver five in-residence courses that will address key regional and global security challenges: Homeland Defense and Border Security, Caribbean Security and Defense Course, Countering Transnational Organized Crime, Cyber Policy Development and Artificial Intelligence Applications for Defense, and Governance and Strategy for Security and Defense. WJPC's virtual offerings will expand access and strengthen capacity-building efforts, with courses such as the Defense Education Pedagogy and the Cybersecurity Fundamentals Asynchronous Course; Combating Transnational Organized Crime; and Space Policy and Strategy. Mobile courses will extend WJPC's reach to partners with demonstrated burden sharing efforts. We intend to conduct five mobile courses: Countering Transnational Organized Crime, Cyber Policy Development, Maritime Security Policy, Space Policy and Strategy, and Strategy and Defense Policy. In addition to these core programs, the Perry Center will execute a range of high-impact activities that will reinforce defense governance networks and strategic dialogue. These will include the Alumni Day/Annual International Security Conference, Alumni Leaders' Summit, the Conference of Defense Ministers of the Americas Working Group, and the Ibero-American Defense Colleges Association Summit. We will also conduct National Security Planning Workshops and "KRISIS!" tabletop exercises, participate in U.S. Southern Command conferences and deliver several Sustained Regional Engagements. Strategic partnerships will be advanced through events such as the Transatlantic Maritime Security Symposium with the ACSS and the Young Leaders Workshop in partnership with the DKI APCSS. The Washington Security and Defense Seminar, a robust webinar series, and targeted faculty outreach will continue to provide timely professional development opportunities and advance Departmental strategic objectives. WJPC will maximize its network and resources through in-residence, virtual, and in-region engagements to advance democratic security and defense institutions, strengthening the safety, stability, and prosperity of the Western Hemisphere.

George C. Marshall European Center for Security Studies

- GCMC's FY 2027-2028 efforts directly support the Department's priorities by driving an effective division of labor where allies assume the lead in Europe, allowing the U.S. to prioritize the homeland and the Indo-Pacific, while fostering a transatlantic defense industrial base that enhances our collective capacity for denial. In FY 2027-2028, GCMC will continue to model effective burden-sharing by increasingly relying on allied and partner contributions to deliver GCMC operations and programs. In FY 2027, GCMC will refine its newly established self-payer model, including the use of existing FMS Blanket Order Training Cases for self-funded participation by allies and partners, and will increase its reliance on allied and partner sponsorship and voluntary national contributions to deliver programming. GCMC's FY 2027-2028 programs aim to (1) build practical defense management skills to help allied and partner ministries translate increased defense resources into credible warfighting capabilities to assume primary responsibility for Europe's conventional defense; (2) convene forums to advance solutions to the challenges facing the transatlantic DIB and collective defense production; (3) build the intellectual and

linguistic interoperability required for allies and partners to think, plan, communicate, exercise, and fight together; (4) advance a shared understanding of threats to the U.S. and allied homelands; and (5) deliver a strategically-aligned network that provides the United States with access and influence to support defense priorities. To advance these objectives, GCMC will continue to deliver its primary programs consisting of GAP Analysis, four modular resident courses, four in-region workshops, a series of online seminars, one senior executive seminar, the GAP Dialogue, and language interoperability skills-based programs to achieve U.S. priorities. In FY 2027, GCMC will continue to develop and expand its capability and capacity to provide on-demand support and assistance with the development of allied and partner strategic planning documents and the in-region delivery of skills-based training programs. GCMC will continue to develop and expand its capability and capacity to deliver technology-enabled programs with in-person, blended, hybrid, and online components. These primary programs are complemented by training programs for U.S. linguists and Foreign Area Officers and other engagements to further advance U.S. defense priorities. GCMC's FY 2027-2028 programs will remain scalable and flexible to respond to emerging requirements.

Near East South Asia Center for Strategic Studies

- In FY 2027, the NESA Center will continue implementation of its FY 2026-2027 Program Plan with direction from the OUSW(P), NDS and NMS and Cross-cutting Policy Guidance, and support warfighters in four U.S. CCMD areas of responsibility (U.S. Central Command, U.S. Africa Command, U.S. Indo-Pacific Command, and U.S. European Command). NESA will continue to prioritize burden-shifting among regional partners and allies, deter CPP influence in critical supporting subregions of Eurasia, counter terrorism directed at the U.S. homeland from those same regions, and exercise broad and deep networks of national security leaders to maintain strategic situational awareness. The NESA Center will also continue to support and prepare the U.S. Warfighters for deployments or future operations in our region and conduct Foreign Area Officer in-region training based out of Fort McNair. NESA will provide in residence training to U.S. Army and USMC War College fellows. NESA will continue to provide subject matter experts to Combatant Commands and other USG agencies as required. The NESA Center will continue to deliver actionable outcomes that contribute positively to DoW objectives, OUSW(P) priorities, NDS, NMS and Cross-cutting Guidance:

Shift Burdens. NESA will focus on strengthening and improving coalitions that are able to deter through strength without U.S. direct support.

Deter China. NESA will conduct programs designed to create and strengthen maritime domain awareness networks.

Defend the Homeland. NESA will conduct programming designed to expand cooperation to counter terrorism, violent extremist organizations, and transnational crime directly responsible for funding terrorism.

Alumni Networks. NESA will continue to expand and reinforce a robust alumni network that can serve as strategic listening posts in the region as resources align to the Pacific to counter China.

Ted Stevens Center for Arctic Security Studies

- In direct execution of the 2026 NDS, TSC provides the education, knowledge, intellectual foundation, and allied network required to

secure America's concrete interests involving the Arctic region – especially regarding its role in homeland defense; these results occur through core lines of effort: warrior-focused education, problem-solving applied research, and clear-eyed engagement and dialogue. TSC programmatic activities are explicitly mapped to the NDS LOE, using five TSC ECs as the primary mechanism for execution: The Center directly supports the U.S. Homeland (LOE 1) by advancing educating and producing expert warfighters (EC 1), as well as enabling Comprehensive Domain Awareness (EC 2) to secure the homeland's northern approaches, which frees resources and enables DoW efforts to deter China's Arctic initiatives and campaigning in the Indo-Pacific (LOE 2). TSC enables the Increase in Burden-Sharing with U.S. Allies (NDS LOE 3) by forging a cohesive allied front willing to take primary responsibility for their own defense (EC 3), which underpins a credible deterrent posture (EC 4). TSC supports the mission to advance the U.S. Defense Industrial Base (NDS LOE 4) and identify the Arctic resources and supply chain risks vital to our national mobilization (EC 5). This programming ensures every activity is a purposeful and efficient investment in rebuilding our nation's military power, capability, and capacity.

ADMINISTRATIVE SUPPORT SERVICES

DSCA Headquarters

A. FY 2025 PRIOR YEAR ASSESSMENT

- The DSCA headquarters supported the Department's mission by enabling the agency to begin optimizing the workforce, flattening hierarchies, and consolidating functions across the agency to comply with Executive Order 14210, "Implementing the President's Department of Government Efficiency Workforce and Executive Order 14222, "Implementing the President's Department of Government Efficiency Cost Efficiency Initiative." This resulted in a consolidation of back-office functions across the agency to a single chain of command by leveraging the reduction of billets through attrition and non-renewal of term employees. The headquarters reduced six Assistant Directors (Senior Executive Service) down to four and reduced Deputy Assistant Director levels (GS-15) by one-third. These actions enhanced the management of enterprise security cooperation programs, ensuring stronger alignment with U.S. policy interests and objectives outlined by the White House and the DoW. The budget facilitated the headquarters' administration of security cooperation activities delegated by the OUSW(P), including the administration of arms transfers, military training, institutional capacity building, end-use monitoring, and humanitarian assistance.
- The POCS program, through the Regional Center Persons and Activity Management System (RCPAMS), provided IT solutions to support recording, reporting, and managing student logistics related to international security cooperation practitioners, their course enrollments, and events at DoW Regional Centers for more than 86,000 students and alumni from 193 countries. Through GlobalNET, the POCS program provided international partners and alumni the ability to continue collaboration with U.S. and other foreign partners on important security issues. GlobalNET also provided the means for U.S. academic institutions to maintain contact with their alumni to sustain lasting relationships for over 86,000 Regional Center alumni, over 80% of Regional Center alumni remain active users of GlobalNET. In FY 2025, POCS continued to leverage RCPAMS and GlobalNET in support of international fellows programs at U.S. Army War College and U.S. Naval Postgraduate School, further integrating efforts of security cooperation providers in the training and education field. RCPAMS continues to improve its stability and security posture. GlobalNET hosts more than 2,000 courses online, 265 of which are self-paced. Congress relies on POCS data provided from RCPAMS in the Foreign Military Training Report, submitted annually pursuant to the Foreign Assistance Act of 1961 (22 U.S.C. § 2416). RCPAMS has also been used for deep dives by the U.S.

House Appropriations Subcommittee on Defense to support appropriations and diplomatic decisions. Together POCS systems created positive impressions while training partner nations through the more than 151,000 students and alumni interactions with these systems each year.

- In FY 2025, DSCA continued to implement capability and functional enhancements to Socium including authority-specific congressional reports, expanded partner nation organization information, social network analysis, tranche analytics, improved training and equipment list features, resource allocation plan automation, integrated chat functionality, expanded full spectrum planning and reporting capabilities for Title 10 and Title 22 authorities, improved support for military assistance and advisory activities, and continued interfaces with authoritative data source and geographic information systems to further integrate security cooperation planning, budgeting, resourcing, and Assessment, Monitoring, and Evaluation. Additionally, Socium interfaced with Command and Control Information Exchange, creating linkages between strategic guidance through Command Campaign Plans and their respective Intermediate Military Objectives.

B. FY 2026 CURRENT YEAR ASSESSMENT

- Under the reorganization, the DSCA headquarters is focusing on finding ways to prioritize speed over process by consolidating regionally oriented planning, execution, and operations functions into one work stream as well as business operations and administrative functions into the other. The agency is implementing a “no vestiges of the past” approach in reducing or eliminating Civilian Harm Mitigation and Response, Women, Peace and Security, climate programs, and other legacy priorities from within the headquarters. The headquarters is also significantly reducing its level of effort on partner capacity building mission sets, which will encourage and enable foreign partners to responsibly act in support of U.S. national security objectives. The headquarters is enforcing stronger fiscal discipline by targeting savings of $1.2 million per year in website operating costs by moving to a centralized content management system used throughout the department. These efforts contribute to the Department’s mission by supporting ongoing efforts to centralize functions, realign offices and personnel, and upgrade systems to better align with DSCA’s core missions. These initiatives are designed to enhance operational efficiency and optimize the management of enterprise security cooperation programs, ensuring stronger support for U.S. policy interests and objectives as outlined by the White House and the DoW. The budget provides the necessary resources to advance these priorities while promoting a clearer understanding of how allocated funds drive mission success.
- The POCS Program continues to provide the GlobalNET and RCPAMS platform operation and maintenance support, to include internet hosting for the GlobalNET and RCPAMS platforms, monitoring for intrusions, malware, system performance, and uptime in a certified risk management framework certified facility. POCS also provides support desk operations to end-users at the DoW Regional Centers. POCS implements upgrades and development as required. POCS continues to expand access to both systems for a host of DoW schoolhouses, thus expanding a common database and knowledge base on which security cooperation providers can draw. RCPAMS will continue to provide logistics, reporting, and tracking capabilities to the DoW Regional Centers for Security Cooperation training and partner capacity building activities. Personnel support is provided to assist institutions and partners globally during courses, seminars, outreach events, and the GlobalNET development team, to conduct operational testing, and to provide tier one support. POCS continues support to partner countries and maintain mechanisms for partners to collaborate and continue to update the GlobalNET technology to ensure the system remains relevant mission assets for the DoW Regional Centers.
- Socium: In FY 2026, DSCA will continue implementing capability and functional enhancements to Socium including authority-specific congressional reports, expanded partner nation organization information, social network analysis, tranche analytics, improved training

and equipment list features, resource allocation plan automation, integrated chat functionality, expanded full spectrum planning and reporting capabilities for Title 10 and Title 22 authorities, improved support for military assistance and advisory, and continued interfaces with authoritative data source and geographic information systems to further integrate security cooperation planning, budgeting, resourcing, and AM&E. FY efforts will integrate Program Customer request data will occur between Socium and the Defense Security Assistance Management System (DSAMS), make enhancements to the annual SSCI development, and further refine capabilities of the Training and Equipment List operations performed in Socium. Additionally, Socium will be looking to transition to hosting cloud providers in attempts to improve zero trust compliance, be better positioned for Identity, Credential, and Access Management, and conform with DOW Chief Information Officer technology standards.

C. FY 2027 PLANS AND OBJECTIVES

- The DSCA headquarters will continue to contribute to the Department's mission by enabling the agency to assess the centralization of functions and the realignment of offices and personnel. These efforts will streamline planning, achieve economies of scale, enhance responsiveness to policy directives, and consolidate all back-office functions under a unified chain of command. Additionally, the budget will support DSCA's review of duplicative budget databases to identify opportunities for integration, improving efficiency and optimizing the management of enterprise security cooperation programs. By providing the necessary resources, the FY 2027 budget will promote a greater understanding of how these initiatives advance the Department's objectives.
- The POCS Program will continue to provide the GlobalNET and RCPAMS platform operation and maintenance support, to include internet hosting for GlobalNET and RCPAMS, monitor the system for intrusions, malware, system performance, and uptime in a risk management framework certified facility. RCPAMS will continue to provide logistics, reporting, and tracking capabilities to the DoW Regional Centers' training and partner capacity building activities. Migrating the hosting of GlobalNET to a shared DoW managed Learning Management System is being explored. POCS systems are part of the planned life-cycle replacement and modernization along with other Title 22-funded systems in the training, education, and workforce program. This effort is expected to replace four systems with one and decommission one system.
- DSCA will continue to perform SOCIUM platform and operational maintenance support including capability and functional enhancements to Socium such as authority-specific congressional reports, expanded partner nation organization information, social network analysis, tranche analytics, improved training and equipment list features, resource allocation plan automation, integrated chat functionality, expanded full spectrum planning and reporting capabilities for Title 10 and Title 22 authorities, improved support for military assistance and advisory activities, and continued interfaces with authoritative data source and geographic information systems to further integrate security cooperation planning, budgeting, resourcing, Assessment, Monitoring, and Evaluation. Additionally, Socium will be finalizing zero trust and Identity, Credential, and Access Management compliance, while also maintaining more operations and sustainment operations of planned new modules deployed in prior year such as DSAMS training, BPC module integrations, and congressional notification status reporting.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**585**	**666**	**666**	**81**	**0**
U.S. Direct Hire	529	512	512	-17	0
Foreign National Direct Hire	15	116	116	101	0
Total Direct Hire	**544**	**628**	**628**	**84**	**0**
Reimbursable Civilians	41	38	38	-3	0
Civilian FTEs (Total)	**585**	**717**	**727**	**132**	**10**
U.S. Direct Hire	529	563	563	34	0
Foreign National Direct Hire	15	116	116	101	0
Total Direct Hire	**544**	**679**	**679**	**135**	**0**
Reimbursable Civilians	41	38	48	-3	10
Average Annual Civilian Salary ($ in thousands)	**200.3**	**183.1**	**182.2**	**-17.2**	**-0.9**
Contractor FTEs (Total)	**365**	**305**	**305**	**-60**	**0**

Personnel Summary Explanations:
Explanation of personnel changes

FY 2025 to FY 2026 Change:
An increase of 132 Full-Time Equivalents (FTEs) in FY 2025-2026 reflects the addition of personnel (34 U.S. Direct Hire and 101 Foreign National Direct Hire) to the Defense Security Cooperation Service (DSCS). This increase supports Combatant Commanders in overseeing the development and management of a professional workforce dedicated to security cooperation programs. DSCS achieved Full Operational Capacity in October 2025, ensuring robust support for global security cooperation initiatives. Concurrently, a decrease of 3 reimbursable civilian employees is attributed to the termination of efforts under the Civilian Harm Mitigation and Response program.

FY 2026 to FY 2027 Change:
The requested increase of 10 reimbursable Full-Time Equivalents is a direct result of fore-casted partner demand for advisory services. This demand is driven by the expansion of existing cases, the implementation of a new partner-facing Foreign Military Sales curriculum, and the

transition of legacy International Security Cooperation Program advisory services to partner-funded models, particularly within the United States European Command Area of Responsibility.

Fiscal Year 2027 Budget Estimates

Defense Threat Reduction Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DTRA	839,331	17,733	-172,691	684,373	10,636	-57,495	637,514

I. Description of Operations Financed:
In a highly competitive security environment with evolving Weapons of Mass Destruction (WMD) risks, the Defense Threat Reduction Agency (DTRA) aligns its efforts with the 2026 National Defense Strategy and focus on "Peace Through Strength," particularly concerning the Indo-Pacific region. Adversaries like China and Russia are actively expanding and modernizing their nuclear and chemical, biological, radiological, and nuclear (CBRN) capabilities, while nations such as Iran and North Korea pursue advanced technologies that undermine regional and global stability. In response, DTRA's FY 2027 President's Budget request prioritizes investments to protect the U.S. homeland and counter these WMD risks, enabling the Department of War (DoW), the U.S. Government (USG), and international partners to deter strategic attacks, prevent proliferation, and prevail in any potential conflict.

As a Combat Support Agency, the DTRA provides cross-cutting solutions to enhance warfighter lethality and defend the homeland, primarily focusing on China's WMD threats while also addressing other high-risk regional destabilizers. The agency executes its mission through five core functions: ensuring a reliable strategic deterrent, developing technical capabilities for the warfighter, reducing CBRN threats through risk reduction and partner capacity building, providing strategic and operational support with subject matter expertise, and assisting the Joint Force with plans and solutions to address CBRN risks. The DTRA's funding enables critical activities such as force-on-force exercises, mission assurance assessments, and direct support to Combatant Commands, ensuring a robust posture to deter and respond to WMD and emerging CBRN threats in crisis and conflict.

NONPROLIFERATION ACTIVITIES

As a key component of nonproliferation, the DTRA enhances global stability by executing U.S. arms control treaties and agreements. DTRA's activities focus on building confidence in agreement compliance through the inspection, monitoring, and verification of weapons stockpiles. The agency's role extends to post-conflict stabilization operations and the training of international law enforcement and border personnel in various regions, including the former Soviet Union, Europe, Asia, and Africa. By controlling, safeguarding, and eliminating existing weapons, DTRA's arms control mission is a focal point for U.S. efforts to reduce the threat from WMD and directly enhances national security interests.

The DTRA's implementation of arms control agreements involves three main objectives: conducting inspections of foreign facilities, escorting foreign inspection teams within the U.S. and at its overseas facilities, and developing the necessary technology to ensure compliance. The agency trains and deploys teams to exercise U.S. treaty rights for agreements such as the Plutonium Production Reactor Agreement, Vienna Document 2011, Dayton Peace Agreement, and the Chemical Weapons Convention. Furthermore, the DTRA operates monitoring stations for the

Comprehensive Nuclear-Test-Ban Treaty, provides technical advice across the USG, and supports other missions like the Biological Weapons Convention and International Atomic Energy Agency Integrated Safeguards, leveraging its unique expertise.

The DTRA FY 2027 President's Budget request for nonproliferation arms control activities provides support for the full range of treaty implementation requirements and reflects the latest revision to treaty entry-into-force dates and projections for inspection and compliance requirements.

TREATY/AGREEMENT	ENTRY-INTO-FORCE
Comprehensive Nuclear-Test-Ban Treaty	TBD
Vienna Document 2011	1 Dec 2011
International Atomic Energy Agency Integrated Safeguards	6 Jan 2009
Plutonium Production Reactor Agreement	23 Sep 1997
Chemical Weapons Convention	29 Apr 1997
Dayton Peace Agreement	14 Dec 1995
Conventional Armed Forces in Europe Treaty (SUSPENDED) (7 Dec 2023*) See note below.	17 Jul 1992
Biological Weapons Convention	26 Mar 1975

The DTRA executes a comprehensive suite of arms control and nonproliferation missions essential for reestablishing deterrence and supporting verifiable international agreements. These activities include implementing treaties like the Chemical Weapons Convention and the Vienna Document 2011 through on-site inspections, verification missions, and monitoring, while also preserving expertise following the suspension of the Conventional Armed Forces in Europe Treaty. To ensure mission success, The DTRA provides extensive training and certification for inspectors and linguists, manages treaty data with the Arms Control Enterprise System, and addresses asymmetric and emerging threats by implementing the Proliferation Security Initiative. The agency's commitment to verification is further demonstrated by its operation of a network of U.S. monitoring stations for the Comprehensive Nuclear-Test-Ban Treaty, all part of a broader effort to expand cooperation with allies and strengthen global security.

WEAPONS OF MASS DESTRUCTION COMBAT SUPPORT AND OPERATIONS

The DTRA provides critical combat and warfighter support to the Chairman of the Joint Chiefs of Staff, Combatant Commands (CCMDs), and military Services against the full spectrum of WMD threats. This support encompasses all levels of warfare and includes essential WMD response capabilities, expert nuclear mission support, and collaboration with interagency partners like the National Nuclear Security Administration to ensure the credibility of the U.S. strategic deterrent. As the demand for this support grows in response to global threats, DTRA's programs remain aligned with national defense strategies, emphasizing emerging threats and developing dual-purpose, synergistic combat support missions that are closely integrated with joint operational efforts and backed by their Research, Development, Test, and Evaluation programs.

The DTRA executes a multifaceted mission to counter WMD by integrating a wide range of programs and capabilities. The agency strengthens the U.S. nuclear deterrent by providing expert oversight on policy and modernization (Nuclear Surety), managing stockpile logistics, conducting independent inspections (DNSIO), and ensuring readiness through national-level exercises and specialized training at the Defense Nuclear Weapons School. Operationally, DTRA enhances global security by building partner capacity, identifying and mitigating vulnerabilities through Mission Assurance assessments, and providing direct support to Combatant Commands with forward-deployed experts (Nimble Elder) and 24/7 situational awareness from its Joint Operations Center. This is all enabled by a foundation of cutting-edge technology, including secure information technology architecture, advanced data analytics platforms like Catapult, and integrated applications for nuclear operations, ensuring the Joint Force is equipped to deter and respond to threats across the globe.

CORE MISSION SUSTAINMENT

Core mission programs enable Agency execution against national priorities and represent a wide range of functions that provide the necessary resources to support the Agency's essential functions (spanning four direct appropriations within a $1.6 billion portfolio). These functions provide the foundation for all DTRA programs to enable the DoW, the USG, and international partners to counter and deter WMD and emerging threats.

These programs provide a wide range of essential services that enable the DTRA to execute its mission by covering everything from managing facilities and finances to ensuring the security and well-being of the workforce and providing the necessary legal and technological infrastructure. These functions include the management of the agency's physical spaces and logistics; comprehensive financial oversight of its $1.6 billion portfolio; and a full-spectrum human resources program to acquire, develop, and sustain an agile workforce. Additionally, the programs ensure a safe and secure operational environment through a reliable information technology infrastructure, stringent environmental and occupational health compliance, dedicated legal support, and integrated security and counterintelligence operations, all supplemented by other critical functions like congressional affairs, internal audits, and strategic communications.

Revised FY 2026 Estimate $684,373

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $684,373

6. Price Change $10,636

7. Functional Transfers ..... $-7,436

a) Transfers In $0

b) Transfers Out ..... $-7,436

1) Critical Infrastructure Defense Analysis Center ..... $-7,436
Transfer of the Critical Infrastructure Defense Analysis Center program and resource management function to the Office of the Deputy Assistant Secretary of the Navy for Installations and Facilities.

(FY 2026 Baseline: $8,525 thousand)

8. Program Increases $17,140

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $17,140

1) Civilian Personnel $7,470
Increases funds and 30 FTEs in civilian compensation to ensure average work-year costs are aligned with the critical expertise required to execute the Agency's national security mission.
(FY 2026 Baseline: $213,264 thousand; 1,057 FTEs; +30 FTEs)

2) Core Mission Sustainment - Human Resources $216
Increases funds for other intra-government purchases in support of projected costs for external agreements for human resource services from the Defense Logistics Agency based on the planned quantity of personnel actions and estimated permanent change of station household goods shipments, non-temporary storage, and vehicle transportation costs.
(FY 2026 Baseline: $9,227 thousand)

3) Enhanced Performance Awards Pool $1,710
Increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $213,264 thousand)

4) Nonproliferation - Asymmetric Threats $566
Increases funds to acquire subject matter expertise focused exclusively on emergent threat analysis to national security.
(FY 2026 Baseline: $1,154 thousand)

5) Nonproliferation - Nuclear Assessments $666
Increases funds for engineering & technical services in support of the deliverance of data aligned to U.S. and DoW objectives related to implementation, monitoring, and verification for 32 U.S. International Monitoring System stations.
(FY 2026 Baseline: $7,507 thousand)

6) WMD Combat Support - Catapult $2,377

Increases funds for IT contract support services to consolidate and migrate projects from costly, redundant platforms onto a single, standardized Development/Security/Operations (Develops) platform.
(FY 2026 Baseline: $11,608 thousand)

7) WMD Combat Support - Mission Assurance and Risk Management.....$1,940
Increases funds for other intra-government purchases for software development maintenance and system administration services to support critical enhancements to existing software capabilities, sustainment, and security updates for software deployed on production networks for multiple DoW Mission Assurance Related Programs and Activities.
(FY 2026 Baseline: $0 thousand)

8) WMD Combat Support - Nuclear Detection.....$1,602
Increases funds to enhance the visibility of nuclear detection efforts.
(FY 2026 Baseline: $0 thousand)

9) WMD Combat Support - Stockpile Logistics.....$593
Increases funds for equipment purchases (non-fund) due to increased costs for Defense Stockpile Management System hardware and software licenses to meet current operational demands and emergent requirements.
(FY 2026 Baseline: $24,615 thousand)

9. Program Decreases .....$-67,199

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-67,199

1) Core Mission Sustainment - Facilities, Engineering, and Logistics .....$-22,698
Decreases funds in operation and maintenance of facilities by divesting from non-essential administrative and warehouse leases and redirecting resources to core infrastructure and capabilities ($-11,260 thousand), and reducing facilities costs for Secure Compartment Information Facility expansion.
(FY 2026 Baseline: $58,125 thousand)

2) Core Mission Sustainment - Other Essential Services.....$-593

Decreases funds in engineering & technical services due to a reduction in life-cycle replacement costs of enterprise-level visual surveillance equipment.
(FY 2026 Baseline: $11,961 thousand)

3) Core Mission Sustainment - Security (Information, Personnel, Physical) .....$-78
Decreases funds in engineering & technical services due to a revised assessment of requirements within the personnel security program.
(FY 2026 Baseline: $12,165 thousand)

4) Efficiency – Contract Services.....$-33,118
Decrease reflects a reduction in contracted services. The reduction of funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
• Nonproliferation Activities ($-1,542 thousand)
• WMD Combat Support and Operations Activities ($-16,604 thousand)
• Core Mission Sustainment Activities ($-14,972 thousand)
(FY 2026 Baseline: $325,223 thousand)

5) Efficiency – Travel.....$-1,708
Decrease reflects reduced discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
• Nonproliferation Activities ($-337,000)
• WMD Combat Support and Operations Activities ($-722,000)
• Core Mission Sustainment Activities ($-649,000)
(FY 2026 Baseline: $9,479 thousand)

6) Federal Retirement System - Agency Contribution Rates.....$-860
Decrease reflects lower Federal Employment Retirement System contribution rates. This adjustment incorporates updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $213,264 thousand)

7) Nonproliferation - Inspection Operations.....$-1,124
Decreases funds in other intra-government purchases due to curtailed inspections activity as a result of the New Start treaty expiration in February 2026.

(FY 2026 Baseline: $5,557 thousand)

8) WMD Combat Support - Cross Cutting Research and Development.....$-1,036
Decreases funds in other services due to a realignment of resources from Cross Cutting Research and Development to WMD Combat Support - Nuclear Detection to further invest in and enhance the visibility of nuclear detection efforts.
(FY 2026 Baseline: $16,019 thousand)

9) WMD Combat Support - Defense Nuclear Weapons School.....$-89
Decreases funds in other intra-government purchases as a result of lower maintenance costs due to the phaseout of obsolete heavy ADM-300 and A/N PDR-77 radiation detectors.
(FY 2026 Baseline: $3,564 thousand)

10) WMD Combat Support - Nuclear Surety Program .....$-188
Decreases funds in equipment purchases (non-fund) ($-101,000), commercial transportation ($-69,000), and studies, analysis, & evaluations ($-18,000) due to programmatic efficiencies.
(FY 2026 Baseline: $7,235 thousand)

11) WMD Combat Support - Nuclear Technologies Integration and Applications.....$-5,186
Decreases funds in supplies & materials (non-fund) ($-22,000 thousand), management & professional support services ($-1,161 thousand), engineering & technical services ($-2,573 thousand), and other services ($-1,430 thousand) to properly align mission efforts in support of Operating in a Nuclear Environment, and nuclear detection to optimize efficiency and visibility.

(FY 2026 Baseline: $5,852 thousand)

12) WMD Combat Support - Operations Integration .....$-204
Decreases funds in management & professional support services due to the divestiture of the Agency's c-UAS integration efforts.
(FY 2026 Baseline: $72,497 thousand)

13) WMD Combat Support - Other WMD, Test, Integration, and Training Support .....$-317
Decreases funds in engineering & technical services as a result of streamlining program requirements to achieve cost savings for higher priorities to include High Performance Computing.
(FY 2026 Baseline: $19,104 thousand)

FY 2027 Budget Request $637,514

IV. Performance Criteria and Evaluation Summary:

A. NONPROLIFERATION ACTIVITIES

Inspections Operations Missions, Plutonium Production Reactor Agreement, and International Atomic Energy Agency Integrated Safeguards

Type of Mission	FY 2025	FY 2026	FY 2027
Inspections Operations Missions			
Escort Activity	6	5	5
Mock Missions	10	10	10

The Defense Threat Reduction Agency (DTRA) supports U.S. compliance with the Chemical Weapons Convention, having overseen the destruction of 100% of the nation's declared chemical weapons stockpile, with remaining waste destruction at Blue Grass, KY, projected for completion by the end of FY 2026. DTRA conducts on-site escort of Organization for the Prohibition of Chemical Weapons (OPCW) inspection teams to verify this destruction, including a final closeout inspection of the facility. Additionally, DTRA manages systematic inspections at Department of War (DoW) Schedule 1 facilities, conducts annual recovered chemical weapons destruction inspections, and participates in readiness training for Chemical Weapons Convention Challenge Inspections.

	FY 2025	FY 2026	FY 2027
Plutonium Production Reactor Agreement			
Inspection Activity	0	3	3
Escort Activity	6	1	1
Mock Missions	1	1	1
Joint Implementation & Compliance Commission Discussions	0	2	2
International Atomic Energy Agency Integrated Safeguards	5	14	4

These efforts ensure: Russian plutonium producing reactors are shut down and Russian Federation produced Plutonium Oxide is accounted for; DTRA on-site arms control implementers and Department of Energy facility and compliance staffs are trained to execute assigned duties to ensure USG compliance and U.S. facilities meet International Atomic Energy Agency Integrated Safeguards standards.

Chemical Weapons Convention Mission program consolidated into Inspections Operations Missions in FY 2026.

Conventional Weapons Missions

	Number of Missions		
Type of Mission	FY 2025	FY 2026	FY 2027
Conventional Weapons			
Active Inspection Activity (Formerly Inspection Activity)	12	26	26
Passive Escort/LNO/Observer Activity (Formerly Escort Activity)	10	17	17
Mock Missions/Military Cooperation (Formerly Mock Missions)	30	20	20

The Conventional Weapons Missions program is focused on reinforcing deterrence and ensuring regional stability through the implementation of international arms control agreements, including the Vienna Document 2011 and the Dayton Peace Agreement. This involves conducting compliance and verification inspections, escorting foreign teams, and engaging in observer activities, with an expanded emphasis on using these provisions to demonstrate the strength and lethality of U.S. forces. In addition to realistic training exercises with allies, the program is adapting to the current security environment by supporting the Defense Security Cooperation Agency in countering the illicit diversion of U.S.-origin defense articles in Ukraine. Ultimately, these integrated efforts aim to reduce conventional arms stockpiles, mitigate the risk of offensive strikes, and promote confidence-building measures across Eurasia.

Inspections Training and Support

Type of Mission	FY 2025	FY 2026	FY 2027
Technical Equipment Inspections	26	106	106
Language Training Events	36	36	36
Recruitment Events	18	18	18
Arms Control Training Events	33	24	24

The Inspections Training and Support program is the U.S. government's central hub for preparing personnel for arms control missions, providing treaty-specific courses on agreements like the International Atomic Energy Agency Integrated Safeguards and the Chemical Weapons Convention for inspectors, escorts, and interagency partners. A key component of this mission is providing specialized language support, including overseas immersion and advanced interpreter training for Russian and Korean linguists and Foreign Area Officers, with an expanding focus on other languages to support broader non-proliferation efforts. Formerly known as Treaty Support, this program also consolidated the Technical Equipment Inspections mission in FY 2026, ensuring that all efforts promote transparency, confirm U.S. treaty compliance, and build confidence through effective verification and monitoring.

Arms Control Enterprise System

	Number of Activities		
Type of Mission	FY 2025	FY 2026	FY 2027
Treaty Notifications	1,640	2,357	2,357

The Arms Control Enterprise System is the critical information system the DTRA uses to ensure U.S. government compliance with legally binding arms control agreements, such as the Vienna Document 2011 and the Wassenaar Arrangement. The system provides comprehensive support by generating annual and semi-annual data reports, creating over 140 different notification types, and assisting the military services in managing treaty-accountable items. Furthermore, Arms Control Enterprise System streamlines mission execution by supporting inspection and escort planning, managing inspector lists, and handling associated passport, visa, and training requirements, serving as an essential tool for data management and a historical reference for treaty activities.

Asymmetric Threats

Type of Mission	FY 2025	FY 2026	FY 2027
Building Partner Capacity Integration/Coordination Events	4	2	4
Strengthening Future Arms Control Events	4	2	4
Proliferation Security Initiative	13	24	29

This program is responsible for implementing the Proliferation Security Initiative on behalf of the DoW. It also is responsible for countering chemical, biological and emerging threats, for implementing the Chemical Weapons Convention, the Biological Weapons Convention, and United Nations Security Council Resolution 1540 Treaty requirements, including through support to interdictions, and for supporting arms control negotiation and training related to improving monitoring, verification, and compliance associated these treaties.

Nuclear Assessments

	Number of Missions		
Type of Mission	FY 2025	FY 2026	FY 2027
International Monitoring System			
Seismic and Infrasound Stations	98.45%	98%	98%
Radionuclide Stations	97.81%	95%	95%

The Nuclear Arms Control Technology operations mission manages and operates 32 U.S. waveform and radionuclide stations, along with the U.S. Radionuclide Analysis Laboratory, which collectively form the majority of the U.S. contribution to the International Monitoring System (IMS). This program is crucial for detecting and characterizing nuclear explosions, with stations striving to meet high data availability performance metrics (98% for seismic/infrasound, 95% for radionuclide) and labs aiming for an "A" grade in annual proficiency tests. By leading IMS performance and collaborating with the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization, the U.S. gains access to an additional 274 global monitoring stations and laboratories, significantly enhancing its capability and confidence in detecting and attributing nuclear events, thus bolstering non-proliferation efforts.

B. WMD COMBAT SUPPORT AND OPERATIONS

Stockpile Logistics

	FY 2025	FY 2026	FY 2027
Number of Key Nuclear Reports Staffed	12	16	17
Number of Nuclear Stockpile Reports Staffed	16	25	24
Number of Unsatisfactory Reports Processed	939	750	874
Number of Technical Publication Changes Processed	126	94	104
Number of Weapon Status Reports Processed	1,753	2,250	2,378
Number of Weapon Record Changes Processed	890	1,300	1,408

The workload associated with management of the nuclear weapons stockpile is primarily related to developing policies and procedures for worldwide use by Combatant Commands (CCMDs) and the military Services. This includes monitoring the status of weapons, weapon issues, and components. Operations include providing day-to-day support for automated systems used to manage the stockpile during peace, crisis, and war. Tracking nuclear weapons requires 100% accuracy to ensure the status and location of all weapons in the DoW nuclear stockpile are always known.

Nuclear Surety

	FY 2025	FY 2026	FY 2027
Reports and Security Environments Assessed	35	35	35
Safety Activities and Assessments	25	20	20
Use Control Activities/Assessments/Nuclear Weapons Council (NWC) Activities	55	32	34
Nuclear Explosive Ordnance Disposal Activities	5	4	4
Nuclear Security Reports, Studies and Assessments	4	4	6
Force-on-Force Program Exercises	2	2	2

The Nuclear Surety program provides essential expertise on nuclear policy, safety, security, and Use Control to support modernization efforts for U.S. nuclear weapons systems. Key activities include conducting physical security modeling, materials defeat testing, and executing the Force-on-Force program to evaluate the effectiveness of nuclear security policy. The program also acts as the controlling authority for logistics keys and code materials and partners with the National Nuclear Security Administration to execute nuclear weapons acquisition and modernization efforts.

Nuclear Exercises

	FY 2025	FY 2026	FY 2027
Nuclear Weapons Accident/Incident Exercises	58	48	48

The DTRA strengthens and sustains nuclear weapon accident and incident response capabilities for both the continental U.S. and U.S. European Command through a series of exercises tailored to specific locations and objectives. These efforts are critical for identifying and remedying gaps in response capabilities while enhancing operational synergy and compatibility between the DoW and its mission partners at the federal, state, local, tribal, and NATO levels.

Defense Nuclear Weapons School

	Total Student Numbers			Total Contact Hours		
Student Projections	FY 2025	FY 2026	FY 2027	FY 2025	FY 2026	FY 2027
New Mexico	1,361	2,273	2,264	35,867	40,254	38,212
Virginia	299	248	227	0	0	0
Mobile Training Team	1,628	1,041	1,037	20,317	12,563	21,827
Nuclear Weapons Instructional Museum	3,067	5,000	4,980	9,201	10,500	11,140
Distance Learning (Joint Knowledge Online)*	5,401	5,200	5,180	N/A	N/A	N/A
Grand Total	11,756	13,762	13,688	65,385	63,317	71,179

The Defense Nuclear Weapons School is a unique DoW entity that provides specialized training in radiological and nuclear weapons, incident response, explosive ordnance disposal threat assessment, and CBRN modeling to personnel from DoW and other federal, state, and local agencies. The school enhances its curriculum with two distinct assets: the DoW's only live radiological field training site and the Nuclear Weapons Instructional Museum, which displays all past and present weapons of the U.S. nuclear stockpile.

Defense Nuclear Surety Inspection Oversight

	FY 2025	FY 2026	FY 2027
Defense Nuclear Surety Inspection Oversight Assessments	12	10	15
Nuclear Procedures Inspections*	6	6	6
Nuclear Weapons Technical Inspection Course	113	100	100
Joint Safety and Surety Inspection Course	46	40	40

The oversight of Navy and Air Force Nuclear Surety Inspections provides the Office of the Secretary of War and Joint Staff with independent assessments of service inspection teams' compliance with inspection directives. This program also provides assurance that Personnel Reliability Assurance Program staff assessments are properly managed at the nuclear capable CCMDs.

Mission Assurance

	FY 2025	FY 2026	FY 2027
Pre-Site Surveys (Total)	76	98	81

Assessments:			
"Blue Assessments": Joint Mission Assurance Assessments / Mission Assurance Assessments	36	60	45
Red Assessments	40	38	36
Total Assessments	76	98	81
Customers	18	18	18
Other Activities			
Technical Support Projects	8	8	8
Analytical Projects	48	48	48
Combatant Command Anti-Terrorism Program Reviews	4	0	0
Mobile Training Teams (Mission Assurance Assessment & All Hazard Threat Assessment Course)	8	4	4
Total Other Activities	68	60	60

The Mission Assurance program identifies vulnerabilities in critical DoW systems and infrastructure by conducting a series of evaluations, including Mission Assurance and Red Team assessments. This analysis provides leadership with actionable recommendations to mitigate risks from adversarial, natural, or accidental threats, enabling informed decisions on vulnerability remediation, mitigation, or acceptance.

Plans and Exercises

	Number of Exercises		
Type of Exercise	FY 2025	FY 2026	FY 2027
Joint Training Plan Exercises focused on training assigned forces	9	10	10
Joint Training Plan Exercises focused on training other than assigned forces	27	38	23
Joint Training Plan Senior Leader Seminars, Tabletop Exercises, and Wargames	12	21	11

The Plans and Exercises program ensures the DTRA mission readiness for globally integrated operations by planning, executing, and assessing counter-WMD exercises in coordination with CCMDs and allied partners, all aligned with national strategic directives. This includes developing and managing the agency's Joint Training Plan, conducting operational readiness assessments, and delivering specialized counter-WMD planning courses. Furthermore, the program provides direct counter-WMD planning expertise to CCMDs, builds and deploys planning teams for contingencies, and drives agency strategy through opportunity analysis and threat characterization, ensuring adaptive planning support against emerging WMD threats.

Cross-Cutting Research and Development (R&D) Support

Technical Reachback is a 24/7/365 capability within the DTRA Cross-Cutting Research and Development program that provides critical situational awareness, technical intelligence, and subject matter expertise. It serves an expansive customer base that includes all CCMDs military Services,

the Intelligence Community, and numerous other federal, state, local, and international partners. The program's performance is measured by the timeliness of its responses to requests for information from these diverse stakeholders.

	FY 2025	FY 2026	FY 2027
Number of RFI's	1,400	1,100	1,200
On-Time/Early Response	1,400	1,100	1,200
Late Response	0	0	0
Timeliness Target – 95%	1,330	1,045	1,140

Building Partner Capacity

Type of Mission	FY 2025	FY 2026	FY 2027
International Counterproliferation Events	9	20	16
Counter WMD Engagements	74	45	47

The DTRA executes global security cooperation operations to build partner capacity against Weapons of Mass Destruction (WMD), enhancing their preparedness for CBRN incidents and enabling them to prevent proliferation and trafficking. By leveraging U.S. interagency, National Guard, and Service partners, DTRA provides training, equipment, and professionalization to strengthen partner nations' capabilities and increase their interoperability with U.S. forces.

Mission IT

Provides 24x7 access to mission IT networks, systems and services primarily at secret and above levels for 5,200+ users worldwide in excess of 99% availability.

	FY 2025	FY 2026	FY 2027
Ability to operate and maintain the networks to ensure functional access is available to DTRA's workforce and partners as needed to support mission requirements.	99%	99%	99%

Nuclear Survivability

Atomic Veterans	FY 2025	FY 2026	FY 2027
Department of Veteran Affairs + Department of Justice Cases Processed/Projected	541	350	400
Atomic Veterans Service Certificate Awards/Projected	264	750	500
Atomic Veterans Commemorative Service Medal Awards/Projected	264	1,500	1,000
Cases Pending (Year End)	112		

Nuclear Test Personnel Review involves providing accurate and timely responses to RFIs from atomic veterans, the Department of Veterans Affairs, the Department of Justice, the Department of Health and Human Services, Congress, Office of the Secretary of War, CCMDs, and the military Services.

Nuclear Integration and Applications

This program encompasses the Defense Threat Reduction Information Analysis Center that manages a vast collection of unclassified and classified knowledge databases and promotes the use of existing scientific and technical information to meet DoW research, development, test, evaluation, training, logistics, maintenance, and operational requirements.

Defense Threat Reduction Information Analysis Center	FY 2025	FY 2026	FY 2027
Registered DTRIAC End Users	163	250	400
Requested records/search requests/Freedom of Information Act requests	873	1,000	2,000
Items Digitized/Loaded into Knowledge Management Systems Objective	901,210	20,000,000	30,000,000

Catapult

	FY 2025	FY 2026	FY 2027
Average Number of Monthly Users	3,361	9,750	10,000
Average Number of Monthly Queries	376,807	650,000	722,200

Over the next two years, the Catapult program will significantly enhance its capabilities to support the DTRA mission through several key initiatives. This includes expanding Catapult Data Lake by integrating new CWMD/CBRNE and DTRA data sources to provide comprehensive information for real-time decision-making. Simultaneously, it will improve data visualization and decision support tools to offer more intuitive and actionable insights, such as dynamic dashboards. The program will also boost operational efficiency and automation by streamlining processes and leveraging advanced AI analytics for data ingestion, processing, and analysis. Finally, Catapult will undergo infrastructure modernization to support scalable and secure data operations, including the ingestion of increasing volumes and diverse types of multi-modal data, ensuring future growth and adaptability.

Enable Global Integrated Operations

Capabilities To enable global integrated operations by serving as the central point for all Counter-WMD and technical support requests, providing CCMDs and mission partners with 24/7 situational awareness, subject matter expertise, and tailored intelligence products fused from a variety of global sources to track and characterize worldwide threats.

- Operational Decision Support and Analysis: Delivers critical support for CBRN planning, operations, and post-event analysis by providing near real-time operational assessments and access to specialized WMD subject matter expertise for CCMDs, DoW elements, and other government agencies.
- Threat Disruption and Defeat: Provides direct operational and effects planning support to Hard Target Defeat units and designated partners tasked with countering asymmetric WMD threats, while also developing planning support and techniques to disrupt WMD proliferation pathways and delivery systems.

.
The table below captures the number of technical support requests anticipated through FY 2027:

	FY 2025	FY 2026	FY 2027
USEUCOM	42	182	51
USNORTHCOM	44	239	53
USINDOPACOM	34	56	41
USCENTCOM	76	249	92
USSOUTHCOM	17	115	21
USTRANSCOM	2	108	4
USSTRATCOM	14	206	17
USSOCOM	151	1,347	183
USAFRICOM	24	136	29
USSPACECOM	13	136	16
Intelligence Community	80	40	40
National Guard	9	4	4
Department of Homeland Security	7	48	9
Department of Health & Human Services	1	4	3
Office of the Secretary of War	18	1	22
Joint Staff	1	64	3
Air Force	154	1	186
Navy	288	1	348
Marine Corps	17	1	21
Army	124	1	150
Others	355	46	430
Total	1,471	2,985	1,719

Nimble Elder

Training/Exercise Events	FY 2025	FY 2026	FY 2027
USEUCOM	27	13	10

USINDOPACOM	17	12	14
USCENTCOM	7	6	6
USAFRICOM	6	8	6
USSOUTHCOM	4	6	7
CONUS	26	23	26
Total Events	87	68	69

The Nimble Elder program, through its Technical Support Groups (TSGs), provides CCMDs and other USG agencies with the capability to address WMD threats. The TSGs conduct specialized CBRN training that normally spans two weeks. Program personnel also participate in regional/international exercises providing assistance to CCMD-designated forces and enhancing CCMD preparedness and capacity to respond to major CBRN events. Personnel facilitate development of a more robust, skilled, and inter-connected counter WMD crisis response capability at all levels, thereby enhancing U.S. capability to respond to counter WMD threats. Exercises are typically one to two weeks in length but can vary depending on the number of participants, location, and complexity.

C. CORE MISSION SUSTAINMENT

The DTRA core mission sustainment activities include the full range of essential operational support functions to sustain approximately 2,100 civilian and military personnel (includes 62 reservists) operating from six sites within the U.S. and four sites overseas, as they execute DTRA's mission.

Support Functions in FY 2027 include:

- Enterprise Management and Human Capital: Provides full-spectrum human resources services for approximately 2,000 personnel and executes robust financial oversight for a $1.6 billion portfolio, ensuring a talented workforce and fiscal accountability through consecutive clean audit opinions.
- Infrastructure, Technology, and Logistics: Manages global infrastructure and engineering projects across eight locations while maintaining a secure, resilient, and cost-effective IT enterprise, all supported by comprehensive logistics, including worldwide shipping and supply chain management.
- Security and Safety: Defends agency personnel, facilities, and critical information through integrated security and counterintelligence operations, while ensuring a safe and healthy work environment with comprehensive environmental, safety, and occupational health programs.
- Legal, Compliance, and External Affairs: Delivers comprehensive legal counsel across all agency functions to ensure compliance and manages essential external relations and oversight, including congressional and media engagement, ethics, and internal investigations.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Active Military End Strength (E/S) (Total)	**702**	**777**	**763**	**75**	**-14**
Officer	442	486	479	44	-7
Enlisted	260	291	284	31	-7
Reserve Drill Strength (E/S) (Total)	**132**	**143**	**62**	**11**	**-81**
Officer	97	102	45	5	-57
Enlisted	35	41	17	6	-24
Civilian End Strength (Total)	**1,259**	**1,190**	**1,220**	**-69**	**30**
U.S. Direct Hire	1,146	1,052	1,082	-94	30
Total Direct Hire	**1,146**	**1,052**	**1,082**	**-94**	**30**
Reimbursable Civilians	113	138	138	25	0
Active Military Average Strength (A/S) (Total)	**702**	**696**	**702**	**-6**	**6**
Officer	442	442	442	0	0
Enlisted	260	254	260	-6	6
Reserve Drill Strength (A/S) (Total)	**132**	**143**	**62**	**11**	**-81**
Officer	97	102	45	5	-57
Enlisted	35	41	17	6	-24
Civilian FTEs (Total)	**1,272**	**1,158**	**1,188**	**-114**	**30**
U.S. Direct Hire	1,159	1,027	1,057	-132	30
Total Direct Hire	**1,159**	**1,027**	**1,057**	**-132**	**30**
Reimbursable Civilians	113	131	131	18	0
Average Annual Civilian Salary ($ in thousands)	**211.6**	**209.2**	**211.7**	**-2.4**	**2.5**

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Contractor FTEs (Total)	**893**	**657**	**567**	**-236**	**-90**

Personnel Summary Explanations:

FY 2025 to FY 2026 Change:
The reduction in military personnel reflects DTRAs alignment of personnel to mission requirements.

FY 2026 to FY 2027 Change:
The increase in Civilian FTEs reflects proper alignment with the critical expertise required to execute the Agency's national security mission.

FY 2026 to FY 2027 Change:
The change in contractor FTEs reflects the reduction of funding for contract services undertaken in direct support of the President’s executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.

Fiscal Year 2027 Budget Estimates

Defense Threat Reduction Agency Cyber

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Combat Development Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DTRA Cyber	52,745	1,251	14,854	68,850	1,321	3,306	73,477

I. Description of Operations Financed:

The United States faces a highly competitive security environment characterized by evolving weapons of mass destruction (WMD) risks across multiple domains. Consistent with the National Security Strategy, the National Defense Strategy (NDS), and FY 2027-2031 Defense Planning Guidance (DPG), focused on *Peace Through Strength*, the Defense Threat Reduction Agency (DTRA) is aligned to counter threats with a focus on the Indo-pacific region. China and Russia are expanding and modernizing their nuclear forces, diversifying advanced conventional WMD delivery systems, and actively developing chemical, biological, radiological, and nuclear (CBRN) capabilities that directly threaten the homeland and American security. At the same time, Iran and North Korea are pursuing advanced warfighting capabilities to undermine regional security and global stability in ways that pose considerable risk to U.S. objectives. Additionally, the potential for the intentional or accidental release of biological pathogens or hazardous chemicals contribute to a dynamic CBRN threat environment.

DTRA's Fiscal Year (FY) 2027 budget request reflects the continued focus on strengthening the agency's alignment to the Secretary of War's priorities. It invests in delivering the capabilities required to protect the Homeland and counter WMD risks while enabling the Department of War (DoW), the United States Government (USG), and international partners (through burden sharing) to deter strategic attacks against the United States and its Allies; prevent WMD and emerging CBRN threats; and prevail against WMD-armed adversaries in crisis and conflict.

DTRA enables the DoW, the USG, and selected allies to meet U.S. national security goals through deterrence, enhancing warfighter lethality, and defending the Homeland. DTRA aligns operations, activities, and investments primarily focused on China's WMD threats, but also addresses other adversaries and high-risk regional destabilizers. In its role as both a Defense Agency and Combat Support Agency, DTRA provides cross-cutting solutions to support each of these mission priorities. DTRA is committed to achieving concrete outcomes and strategic effects through its five core functions:

- Ensuring a reliable, resilient strategic deterrent through nuclear surety, mission assurance, and crisis response activities;
- Developing and delivering technical capabilities to the warfighter across the WMD threat spectrum;
- Preventing, reducing, and eliminating CBRN threats through targeted and focused risk reduction, arms control, partner capacity building and warfighter support;
- Providing strategic and operational support through subject matter expertise, technical reach back, tailored analysis, and exercise support;
- Supporting the Joint Force with plans, concepts, exercises, and materiel solutions to address CBRN operational and strategic risks.

As a Combat Support Agency, DTRA envisions, develops, and delivers capabilities to the Warfighter to counter WMD and emerging CBRN threats posed by adversaries. DTRA also supports whole-of-government efforts to prevent the acquisition, proliferation, and use of WMD and associated materials. Given the CBRN-related challenges posed by WMD-armed actors, DTRA will continue to enhance its crisis response readiness and its ability to posture for crisis and conflict.

DTRA's O&M Cyber programs mitigate risk to DoW critical infrastructure through advanced cyber assessments including risk-based vulnerability assessments (Blue) and adversarial emulation (Red) audit vulnerability assessments, as well as penetration tests. Programs also ensure the Agency meets DoW cybersecurity compliance standards and maintains an acceptable cybersecurity posture.

Narrative Explanation of Changes:

The FY 2027 O&M Cyber budget request reflects an increase of +$4.6 million from the FY 2026 enacted level. This net increase includes price growth of +$1.3 million, program increases totaling +$6.3 million and program decreases totaling $-3 million.

	$ in thousands		
	FY 2025 Actuals	**FY 2026 Request**	**FY 2027 Estimate**
A. Cyber Activities	**52,745**	**68,850**	**73,477**

This Sub-Activity Group provides resource transparency into DTRA's cyber activities. Activities include:

- Protecting and defending the Agency's cyberspace and area of operations by providing 24x7 detect, protect, respond, and sustain cybersecurity services and defense.
- Monitoring and analyzing network activity for external threats via the Agency Cybersecurity Service Provider (CSSP).
- Providing capability to monitor, alert, report and respond to, and recover from, unauthorized cyber events.
- Providing cyber-based situational awareness to Agency senior leadership, Agency stakeholders, DoW cybersecurity community, and U.S. Cyber Command.
- Ensuring both cybersecurity and Information Assurance compliance in support of DoW regulations, initiatives, and tasks.
- Conducting "Blue" and "Red" audits, vulnerability assessments, and penetration tests that evaluate the strengths or weaknesses of software, hardware, processes, and channels over valuable DoW information flows.

Cybersecurity and Information Assurance

DTRA's cybersecurity and Information Assurance programs facilitate the establishment and sustainment of essential cybersecurity and Information Assurance measures, guidelines, and capabilities. This ensures all DTRA networks/enclaves uphold DoW cybersecurity standards and continue to be integrated within the Department of Defense Information Networks (DODIN).

This involves military, civilian, and contractor assistance to execute DoW-mandated foundational activities. This includes procuring, installing, operating, and maintaining hardware/software, as well as licensing, to carry out the following functions: Computer Network Defense, Zero Trust implementation, Department of Defense Cyber Defense Command (DCDC) cyber self-assessment, Communications Security, Supply Chain Risk Management, Cross Domain Support Element, Accreditation and Certification, Cyber Risk Assessment and Management, Cyber Policy and Planning, Security Control Assessment, and Independent Verification & Validation.

Furthermore, cyber leadership and supervision are provided to ensure these activities function cohesively and the Agency adheres to compliance standards and maintains a robust cybersecurity stance.

Mission Assurance

DTRA serves as the Mission Assurance Center of Excellence, performing assessments that identify vulnerabilities in critical systems, networks, and architecture that could be exploited well below the level of armed conflict by state or non-state threat networks or could be impacted by natural or accidental hazardous events. DTRA accomplishes this analysis through the utilization of the Defense Critical Infrastructure Vulnerability Analysis process, which includes:

- Advanced Cyber Assessments: Consist of both risk-based vulnerability assessments (Blue) and adversarial emulation (Red) audits, vulnerability assessments, and penetration tests that evaluate the strengths or weaknesses of software, hardware, processes, and channels over valuable DoW information flows.

All assessments provide recommendations to mitigate identified risks to critical infrastructure. DTRA narrows this analysis to specific key missions identified by DoW leadership (most commonly, Defense Critical Missions), through strategic analysis, and identifies mission impacts, trends, and lessons learned. This information is provided to DoW senior leaders, who will then decide the best courses of action for vulnerability remediation, mitigation, or acceptance.

FY 2026 Baseline Funding $68,850

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $68,850

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $68,850

6. Price Change $1,321

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $6,365

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $6,365

1) DTRA Cyber Activities - Civilian Personnel $126

The increase in executive, general and special schedules reflects the proper alignment of salary and benefit costs incurred during FY 2025 execution.
(FY 2026 Baseline: $6,770 thousand; 31 FTEs)

2) DTRA Cyber Activities - Cyber Security and Information Assurance $6,188
The increase enhances Defensive Cyber Operations (DCO) to support Department of Defense Information Network Areas of Operation (DAO) authorities, Zero Trust mandates and operations efforts by providing hardware, software, and cyber mission services for improved monitoring and security measures. Improvements will enable real-time awareness of DTRA's cybersecurity posture through automated management and reporting of cybersecurity compliance and vulnerability status and facilitate cross-domain cybersecurity solutions. Specifically, increase supports Cybersecurity Service Provider (CSSP) cloud monitoring, firewall maintenance and Common Access Card (CAC) middleware. The increased funding will cover purchased communications ($4,255 thousand), IT contract support services ($1,240 thousand), equipment purchases ($394 thousand), and other intra-governmental purchases ($299 thousand).
(FY 2026 Baseline: $20,458 thousand)

3) DTRA Cyber Activities - Enhanced Performance Awards Pool.....$51
The increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $6,770 thousand)

9. Program Decreases .....$-3,059

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-3,059

1) Efficiency - Contract Services .....$-3,033
The decrease reflects a reduction in funding for contract services undertaken in direct support of the President’s executive order, which prioritizes cost efficiency, transparency, and the consolidation of services.

This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $41,477 thousand)

2) Federal Retirement System - Agency Contribution Rates.....$-26
The decrease reflects lower Federal Employment Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $6,770 thousand)

FY 2027 Budget Request $73,477

IV. Performance Criteria and Evaluation Summary:

Cyber Activities

Cybersecurity and Information Assurance:

	FY 2025	FY 2026	FY 2027
Ability to meet DoW Chairman of the Joint Chief of Staff Instruction 6510 Incident Reporting Timelines for High Priority Incidents (CATEGORY 1's – 2's). Acceptable Threshold = 100%	100%	100%	100%
Agency Certification and Accreditation Rate of Systems and Enclaves. Acceptable Threshold = >90%	97%	95%	95%
Agency Self Assessed Command Cyber Readiness Inspection (CCRI) Score. Acceptable Threshold = >80%	Not Conducted	Moderate	Moderate

The DTRA summarizes its extensive cybersecurity efforts in three primary activities to which it measures its performance and effectiveness.

1) Ability to rapidly respond to cybersecurity events - DTRA maintains a comprehensive cybersecurity tool suite, it is a fully certified and accredited DoW Cybersecurity Service Provider Tier 2 organization and promotes a continuous cybersecurity awareness campaign ensuring its workforce remains aware and vigilant. Understanding that not all cybersecurity attacks can be defended, possessing the ability to quickly respond to cybersecurity events is critical.

2) Maintaining compliance with DoW Cybersecurity taskings and requirements - DTRA has developed a robust cybersecurity compliance program to ensure the Agency's Information Technology (IT) environment remains compliant with DoW IT taskings and security baselines. Ensuring DTRA IT systems undergo continuous monitoring and maintain an Authorization to Operate is essential to remain in good standing and protect its portion of the Global Information Grid.

3) Self-Assessed Command Cyber Readiness Inspection (CCRI) Score - the U.S. Cyber Command and Joint Force Headquarters - DoD Information Network (JFHQ-DODIN), use the results of CCRIs as a key measure to help assess the overall security posture of DoDIN. The DTRA performs well during these JHFQ-DODIN inspections and contributes much of its success to an in-house Self Assessed CCRI dashboard providing near real-time CCRI compliance status, points of contact and action plans for compliance.

Mission Assurance

	FY 2025	FY 2026	FY 2027
Pre-site Surveys (Total)	49	150	91
Advanced Cyber Assessments	12	50	30
Red Team Cyber Assessments	1	8	16
Control System Assessments	0	32	0
Level I Cyber Assessments	36	60	45
Total Assessments	49	150	91
Customers	18	18	18

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**25**	**31**	**31**	**6**	**0**
U.S. Direct Hire	25	31	31	6	0
Total Direct Hire	**25**	**31**	**31**	**6**	**0**
Civilian FTEs (Total)	**25**	**31**	**31**	**6**	**0**
U.S. Direct Hire	25	31	31	6	0
Total Direct Hire	**25**	**31**	**31**	**6**	**0**
Average Annual Civilian Salary ($ in thousands)	**230.4**	**218.4**	**223.8**	**-12.0**	**5.5**
Contractor FTEs (Total)	**76**	**92**	**91**	**16**	**-1**

Personnel Summary Explanations:
No change in civilian full-time equivalents (FTE) between FY 2026 to FY 2027.

The change in contractor FTE from FY 2026 to FY 2027 reflects a reduction in funding for contract services undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.

Notes:

-

- Increase in OP-32 Code 101 - Executive, General and Special Schedules strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department; and a re-pricing of civilian personnel compensation based on FY 2025 actuals.
- Increase in OP32 Code 914 - Purchased Communications (Non-Fund) to enhance Defensive Cyber Operations (DCO) for Department of Defense Information Network Areas of Operation (DAO) authorities, Zero Trust mandates and named operations efforts by providing hardware, software, and cyber mission services for improved monitoring and security measures. Improvements will enable real-time awareness of DTRA's cybersecurity posture through automated management and reporting of cybersecurity compliance and vulnerability status and facilitate cross-domain cybersecurity solutions.
- Increase in OP-32 Code 925 - Equipment Purchases (Non-fund) for mission execution across multiple cyber platforms. This ensures uninterrupted mission operations, and the delivery of enhanced cyber capabilities aligned with evolving mission assurance program objectives.
- Decrease in OP-32 Code 934 - Engineering & Technical Services and OP-32 Code 987 - Other Intra-Government Purchases reflects a reduction in cyber assessment teams and associated costs to align with planned requirements for FY 2027.
- Increase in OP-32 Code 990 - Information Technology Contract Support Services contract support to conduct enhanced cyber assessments, challenge protection strategies from an adversarial perspective, and deliver actionable intelligence aligned with evolving mission assurance program objectives.

Fiscal Year 2027 Budget Estimates

Defense Technology Security Administration

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
DTSA	43,839	471	-6,026	38,284	327	8,490	47,101

I. Description of Operations Financed:
The Defense Technology Security Administration (DTSA), a Field Activity under the Under Secretary of War for Acquisition and Sustainment, is the Department of War's (DoW) lead agency for developing and implementing technology security policies for all international transfers of defense-related goods, services, and technologies. In direct support of the 2026 National Defense Strategy (NDS), the DTSA protects the U.S. military's critical technological advantages by conducting risk assessments to prevent the diversion of sensitive technology to adversaries while enabling responsible transfers to allies and partners. The agency works with multilateral export control regimes, chairs the National Disclosure Policy Committee to support partner interoperability, and plays a critical role in strategic initiatives. Ultimately, the DTSA strives to build enduring advantages by balancing the safeguarding of critical defense information with fostering a healthy U.S. defense industrial base through its core functions of national security reviews, international cooperation, policy development, and mission application management.

National Security Review of Defense Information and Technology Transfers:

To protect U.S. technological advantages from nations of concern such as China, Russia, Iran, and North Korea, the DTSA leads the national security review of defense information and technology transfers. In partnership with other government agencies and industry, the DTSA assesses technology transfer risks associated with Direct Commercial Sales and Foreign Military Sales, makes recommendations on export licenses, and develops control plans to mitigate those risks.

International Engagements and Security Cooperation:

To strengthen its network of allies and partners, the DTSA collaborates internationally to protect critical defense-related technology, enhance military interoperability, and promote burden sharing. The agency's leadership conducts direct bilateral engagements to help partners elevate their technology security and export controls to U.S. standards, building the confidence required for increased cooperation without compromising America's technological edge.

DoW Export, Technology Release, and Foreign Disclosure Policy Determinations:

As a key function of the DoW the DTSA shapes and implements the policies and regulations that protect U.S. defense information while facilitating security cooperation with allies.

Technology Security Management Functions:

The DTSA supports the USG and DoW by performing several management functions that support technology security-related systems. The DTSA oversees the international visits program that sets policy guidance for foreign personnel visits and assignments to USG organizations.

Export Controls Directorate:

The Export Controls Directorate serves as the Department of War's central hub for the national security review of all export licensing, including direct commercial sales, dual-use items, and nuclear technology. Providing essential technical and regulatory analysis, the Export Controls Directorate leads the DoW's efforts to identify and protect critical and emerging technologies by proposing new controls, shaping U.S. regulations like the International Traffic in Arms Regulations and Export Administration Regulations, and assessing the national security harm from potential export violations.

Research Analysis and Intelligence Dissemination:

The Research Analysis and Intelligence Dissemination directorate serves as the Defense Technology Security Administration's proactive intelligence hub, responsible for analyzing strategic technology security issues to mitigate proliferation risks and preserve the U.S. military's technological advantage.

Executive Operations:

Consistent with U.S. policy and national security objectives, the DTSA Director is responsible for protecting America's military technology advantage in direct support of the 2026 NDS. The agency accomplishes this by overseeing the development and implementation of technology security policies for international transfers, working with allies to prevent critical technologies from reaching strategic competitors.

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $10,287

1) Civilian Compensation $6,538
Increases funds to rightsize civilian compensation (+$6,440 thousand) in alignment with DTSA's average work-year cost. Additionally, the increase strengthens the Department's ability to recognize and reward the

civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department (+$98,000).

(FY 2026 Baseline: $26,791 thousand; 137 FTEs)

2) Information Technology $3,392
Increases funds in IT contract support services and other intra-government purchases provides the necessary funding to execute a complete IT modernization of DTSA's mission applications, directly enabling the implementation of Executive Order 14268 on defense sales. DTSA's primary application, USXPORTS, facilitates over $618 billion in U.S. technology export licensing reviews. This investment is essential to creating the rapid, secure, and reliable technology transfer process mandated by national policy. Funding will also integrate the mandatory cybersecurity monitoring required to secure these critical systems within the cloud environment.
(FY 2026 Baseline: $5,235 thousand)

3) Intra-Governmental Support -Defense Financial Operation $293
Increases funds in defense financial operation to align DTSA's resources with the actual cost of mandatory services provided by Defense Finance and Accounting Service (DFAS). This increase addresses a recurring funding gap for this requirement which necessitated internal realignments of resources from other mission-critical programs. Funding this requirement establishes a sustainable baseline to ensure the continuity of these essential services.
(FY 2026 Baseline: $1,249 thousand)

4) Training.....$10
Increases funds in training and leadership development provides continuing education to ensure DTSA's workforce maintains the specialized, industry-standard certifications required for their positions. This investment is essential to sustaining the advanced technical expertise that underpins mission effectiveness and guarantees operational readiness.

(FY 2026 Baseline: $186 thousand)

5) Travel.....$54
The increase in travel supports mandatory site surveys required for international agreements and to enable alignment to U.S. export control policies in multilateral regimes.
(FY 2026 Baseline: $437 thousand)

9. Program Decreases ..... $-1,797

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-1,797

1) Civilian Personnel Compensation ..... $-325
Decreases funds in civilian pay compensation to account for the anticipated impact of administrative and operational expenses.
(FY 2026 Baseline: $26,791 thousand; 137 FTEs; -1 FTEs)

2) Export Control Legacy Materials ..... $-10
Decreases funds for supplies & materials (non-fund) due to historical spending levels.
(FY 2026 Baseline: $50 thousand; 0 FTEs; +0 FTEs)

3) Federal Employee Retirement System ..... $-391
The decrease aligns with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.

4) Financial Support and Software Licenses ..... $-801
Decreases funds in other services due to a comprehensive review of operational requirements resulting in the optimization of contract services and software licensing portfolios. This reduction reflects the consolidation of service capabilities and rigorous application of cost-efficiency standards.
(FY 2026 Baseline: $1,592 thousand)

5) Mark Center Rent ..... $-270
Decreases funds in the Pentagon Reservation Maintenance Revolving Fund purchases due to reductions in customer rates charged for goods and services based on identified efficiencies and civilian full-time equivalent.
(FY 2026 Baseline: $2,739 thousand)

FY 2027 Budget Request $47,101

IV. Performance Criteria and Evaluation Summary:

Technology Security Actions represent work accomplished by the DTSA. A typical technology security action represents a unit of work, which allows for the tracking and analysis of our business activity. On average, DTSA processes 130,000 actions annually, to include Committee on Foreign Investment in the United States, dual-use and munitions licensing, and patent reviews. Such actions accounted for represent the application of resources to achieve all mission, regulatory, and statutory goals, and objectives. Some technology security actions are devoid of precise performance or time measurement. For example, the development of an International Agreement may take months of work, negotiation, and coordination before actual implementation, where the license review is measured and tracked daily.

In FY 2025 and FY 2026, the DTSA will adjudicate 85% of munitions and dual-use export license applications received from the Departments of State and Commerce within prescribed statutory and regulatory timelines. A decrease in performance was due to the government furlough and staffing shortfalls. In FY 2027, the DTSA will recover and improve in adjudication processing efficiency.

FY 2025 Actuals	FY 2026 Estimate	FY 2027 Estimate
100%	85%	90%

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Active Military End Strength (E/S) (Total)	**8**	**8**	**8**	**0**	**0**
Officer	8	8	8	0	0
Reserve Drill Strength (E/S) (Total)	**21**	**0**	**0**	**-21**	**0**
Officer	15	0	0	-15	0
Enlisted	6	0	0	-6	0
Civilian End Strength (Total)	**141**	**141**	**138**	**0**	**-3**
U.S. Direct Hire	138	138	137	0	-1
Total Direct Hire	**138**	**138**	**137**	**0**	**-1**
Reimbursable Civilians	3	3	1	0	-2
Active Military Average Strength (A/S) (Total)	**8**	**8**	**8**	**0**	**0**
Officer	8	8	8	0	0
Reserve Drill Strength (A/S) (Total)	**21**	**0**	**0**	**-21**	**0**
Officer	15	0	0	-15	0
Enlisted	6	0	0	-6	0
Civilian FTEs (Total)	**141**	**141**	**138**	**0**	**-3**
U.S. Direct Hire	138	138	137	0	-1
Total Direct Hire	**138**	**138**	**137**	**0**	**-1**
Reimbursable Civilians	3	3	1	0	-2
Average Annual Civilian Salary ($ in thousands)	**225.9**	**194.1**	**238.6**	**-31.7**	**44.5**
Contractor FTEs (Total)	**43**	**37**	**37**	**-6**	**0**

Personnel Summary Explanations:
Civilian FTEs (Total):

Changes from FY 2025 to FY 2026: No change.

Changes from FY 2026 to FY 2027: These changes include a personnel reduction of three billets, decreasing the workforce from 141 to 138. This reduction is composed of one direct hire and two reimbursable billets. Critically, the reimbursable billets directly support DTSA's legally mandated space launch monitoring activities under Public Law (PL) 105-261 Section 1514 and PL 106-65 Section 1404. DTSA is undertaking a thorough assessment of its workload and resource allocation to identify potential mitigation strategies and maintain its core mission capabilities.

Average Annual Civilian Salary: In FY 2026 the decrease reflects incorrect civilian compensation cost estimates. The increase in FY 2027 reflects the effort to rightsize the civilian compensation average work-year cost.

Contractor FTEs (Total):

Changes from FY 2025 to FY 2026: DTSA contracts are firm fixed price. Contract FTE reductions are due to the efficiencies taken in contract reductions

Changes from FY 2026 to FY 2027: No change.

Reserve Drill Strength (A/S) (Total)
Changes from FY 2025 to FY 2026: The change reflects a reduction of 21 reservist intelligence analyst billets. DTSA will mitigate capabilities through internal and external analytic partnerships.

Fiscal Year 2027 Budget Estimates

Missile Defense Agency

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-Wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
MDA	671,366	16,756	9,607	697,729	14,448	-224,942	487,235

I. Description of Operations Financed:

Provides the following Ballistic Missile Defense unique sustainment support:

A. **Aegis Ballistic Missile Defense.** Provides Ballistic Missile Defense unique sustainment support for deployed Aegis Ballistic Missile Defense ships, Standard Missile-3, Ballistic Missile Defense Aegis Weapon System, Operational Readiness, and Aegis Ashore sites.

The Standard Missile-3 missile sustainment includes recertification, repair, and second destination transportation of missiles; installation of software and hardware updates; modeling and simulation; and logistics efforts.

The Ballistic Missile Defense Aegis Weapon System sustainment support includes:

1. Technical and engineering services for in-service Ballistic Missile Defense ships and sites Missile Defense System test infrastructure maintenance to ensure in-service Ballistic Missile Defense Aegis Weapon System baselines maintain directed operational availability.
2. Ballistic Missile Defense Engineering Agent technical support and operational analysis for Ballistic Missile Defense units for casualty correction, technical issues, improvements, maintenance, certification, and delivery of Ballistic Missile Defense Aegis Weapon System computer program updates to the Fleet.
3. Aegis software maintenance corrections in the common source library.
4. Readiness analysis, ship installs, system-level test, maintenance builds, and post-certification Threat Adaptation Development updates for Ballistic Missile Defense 4.x and Ballistic Missile Defense 5.x.
5. Integrated logistics support of Ballistic Missile Defense unique parts, including technical documentation review and updates; diminishing manufacturing sources; and obsolete materiel surveillance, identification, and resolution.
6. Aegis Ballistic Missile Defense mission planner re-host to fleet warfighters.
7. Depot-level maintenance for Aegis Ballistic Missile Defense missile defense unique equipment.

Aegis Ashore sustainment support includes facilitating data management efforts, including oversight for collection, storage, and distribution of technical data and documentation required for sustainment of the Aegis Ashore sites.

B. **Ground-Based Midcourse Defense.** Sustainment support for operational Ground-Based Interceptors and Ground-Based Midcourse Defense Weapon System based at Fort Greely, AK, and Vandenberg Space Force Base, CA, as well as supporting systems and nodes at Schriever Space Force Base, CO, Fort Drum, NY and Eareckson Air Station, AK. Sustainment support also includes repairs and improvements to aging support facilities that are critical to the mission.

Funding also ensures Ground-Based Midcourse Defense assets are properly maintained, and crews are trained to meet Combatant Commanders' needs. Specific activities include:

1. Weapon system sustainment support, equipment maintenance, operations support, and sustainment engineering.
2. Mission support, network operations and defense, and integrated logistics support.
3. Ground-Based Midcourse Defense unique base operations support, facility maintenance and repairs, facility restoration and modernization, and communication support at Fort Greely, AK, Vandenberg Space Force Base, CA, Fort Drum, NY and Eareckson Air Station, AK as outlined in respective support agreements and/or Missile Defense Agency (MDA) contracts. The respective Military Services are responsible for common use areas and common use items.
4. Utilities for facilities that Ground-Based Midcourse Defense occupies at Vandenberg Space Force Base, CA, Fort Drum, NY and Eareckson Air Station, AK and in the Fort Greely, AK cantonment area as outlined in the associated support agreements. The Fort Greely, AK cantonment area does not include the Fort Greely, AK Missile Defense Complex.
5. Configuration management and control for the fielded weapon system.
6. Facility Sustainment Restoration and Modernization (FSRM) at Ground-Based Midcourse Defense sites based on the MDA FSRM Project Integrated Priority List to support aging infrastructure, protect mission critical assets, and ensure power reliability and redundancy.
7. Contractor supported offsite maintenance activities for Ground-Based Midcourse Defense Weapon System subsystems.
8. Real-property support contractor services for operations, maintenance, and facility repair activities at Fort Greely, AK.
9. Communication Network hardware support, maintenance, and simultaneous Test and Operation support in the field to include the Upgraded Early Warning Radar (UEWR) locations at Beale Air Force Base, CA; Cape Cod Air Force Station, MA; Clear Air Force Station, AK; EAS, AK; Royal Air Force, Fylingdales, UK; Pituffik Space Force Base, Pituffik, Greenland; and the Sea-Based X-Band Radar.

C. **Missile Defense Systems Radars**. Funding provides sustainment support for five (5) Forward Based Mode Army Navy/Transportable Radar Surveillance and Control-2 (AN/TPY-2) radars, Sustainment support also includes MDA Missile Defense mission unique sustainment for the five (5) UEWR, Long Range Discrimination Radar (LRDR), and COBRA DANE radar that are in the United States Space Force's Global Command, Control, Communication, Intelligence & Early Warning program. The Space Force is the responsible organization for the UEWR, LRDR and COBRA DANE force structure, radar operators and maintainers, and operation and maintenance costs. Specific activities include:

1. Supply support, repair, maintenance, modernization, transportation, and storage.

2. Special tools, test equipment, and parts.
3. Recurring and delta training, technical interface, and training device maintenance.
4. Engineering support and interactive electronic technical manual updates.
5. Software revision certification and software user guide updates.
6. Depot Level Maintenance for MDA Ground Sensors missile defense unique equipment.
7. Gallium Nitride Transmit/Receive Integrated Microwave Module (T/RIMM) to replace obsolete Gallium Arsenide T/RIMM, incorporate server updates, and enhance radar capabilities.

D. Terminal High Altitude Area Defense. No funding is requested in FY 2027 to align with the Secretary of War's Military Strategy. In fiscal year 2026 and prior years, the MDA was responsible for the sustainment of the unique and developmental items for the Terminal High Altitude Area Defense (THAAD) missile defense system, while the U.S. Army was responsible for the operations and sustainment of the common items. The MDA funding provided sustainment for all fielded THAAD Batteries, ensured THAAD assets were properly maintained, and guaranteed that crews were trained to meet the needs of Combatant Commanders.

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $697,729

6. Price Change $14,448

7. Functional Transfers ..... $-175,816

a) Transfers In $0

b) Transfers Out ..... $-175,816

1) Forward Based Mode Army Navy/Transportable Radar Surveillance and Control-2 to Procurement, Army . $-62,440
Transfer $50,606 thousand for contract logistics support services, $6,590 thousand for ground transportation support services, and $5,244 thousand for depot maintenance to the Procurement, Army appropriation.
(FY 2026 Baseline: $275,787 thousand)

2) Terminal High Altitude Area Defense to Procurement, Army ..... $-113,376
Transfer $61,637 thousand for depot maintenance, $27,481 thousand for contract logistics support services, and $24,258 reduced for materials and parts to the Procurement, Army appropriation.
(FY 2026 Baseline: $113,376 thousand)

8. Program Increases $103,372

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $103,372

1) Ground-Based Midcourse Defense $47,750

$27,291 thousand increase provides additional Ground-Based Midcourse Defense remote site sustainment, facility maintenance and facility repair projects based on the Ground-Based Midcourse Defense facility project Integrated Priority List. Projects include adding a Redundant Substation Transformer at Fort Greely; replacing the Heating, Ventilation, and Air Conditioning unit in the Launch Control Center Facility at Vandenberg Space Force Station; and replacing the Rockwell Automation cabinets in Missile Field 2 Mechanical Electrical Building at Fort Greely to meet the mission readiness and increase Warfighter weapon system availability.

$13,293 thousand increase provides Ground-Based Midcourse Defense Weapon System sustainment to support new Fort Greely missile field, associated Silo Interface Vaults/Silos, COMSEC equipment, spare parts obsolescence mitigation, and to extend support for legacy Launch Support Equipment during Next Generation Launch Equipment development to ensure critical Ground-Based Midcourse Defense assets are continuously available to the Warfighter.

$3,948 thousand increase provides for proactive/corrective maintenance, hardware/software refresh planning, information assurance, network administration services, and cybersecurity management to ensure continued operations of the Ground-Based Midcourse Defense sites.

$2,683 thousand increase provides additional contract logistics support services for the operations and maintenance of the Ground-Based Midcourse Defense Weapon Systems.

$528 thousand increase provides for the MDA's fair share of utilities payments, based on the installation support agreements at Eareckson Air Station and Fort Greely.

$7 thousand increase provides the purchase of Defense Information Systems Agency circuits for continued communications and operations of the Ground-Based Midcourse Defense sites.

(FY 2026 Baseline: $161,089 thousand)

2) Missile Defense System Radars $55,621
$55,621 thousand increase provides spares inventory and obsolescence mitigation of Gallium Arsenide (GaAs) Transmit/Receive Integrated Microwave Module with Gallium Nitride (GaN) Transmit/Receive Integrated Microwave Module replacements to maintain availability and reliability of the AN/TPY-2 radar system.
(FY 2026 Baseline: $275,787 thousand)

9. Program Decreases .....$-152,498

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-152,498

1) Aegis Ballistic Missile Defense .....$-51,071
-$28,335 thousand decrease reflects the realignment of software sustainment activities to the Research, Development, Test & Evaluation appropriation to improve Aegis capabilities, ensuring operational readiness and effective test site utilization. Consolidating software development and sustainment efforts under MDA, currently managed by the prime contractor, will decrease costs, reduce obsolescence, and mitigate acquisition risk.

-$12,630 thousand reduction of funding for contract services in direct support of the President's Executive Order14222 which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.

-$6,924 thousand reflects reduced Standard Missile-3 Block IIA systems engineering services from other government agencies.

-$3,182 thousand reduction is due to reduced depot-level maintenance services for Aegis Ballistic Missile Defense shipsets.

(FY 2026 Baseline: $147,477 thousand)

2) Ground-Based Midcourse Defense .....$-4,578
-$3,345 thousand decrease reflects the reduction in IT telecommunication services. This is due to an increase in IT helpdesk and user support services, which are included in IT Contract Support.
-$665 thousand decrease is due to elimination of Ground-Based Midcourse Defense low-value / non-Warfighting training requirements.

-$316 thousand decrease is due to reduced fuel purchases for the installation at Ft. Greely.
-$252 thousand decrease is due to reduced purchases for Ground-Based Midcourse Defense low-value / non-Warfighting training requirements.
(FY 2026 Baseline: $161,089 thousand)

3) Missile Defense System Radars .....$-96,849
-$34,409 thousand decrease reflects a reduction of funding for contract services in direct support of the President's Executive Order14222, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness. The effect is a reduction in depot-level refurbishment activities and repairs at Letterkenny Army Depot for major radar components.

-$50,606 thousand decrease is due to reduced contract X-Band radar logistics support services and infrastructure operations and sustainment.

-$6,590 thousand decrease is due to reduced ground transportation support services for AN/TPY-2 depot refurbishment due to the transition and transfer of the Forward Based Mode AN/TPY-2 deport efforts to the Army.
-$5,244 thousand decrease is due to reduced organic depot-level maintenance services from the Letterkenny Army Depot.
(FY 2026 Baseline: $275,787 thousand)

FY 2027 Budget Request $487,235

IV. Performance Criteria and Evaluation Summary:

	FY 2025 Actuals	FY 2026 Estimate	FY 2027 Request
1. Operational Support	**671,366**	**697,729**	**487,235**
Aegis Ballistic Missile Defense	109,373	147,477	100,052
Ground-Base Midcourse Defense	181,419	161,089	204,261
Missile Defense System Radars	270,149	275,787	182,922
Terminal High Altitude Area Defense	110,425	113,376	0
Total Operations and Maintenance, Defense Wide	**671,366**	**697,729**	**487,235**

The MDA Ballistic Missile Defense mission is to deliver an enduring, operationally effective and supportable Ballistic Missile Defense capability to defend the nation, deployed forces, partners and allies.

A. Aegis Ballistic Missile Defense. The Aegis Ballistic Missile Defense element of the Missile Defense System capitalizes upon and evolves from the existing U.S. Navy Aegis Weapon System and Standard Missile infrastructures. Aegis Ballistic Missile Defense provides a forward-deployable, mobile capability to detect and track Ballistic Missiles of all ranges, and the ability to destroy short-range, medium-range, and intermediate-range ballistic missiles in the midcourse phase of flight and short-range missile in terminal phase. Aegis Ballistic Missile Defense also provides a long-range surveillance and track capability to the Missile Defense System. By the end of FY 2027, there will be 64 total Ballistic Missile Defense capable ships requiring maintenance support.

B. Ground-Based Midcourse Defense. The Ground-Based Midcourse Defense fielded weapon system is under the command of U.S. Northern Command and is operated by Soldiers from the 100th Missile Defense Brigade headquartered at SSFB and its 49th Missile Defense Battalion at Fort Greely and the 100th Missile Defense Brigade at Vandenberg Space Force Station. In FY 2027, MDA will support operationally deployed Ground-Based Interceptors located at Fort Greely and Vandenberg Space Force Station. Each Ground-Based Interceptor delivers a single Exo-atmospheric Kill Vehicle to defeat threat warheads in space during the midcourse phase of the ballistic trajectory. The Ground-Based Midcourse Defense Fire Control System consists of redundant fire control nodes at FGA (two (2) each) and the Missile Defense Integration and Operations Center (two (2) each) at Schriever Space Force Base. The In-Flight Interceptor Communication System Data Terminals are currently located at Fort Greely (two (2) each); Vandenberg Space Force Station (two (2) each); Eareckson Air Station; and Fort Drum.

C. Missile Defense Systems Radars. The MDA continues supporting five (5) Forward Based Mode Army Navy/Transportable Radar Surveillance and Control-2 (AN/TPY-2) radars, which are at fixed radar sites operating continuously 24 hours a day, 7 days a week, 365 days a year. The operational tempo is met by utilizing military personnel and Contractor Logistics Support to operate and maintain the radars. For FY 2027 this includes AN/TPY-2 operations and maintenance execution and continuation of T/RIMM sustainment due to vehicle life expectancy, obsolescence improvements, and high operational tempo use in corrosive environments. MDA also provides contributions

to sustainment unique to the MDA Missile Defense mission for the five Upgraded Early Warning Radar (UEWRs), Long Range Discrimination Radar and COBRA DANE radar that are in the U.S. Space Force's Global Command, Control, Communications, and Intelligence & Early Warning program. The Space Force is the responsible organization for the UEWR, Long Range Discrimination Radar and COBRA DANE force structure, radar operators and maintainers, and operations and maintenance funding.

D. Terminal High Altitude Area Defense. Army force structure for Terminal High Altitude Area Defense (THAAD) missile defense is currently set at eight (8) batteries with six (6) launchers operated by 90 Soldiers. The battery is organized to conduct 120-day deployments (45 days of entry operations and 75 days of 17-hour/day combat operations). During actual deployments, batteries have been operating 24 hours a day, 7 days a week for 365 days a year operational tempo, with increased Contract Logistics Support costs. This increased tempo has been sustained through the increase of appropriate attachments and support. Additionally, increased OCONUS stationing of THAAD Batteries by the Army drove an increase in costs for deployed contractor support, increased transportation costs for spares/repair parts, and increased quantities of stocks to support separate locations. In support of the Secretary of War's Military Defense Strategy, no funding is requested in FY 2027, as these efforts are transitioning to the United States Army.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Contractor FTEs (Total)	**892**	**959**	**610**	**67**	**-349**

Personnel Summary Explanations:

Increase of +67 contractor full-time (cFTE) equivalents from FY 2025 to FY 2026 provides for:

- +36 cFTEs for increased delivery frequency of Aegis baseline maintenance builds to support ongoing military operations, force protection, deterrence, training, and operations of Navy ships in support of USCENTCOM.
- +19 cFTEs for equipment reset of one Terminal High Altitude Area Defense (THAAD) battery after returning to the U.S. in FY 2026 to provide the desired level of THAAD combat capability in support of USCENTCOM military operations, force protections, and deterrence activities.
- +12 cFTEs for SM-3 Block IA/IB recertifications in support of USCENTCOM military operations, force protections, and deterrence activities.

Decrease of -349 cFTE from FY2026 to FY 2027 reflects:

- -248 cFTEs reduction is due to the transition and transfer of the THAAD operations and sustainment requirements to the U.S. Army in support of the Secretary of War's Military Defense Strategy. No funding is requested in FY 2027 for THAAD.
- -61 cFTE reflects the reduction of depot-level maintenance and Common Source Library maintenance requirements aligned with the U.S. Navy's maintenance schedules for deployed or deploying ships across various Aegis Ballistic Missile Defense baselines.
- -43 cFTEs reduction is due to the transition and transfer of responsibility for operations and sustainment of eight (8) terminal mode AN/TPY-2 radar systems to the U.S. Army in support of the Secretary of War's Military Defense Strategy.
- -13 cFTEs realigned Aegis Baselines software enhancement capabilities, maintaining operational readiness and test site effectiveness to RDT&E, per DoD Instruction 5000.85 and Commander's Training and Readiness assessments.
- - 6 cFTE reduction is due to elimination of Ground-Based Midcourse Defense low-value / non-Warfighter training requirements.
- +22 cFTE increase provides combined communication support services with the Missile Defense Integration and Operations Center to meet the Ground-Based Midcourse Defense mission requirements.

Fiscal Year 2027 Budget Estimates

Office of Local Defense Community Cooperation

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
OLDCC	468,342	11,549	-296,751	183,140	3,647	-44,190	142,597

I. Description of Operations Financed:
The Office of Local Defense Community Cooperation (OLDCC), statutorily authorized under Title10 United States Code (U.S.C.) §198, is a unique Department of War (DoW) field activity that furthers the Secretary's priorities by supporting efforts to enhance the readiness and lethality of military installations, ranges, and test facilities. These efforts in turn help support the States, defense communities, warfighters, and their families. In accordance with Title 10 U.S.C. §2391 and numerous National Defense Authorization and DoW Appropriation Acts, the OLDCC provides assistance to States, counties, municipalities, regions, and other communities to foster cooperation with military installations to enhance the military mission, achieve facility and infrastructure savings and reduced operating costs, address encroachment and compatible land use issues, support military families, and increase military, civilian, and industrial readiness and resiliency.

The OLDCC often engages at the juxtaposition of State and local civilian efforts in response to local mission activity and/or need, embodying the Secretary's priorities to restore the warrior ethos, rebuild our military, and reestablish deterrence.

DoW facilities and the industrial base rely upon the States and communities that host them, a circumstance where the readiness and resilience of installations and the industrial base are intrinsically related to their neighboring civilian jurisdictions, especially where dependencies exist on public infrastructure and services. The OLDCC continuum of technical and financial assistance enables these State and community partners to organize, plan, and carry out efforts that benefit both them and DoW installations, the organic industrial base, and the defense industrial base.

On behalf of the Secretary of War, the OLDCC also directs and executes the Defense Economic Adjustment Program, coordinating the involvement of other Federal Agencies through the Economic Adjustment Committee (EAC) per Executive Order 12788 (Defense Economic Adjustment Program), as amended by Executive Order 13378 (Amendments to Executive Order 12788 Relating to the Defense Economic Adjustment Program). The OLDCC Director is the Executive Director for the Economic Adjustment Committee, and provides guidance and assistance in leveraging other Federal agency expertise and resources to enable the DoW, its Components, and affected States and communities to: 1) assess economic and socioeconomic hardships caused by DoW program changes; 2) identify and evaluate alternative responses for local economic recovery; 3) identify resource requirements; and 4) assist in the preparation and implementation of adjustment strategies or action plans. The Departments of Labor and Commerce are each co-vice chairs of the Economic Adjustment Committee. For example, DoW Indo-Pacific basing actions are complemented by the OLDCC-led Economic Adjustment Committee efforts along with the Territory of Guam's Office of the Governor and its legislature, resulting in the execution of approximately $233 million in outside-the-fence infrastructure investments.

The OLDCC is currently managing over 204 active awards, totaling more than $1 billion. The OLDCC's project management and grant oversight responsibilities require a wide range of capabilities and expertise to perform critical functions from pre-award risk assessments to post-award compliance, as mandated by Title 2 of the Code of Federal Regulations, Part 200, the "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards," and DoW-specific responsibilities under Title 2 Code of Federal Regulations Parts 1104-1125. Depending on the award, audit responsiveness, Federal Interest oversight responsibilities, and OLDCC involvement may extend for several years after the close-out of a grant award.

Programs of Assistance:
OLDCC Programs of Assistance are continually scrutinized to ensure they effectively enable communities to be responsive to DoW needs as they support the military and civilian households (over 70% of the military households reside off installation) that sustain the local mission. These programs presently include: Installation Readiness (which encompasses OLDCC Compatible Use activities); Mission Growth (including support for our Indo-Pacific basing actions); Defense Community Infrastructure; Modernization; Public Schools on Military Installations; and Mission Realignment (including Base Closures and Realignments). These programs help states and communities respond to a range of need, including mitigating threats to the installation-level operating environment; DoW mission changes; and demand for increased public services and infrastructure with a focus on civilian Critical Infrastructure risk management.

Installation Readiness:
These efforts are the only DoW source of technical and financial assistance for states and communities to work with nearby installations (including testing and training ranges, special use airspace, military operations areas, and/or military training routes) to plan, enhance infrastructure, and implement measures that contribute to maintaining or enhancing a military installation's readiness and lethality while also supporting the warfighter mission.

Installation Readiness activities are geared to support the organizing, planning, and implementation actions necessary to avoid, prepare for, minimize the effect of, adapt to, and recover from extreme weather events, or from anticipated or unanticipated changes in environmental conditions, that do, or have the potential to, adversely affect the lethality of a military installation, assessing potential impacts to critical infrastructure, and designing risk management enhancements / mitigations in order to maintain, improve, or rapidly reestablish installation mission assurance and mission-essential functions. Under this assistance, State or local governmental entities analyze external threats and vulnerabilities to the readiness and lethality of the installation, develop mitigation strategies, and identify resources necessary to ensure the continuity of DoW and installation mission capabilities. This program enables a collaborative response that leverages Federal, State, local, and private resources to optimize the capacities and funds that each can bring to the effort. These program activities establish or reinforce an ongoing collaboration between civilian (public and private) and military equities that thrives beyond the term of any project. Installation Readiness projects may include a comprehensive review of threats and vulnerabilities; targeted studies or plans concerning, but not limited to, transportation, land use/encroachment, utility services, housing, stormwater management, and other critical infrastructure. Applicants are encouraged to undertake tabletop exercises with their local installations and other key partners, including State National Guard, to facilitate threat-based scenarios to identify critical infrastructure vulnerabilities and prioritize improvements where the need exists. OLDCC is currently supporting 89 active efforts serving the readiness needs of the Department through the development of plans to identify and then carry out efforts to prevent encroachment

and mitigate threats. The Military Departments may nominate installations and ranges for this program, or State and local governments may directly request assistance.

In FY 2025, efforts under this program benefitted the Department and its civilian partners, such as:

- The City of Virginia Beach Department of Public Utilities has been working with Naval Air Station Oceana and Joint Expeditionary Base Little Creek-Fort Story through a $300 thousand effort to plan and design ~1.5 miles of a new 30-inch diameter water transmission main in support of the mission requirements for potable water and water suppression.
- Bay County, Florida, has been working with Tyndall Air Force Base and Naval Support Activity Panama City through a $500 thousand effort to conduct a feasibility study for a new water treatment plant to support mission readiness in the event of extreme weather.
- The North Central Texas Council of Governments, through a $431 thousand effort, assessed encroachment threats to Naval Air Station Joint Reserve Base Fort Worth, Dallas Army Aviation Support Facility, Fort Wolters, Camp Maxey, and the Eagle Mountain Training Center, resulting in a $2.7 million local investment to successfully acquire commercially zoned properties near the Naval Air Station Joint Reserve Base Fort Worth's runway, mitigating incompatibility with F-35 Joint Strike Fighter operations.

The OLDCC FY 2027 President’s Budget requests $5,000 thousand for the programs of assistance in Installation Readiness. This program enables a collaborative response that leverages Federal, State, local, and private resources to optimize the capacities and funds that each can bring to the effort.

Defense Community Infrastructure:

These projects assist state and local partners through a competitive program to address deficiencies in community infrastructure, supportive of a military installation, to enhance mission assurance or installation readiness, military family quality of life, installation resilience, or support the training of Reserve Officer Training Corps cadets. These infrastructure projects enhance our local installations, benefitting our Service members, their families, and missions. Awards fund community infrastructure projects, which are statutorily defined as transportation projects, community support facilities (e.g., schools, hospitals, police, fire, and emergency response), and utility infrastructure projects (e.g., water, wastewater, telecommunications, electric, gas, etc.) and demolition projects that are located off a military installation or on land leased from the DoW, supporting a military installation, and are owned by a State or local government or a not-for-profit, member-owned utility. Under the program, 16 grants were made in FY 2020, 12 grants in FY 2021, 19 grants in FY 2022, 17 grants in FY 2023, 14 grants in FY 2024, and 10 grants in FY 2025. In total, $483.9 million in federal funds are supporting $812.6 million in total enhancements to benefit installations.

In FY 2025, efforts under this program benefitted the Department and its civilian partners, such as:

- A $14 million investment is installing high-speed fiber optic telecommunications infrastructure to Point Barrow Long Range Radar Site, ensuring the connection of a critical telecommunications linkage between the Alaskan North Slope and Joint Base Elmendorf-Richardson, preparing warfighters to defend our homeland as well as the availability of the Alaskan radar facilities for missile defense system testing, such as for a Golden Dome system, supporting an installation population of over 13,000.

- A $10 million investment is reconstructing a segment of US-69 and replacing the Peaceable Creek bridge to improve access at McAlester Army Ammunition Plant, Oklahoma, supporting an installation population of 18,052. The project will improve current risk and constraints on material delivery and final ammunition dispatch from the ammunition plant.

The OLDCC FY 2027 President's Budget requests $100,000 thousand for this program, which will provide resources and enable the Department to leverage state and local investments in critical infrastructure projects.

Modernization: Efforts under this program enable states and local governments to undertake civilian/military reviews of civilian infrastructure and public services necessary to support the mission of military installations, the defense industrial base and the defense industrial base workforce. Projects may review installation readiness in the context of vulnerabilities to civilian dependencies, explore the feasibility of solutions, and design responsive improvements to public infrastructure and services to enhance the capacity of the surrounding jurisdictions to support current and future mission requirements. In FY 2026, OLDCC is providing technical and financial assistance to DoW-nominated states and communities to partner with nearby military facilities on strengthening critical infrastructure.

The OLDCC FY 2027 President's Budget requests $21,097 thousand for the programs of assistance in Mission Growth, Installation Readiness; Modernization; and Mission Realignment (including Base Closures and Realignments.)

Public Schools on Military Installations:
These projects enable Local Education Agencies to remedy condition and capacity deficiencies at public schools on military installations as prioritized by the Secretary of War. Participation in this program is by invitation only based on 1) a Deputy Secretary of War prioritization ranking of all 160+ public schools on military installations, and 2) the availability of appropriations to fund a project in the order of that prioritization. Grants are provided to construct, renovate, repair, or expand elementary and secondary public schools. Since FY 2011, the program has received $3.25 billion in appropriations to execute this program. The top 71 schools prioritized by the Secretary are currently being addressed.

In FY 2025, efforts under this program benefitted the Department and its civilian partners, such as:

- A $65.4 million investment ($52.3 million federal, $13.1 million non-federal) for Altus Public Schools, Altus, Oklahoma, replaced a severely deteriorated school (Rivers Elementary School) at Altus Air Force Base, Oklahoma, benefiting over 600 students annually and vastly improving the military family quality of life and airmen retention rates at Altus Air Force Base, contributing to the readiness and lethality of Altus's missions.
- A $10 million investment ($8 million federal, $2 million non-federal) for Yuma Elementary School District One, Yuma, Arizona, replaced a severely deteriorated school (Price Elementary School) at Yuma Proving Grounds, Arizona, benefitting over 125 students annually and vastly improving the military family quality of life and retention rates at Yuma Proving Grounds, contributing to the readiness and lethality of Yuma Proving Grounds' missions.

The FY 2026 spend plan amount for OLDCC includes $183,140 thousand of discretionary and $100,000 thousand of mandatory (reconciliation) for a total of $283,140 thousand.

II. Force Structure Summary:

From FY 2020 through FY 2026, Congress has appropriated an average of more than 482 percent above the President's Budget request which resulted in an expanded program portfolio of greater complexity with additional post-grant award monitoring activities (e.g., construction, environmental compliance, Federal interest, and others). In response, the OLDCC significantly restructured the organization twice and made several other minor organization changes. The OLDCC experienced a 12 percent reduction in manning levels as part of the workforce optimization combined with the DoW Deferred Resignation Programs.

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action			
A. BA Subactivities	**FY 2025 Actuals**	**Budget Request**	**Amount**	**Percent**	**Current Enacted**	**FY 2027 Request**

Total Operations and Maintenance, Defense Wide ($ in thousands)	**468,342**	**183,140**	**142,597**

The Office of Local Defense Community Cooperation (OLDCC), statutorily authorized under 10 U.S.C. §198, is a unique Department of War field activity that furthers the Secretary's priorities by supporting efforts to enhance the readiness and lethality of military installations, ranges, and test facilities. These efforts in turn help support our defense communities, our warfighters and their families. In accordance with 10 U.S.C. §2391 and numerous National Defense Authorization and Appropriation Acts, OLDCC executes programs of assistance on behalf of the Secretary to make grants, conclude cooperative agreement, and supplement other Federal programs to work with states and communities.

The OLDCC grant management and oversight responsibilities extend from pre-award project management and risk assessments, through post-approval monitoring and management of awards (to include payments, amendments, enforcement, and project management travel), to close-out, audit responsiveness, Federal Interest enforcement, and intellectual property management. Applications are evaluated against criteria established by Title 2 Code of Federal Regulations Parts 200 and 1120, 10 U.S.C. §2391 authorities, as well as Congressional legislation addressing specific programs. Post-award monitoring consists of continual OLDCC project and grants management oversight to include approving recurring performance and financial reports submitted by grantees, which are evaluated against scope and cost data in the award to ensure compliance. Depending on the award, OLDCC oversight may extend across several fiscal years.

The OLDCC Operations performance is evaluated against execution criteria that is established through budget formulation. Further, OLDCC's well-established Risk Management and Internal Controls Program provides consistent oversight of activities during the year through continuous internal testing of assessable units to mitigate risks and provide reasonable assurance that OLDCC's assets are protected from fraud, waste, and mismanagement.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Active Military End Strength (E/S) (Total)	**3**	**3**	**3**	**0**	**0**
Officer	3	3	3	0	0
Civilian End Strength (Total)	**55**	**47**	**47**	**-8**	**0**
U.S. Direct Hire	55	47	47	-8	0
Total Direct Hire	**55**	**47**	**47**	**-8**	**0**
Civilian FTEs (Total)	**55**	**47**	**47**	**-8**	**0**
U.S. Direct Hire	55	47	47	-8	0
Total Direct Hire	**55**	**47**	**47**	**-8**	**0**
Average Annual Civilian Salary ($ in thousands)	**233.4**	**232.9**	**240.8**	**-0.5**	**8.0**
Contractor FTEs (Total)	**22**	**22**	**22**	**0**	**0**

Personnel Summary Explanations:
Explanation of changes in Active Military Average Strength (A/S): No change in Active Military Average Strength

Explanation of changes in Civilian FTEs: The decrease from FY 2025 to FY 2026 reflects -8 FTEs to optimize the workforce in compliance with Executive Order 14210, “Implementing the President’s Department of Government Efficiency Workforce Optimization Initiative.”

I. Description of Operations Financed:
The Office of the Secretary of War (OSW) is responsible for policy development, planning, resource management, and program evaluation. The OSW includes the offices of top civilian Department decision-makers concerning personnel, weapons acquisition, research, intelligence, and fiscal policy, as well as offices that the Secretary of War (SECWAR) establishes to assist in carrying out assigned responsibilities. The OSW includes the immediate offices of the SECWAR and Deputy Secretary of War (DEPSECWAR), the Under Secretaries of War, the Principal Staff Assistants (PSA), the Executive Support Offices, and other core programs, which are listed below:

OSW Offices/Principal Staff Assistants:
- Immediate Office of the Secretary and Deputy Secretary of War
- Office of the Assistant Secretary of War for Legislative Affairs (OASW(LA))
- Office of the Assistant Secretary of War for Special Operations Low-Intensity Conflict (OASW(SO/LIC)) & Secretariat for Special Operations (SSO)
- Office of the Assistant to the Secretary of War for Public Affairs (OATSW(PA))
- Defense Innovation Unit (DIU)
- Director of Administration and Management (DA&M)
- Director, Cost Assessment and Program Evaluation (D, CAPE)
- Director, Operational Test and Evaluation (D, OT&E)
- DoW Chief Information Officer (DoW CIO)
- Office of General Counsel (OGC)
- Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S))
- Office of the Under Secretary of War (Comptroller) (OUSW(C))
- Office of the Under Secretary of War for Intelligence and Security (OUSW(I&S))
- Office of the Under Secretary of War for Personnel and Readiness (OUSW(P&R))
- Office of the Under Secretary of War for Policy (OUSW(P))
- Office of the Under Secretary of War for Research and Engineering (OUSW(R&E))
- Strategic Capabilities Office (SCO)
- Test Resource Management Center (TRMC)

Other Funded Programs and Organizations:
- Civilian Pay

- Congressional Commissions
- Centrally Managed Programs and Lines of Business (including Capital Security Cost Sharing (CSCS))
- Secretary of War and Department Initiatives (including Direct Report Portfolio Managers (DRPM))

Civilian Pay: The OSW Core Operating Program provides the necessary resources to support the effective implementation of the 2026 National Defense Strategy (NDS). Funding includes all civilian personnel compensation and benefits required for OSW's operations and the centrally funded support services as depicted in the subsequent tables:

OSW Offices/Principal Staff Assistants Mission Descriptions:

Immediate Office of the Secretary and Deputy Secretary of War: Includes the SECWAR and DEPSECWAR, as well as their support staff tasked with leading the Department.

Office of the Assistant Secretary of War for Legislative Affairs (OASW(LA)): The OASW(LA) serves as the PSA and advisor to the SECWAR for DoW relationships with the U.S. Congress and oversees DoW legislative affairs. The OASW(LA) promotes the DoW defense budget and strategy, legislative priorities, and policies to the U.S. Congress. The OASW(LA) priorities support required contracts specializing in critical areas of research and operational requirements necessary to accomplish the LA mission as defined by the Department.

Office of the Assistant Secretary of War for Special Operations/Low-Intensity Conflict (OASW(SO/LIC)) & Secretariat for Special Operations (SSO): Pursuant to Sections 138(b)(2)(A) and 139b of Title 10, U.S. Code, and in accordance with Section 922 of the NDAA for FY 2017, Section 902 of the NDAA for FY 2021, Section 907(a)(2) of the NDAA for FY 2025, and Sections 138(b)(2)(A) and 139b of Title 10, U.S. Code, the Assistant Secretary of War for Special Operations/Low-Intensity Conflict (ASW(SO/LIC)) serves as the PSA to the SECWAR for special operations, low-intensity conflict, and special operations-peculiar administrative matters.

The Office of Secretariat for Special Operations (SSO) within this PSA exercises the authority, direction, and control with respect to special operations-peculiar administrative matters related to organizing, training, and equipping of special operations forces (SOF), and following the administrative chain of command specified in Section 167(f) of Title 10. The SSO mission is to forge the future of joint SOF by cultivating partnerships and shaping strategic initiatives and policies that ensure SOF remains optimally organized, trained, equipped, and resourced to address evolving global security challenges. More specifically, SSO is focused on the following priorities and functions:

1) **Design the future SOF force:** Deliver analytically grounded recommendations on SOF size, structure, posture, and capability mix to reestablish deterrence and ensure long-term alignment with strategic threats, missions, and priorities.
2) **Maximize performance and resilience of SOF personnel:** Develop policy and guidance to restore the warrior ethos and ensure the recruitment, selection, development, and retention of a highly capable future force.
3) **Ensure training and readiness meets future needs:** Evaluate and advocate for readiness standards, training pipelines, and infrastructure to ensure the force is prepared for evolving, dynamic operational requirements.
4) **Align capability development to strategic priorities:** Provide policy direction and oversight for special operations-peculiar and irregular warfare capability development. Ensure capability investments are aligned to rebuilding military strength, advancing modernization goals, and delivering real operational value. Clear hurdles to prototyping, experimentation, and fielding.
5) **Rapidly solve asymmetrical and ambiguous problems:** Partner with interagency and international entities, especially where irregular warfare is central to prioritize rapid development of irregular warfare capabilities if they are tied to irregular warfare missions; no other DoW entity is solving it at operational speed; and it can field something faster or more adaptable than formal acquisition programs. Ensure irregular warfare technology development is aligned with national policy and operational demand signals.

6) **Strengthen resource oversight and institutionalize accountability:** Advance data-driven analysis and tools to enhance fiscal responsibility and ensure that resourcing decisions are tracked and aligned with strategic outcomes across the SOF enterprise.

The SSO priorities and functions are grounded in data, performance metrics, and rigorous analysis. The SSO leverages technology to lead development of tools and frameworks that enable transparent, measurable oversight and implementation of the SSO initiatives across the organize-train-equip-resource spectrum.

The SSO operating budget supports the ASW(SO/LIC)'s role as a PSA and advisor to the SECWAR and DEPSECWAR. Requested funding covers operational requirements, including travel, information technology support, digital-first operations initiatives, administrative functions, and surge technical/analytical support needed to implement the SSO Strategic Plan. These resources are vital to the SSO's ability to provide Service Secretary support to SOF, build enduring advantages across the defense ecosystem, and sustain readiness at the highest standards while anticipating emerging requirements.

Office of the Assistant to the Secretary of War for Public Affairs (OASW(PA)): Serves as the PSA and assistant to the SECWAR and DEPSECWAR for public information, internal information, community relations, training, and audiovisual matters. The OASW(PA) follows the Secretary's guidance in providing Department information to the public, the Congress, and the media. The OASW(PA) sponsors the DoW War.gov website, which is the DoW's official website and the starting point for finding U.S. military information online. The Assistant to the Secretary of War for Public Affairs (ATSW(PA)) is the lead for the DoW's Strategic Marketing Office, supports all SECWAR's public communications, and responds to all public inquiries to the DoW.

The OASW(PA) funding supports specialized contracts, which provide the Department's information to all audiences. These contracts support distributing official DoW information across the full spectrum of media platforms as well as reviewing and analyzing the impacts of DoW and adversary communication efforts.

Defense Innovation Unit (DIU): The DIU's mission is to strengthen U.S. national security by accelerating the adoption of commercial technology throughout the Department while growing the national security innovation community. The DIU partners with organizations across the Federal Government, DoW, intelligence community, and domestic and foreign partners to rapidly prototype, field, and scale commercially derived solutions to meet the most critical operational capability gaps identified by the Department with the focus, speed, and scale required to help deter major conflict and win if forced to fight. With offices in Silicon Valley, Boston, Austin, Chicago, and the Pentagon, the DIU attracts the best and brightest talent and cutting-edge solutions.

The DIU operating budget supports the organization's role as a PSA and advisor to the SECWAR and DEPSECWAR. It supports the DoW's initiatives to build enduring advantages across the defense ecosystem - the DoW, defense industrial base (DIB), and array of private sector enterprises and academia that create and sharpen the joint force's technological edge, with a focus on innovation and rapid adjustment to new strategic demands. In addition to supporting core DIU functions, the requested funding supports operational requirements for IT, due diligence and business intelligence software licenses, travel, and administrative functions for the National Security Innovation Network and National Security Innovation Capital programs.

Director of Administration and Management (DA&M): The DA&M is the PSA and advisor to the SECWAR and DEPSECWAR on DoW-wide administration, organization, and management. As a PSA, the DA&M exercises authority, direction, and control of the Director, Washington Headquarters Services (WHS), and

the Director, Pentagon Force Protection Agency (PFPA). The DA&M provides policy, oversight, direction, and control for the management, operation, security, and modernization of the Pentagon Reservation and supported DoW facilities in the National Capital Region (NCR). This includes exercising the authorities of the Secretary of War under chapter 159 of title 10, U.S. Code, for real property management.

Key activities conducted in the Office of the DA&M include:

- Conduct analyses and studies of DoW organizations, missions, and functions, and recommend changes to the SECWAR and DEPSECWAR for improved organizational, structural, functional, and managerial arrangements for the administration of DoW plans and programs.
- Developing, coordinating, and issuing policy for the administration and management of specified DoW activities and programs, including:
    - The DoW Directives, Committee Management, and Federal Advisory Committee Management Programs.
    - The Office of the Director, Privacy, Civil Liberties, and Transparency (PCLT) is a Directorate that advances the DoW's commitment to executing its mission while protecting individual privacy and civil liberties. The PCLT Directorate also serves as the DoW Senior Intelligence Oversight Official.
    - The DoW Freedom of Information Act (FOIA), Security Review, and Regulatory Planning and Review Programs are consistent with section 552 of title 5, U.S. Code. Serve as the DoW Chief FOIA Officer.
    - The DoW Regulatory Planning and Review Program.
    - The DoW Senior Intelligence Oversight Official
    - The manpower system of record supporting the OSW, Joint Staff, and Combatant Commands.
- Providing the SECWAR, DEPSECWAR, and other senior leaders with comparative analyses of military and technological trends through the Office of the Director, Net Assessment (ODNA). The ODNA identifies emerging strategic risks and opportunities to inform long-term planning.
- Serving as the Chief Information Officer for OSW.
- Representing the Department on the National Capital Planning Commission and chairing the Pentagon Governance Council.

In addition, the DA&M, via the WHS, has increased its support requirements to SECWAR and DEPSECWAR due to new priorities such as the Business Operators for National Defense (BOND) initiative and the establishment of multiple Direct Reporting Portfolio Managers (DRPM).

Director, Cost Assessment and Program Evaluation (D, CAPE): The D, CAPE provides the SECWAR and other DoW senior leaders with non-advocate, fact-based decision support on the size, shape, affordability, disposition, and readiness of the future joint force to achieve the NDS. This includes analyzing the DoW Program by leading strategic portfolio reviews and the annual program review; supporting the acquisition process by providing senior acquisition executives with independent cost estimates (ICE) and guidance and sufficiency reviews of Analyses of Alternatives (AoA); and leading DoW's analytic and cost communities. The D, CAPE funds analyses that inform cost estimating, long-range planning, the development and maintenance of a database of actual operating and support costs for major weapons systems, requirements for strategic portfolio reviews, and the development of the analytic community within DoW. Through studies and analyses, the D, CAPE offers trade-offs and alternatives and assesses best practices and affordability options to advance the national strategy effectively. These analyses are groundbreaking, comprehensive, and data-driven, exploring capabilities that improve the force's lethality. Resources support key priorities such as: the Analysis Working Group (AWG), standing up the Requirements and Resourcing Alignment Board (RRAB), rebuilding military readiness, campaign analysis,

force planning analysis, industrial base assessments, modernizing analytic tools and capabilities, and accelerating the reform of DoW analytic practices. Through competitive sourcing and consolidation, the D, CAPE continues to optimize spending on contracts and contract personnel supporting those efforts. Overall resources are balanced to support competing demands, including the modernization of the D, CAPE analytic and business IT systems, congressionally mandated studies, SECWAR priorities, continuing strategic reviews, and strategic and warfighting analyses, as prioritized by the DEPSECWAR and the Vice-Chairman of the Joint Chiefs of Staff (VCJCS).

The activities include:

1) Long Range Planning
2) Cost Estimating and Program Evaluation Economic Research
3) Strategic, C4, and ISR Programs
4) Conventional Forces Analytical Support
5) Readiness and Force Employment Analysis
6) Irregular Warfare, Mobility Capability, and Force Projection Analyses
7) Force Structure, Weapons Systems, and Warfighting Analysis
8) Support for Strategic Analysis and Campaign Analysis
9) Industrial Base Assessments
10) Enterprise Data Initiatives
11) Cost Data Support Group
12) Manpower Analysis
13) Modeling and Simulation
14) Programmatic and Budgetary Data Requirements
15) Enterprise Visibility and Management of Operating and Support Cost (EVAMOSC)

Director, Operational Test and Evaluation (D,OT&E): Section 139 of Title 10, U.S. Code, requires the D, OT&E to prescribe policies and procedures for the conduct of operational test and evaluation in DoW. The D, OT&E monitors and reviews all operational tests to confirm operational effectiveness and suitability of the defense system in combat use. Additionally, the D, OT&E supports mission-essential headquarters travel and hosting of the D, OT&E public-facing website.

DoW Chief Information Officer (DoW CIO): As the PSA and advisor to the SECWAR and DEPSECWAR on all information technology (IT) matters, the DoW CIO is responsible for the entire Department information enterprise. The DoW CIO develops the Department-wide strategy, enterprise architecture, and technical standards for all IT systems to ensure their security, interoperability, and operational effectiveness. In direct support of the National Security and National Defense Strategies, the DoW CIO's activities focus on modernizing key information capabilities, enhancing resiliency, and ensuring the DoW maintains a decisive technological advantage over its adversaries.

The DoW information enterprise and systems resource management activities include:

1) Command, control, and communication (C3), including positioning, navigation, and timing (PNT) policy and spectrum management.

2) E-Gov initiatives and government-wide councils; and
3) Software modernization (development, security, operation), including cloud computing

Office of General Counsel (OGC): The OGC is headed by the DoW General Counsel. Appointed by the President with the advice and consent of the Senate, the General Counsel is, by law, the Chief Legal Officer of the DoW, in accordance with section 140 of Title 10, U.S. Code. The DoW General Counsel shares direct legal responsibilities and functions with the Defense Legal Services Agency (DLSA) and is responsible for, but not limited to, the following functional areas:

- Provides advice to the SECWAR and DEPSECWAR regarding all legal matters and services performed within, or involving, the DoW.
- Directs legal services performed within DoW, including determining the adherence of DoW attorneys to appropriate professional standards.
- Serves in two capacities as the DoW General Counsel and as the Director of DLSA. This DoW agency provides legal advice and services for the Defense Agencies, DoW Field Activities, and other assigned organizations.

Office of the Under Secretary of War for Acquisition and Sustainment (OUSW(A&S)): The OUSW(A&S) is the PSA and advisor to SECWAR and DEPSECWAR for all matters relating to acquisition and sustainment in the DoW. The primary responsibilities of OUSW(A&S) include serving as the DoW chief acquisition and sustainment officer, with the mission of enabling the delivery and sustainment of secure, resilient capabilities to the warfighter and international partners quickly and cost-effectively. The OUSW(A&S) focuses on ensuring the operational readiness and long-term sustainment of military systems, covering everything from routine maintenance and logistics to the manning and operation of military installations. These funds are critical for managing the day-to-day activities that keep equipment mission-capable and support the warfighter, including energy resilience and facility upkeep. The OUSW(A&S) is also responsible for establishing policies and supervising all elements of acquisition, sustainment, the defense industrial base (DIB), and modernization of the nuclear forces. The OUSW(A&S)'s major activities include Acquisition Transformation Support (ATS), War Production Unit (WPU), Economic Defense Unit (EDU), Readiness and Environmental Protection Initiative (REPI), Enterprise Logistics, Native American Lands Environmental Mitigation Program (NALEMP), Global Investments and Economic Security (GIES), APEX Accelerators, and Chemical and Biological Weapons Elimination (CBWE) Support Services, and Biosurveillance (BSV) program (transferred from the Defense Health Agency).

Other OUSW(A&S) activities include:

<u>Acquisition Transformation Support:</u>

1) Acquisition Integration and Interoperability (AI2)
2) Acquisition Innovation
3) Contracting Enablers, Initiatives, and Pricing
4) Contracting E-Business Capabilities
5) Cost-Effective Material Readiness
6) Cyber Integration
7) Industrial Policy Program Support

8) Information and Integration Portfolio Management
9) International Cooperation Program Support
10) Industrial Planning and Analysis
11) Product Life-Cycle Sustainment
12) Small Business Program Support
13) Industry Affairs
14) Mergers and Acquisitions (M&A)

Global Investments and Economic Security (GIES):

15) Committee on Foreign Investment in the United States (CFIUS)
16) Team Telecom (TT)
17) Economic Warfare
18) Due Diligence
19) FCC Covered List Waivers
20) Information Communication Technology Supply Chain (ICTS)
21) 1260H
22) Outbound Investment

Other A&S Programs

23) Chief Financial Officer Act Compliance
24) Chemical Biological Weapons Elimination Program Support Services
25) Core Services
26) Defense Installation Data Infrastructure (DISDI)
27) Defense Management Initiatives (DMI)
28) DoW Legacy Program
29) DoW Siting Clearinghouse
30) Emerging Contaminants
31) Energy
32) Environmental Compliance
33) Installation Resilience

34) Federally Funded Research & Development Center (FFRDC) Oversight
35) Human Capital Initiatives (HCI)
36) Installation & Environment Business Enterprise Integration
37) OUSW(A&S) Travel
38) Official Representation Funds
39) Quick Reaction Special Projects (QRSP)
40) Acquisition Program Support Systems
41) Logistics Systems Modernization (LSM) support

Office of the Under Secretary of War (Comptroller) (OUSW(C)): The OUSW(C) is the PSA to the SECWAR for budgetary and fiscal matters, including financial management, accounting policy and systems, audit and audit remediation, management control systems, budget formulation and execution, and data analytics. The OUSW(C) is responsible for managing the review, formulation, presentation, and execution of the DoW budget. In doing so, the OUSW(C) works to achieve economy and efficiency in DoW operations through sound business judgment and effective fiscal planning and control. The OUSW(C) ensures DoW leaders have access to high-quality, timely, and analyzed data for decision-making through a business framework that simplifies processes, standardizes systems and information, and promotes financial policies and internal controls. This framework supports effective and efficient financial management operations, with a focus on achieving and sustaining unmodified (or clean) audit opinions across the Department. In support of the DoW's financial management workforce, the OUSW(C) develops and sustains developmental programs, including the DoW Financial Management Certification Program. The activities include: Comptroller initiatives, administrative support, and the Next Generation Resource Management System.

Office of the Under Secretary of War for Intelligence and Security (OUSW(I&S)): The OUSW(I&S) operating budget supports the Under Secretary's (USW(I&S)) role as PSA and advisor to the SECWAR and DEPSECWAR regarding intelligence, counterintelligence, security, law enforcement, sensitive activities, and other intelligence-related matters. The budget also supports the USW(I&S)'s role in exercising the SECWAR's authority, direction, and control over and oversight of the War Agencies and DoW Field Activities that are defense intelligence, counterintelligence, law enforcement, or security Components and exercises planning, policy, and strategic oversight over all defense intelligence, counterintelligence, law enforcement, and security policy, plans, and programs.

In addition to the Military Intelligence Program (MIP) Management and Activities of the OUSW(I&S) operating budget, funding is provided for:

- The Defense Military Deception Program Office (DMDPO) provides governance, oversight, and operational implementation of Military Deception (MILDEC) planning and execution capabilities across the DoW, including Sensitive Messaging, Deception, Influence, and other Operations in the Information Environment.

- The OSW Red Team serves as the Secretary's and Deputy Secretary's red team, providing insights into adversaries' highest-level perspectives and potential actions to inform strategic-level DoW activities. These adversary-centric insights augment, complement, and are separate and distinct from other established channels of military advice, finished intelligence products, and analysis provided to the SECWAR, DEPSECWAR, and the DoW Components.

The Red Team's most valuable resource is its mix of operational and intelligence experts who bring distinct knowledge and skills not found elsewhere in the DoW. Providing exquisite insight into the SECWAR and DEPSECWAR ensures that adversary calculus and military responses are factored into deterrence and denial strategies.

- The Influence and Perception Management Office (IPMO) is the OUSW(I&S) center of gravity for efforts to deliberately influence foreign War and intelligence entities to behave in ways that benefit America's defense-related strategic interests. The IPMO integrates, matures, and operationalizes oversight, governance, and execution of cross-cutting influence activities. The IPMO's activities include the development of thematic influence guidance and integrated influence strategies; oversight of intelligence support to operations in the information environment; oversight and governance of deception activities; oversight and governance of the deliberate conceal and selective reveal of strategic DoW capabilities; and management of designated compartmented programs.

- Advanced Intelligence Capabilities (AIC) reports directly to the DEPSECWAR and the Principal Deputy Director of National Intelligence and synchronizes efforts across the Department and with other U.S. Federal departments and agencies to detect, identify, and attribute objects of interest in, on, or near military installations, operating areas, training areas, special-use airspace, and other areas of interest, and, as necessary, to mitigate any associated risks to the safety of operations and national security. This includes anomalous, unidentified space, airborne, submerged, and transmedium objects.

- DoW Law Enforcement (LE) Oversight and Compliance: The LE Directorate will serve as the senior advisor to the OUSW(I&S) for law enforcement policy and provide oversight of the law enforcement community. The Directorate leads, coordinates, and integrates law enforcement initiatives to bolster law enforcement officer standards and training, improve the care and utilization of working dogs, strengthen the high-risk personnel program, and support related programs across the LE community.

Office of the Under Secretary of War for Personnel and Readiness (OUSW(P&R)): The OUSW(P&R) is the PSA and advisor to the SECWAR for:

- Total Readiness programs, including operational and strategic readiness
- Readiness Assessments, Reporting, and Analytics
- Military Education and Joint Training
- Occupational and Environmental Safety
- Operational Safety
- Warfighter Performance Optimization
- Manpower and reserve affairs, including the recruitment and retention of both civilian and uniformed personnel
- Total Force Manpower Management and Policy, including workforce mix, sourcing, allocation, and apportionment
- Reserve Component matters
- Military family, childcare, spouse employment, and community matters
- Delivery of health care to the Force, with strategic governance of the Military Health System through the oversight of the Defense Health Agency
- Suicide prevention

- Force resiliency
- Prevention of and response to problematic and violent behaviors, including sexual assault
- DoW Drug Demand Reduction Program
- DoW Dependent Schools via oversight of the DoW Education Activity
- Commissaries and exchanges
- Non-appropriated fund activities, including Morale, Welfare, and Recreation activities
- Civil Military Programs, which include the National Guard Youth Challenge Program, STARBASE, and Innovative Readiness Training
- Resource allocation for interagency and intergovernmental activities, studies, special projects, and external requests that require DoW civilian and military personnel
- Collaboration with the Department of Veterans Affairs
- United States Military Entrance Processing Command (USMEPCOM)

The OUSW(P&R) also oversees the preparedness of the Total Force of military (Active, Reserve, and Guard), civilian, and contracted support to execute national security guidance, to include the development of policies, plans, and tools for the reporting of readiness levels and analysis of the impacts of Department decisions on readiness; military education and training of Service members and units to execute assigned missions; and the full spectrum of occupational readiness functions, as foundational elements of Total Force preparedness.

The OUSW(P&R) mission is critical to advancing lethality and promoting meritocracy and sustainability across the civilian and uniformed enterprises. The OUSW(P&R) is committed to ensuring a merit-based force, focused on cultivating talent based on performance, potential, and mission contribution. Advancing an optimal, mission-ready, combat credible, and enabling workforce, aligned against validated requirements, that strengthens readiness and preserves critical skills is fundamental to the NDS. The organization is leading the way in cultivating a pipeline of strong civilian employees and uniformed personnel by investing in, building, and developing a talent pool with the technical and leadership skills to drive results across functional areas, business units, and the DoW. This involves overseeing the Department's personnel initiatives (e.g., the Deferred Resignation Program and the Voluntary Early Retirement Authority) to advance the President's directives and SECWAR's intent, optimize the workforce in support of our core warfighting mission, and cultivate a more ready, lethal, and effective fighting force.

Office of the Under Secretary of War for Policy (OUSW(P)): The OUSW(P) is the PSA and advisor to the SECWAR and DEPSECWAR on capabilities, force, and contingency plans necessary to implement the NDS, War policy, and the integration and oversight of DoW policy and plans to achieve national security objectives. The OUSW(P) represents the DoW to foreign governments, international organizations, and interagency functions. The OUSW(P) funding supports mission requirements to consistently provide responsive, forward-thinking, and insightful policy advice and support to the SECWAR and the DoW, aligned with national security objectives.

The OUSW(P) core mission areas include:

Indo-Pacific Security Affairs (IPSA) - The Assistant Secretary of War for IPSA (ASW(IPSA)) is the principal advisor to the Under Secretary of War for

Policy (USW(P)) and SECWAR on international security strategy and policy on issues of DoW interest that relate to the nations and international organizations of the Asia-Pacific, its governments, and War establishments and for oversight of security cooperation programs, including foreign military sales (FMS), in the region.

Homeland Defense and Americas Security Affairs Affairs (HD&ASA) (Formerly Homeland Defense and Hemispheric affairs (HDHA) - The mission of the OASW(HD&ASA) is to provide policy and planning oversight for DoW homeland defense and mission assurance, defense support of civil authorities, and Americas Security Affairs matters and advance and represent priority issues with U.S. interagency partners, U.S. Congress, Allies and partners, U.S. state, local, territorial, and tribal governments, and private section organizations.

International Security Affairs (ISA) - The ASW(ISA) is the principal advisor to the USW(P) and the SECWAR on international security strategy and policy on issues of DoW interest that relate to the nations and international organizations of Europe (including the North Atlantic Treaty Organization (NATO)), the Middle East, and Africa, their governments and defense establishments, and for oversight of security cooperation programs and FMS in these regions.

Space Policy (SP) - The ASW(SP) is the senior official responsible for the overall supervision of DoW policy for space warfighting under the authority, direction, and control of the USW(P). In addition, ASW(SP) is responsible for interagency coordination and international engagement on space policy and strategy.

Cyber Policy (CP) - The ASW(CP) establishes and oversees the implementation of DoW cyberspace policy and strategy; integrates national cyberspace policy and guidance with DoW cyberspace policy and provides guidance and oversight on DoW cyberspace activities as they relate to foreign cyberspace threats, international cooperation, engagement with foreign partners and international organizations; and implementation of DoW cyberspace strategy and plans, including those related to cyberspace forces, capabilities, and their employment.

Nuclear Deterrence, Chemical, and Biological Defense Policy and Programs (ND-CBD) – The OASW(ND-CBD) leads the DoW efforts to ensure a safe, secure, and effective U.S. nuclear deterrent against weapons of mass destruction (WMD) threats. As threats against the U.S., its allies, and interests are both proliferating and becoming more difficult to challenge, the OASW (ND-CBD) is at the forefront of U.S. efforts to sustain and modernize the nuclear deterrent, while simultaneously providing chemical and biological defense and compliance with international NCB treaties and agreements. The OASW(ND-CBD) is also responsible for interagency coordination and international engagement on CWMD policy and strategy. The OASW(ND-CBD) is reshaping the way the DoW meets and responds to WMD threats.

Strategy, Plans, and Forces (SPF) (Formerly Strategy, Plans, and Capabilities (SPC)) - The ASW(SPF) serves as the principal civilian advisor to the USW(P) and SECWAR on national security and defense strategy and capabilities, forces, and contingency plans necessary to implement the NDS. The ASW(SPF) is also responsible for policy management and advisory responsibilities to the Plans and Posture Office, the Strategy Force Development Office, and the Defense Security Cooperation Agency.

The OUSW(P) major program activities include:

1) OUSW(P) Operations
2) OUSW(P) Mission Support
3) U.S. Mission to NATO
4) Rewards Program
5) Office of the Principal Cyber Advisor
6) Ex Gratia Program
7) Psychological Operations (PSYOP)
8) Vietnam Dioxin Remediation
9) Homeland Border Security Initiative

Office of the Under Secretary of War for Research and Engineering (OUSW(R&E)): The OUSW(R&E) is the PSA and advisor to the SECWAR and DEPSECWAR for all matters on research and engineering efforts. The OUSW(R&E) serves as the DoW's Chief Technology Officer (CTO) and is responsible for unifying DoW research, development, and prototyping activities across the enterprise. The OUSW(R&E) establishes policies on and oversees all DoW research and engineering, technology development, technology transition, prototyping, experimentation, and development testing activities and programs. The OUSW(R&E) responsibilities also include:

- Establishing a Department-wide, mission-focused roadmap for each of the critical technology areas' strategies
- Developing and implementing a National Defense Science and Technology Strategy
- Leading the establishment and implementation of Department-wide protection methodologies that mitigate the risk of loss of critical technologies to determined adversaries
- Initiating critical prototypes within the OUSW(R&E) identified capability thrust priorities; developing policy and guidance for DoW Mission and Enterprise Architectures
- Establishing Open Architecture Standards, piloting alternate rapid acquisition approaches
- Ensuring the integration of developmental and operational test and evaluation in coordination with the DOT&E
- Accelerating DoW adoption of data, analytics, and artificial intelligence (AI) for decision advantage to deliver the industry's best data, analytics, and AI capability to joint decision makers at speed and scale to enable better, faster decisions and increase lethality and efficiency
- Removing systemic barriers to digital technology adoption to enable more agility, speed, and impact
- Accelerating and scaling AI deployment, and providing provision and sustainment of software tools to lead and support AI testing, evaluation, monitoring, benchmarks, and red teaming

Strategic Capabilities Office (SCO): Established as a Field Activity in FY 2026 in the DoW Innovation Ecosystem led by the OUSW(R&E), the SCO mission is to quickly deliver game-changing capabilities to the warfighter to counter near-peer adversaries in all phases of competition and conflict through leveraging near-term

technologies and/or the unconventional use of existing programs to field disruptive capabilities that create new strategic effects (through deterrence, power projection, cost imposition, surprise, and overmatch). SCO develops, demonstrates, and transitions operationally impactful capabilities to increase the lethality of the joint force in contested environments. The SCO serves as the senior advisor to the SECWAR, DEPSECWAR, and the USW(R&E), augmenting efforts within the Department with respect to strategic capabilities development and providing advice related to the identification, analysis, and introduction of disruptive applications and new and unconventional uses of existing systems and near-term technologies, for both U.S. Government and commercial capabilities, to create operational strategic effects.

Test Resource Management Center (TRMC): A Field Activity under the purview of the OUSW(R&E), the TRMC ensures the Department has the necessary capabilities to test weapon systems under development. Mandated by Congress in the NDAA for FY 2003, the TRMC governs and assesses the adequacy of DoW's Test and Evaluation (T&E) infrastructure to support the development, acquisition, fielding, and sustainment of defense systems; reviews and certifies proposed Service and Defense Agency T&E budgets for adequacy; and formulates and maintains a strategic plan for T&E resources to ensure they align with the NDS.

Capital Security Cost Sharing (CSCS): The CSCS funds support the DoW's critical component of building relationships with other partners and allies and fund the DoW's share of the Department of State CSCS and Maintenance Cost Sharing program as authorized by section 604 of the Secure Embassy Construction and Counterterrorism Act of 1999. The CSCS also funds the Department's share of the CSCS International Cooperative Administrative Support Services pass-through. The CSCS funding supports more than 86,000 U.S. Government employees from more than 30 agencies at over 280 locations worldwide. Together with interagency contributions from the CSCS program and other reimbursements, the funding provides the necessary resources for New Embassy Compound (NEC) projects and site acquisitions at locations where future NEC projects are planned. Additionally, the request supports the maintenance, repair, and renovation of existing office and support (non-residential) facilities that multiple agencies occupy. These projects also address security deficiencies and include major security upgrades as part of the larger rehabilitation projects.

The FY 2027 request for the OSW includes $3,832,831 thousand in discretionary and $1,067,469 thousand in mandatory funding, for a total of $4,900,300 thousand.

The mandatory funds for Air Superiority (OUSW(A&S)) are for contracting support to a new initiative in FY 2027 between the F-35 Joint Program Office, Air Force, Navy, and Marine Corps, to conduct a study to analyze and define the Minimum Sustaining and Maximum Production rates for each F35 variant (A, B, C). The study will include analysis of Lockheed Martin and Final Assembly and Check Out (FACO) facility production capacity limitations, as well as the capacity of critical suppliers to build components that may limit the total number of aircraft produced, such as

engines, canopies, and centers. The study will include aircraft quantities, along with supporting analysis, assumptions, and documentation to substantiate the numbers. Funding in FY 2027 is requested to begin this new analytical effort.

The mandatory funds for the Defense Industrial Base (OUSW(A&S)) support Supply Chain Risk Management Tools by expanding the use of commercially available tools and private-sector best practices across at least 50 Major Defense Acquisition Programs. These funds will also establish the Supply Chain Risk Management – Integration Center (SCRM-IC) to unify supply chain management across the DoW. Funding in FY 2027 is required to resource the stand-up and initial operating capability of the Economic Defense Unit (EDU), the Wartime Production Unit (WPU), and the Assistant Secretary of War for International Armament Cooperation (ASW(IAC)). Defense Industrial Base mandatory funds include a total obligation authority of $103,948 thousand to fund 75 additional civilian full-time equivalents (FTE) from FY 2027 – FY 2031.

The FY 2026 spend plan amount for the OSW includes $2,128,884 thousand in discretionary and $1,016,163 thousand in mandatory (reconciliation), for a total of $3,145,047 thousand.

The FY 2025 spend plan amount for the OSW includes $2,877,729 thousand in discretionary and $0 thousand in mandatory (reconciliation), for a total of $2,877,729 thousand.

1) Classified Adjustment $1,000

2) Global Fragility Act Implementation $5,000

3) Program Increase - Afghanistan War Commission $12,000

4) Program Increase - APEX Accelerators $38,207

5) Program Increase - Conflict Operations Analysis $11,600

6) Program Increase - National Commission on the Future of the Navy $6,000

7) Program Increase - National Defense Strategy Commission $5,000

8) Program Increase - National Security Commission on Emerging Biotechnology $6,000

9) Program Increase - National September 11 Memorial & Museum $12,000

10) Program Increase - Office of Net Assessment $5,000

11) Program Increase - Project Spectrum $2,578

12) Program Increase - Readiness and Environmental Protection Integration Program (REPI) $20,000

13) Program Increase - USTTI Defense Training $500

14) Program Increase - Vietnam Dioxin Remediation $15,000

15) Unjustified Growth ..... $-100,000

b) Undistributed Adjustments ..... $-42,572

1) Historical Unobligated Balances ..... $-5,902

2) Projected Underexecution of Civilian Compensation (Excludes SOCOM, CYBERCOM, and Intelligence Activities) ..... $-36,670

c) Adjustments to Meet Congressional Intent $0

d) General Provisions $37,854

1) Sec. 8050 Red Cross $25,000

2) Sec. 8050 United Services Organization $24,000

3) Sec. 8136 Savings from Efficiencies ..... $-11,146

FY 2026 Appropriated Amount $2,128,884

2. Supplemental Appropriations $0

a) Supplemental Funding $0

3. Fact-of-Life Changes $0

a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $2,128,884

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $2,128,884

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $2,128,884

6. Price Change $32,747

7. Functional Transfers $17,852

a) Transfers In $43,204

1) Compensation and Benefits - Biosurveillance (BSV) Program Transfer - OUSW(A&S) $6,456
Transfer of oversight and resources of the BSV Program from the Defense Health Agency (DHA) to OUSW(A&S). The BSV program collects data and information on threats posed by endemic and emerging infectious diseases worldwide, relevant to the military. This is the transfer of the civilian FTE and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +26 FTEs)

2) Compensation and Benefits - Defense Civilian Personnel Advisory Service (DCPAS) Realignment from Defense Human Resources Activity (DHRA) to the Assistant Secretary of War for Manpower and Reserve Affairs (ASW(M&RA)) - OUSW(P&R) $2,620

The USW(P&R) assessed the mission and functional alignments, and the associated manpower, personnel, and resource allocation across the entire enterprise, to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed 13 civilian FTEs associated with the Strategic Policy-Making Element of DCPAS realigned from DHRA to the ASW(M&RA) to better meet the Secretary's priorities. This is the transfer of the civilian FTEs and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +13 FTEs)

3) Compensation and Benefits - Mission Partner Environment (MPE) Transfer from Air Force - DoW CIO.....$2,063
Transfer of +8 FTEs related to MPE from the Air Force to DoW CIO. The MPEs are secure, shared digital frameworks that enable the U.S. military and allies to collaborate, communicate, and share sensitive information in real time during operations. This is the transfer of the civilian FTEs and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +8 FTEs)

4) Compensation and Benefits - Organizational Realignment from Defense Health Agency (DHA) to OUSW(P&R) - OUSW(P&R).....$214
The USW(P&R) assessed the mission and functional alignments and the associated manpower, personnel, and resource allocation across the entire enterprise to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed one (1) civilian FTE associated with DHA to be realigned to the Assistant Secretary of War for Readiness (ASW(R)) to meet the Secretary's priorities. This is the transfer of the civilian FTE and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +1 FTEs)

5) Mission Support - BSV Program Transfer - OUSW(A&S).....$16,170
Transfer of oversight and resources of the BSV Program from the DHA to OUSW(A&S). The BSV program collects data and information on threats posed by endemic and emerging infectious diseases worldwide, relevant to the military. This is the transfer of the associated mission support costs for the personnel.
(FY 2026 Baseline: $296,766 thousand)

6) Mission Support - MPE Transfer from Air Force - DoW CIO.....$2,000
Transfer of funds related to MPE from the Air Force to DoW CIO. The MPEs are secure, shared digital frameworks that enable the U.S. military and allies to collaborate, communicate, and share sensitive information in real time during operations.
(FY 2026 Baseline: $72,382 thousand)

7) Mission Support - Total Force Fitness (TFF) Resources Realignment from Defense Health Agency (DHA) to ASW(R) - OUSW(P&R) $6,481
The USW(P&R) assessed the mission and functional alignments and the associated manpower, personnel, and resource allocation across the entire enterprise to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW directed that program management and resources associated with TFF be realigned to the Office of the OASW(R) to better align with the Secretary's priorities.
(FY 2026 Baseline: $98,744 thousand)

8) Mission Support - Transfer from Defense Counterintelligence and Security Agency (DCSA) to OUSW(I&S) - OUSW(I&S) $7,200
The increase reflects the transfer of funding for the Applied Research Laboratory for Intelligence and Security (ARLIS) and the Critical Technology Protection Integration Cell (CTPIC) from the DCSA. The ARLIS program management office oversees the University Affiliated Research Center for the Defense Intelligence and Security Enterprises, which provides strategic research and development to solve intelligence and security problems. The CTPIC is a whole-of-government engagement effort to deter, detect, and disrupt the unauthorized technology transfer activities of our adversaries.
Summary of Transferred Resources

- +$4,900 thousand for the ARLIS
- +$2,300 thousand for the CTPIC

(FY 2026 Baseline: $102,088 thousand)

b) Transfers Out .....$-25,352

1) Compensation and Benefits - Manpower Transfer to US Southern Command (USSOUTHCOM) - OUSW(A&S)$-1,404
Transfer of -9 FTEs from the OUSW(A&S) to the US Army and the Defense Intelligence Agency in support of USSOUTHCOM Headquarters. This is the transfer of the civilian FTEs and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -9 FTEs)

2) Compensation and Benefits - Office of Command Climate and Well-Being Integration (OCCWI) Realignment from Office of Force Resiliency from OUSW(P&R) to DHRA - OUSW(P&R) .....$-3,067
The USW(P&R) assessed the mission and functional alignments, and the associated manpower, personnel, and resource allocation across the entire enterprise, to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end,

the USW(P&R) directed resources associated with the OCCWI, thirteen (13) civilian full-time equivalent, and the responsibilities for policy oversight and program management to be realigned to the DHRA to meet the Secretary's priorities. This is the transfer of the civilian FTEs and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -13 FTEs)

3) Compensation and Benefits - Organizational Realignment from OUSW(P&R) to DHA - OUSW(P&R).....$-313
The USW(P&R) assessed the mission and functional alignments, and the associated manpower, personnel, and resource allocation across the entire enterprise, to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed that one (1) civilian FTE associated with the Office of Force Resiliency (OFR) be realigned to DHA to meet the Secretary's priorities. This is the transfer of the civilian FTE and the associated compensation and benefits costs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -1 FTEs)

4) Mission Support - Defense Suicide Prevention Office Realignment from OUSW(P&R) to DHA - OUSW(P&R)$-1,502
The USW(P&R) assessed the mission and functional alignments and the associated manpower, personnel, and resource allocation across the entire enterprise to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed that suicide prevention resources be realigned to the DHA to meet the Secretary's priorities. This includes Suicide Prevention & Response Independent Review Committee, Suicide Prevention & Response Epidemiological Integration, Suicide Prevention & Response Operations (Crisis Response), Postvention, Curricula Development, Evaluation & Research, and Transition.
(FY 2026 Baseline: $98,744 thousand)

5) Mission Support - Military Credentialing Program Realignment from ASW(R) to DHRA - OUSW(P&R).....$-1,639
The USW(P&R) assessed the mission and functional alignments, and the associated manpower, personnel, and resource allocation across the entire enterprise, to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed that resources associated with the Military Credentialing Program be realigned to DHRA to meet the Secretary's priorities.
(FY 2026 Baseline: $98,744 thousand)

6) Mission Support - MPE Transfer to Defense Information Systems Agency (DISA) - OUSW(R&E).....$-6,000
Transfer of funds related to MPE from OUSW(R&E) to the DISA. MPEs are secure, shared digital frameworks that enable the U.S. military and allies to collaborate, communicate, and share sensitive

information in real time during operations.
(FY 2026 Baseline: $122,163 thousand)

7) Mission Support - OCCWI Realignment from Office of Force Resiliency from OUSW(P&R) to DHRA - OUSW(P&R).....$-10,800
The USW(P&R) assessed the mission and functional alignments, and the associated manpower, personnel, and resource allocation across the entire enterprise, to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed resources associated with the OCCWI, thirteen (13) civilian FTEs, and the responsibilities for policy oversight and program management to be realigned to DHRA to meet the Secretary's priorities.
(FY 2026 Baseline: $98,744 thousand)

8) Mission Support - OFR Enterprise Operations Support Realignment from OUSW(P&R) to DHRA - OUSW(P&R)$-627
The USW(P&R) assessed the mission and functional alignments and the associated manpower, personnel, and resource allocation across the entire enterprise to ensure close alignment with the Secretary of War's priorities: Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence. To that end, the USW(P&R) directed that functions associated with the OFR, particularly those related to resiliency and resources for enterprise operations, be realigned to DHRA to meet the Secretary's priorities.
(FY 2026 Baseline: $98,744 thousand)

8. Program Increases.....$2,443,075

a) Annualization of New FY 2026 Program.....$0

b) One-Time FY 2027 Increases.....$0

c) Program Growth in FY 2027.....$2,443,075

1) Compensation and Benefits - Build and Scale Office of Strategic Capital (OSC) Loan Infrastructure - OUSW(R&E).....$7,400
An increase of +20 FTEs supports personnel costs as OSC infrastructure scales to accommodate the higher lending volume. The OSC develops and implements strategies and partnerships to accelerate and scale private investment in critical supply chain technologies needed for national security.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +20 FTEs)

2) Compensation and Benefits - Classified Increase 1 - SCO.....$600
Classified labor increase of +2 FTEs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +2 FTEs)

3) Compensation and Benefits - Classified Increase 2 - SCO.....$837
Classified labor increase of +3 FTEs.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +3 FTEs)

4) Compensation and Benefits - Deferred Hiring and Functional Alignments - OSW $44,697
An increase of +159 FTEs reflects deferred hiring of FY 2026 OSW personnel and results from a comprehensive assessment of mission and functional realignments across the OSW enterprise. The requested manpower levels are necessary to better align with SECWAR's priorities of Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence.

Summary of Changes by PSA

- +80 FTEs and +$22,490 thousand for OUSW(A&S)
- +49 FTEs and +$13,775 thousand for DIU
- +12 FTEs and +$3,374 thousand for OUSW(P)
- +4 FTEs and +$1,124 thousand for D,CAPE
- +4 FTEs and +$1,124 thousand for OUSW(I&S)
- +3 FTEs and +$843 thousand for OASW(LA)
- +3 FTEs and +$843 thousand for OASW(SO/LIC) & SSO
- +2 FTEs and $562 thousand for D,OT&E
- +2 FTEs and +$562 thousand for SECWAR

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +159 FTEs)

5) Compensation and Benefits - Direct Reporting Portfolio Manager (DRPM) for Critical Major Weapon Systems (CMWS) - SECWAR and Department Initiatives $2,551
An increase of +10 FTEs reflects manpower and labor in support of establishing the DRPM for CMWS to oversee critical weapon system programs, including the LGM-35A Sentinel Intercontinental Ballistic Missile (ICBM) systems, Minuteman III ICBM systems, B-21 Family of Systems, F-47 Family of Systems, and VC-25B Presidential Airlift.

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +10 FTEs)

6) Compensation and Benefits - Direct Reporting Portfolio Manager (DRPM) for Submarines - SECWAR and Department Initiatives $7,551
An increase of +30 FTEs reflects manpower and labor to support the establishment of the DRPM for Submarines to oversee the industrial base production of Virginia- and Columbia-class submarines. The DRPM will streamline and enhance the Department's ability to address production challenges, resulting in reduced shipyard backlogs and improved delivery speed.

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +30 FTEs)

7) Compensation and Benefits - DoW Special Access Program Central Office (SAPCO) Support to the Executive Office of the President (EOP) - DA&M $268
Increase of +1 FTE in the DoW SAPCO that is designated to support the EOP.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +1 FTEs)

8) Compensation and Benefits - Economic Defense Unit (EDU) - OUSW(A&S) $9,810
An increase of 33 FTEs represents the manpower needed to establish the EDU formally. The EDU will develop a data and analytic platform, execute operations and activities, reinforce military advantage in and through the economic domain, and coordinate economic competition requirements or programs into joint and interagency planning activities.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +33 FTEs)

9) Compensation and Benefits - Enhanced Performance Award Pool for OSW Civilian Employees $10,234
The increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +0 FTEs)

10) Compensation and Benefits - Financial Management Initiatives - OUSW(C) $15,012
An increase of +60 FTEs will address critical DoW financial management initiatives to enable achieving an unmodified (clean) audit opinion and modernizing systems and processes.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +60 FTEs)

11) Compensation and Benefits - FTE Repricing - OSW $39,973

The increase reflects properly priced pay for the current workforce based on FY 2026 actuals to date and planned FY 2027 pay rates.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +0 FTEs)

12) Compensation and Benefits - Legislative Liaison Support - OASW(LA) $529
An increase of +2 FTEs supports the three new DRPMs for Golden Dome for America, Submarines, and Critical Major Weapon Systems.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +2 FTEs)

13) Compensation and Benefits - Office of Strategic Capital (OSC) - OUSW(R&E) $7,150
Increase of +22 FTEs to support the critical DoW priorities of critical minerals, shipbuilding, and drones.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +22 FTEs)

14) Compensation and Benefits - Presidential and SECWAR Travel Requirements - DoW CIO $2,286
Increase of +9 FTEs to address expanded user base and evolving capabilities in support of White House and SECWAR travel.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +9 FTEs)

15) Compensation and Benefits - Realignment of Chief Digital and Artificial Intelligence Office (CDAO) under OUSW(R&E) - OUSW(R&E).....$44,652
Increase of +208 FTEs reflects the realignment of the CDAO under the OUSW(R&E) in accordance with Deputy Secretary of War memorandum "Realigning the Office of the Chief Digital and Artificial Intelligence Officer to Accelerate Department-wide Artificial Intelligence Transformation," signed on August 14, 2025.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +208 FTEs)

16) Compensation and Benefits - Realignment of Office of Net Assessment (ONA) and Office of Assistant to the Secretary (Privacy, Civil Liberties, and Transparency) (OATSW(PCLT)) under DA&M - DA&M $12,397
An increase of +54 FTEs reflects the reestablishment and administrative realignment of the ONA, and the functional realignment of the OATSW(PCLT), under the DA&M in accordance with the SECWAR memorandum titled “Office of Net Assessment and Office of the Assistant to the Secretary of War for Privacy, Civil Liberties, and Transparency," signed on October 16, 2025.
Summary of Changes by Organization

- +38 FTEs and $8,571 thousand for OATSW(PCLT)
- +16 FTEs and $3,826 thousand for ONA

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +54 FTEs)

17) Compensation and Benefits - Rebuild Analytic Capacity - OSW $7,754

An increase of +30 FTEs supports establishing the analytic capability required to support DoW priorities and standing up the Secretary and Deputy Secretary of War's new Requirement and Resourcing Alignment Board and Mission Engineering and Integration Activity to align requirements, implement acquisition reforms, and speed capabilities to warfighters. Personnel will also support OSW Red Team efforts.

Summary of Changes by PSA

- +15 FTEs and $3,900 thousand for the D,CAPE
- +5 FTEs and $1,370 thousand for the OUSW(A&S)
- +6 FTEs and $1,448 thousand for the OUSW(I&S)
- +4 FTEs and $1,036 thousand for the OUSW(P)

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +30 FTEs)

18) Compensation and Benefits - Resource Realignment to Fund Manpower Increase - OUSW(R&E) $13,827
Increase of +50 FTEs to respond effectively to the Department's priorities – specifically the White House priorities in AI/Autonomy, Hypersonics, Directed Energy, Energetics and Munitions, and critical minerals.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +50 FTEs)

19) Compensation and Benefits - Resource Realignment to Fund Manpower Increase - TRMC $7,624
An increase of +28 FTEs reflects the need for additional personnel to meet the TRMC mission for the Department and provide increased program oversight for these national programs. Additional FTEs will support Mach-TB, SkyRange, Holloman High Speed Test Track, Attributable Test, and AI testing.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +28 FTEs)

20) Compensation and Benefits - Transfer from DA&M to DoW CIO - DoW CIO $265
The increase reflects the transfer of 1 FTE from DA&M to the DoW CIO to better align and optimize mission resources.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +1 FTEs)

21) Mission Support - AI O&M Support - OUSW(R&E) $100,776
Increase funding for the CDAO's AI Workforce Program and Center of Excellence training programs to enhance AI skills for DoW personnel, strengthen CDAO's Cybersecurity & Risk Management support, and create new AI Rapid Capabilities support from AI Assessment and Assurance.
(FY 2026 Baseline: $122,163 thousand)

22) Mission Support - AI User Training - OUSW(R&E) $7,000

Increase support for user training across the Department for AI tools, aligned with the DoW's strategic AI objectives and the USW(R&E) AI strategy.
(FY 2026 Baseline: $122,163 thousand)

23) Mission Support - AI, Automation, and Financial Systems - OUSW(C) $250,000
Increase sustains automation and AI technologies, advances financial systems modernization and retirement projects, and manages the War Data Platform program to ensure achieving a clean opinion on the FY 2028 financial statements.
(FY 2026 Baseline: $123,319 thousand)

24) Mission Support - Analytic Process Reform and System Modernization - D, CAPE $2,030
Increase support for critical mission requirements by reforming analytical processes and modernizing systems to enhance analytic capabilities through optimized performance, greater efficiency, and increased productivity, delivering superior end products.
(FY 2026 Baseline: $26,266 thousand)

25) Mission Support - Anomalous Health Incidents (AHI) - OUSW(R&E) $53,300
Increase reflects the internal realignment of the AHI program from the OUSW(P) to the OUSW(R&E).
(FY 2026 Baseline: $122,163 thousand)

26) Mission Support - Audit Contract Support - OUSW(C).....$12,525
The increase in funding reflects the first full year of a new audit contract and increased travel expenses for audit remediation teams in support of achieving an unmodified (clean) audit opinion.
(FY 2026 Baseline: $123,319 thousand)

27) Mission Support - Business Operators for National Defense (BOND) Program - SECWAR and Department Initiatives.....$88,000
Increase support for the BOND program efforts to recruit and retain private-sector and defense industry expert candidates. The BOND program focuses on modernizing the defense industrial base by integrating operational expertise directly into the Department to support operational readiness and strengthening national defense through reform. Funds will support contracts for executive recruiting services for the BOND program, including recruiting, vetting, and initial introductions of executive-level candidates. The recruiting goal is to achieve 250 advisers from an original advisor population of 40. Advisors provide C-Suite-level recommendations to DoW Organizations but do not work in a permanent placement.
(FY 2026 Baseline: $14,265 thousand)

28) Mission Support - Capital Security Cost Sharing (CSCS) - OSW Centrally Managed Programs $50,596

Increase fully funds the CSCS bill from the Department of State for the FY 2027 Statement of Charges.
(FY 2026 Baseline: $393,283 thousand)

29) Mission Support - CDAO Operational Support - OUSW(R&E).....$35,274
Increase support for establishing program offices for the War Data Platform, the Maven Smart System program of record, engineering-secured data transfer, and data mesh across multi-domain environments.
(FY 2026 Baseline: $122,163 thousand)

30) Mission Support - Classified Increase 3 - DoW CIO.....$18,280
Increase support for Presidential and SECWAR communication upgrades. Further details are classified.
(FY 2026 Baseline: $72,382 thousand)

31) Mission Support - Classified Increase 4 - OSW $15,785
The increase reflects funding for IT costs. Further details are classified.
Summary of Changes by PSA

- +$13,785 thousand for the SECWAR and Department Initiatives
- +$2,000 thousand for the OUSW(P)

(FY 2026 Baseline: $594,523 thousand)

32) Mission Support - Classified Increase 5 - OUSW(I&S).....$2,000
Classified program increase.
(FY 2026 Baseline: $102,088 thousand)

33) Mission Support - Congressional Hearing & Reporting Requirements System (CHARRTS) - OASW(LA).....$115
Increase continued support for the Remote Access with Cyber Security Service Provider, Subscription Services-Datacenter with External Vulnerability Scan, and Web Vulnerability Scan activities. Funding supports the processes that enable congressional Professional Staff Members to access the system remotely.
(FY 2026 Baseline: $651 thousand)

34) Mission Support - Consolidated DoW Auditor - OUSW(C).....$35,000
The increase enables the Department to contract with an Independent Public Accounting (IPA) firm to execute the agency-wide consolidated financial statement audit and support achieving a clean audit opinion by December 31, 2028. Transitioning audit execution to an IPA firm will strengthen independence, improve audit quality, and ensure comprehensive, standardized procedures across all reporting components. This funding provides the resources necessary to fully outsource the consolidated audit and position the

Department to meet the 2028 mandate while enhancing financial accountability and reliability.
(FY 2026 Baseline: $123,319 thousand)

35) Mission Support - Continuity of Operations (COOP) Implementation and Modernization Costs – SECWAR and Department Initiatives $7,000
Increase support for COOP sites, including funding for facility expenses, ensuring compliance with classification standards, IT hardware and software, cabling, and communications equipment.
(FY 2026 Baseline: $0 thousand)

36) Mission Support - Core Services - OUSW(A&S) $6,000
Increase supports A&S enterprise management support service contracts and reimbursable civilian labor support agreement between A&S and the Defense Logistics Agency, Business Process Re-engineering Center.
(FY 2026 Baseline: $296,766 thousand)

37) Mission Support - Defense Business Systems (DBS) Reform - OUSW(A&S) $49,000
Increase accelerates the decommissioning of legacy DBS across the Department for all Components to support DBS Reform, which focuses on modernizing the information technology systems, data, and processes that support weapon systems acquisition, logistics, and supply chain management. The increase supports the professional and technical service contracts required to accelerate this process.
(FY 2026 Baseline: $296,766 thousand)

38) Mission Support - Direct Reporting Portfolio Manager (DRPM) for Critical Major Weapon Systems (CMWS) - SECWAR and Department Initiatives $22,449
Increase support for establishing the DRPM for CMWS to oversee critical weapon system programs, including the LGM-35A Sentinel Intercontinental Ballistic Missile (ICBM) systems, Minuteman III ICBM systems, B-21 Family of Systems, F-47 Family of Systems, and VC-25B Presidential Airlift.
(FY 2026 Baseline: $14,265 thousand)

39) Mission Support - Direct Reporting Portfolio Manager (DRPM) for Submarines - SECWAR and Department Initiatives $2,949
Increase support for establishing the DRPM for Submarines to oversee the industrial base production of Virginia- and Columbia-class submarines. The DRPM will streamline and enhance the Department's ability to address production challenges, resulting in reduced shipyard backlogs and improved delivery speed.
(FY 2026 Baseline: $14,265 thousand)

40) Mission Support - Division of Strategic Marketing - OATSW(PA) $23,175
Increase establishes the Division of Strategic Marketing within the OATSW(PA). The Division's mission is to establish "War Department" brand position, improve the Department's reputation, and reach across key

stakeholders to support the DoW Branding and Trademark Licensing Program objectives in accordance with DoD Directive 5535.09 and Section 2260 of Title 10, U.S. Code. This mission will be achieved by driving integrated marketing actions for the Department to directly support official communication efforts and improve perceptions of military service to distinct audiences. This mission will also include the creation of a DoW Trademark Licensing Office within the Division of Strategic Marketing, a shortfall that has existed for nearly 20 years. The trademark licensing team will build on the marketing of the Department of War brand, similar to programs in the military services, and will be responsible for helping the Office of the Secretary of War Components protect their marks, including the Department's medals and awards. This effort is critical in today's information environment, where infringements and misappropriations are occurring at an exponential rate. The Department cannot afford to lose control of its marks and must have the resources to protect and monitor them actively against infringement. Unauthorized use of DoW marks threatens the Department's reputation and credibility, which, once lost, is nearly impossible to recover.
(FY 2026 Baseline: $3,821 thousand)

41) Mission Support - Economic Defense Unit (EDU) - OUSW(A&S).....$30,909
The requested increase is essential to sustain and expand mission-critical capabilities for the EDU's core operational requirements. Growing demand for contracts and personnel with specialized expertise in economic analysis, due diligence, and M&A deal support — capabilities predominantly found in the private sector and not currently resident within the Department — has outpaced existing staffing capacity. The increasing volume and complexity of transaction assessments necessitate additional resources to close critical gaps and maintain operational continuity in monitoring covered transactions. Finally, the growing need for bespoke financial data services, combined with targeted cybersecurity enhancements, is imperative to support the development of an EDU-specific data analytics platform — all of which are necessary to maintain a technological edge and enable timely, accurate decision-making in an increasingly complex economic threat landscape.
(FY 2026 Baseline: $296,766 thousand)

42) Mission Support - Enhance and Expand Hypersonic Test and Evaluation (T&E) Infrastructure - TRMC ...$178,000
Increase supports SkyRange fleet organizational and depot-level maintenance, supply chain management, and operational readiness support, and provides comprehensive operations support across SkyRange forward operating locations. Increase additional funds for operations support for a central data center processing hypersonic ground and flight test data, including sustainment of secure IT networking infrastructure and multi-level security enclaves to host ground and flight test databases.
(FY 2026 Baseline: $2,688 thousand)

43) Mission Support - Enterprise Transformation and Modernization - OSW.....$32,000
Increase accelerates improvements in business and analytic systems and processes by contracting for the modernization of Planning, Programming, Budgeting, and Execution support systems, the refresh of existing

platforms, and the acquisition of licenses for tools and technologies to support improved output of strategic analysis products. Funds will improve analytical tools and analysis capabilitiesby introducing new capabilities. Funds will additionally support the Mission Engineering & Integration Activity and the development of a cloud-based digital network.

Summary of Changes by PSA

- +$25,000 thousand for the SECWAR and Department Initiatives
- +$7,000 thousand for the OUSW(R&E)

(FY 2026 Baseline: $515,446 thousand)

44) Mission Support - Homeland Border Security - OSW.....$190,000
Increase supports the DoW mission to establish, operationalize, and proactively deter threats to National Defense Areas in accordance with Executive Order 14167, "Clarifying the Military's Role in Protecting the Territorial Integrity of the United States" signed by the President on January 20, 2025 and the National Security Presidential Memorandum 4 (NSPM-4) "Establishment of National Defense Areas" signed on April 11, 2025. The increase is required to sustain and expand operations to disrupt the significant threat to national security that the Transnational Criminal Organizations (TCOs) and cartels pose from human smuggling and the trafficking of illicit narcotics into the United States that began in FY2026. This funding will be used to disrupt the operational capacity of these illicit networks as targeted Operations in the Information Environment (OIE) will be executed.

Summary of Changes by PSA

- +$165,000 thousand for the OUSW(R&E)
- +$25,000 thousand for the OUSW(P)

(FY 2026 Baseline: $323,403 thousand)

45) Mission Support - Integrated Supply Chain Risk Management - OUSW(A&S).....$4,256
Increase establishes the Supply Chain Risk Management - Integration Center to coordinate with the Principal Staff Assistant, the Economic Defense Unit, Service Acquisition Executives, Program Executive Officers, and Product Support Managers to unify supply chain management across the Department.
(FY 2026 Baseline: $296,766 thousand)

46) Mission Support - Joint Aircraft Survivability Program (JASP) - OUSW(A&S).....$1,800
In accordance with the Secretary of War memorandum titled "Reorganization of the Office of the Director of Operational Test and Evaluation," signed May 7, 2025, the DOT&E was directed to implement a strategic and deliberate reorganization to eliminate non-statutory and/or redundant functions. The analysis concluded that six managed activities were critical to the Department but non-statutory. Thus, one of the six managed

activities - JASP - transitioned to OUSW(A&S).
(FY 2026 Baseline: $296,766 thousand)

47) Mission Support - Joint Modular Emitter Interface Standards (JMEIS) - DoW CIO.....$10,000
Significant increases enhance combat readiness capabilities across the Joint Force by enabling the rapid development, deployment, and sustainment of a greater number and variety of lower-cost threat emitters. JMEIS is a cost-effective system that helps the military prepare for combat by making it easier and faster to create and use a wider range of devices that simulate enemy threats, such as radar and communications signals. This allows for more realistic and varied training for all branches of the armed forces.
(FY 2026 Baseline: $72,382 thousand)

48) Mission Support - Next Generation Resource Management System (NGRMS) Enhancements - OUSW(C) $10,903
Increase accelerates the consolidation of fragmented OSW systems into NGRMS, creating a single authoritative source for linked PPBE data in support of the President’s Budget.
(FY 2026 Baseline: $123,319 thousand)

49) Mission Support - One-Time FY 2026 Mandatory Funding - DIU.....$39,015
Increase reflects funding for the DIU in the FY 2027 discretionary budget that was requested in mandatory funding in FY 2026 (P.L. 119-21). Funding supports the DIU's core operational infrastructure and day-to-day activities. It directly supports the foundational elements that enable DIU to execute its high-tempo mission of bridging the gap between commercial innovators and warfighter needs. Specifically, this funding provides robust, secure IT support and supports the systematic lifecycle replacement of hardware; resources the associated facility support services, utilities, and any routine maintenance; and supports the DIU's geographically dispersed teams performing technical due diligence on emerging technologies, engaging with the venture capital community, and embedding within Combatant Commands to ensure prototype solutions meet critical, real-world warfighter requirements.
(FY 2026 Baseline: $0 thousand)

50) Mission Support - One-Time FY 2026 Mandatory Funding - OUSW(A&S).....$215,959
Increase reflects funding for OUSW(A&S) activities in the FY 2027 discretionary budget that were requested in mandatory funding in FY 2026 (P.L. 119-21). Funding bolsters key OUSW(A&S) initiatives, including, but not limited to, Acquisition Transformation Support, Global Investments and Economic Security, Logistics Systems Modernization support, Native American Lands Environmental Mitigation Program, Chemical Biological Weapons Elimination, and supports core daily operations essential for maintaining mission

readiness, long-term sustainment, and warfighter support.
(FY 2026 Baseline: $296,766 thousand)

51) Mission Support - One-Time FY 2026 Mandatory Funding - OUSW(R&E).....$42,738
Increase reflects funding for OUSW(R&E) activities in the FY 2027 discretionary budget that were requested as mandatory funding in FY 2026 (P.L. 119-21). Funding supports the OUSW(R&E) in meeting new and expanding mission demands, executing functions as the DoW Chief Technology Officer, and supporting SECWAR and DEPSECWAR priorities. More specifically, funds support unifying the defense innovation ecosystem to include the CDAO, DARPA, TRMC, DIU, SCO, and OSC; enable support for the six critical technology areas, critical munitions, critical minerals, and other key priorities of the DoW; and provide support for new entrant industry innovators and building a modern Arsenal of Freedom.
(FY 2026 Baseline: $122,163 thousand)

52) Mission Support - One-Time FY 2026 Mandatory Funding - TRMC $34,900
Increase reflects funding for TRMC activities in the FY 2027 discretionary budget that were requested as mandatory funding in FY 2026 (P.L. 119-21). Funding supports Deployable Test and Evaluation for All-Domain, Attritable Autonomous Systems. Additional information is available at a higher classification.
(FY 2026 Baseline: $2,688 thousand)

53) Mission Support - Operations Increase - OASW(SO/LIC) & SSO.....$857
Increase supports operational cost related to the continued statutory requirement for oversight of U.S. Special Operations Command. Funds support OASW(SO/LIC) SSO's ability to meet new and expending mission demands, contractual obligation for analytic and mission support, and the administrative functions required to sustain day-to-day business such as budget and finance, human capital, security, facilities, information technology, and training, conduct strategic studies, and respond to congressional actions.
(FY 2026 Baseline: $8,223 thousand)

54) Mission Support - Operations Increase - OUSW(I&S).....$10,240
Increase support for operational costs associated with continued oversight of security and intelligence activities across the Department. Funds support IT services and hardware, federally funded research and development centers, and interagency agreements.
(FY 2026 Baseline: $102,088 thousand)

55) Mission Support - Operations Increase - OUSW(P&R).....$4,460
The increase reflects a realignment of research & development funding for modernization to O&M funding to sustain the enduring fielding of the Defense Readiness Reporting System and related Readiness analytics

capabilities.
(FY 2026 Baseline: $98,744 thousand)

56) Mission Support - Operations Increase - OUSW(P) $4,048
The increase in funds reflects additional studies and analysis requirements, as well as interagency agreements, in support of the partnership among Australia, the United Kingdom, and the United States and the broader OUSW(P).
(FY 2026 Baseline: $201,240 thousand)

57) Mission Support - Operations Increase - OUSW(R&E) $33,729
The increase realigns resources from RDT&E to O&M to properly fund operation support activities essential to OUSW(R&E)'s ability to manage high priority technology portfolios and Department wide initiatives. This adjustment ensures funds are properly aligned with the support services—providing critical programmatic, analytical, acquisition, financial, and technical expertise, including professional support services. The increase also supports IT services, licenses, cybersecurity, and knowledge management tools required for daily operations and data stewardship, as well as contracted mission support for the Office of Strategic Capital to accelerate private sector investment in critical supply chain technologies. Realigning these resources to O&M strengthens oversight and ensures mission-aligned support functions are appropriately resourced to meet Department priorities.
(FY 2026 Baseline: $122,163 thousand)

58) Mission Support - Pentagon Force Protection Agency (PFPA) Counter Assault Team (CAT) – SECWAR and Department Initiatives $10,000
Increased funding provides resources to ensure continuous 24/7 personnel protective operations and security support to the SECWAR, DEPSECWAR and/or those serving in an "acting" role (i.e., Principals) at their residences, during movements to and from official and unofficial functions, meetings, events, and continuity of operations.
(FY 2026 Baseline: $14,265 thousand)

59) Mission Support - Planned Direct Report Portfolio Manager (DRPM) Establishment Costs - SECWAR and Department Initiatives $26,364
Increase support for the operating funds associated with implementing the DRPMs, including facility expenses, equipment and supplies, and travel costs.
(FY 2026 Baseline: $14,265 thousand)

60) Mission Support - Private Shipyard Performance Improvement - SECWAR and Department Initiatives $33,000
The increase reflects continued contractor support and oversight at private shipyards to improve their efficiency and productivity, resulting in faster submarine deliveries and reduced backlogs.

(FY 2026 Baseline: $14,265 thousand)

61) Mission Support - Quadrennial Review of Military Compensation (QRMC) - OUSW(P&R).....$1,964
The increase reflects the planning resources required in FY 2027 for the statutorily required (37 U.S.C. §1008(b)) and Presidentially-directed 15th QRMC, which will be fully executed in 2028.

(FY 2026 Baseline: $98,744 thousand)

62) Mission Support - Range Modernization and Capacity Enhancements - TRMC.....$19,000
Increase automated range scheduling using AI/ML analytics and expand cloud data suites to accelerate test data analysis. This will increase test capacity by expanding remote, containerized instrumentation and upgrading DoW and non-traditional test locations for drone, directed energy, electronic warfare, and spectrum testing, and by enhancing cybersecurity and data protection at non-DoW test sites, ensuring data security for classified test missions.
(FY 2026 Baseline: $2,688 thousand)

63) Mission Support - Realignment of CDAO under OUSW(R&E) - OUSW(R&E).....$109,581
Funding reflects the mission costs associated with the realignment of the CDAO under the OUSW(R&E) in accordance with Deputy Secretary of War memorandum "Realigning the Office of the Chief Digital and Artificial Intelligence Officer to Accelerate Department-wide Artificial Intelligence Transformation," signed on August 14, 2025.
(FY 2026 Baseline: $12,582 thousand)

64) Mission Support - Realignment of ONA and OATSW(PCLT) under DA&M - DA&M.....$33,063
Funding increase reflects the mission costs associated with the reestablishment and administrative realignment of the ONA, and the functional realignment of the OATSW(PCLT), under the DA&M in accordance with Secretary of War memorandum titled “Office of Net Assessment and Office of the Assistant to the Secretary of War for Privacy, Civil Liberties, and Transparency," signed on October 16, 2025.
Summary of Changes by Organization

- $9,006 thousand for OATSW(PCLT)
- $24,057 thousand for ONA

(FY 2026 Baseline: $36,802 thousand)

65) Mission Support - Rebuild Analytic Capacity - OSW.....$24,809

Increase supports rebuilding analytic capability and closing critical analytic workforce shortfalls, standing up the Secretary and Deputy Secretary of War's new Requirement and Resourcing Alignment Board and the Mission Engineering and Integration Activity to align requirements and acquisition reforms, and to speed capabilities to warfighters. Funds will support the development of Artificial Intelligence (AI) tools that simulate and model adversary tactical, operational, and strategic decision-making in wargames, tabletop exercises, and other unique environments. These AI modeling and simulation tools will improve the Department's ability to predict and plan strategies to deter and defeat adversary battlefield strategies and courses of action.

Summary of Changes by PSA

- +$1,609 thousand for the D,CAPE
- +$15,154 thousand for the OUSW(A&S)
- +$7,957 thousand for the OUSW(I&S)
- +$89 thousand for the OUSW(P)

(FY 2026 Baseline: $626,360 thousand)

66) Mission Support - Records Management Strategy - DoW CIO $12,800
Increase support for compliance with the Federal Records Act of 1950, as amended, by resourcing technical solutions to the growing records management challenge, given the number of electronic records in the Department that must be appropriately archived.
(FY 2026 Baseline: $72,382 thousand)

67) Mission Support - Regenerative-Grazing Open Air Lab (R-GOAL) - OUSW(A&S).....$4,364
Increase supports R-GOAL, which has increased land availability for training by reducing downtime due to fire and land degradation. Funding supports livestock management, personnel, basic infrastructure, and required equipment, such as polywire and cattle, as well as vocational training for transitioning veterans.
(FY 2026 Baseline: $296,766 thousand)

68) Mission Support – SECWAR Security and High-Risk Personnel (HRP) Support - SECWAR and Department Initiatives.....$28,000
Increase resource requirements for the Protection Providing Organizations and other entities as determined in DoDI 0-2000.22 to protect the SECWAR, DEPSECWAR, and other HRP designated for protection. These resources include protection operations for both Continental and outside the Continental United States travel. Requested resources support critical security requirements for senior leadership and operational force protection. Specifically, it executes Task Order technical contracts to secure the personal residences of the SECWAR and DEPSECWAR. Furthermore, it facilitates the acquisition of modern technological tools to counter rapidly evolving threats in the theater. Finally, it provides for the Criminal Investigation Division

(CID) to conduct mission travel to establish comprehensive safety measures and protective details for High Risk Personnel during domestic and international engagements.
(FY 2026 Baseline: $14,265 thousand)

69) Mission Support - Sensitive Compartmented Information Facility (SCIF) and Infrastructure Costs - SECWAR and Department Initiatives $35,000
Increase support for facility improvements to meet required construction standards for classified space, including modernizing existing classified workspaces and retrofitting facilities that lack appropriately certified space.
(FY 2026 Baseline: $0 thousand)

70) Mission Support - Special Access Program - OUSW(A&S) $1,851
Increase reflects operational support and sustainment requirements for the A&S Special Access Program.
(FY 2026 Baseline: $296,766 thousand)

71) Mission Support - Supply Chain Risk Management Tools - OUSW(A&S) $42,000
Increase expands the use of commercially available supply chain risk management tools and private-sector best practices to at least 50 Major Defense Acquisition Programs. Funds are intended for contractor support for inventory management and optimization; supplier risk and performance management; supply chain visibility and mapping; procurement and e-procurement software; cybersecurity; supply chain risk management; and predictive maintenance and analytics. The expansion and associated growth will be coordinated with the Economic Defense Unit.
(FY 2026 Baseline: $296,766 thousand)

72) Mission Support - Survivability Modernization Enhancements - TRMC $182,650
The funding increase is for critical test and evaluation to upgrade and expand electromagnetic pulse and nuclear environment radiation effects testing. Funds enable the development of flexible, multi-platform test capabilities to increase throughput, address testing backlogs, comply with military standards, and support combined-environment testing for strategic systems. Upgrades will provide dedicated DoW access to unique test facilities and enable more threat-realistic testing addressing nuclear modernization priorities.
(FY 2026 Baseline: $2,688 thousand)

73) Mission Support - Tradewinds Marketplace - OUSW(R&E) $4,187
The increase reflects Tradewinds Marketplace transitioning to the production phase.
(FY 2026 Baseline: $122,163 thousand)

74) Mission Support - United States European Command (USEUCOM) Operations - OUSW(R&E) $5,108

Increase provides support for activities in the USEUCOM area of responsibility. Further details are classified.
(FY 2026 Baseline: $122,163 thousand)

75) Mission Support - Vendor Threat Mitigation Manpower - OUSW(A&S) $8,849
Increase establishes a vendor threat mitigation capabilityto identify, vet, and address threats posed by those who oppose U.S. and allies' and partners' interests, or who pose a threat to national security, and to mitigate those risks as appropriate.
Summary of Changes by PSA

- +4,999 thousand for OUSW(A&S)
- +3,850 thousand for OUSW(I&S)

(FY 2026 Baseline: $398,854 thousand)

9. Program Decreases .....$-789,727

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases .....$-192,815

1) Afghanistan War Commission .....$-12,252
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $12,000 thousand for the Afghanistan War Commission.

(FY 2026 Baseline: $0 thousand)

2) APEX Accelerators.....$-39,009
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $38,207 thousand for APEX Accelerators.
(FY 2026 Baseline: $0 thousand)

3) Classified.....$-1,021
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $ 1,000 thousand for a classified program.
(FY 2026 Baseline: $0 thousand)

4) Conflict Operations Analysis .....$-11,807
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $11,600 thousand for Conflict Operations Analysis.
(FY 2026 Baseline: $0 thousand)

5) Global Fragility Act Implementation.....$-5,105
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $5,000 thousand for Global Fragility Act Implementation.
(FY 2026 Baseline: $0 thousand)

6) National Commission on the Future of the Navy.....$-6,126
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $6,000 thousand for the National Commission on the Future of the Navy.
(FY 2026 Baseline: $0 thousand)

7) National Defense Strategy Commission.....$-5,105
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $5,000 thousand for the Office of Net Assessment.
(FY 2026 Baseline: $0 thousand)

8) National Security Commission on Emerging Biotechnology .....$-6,126
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $6,000 thousand for the National Security Commission on Emerging Biotechnology.
(FY 2026 Baseline: $0 thousand)

9) National September 11 Memorial & Museum.....$-12,252
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $12,000 thousand for the National September 11 Memorial & Museum.
(FY 2026 Baseline: $0 thousand)

10) Office of Net Assessment.....$-5,105
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $5,000 thousand for the Office of Net Assessment.
(FY 2026 Baseline: $0 thousand)

11) Project Spectrum.....$-2,632

Decrease reflects a reduction of the one-time FY 2026 congressional increase of $2,578 thousand for Project Spectrum.
(FY 2026 Baseline: $0 thousand)

12) Readiness and Environmental Protection Integration Program (REPI) .....$-20,420
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $20,000 thousand for REPI.
(FY 2026 Baseline: $20,000 thousand)

13) Sec. 8050 Red Cross .....$-25,525
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $25,000 thousand for Sec. 8050 Red Cross.
(FY 2026 Baseline: $0 thousand)

14) Sec. 8050 United Services Organization.....$-24,504
Decrease reflects a reduction of the one-time FY 2026 congressional increase of $24,000 thousand for Sec. 8050 United Services Organization.
(FY 2026 Baseline: $0 thousand)

15) United States Telecommunications Training Institute (USTTI) Defense Training.....$-511
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $500 thousand for USTTI Defense Training.
(FY 2026 Baseline: $0 thousand)

16) Vietnam Dioxin Remediation.....$-15,315
The decrease reflects a reduction of the one-time FY 2026 congressional increase of $15,000 thousand for Vietnam Dioxin Remediation.

(FY 2026 Baseline: $0 thousand)

c) Program Decreases in FY 2027 .....$-596,912

1) Compensation and Benefits - Deferred Hiring and Functional Alignments - OSW .....$-19,387
A decrease of -69 FTEs reflects deferred hiring of FY 2026 OSW personnel and results from a comprehensive assessment of mission and functional alignments across the OSW enterprise. The requested manpower levels are necessary to better align with SECWAR's priorities of Restoring the Warrior Ethos, Rebuilding our Military, and Reestablishing Deterrence.

Summary of Changes by PSA

- -1 FTEs and -$281 thousand for DoW CIO
- -2 FTEs and -$562 thousand for OATSW(PA)
- -6 FTEs and -$1,686 thousand for OGC
- -12 FTEs and -$3,372 thousand for OUSW(P&R)
- -23 FTEs and -$6,463 thousand for DA&M
- -25 FTEs and -$7,023 thousand for OUSW(R&E)

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -69 FTEs)

2) Compensation and Benefits - Federal Retirement System – Agency Contribution Rates - OSW .....$-2,755
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; +0 FTEs)

3) Compensation and Benefits - Realignment of CDAO under OUSW(R&E) - OSW .....$-44,652
Decrease of funding for -208 FTEs reflects the internal realignment of the CDAO under the OUSW(R&E) in accordance with Deputy Secretary of War memorandum "Realigning the Office of the Chief Digital and Artificial Intelligence Officer to Accelerate Department-wide Artificial Intelligence Transformation," signed on August 14, 2025.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -208 FTEs)

4) Compensation and Benefits - Realignment of ONA and OATSW(PCLT) under DA&M - OSW.....$-12,397
Decrease of funding for -54 FTEs reflects the internal realignment of the OATSW(PCLT) under the DA&M in accordance with Secretary of War memorandum titled “Office of Net Assessment and Office of the Assistant to the Secretary of War for Privacy, Civil Liberties, and Transparency," signed on October 16, 2025.

Summary of Changes by Organization

- -38 FTEs and -$8,571 thousand for OATSW(PCLT)
- -16 FTEs and -$3,826 thousand for ONA

(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -54 FTEs)

5) Compensation and Benefits - Transfer from DA&M to DoW CIO - DA&M.....$-265
The decrease reflects the internal transfer of 1 FTE from the DA&M to the DoW CIO to align better and optimize mission resources.
(FY 2026 Baseline: $588,184 thousand; 2,447 FTEs; -1 FTEs)

6) Efficiency - Contract Services - OSW.....$-254,905
The reduction in funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and service consolidation. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $1,540,700 thousand)

7) Efficiency - Supplies and Materials - OSW.....$-7,329
Reduces funding for supplies and materials to align with historical execution levels and ensure alignment with the priorities of the Secretary of War to improve the efficiency and effectiveness of our mission and business operations.
(FY 2026 Baseline: $1,540,700 thousand)

8) Efficiency - Travel Budget - OSW.....$-2,860
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
(FY 2026 Baseline: $1,540,700 thousand)

9) Mission Support - Active Duty Operational Support (ADOS) - OUSW(R&E).....$-2,200
The decrease reflects the use of internal resources to support additional military manpower via ADOS.
(FY 2026 Baseline: $122,163 thousand)

10) Mission Support - Anomalous Health Incidents (AHI) - OUSW(P).....$-53,300
Decrease reflects the internal realignment of the AHI program from the OUSW(P) to the OUSW(R&E).
(FY 2026 Baseline: $201,240 thousand)

11) Mission Support - Financial Management Initiatives - OUSW(C).....$-9,587
Decrease reflects a reduction in contract support to realign inherently government workload to civilian FTEs to achieve efficiencies, further address financial management initiatives in furtherance of achieving an unmodified (clean) audit opinion, and modernize systems and processes.
(FY 2026 Baseline: $123,319 thousand)

12) Mission Support - Fourth Estate Manpower Tracking System (FMTS) - DA&M.....$-1,616
The decrease reflects the normalization of the initial level of contract support required for the Manpower Management Office (MMO) FMTS transfer program.
(FY 2026 Baseline: $69,865 thousand)

13) Mission Support - Independent Review Commission on Sexual Assault in the Military - OUSW(P).....$-2,556

Decrease reflects a programmed reduction for the Department-wide Independent Review Commission on Sexual Assault in the Military (IRC) implementation effort. Specifically, this adjustment aligns with the funding profile for IRC Tier 3, Recommendation 3.4.c (Integrate a gender analysis into the military's planning and operational frameworks). Per the September 22, 2021, IRC implementation memo, the Department established a phased roadmap, with the prioritized initial tier of recommendations mandated for completion by the end of FY 2027. OUSW(P) remains responsible for oversight of five sub-recommendations related to Women, Peace, and Security (WPS) through FY27. However, Policy's role in implementing these recommendations is nearing completion.
(FY 2026 Baseline: $201,240 thousand)

14) Mission Support - O&M to RDT&E Fund Realignment - DoW CIO.....$-11,858
Decrease represents a funding transfer from DoW CIO O&M to DoW CIO RDT&E to support mission-critical research and development investments. The decrease reduces contract support to mission support services to advance command, control, and communications capabilities.
(FY 2026 Baseline: $72,382 thousand)

15) Mission Support - Office of Strategic Capital (OSC) - OUSW(R&E).....$-7,150
The decrease reflects the targeted reduction of contracted mission support services, including cuts to SETA support, program management assistance, analytical support, administrative contract labor, and other contractor provided operational functions. These reductions free resources to support the planned expansion of the civilian workforce, shifting responsibilities previously performed by contractors to newly added government personnel. This realignment strengthens internal capacity, consolidates critical functions under federal staff, and ensures the Office of Strategic Capital is able to respond effectively to the Department's priorities – specifically the White House priorities in critical minerals, shipbuilding, and drones.
(FY 2026 Baseline: $122,163 thousand)

16) Mission Support - Realignment of CDAO under OUSW(R&E).....$-109,581
The funding decrease reflects the realignment of the CDAO under the OUSW(R&E) in accordance with the Deputy Secretary of War's memorandum "Realigning the Office of the Chief Digital and Artificial Intelligence Officer to Accelerate Department-wide Artificial Intelligence Transformation," signed on August 14, 2025.
(FY 2026 Baseline: $109,581 thousand)

17) Mission Support - Realignment of ONA and OATSW(PCLT) under DA&M.....$-33,063
Funding decrease reflects the functional realignment of the OATSW(PCLT) under the DA&M in accordance with the Secretary of War memorandum titled "Office of Net Assessment and Office of the Assistant to the Secretary of War for Privacy, Civil Liberties, and Transparency," signed on October 16, 2025.

Summary of Changes by Organization

- -$9,006 thousand for OATSW(PCLT)

- -$24,057 thousand for ONA

(FY 2026 Baseline: $33,063 thousand)

18) Mission Support – Reduction of Contracted Services to Enable Civilian Workforce Expansion – OUSW(R&E)$-13,827
The decrease reflects the targeted reduction of contracted mission support services across OUSW(R&E), including cuts to SETA support, program management assistance, analytical support, administrative contract labor, and other contractor provided operational functions. These reductions free resources to support the planned expansion of the civilian workforce, shifting responsibilities previously performed by contractors to newly added government personnel. This realignment strengthens internal capacity, consolidates critical functions under federal staff, and ensures OUSW(R&E) is positioned to sustain long term mission execution across priority technology areas such as AI/Autonomy, Hypersonics, Directed Energy, Energetics and Munitions, and critical minerals.
(FY 2026 Baseline: $122,163 thousand)

19) Mission Support - Resource Reduction in Hypersonic Event Support and Data Collection - TRMC .....$-7,624
The decrease reflects the reduction in mission support for hypersonic ground test event data storage and processing to address the need for additional personnel to meet the TRMC mission for the Department and provide increased program oversight for these national programs.
(FY 2026 Baseline: $395,971 thousand)

FY 2027 Budget Request $3,832,831

IV. Performance Criteria and Evaluation Summary:

Office of the Under Secretary of War, Acquisition and Sustainment (OUSW(A&S)):

The OUSW(A&S) is the PSA and advisor to SECWAR and DEPSECWAR for all matters relating to acquisition and sustainment in DoW. The primary responsibilities of OUSW(A&S) include serving as the DoW's chief acquisition and sustainment officer, with the mission of enabling the delivery and sustainment of secure and resilient capabilities to the warfighter and international partners quickly and cost-effectively. The OUSW(A&S) focuses on ensuring the operational readiness and long-term sustainment of military systems, covering everything from routine maintenance and logistics to the manning and operation of military installations. These funds are critical for managing the day-to-day activities that keep equipment mission-capable and support the warfighter, including energy resilience and facility upkeep. The OUSW(A&S) is also responsible for establishing policies and supervising all elements of acquisition, sustainment, the defense industrial base, and modernization of the nuclear forces.

The OUSW(A&S)'s major activities include Acquisition Transformation Support (ATS), War Production Unit (WPU), Economic Defense Unit, Readiness and Environmental Protection Initiative (REPI), Enterprise Logistics, Native American Lands Environmental Mitigation Program (NALEMP), Global Investments and Economic Security (GIES), APEX Accelerators, and Chemical and Biological Weapons Elimination (CBWE) Support Services, and Biosurveillance (BSV) program (transfer from the Defense Health Agency).

Major Program Title: Readiness and Environmental Protection Integration (REPI)

Measure/Description	Actuals	Enacted	Request
Readiness and Environmental Protection Integration (REPI)	**FY 2025**	**FY 2026**	**FY 2027**
Metric #1: Percent funding to highest tier priority installations (Target is 80%)	64%	59%	80%
Metric #2: Percent of validated projects funded (Target is 70%)	73%	77%	73%
Metric #3: Percent partner cost-share (Target is 50%)	37%	50%	50%

The risk of incompatible land use threatens mission capabilities essential for warfighter access to realistic training and testing for current and future forces. Investments for the REPI program address Component requirements to enter into cost-savings agreements with private conservation organizations and/or state and local governments to acquire off-base property interests, usually easements, as well as enhance off-base installation resilience to severe weather events. These agreements protect mission capability by cost-sharing the long-term protection of compatible land uses around DoW ranges and installations, including preserving strategically important missions across the USINDOPACOM region and preventing unwanted foreign ownership. The REPI program partnership projects address critical, near-term, but time-limited opportunities to preserve DoW installation and range capabilities. The REPI program leverages the capabilities, resources, and priorities of the private sector and state and local governments to obtain land and/or easements that prevent incompatible development or other land uses that impact military operations. The REPI program partnerships support sound planning, ecological integrity, and interagency coordination, and help avoid more expensive costs, such as the need for training workarounds or segmentation and future Military Construction (MILCON) costs to modify or relocate training assets to less-restricted locations.

Major Program Title: Enterprise Logistics (EL) Formerly reported within Logistics Systems Modernization (LMS)Support

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Metric #1: Time Definite Delivery (TRANSPORTATION)	82.2%	85%	82.3%
Metric #2: Percentage of Policy Current[1] (Goal: 90%)	95%	90%	90%
Metric #3: High-priority audit recommendations closed[2] (Goal: Close within timeframe assigned)	0	2	1
Metric #4: Percentage of Log IT systems w/ end-to-end Logistics processes compliant w/ DoWD 8190.01E & Defense Logistics Manual (DLM) 4000.25 (Surveillance & Performance Monitoring (SPM 4.7.4.1))	N/A	80%	90%
Metric #5: Percentage of Log IT systems that perform equipment accountability and visibility that comply with DoWI 5000.64 (SPM 4.7.4.2)	N/A	10%	20%
Metric #6: Percentage of Log IT systems w/ materiel inventory management functions compliant w/ DoWM 4140.01 V11 (SPM 4.7.4.3)	N/A	10%	20%
Metric #7: Number of Service/DLA warehouse locations scanned, recorded, and managed into the WU Dashboard (SPM 4.7.7.1)	N/A	9	90
Metric #8: Policy and procedures established to submit the automated Storage Space Management Report (SSMR) to DASD(Log) twice a year (SPM 4.7.7.2)	N/A	25%	75%

Office of the Deputy Assistant Secretary of War for Logistics (ODASW(LOG)) currently manages and maintains 89 issuances. The ODASW(LOG), under the ASW(S), is responsible for the Department's logistics strategy and policy, supply, storage and distribution, property and equipment, transportation, and program support. Its mission is to drive warfighting advantages through efficient and effective operation and improvement of the Joint Logistics Enterprise. The subject budget line provides a 56 contractor FTE workforce across six major functional areas in ODASW(LOG); the contractor workforce represents 70 percent of the total ODASW(LOG) workforce.

---

[1] Office of the Deputy Assistant Secretary of War for Logistics (ODASW(LOG)) currently manages and maintains 89 issuances.
[2] ODASW(LOG) Policy & Compliance considers GAO Priority Recommendations the priority to ensure are worked and addressed to the satisfaction of the DASW(LOG), ASW(S), and GAO. There are currently 3 recommendations provided under GAO-22-105002, issued May 2023. All high priority recommendations are tied to the Joint Strike Fighter, F-35 program.

The functional subcomponents supported by this contract are as follows: 1) The Supply Directorate, which oversees DoW policy and guidance for materiel management, supply, storage, and distribution. This directorate monitors supply support efficiency and effectiveness through performance measures and develops policies and processes to improve visibility, accountability, and control of all critical assets. The Supply Directorate, on behalf of OUSW(A&S), is also responsible for monitoring War Working Capital Fund activities, ensuring supply availability, and cash solvency. 2) The Transportation Directorate promulgates, provides, and oversees the DoW policy and guidance for the efficient and effective use of government and commercial transportation resources. This directorate coordinates government-wide category management initiatives for transportation and logistics services. This directorate also ensures the effectiveness of the War Transportation System and advocates for US civilian transportation capabilities for wartime needs. Finally, this directorate oversees the Department's Personal Property and Mail policies and programs. 3) The Commercial Support to Operations Directorate develops and sustains DoW policy and federal regulations and provides program support governing Operational Contract Support (OCS), Private Security Contractors (PSC), Vendor Threat Mitigation (VTM), contractor planning, management, and execution in support of combat, humanitarian, and disaster relief operations. This directorate works across the DoW enterprise to integrate OCS, PSC, and VTM programs across joint capability areas, joint warfighting functions, and interagency and industry partners. 4) The Audit & Equipment Directorate is responsible for the DoW policies for General Equipment (GE), Internal Use Software (IUS), and Non-Tactical Vehicles (NTV). The Directorate manages the defense-wide remediation of the financial statement audit material weaknesses and serves as OASD Sustainment’s lead in remediation efforts and overall audit compliance. This Directorate is also responsible for compliance oversight of the DoW Logistics Information Technology (LogIT) portfolio, driving rationalization and reducing the Department’s technical debt. 5) The Business Operations Directorate provides customer-focused support for inquiries, congressional reports, and audits. Additionally, it manages all Contract Officer Representative (COR) functions, including support for award, modification, and exercise of contract options, as well as all contractor tracking. Lastly, this directorate is the resource management liaison for planning, programming, budgeting, and financial management, including all FIAR accountability, invoicing, and reporting.

Major Program Title: Native American Lands Environmental Mitigation Program (NALEMP)

Measure/Description	**Actuals**	**Enacted**	**Request**
Address environmental impacts on Indian lands from former DoW activities.	**FY 2025**	**FY 2026**	**FY 2027**
Metric #1: Assess up to 10 reported potential impacts (RPI) through completion of Step I and Step II/III Assessment Reports. [1,158 RPIs reported to date.]	100%	100%	100%
Metric #2: Prioritize and rank all NALEMP-eligible and Under Review sites for funding consideration.	100%	100%	100%
Metric #3: Execute Cooperative Agreements (CA) with Federally Recognized Tribes to remediate environmental impacts.	14 CAs	14 CAs	15 CAs

The NALEMP, codified under the NDAA for FY 2021, addresses the environmental effects of past DoW actions on Indian lands and on other locations where DoW, an Indian tribe, and the current landowner agree that such mitigation is appropriate. The DoW addresses environmental impacts through government-to-government consultation aimed at restoring health and human safety, protecting natural and cultural resources, and returning Tribal lands to optimal use determined by the Tribe. The NALEMP projects remove hazardous materials, munitions debris, unsafe buildings or structures, lead-based paint or asbestos, and abandoned equipment.

The NALEMP uses site evaluation and assessment processes, while also considering other potential effects on tribal communities' way of life. The NALEMP-eligible sites are screened annually against health, safety, and environmental criteria to help the Office of the Assistant Secretary of War for Energy, Installations, and Environment (OASW(EI&E)) determine cleanup priorities.

Funding available under NALEMP is provided to Tribal Partners through 2-year Cooperative Agreements (CA) that enable Tribal governments to lead NALEMP projects, incorporate traditional ecological knowledge into cleanup design, and build tribal capacity in environmental services and technical remediation.

Major Program Title: Global Investments and Economic Security (GIES)

Under the authority, direction, and control of the OUSW(A&S), the Assistant Secretary of War (ASW), Industrial Base Policy (IBP) serves as the DoW's representative on three statutory and Executive Order-mandated interagency committees and consultative bodies responsible for the review of potential impacts by foreign investments in the U.S. and defense industrial base (DIB), telecommunications industry, and foreign access to the electromagnetic spectrum. These include the Committee for Foreign Investments in the U.S. (CFIUS), an interagency committee that operates pursuant to section 721 of the Defense Production Act (DPA) of 1950, as amended (section 721), and as implemented by Executive Order 11858, as amended, and the regulations at chapter VIII of title 31 of the Code of Federal Regulations; The Committee for the Assessment of Foreign Participation in the U.S. Telecommunication Services Sector, as established by Executive Order, commonly referred to as "Team Telecom", and the Information and Communications Technology and Services (ICTS) Supply Chain interagency consultative body as established by Executive Order: Securing the Information and Communications Technology and Services Supply Chain.

GIES also serves as the Department's lead on other critical economic security programs and due diligence efforts. GIES serves as the DoW's co-lead with the Federal Trade Commission (FTC) and Department of Justice on antitrust transaction and conduct reviews, including Hart-Scott-Rodino reviews of proposed mergers and acquisitions, and serves as its Compliance Officer in the administration of an FTC-ordered consent decree governing the operations of a merger of two key defense industrial base entities. GIES leads Section 1260H of the NDAA for FY 2021 (Public Law 116-283 as amended by Public Law 118-159, section 1346). This 1260H list identifies Chinese military companies operating directly or indirectly in the U.S. and publicly lists them in the Federal Register. Section 805 of the NDAA for FY 2024 requires the Department to prohibit its procurement from entities identified as Chinese military companies pursuant to Section 1260H. Under Executive Order 14105 and the newly passed Comprehensive Outbound Investment National Security (COINS) Act of 2025 in the NDAA for FY 2026, GIES leads the Outbound Investment Program for the DoW, coordinating with stakeholder organizations to identify national security concerns associated with notifications and to scan the market for prohibited transactions. The Outbound Investment Program (OIP) reviews notifications and helps shape outbound investment policy. The OIP requires notification of certain transactions and prohibits other transactions that constitute outbound investments into countries of concern in specified technology areas. The GIES Due Diligence team provides detailed national security reviews of companies under consideration for awards, loans, investments, or contracts from the DoW, including efforts supporting the Munitions Acceleration Council, DPA, Industrial Base Analysis and Sustainment (IBAS), Office of Strategic Capital, and the Economic Defense Unit. These reviews lead to assessments of potential risk posture and mitigation measures, enabling stakeholders across the DoW to make informed investment decisions and safeguard the DIB.

The CFIUS mission covers five primary functional areas: 1) Case Management, 2) Mitigation, 3) Monitoring, 4) Non- notified, and 5) International Engagement. Case Management investigates currently filed cases and declarations, coordinating with thirty-three DoW stakeholder organizations to identify national security concerns associated with a transaction. Mitigation negotiates the terms of national security agreements to resolve national security concerns. Monitoring oversees the implementation, sustainment, oversight, and enforcement of national security mitigation agreements. Non-notified transactions are those that have not been filed with CFIUS and may pose national security considerations for the defense industrial and technology base. International engagement cooperates with allies and

partners to address the transnational challenges posed by evolving national security threats and investment landscapes.

Committee on Foreign Investments in the U.S. (pursuant to s. 721 of the Defense Production Act (DPA) of 1950)

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Cases and Declarations filed:	367	425	475
National Security Agreements monitored:	145	150	155
Non-notified transactions assessed:	435	450	500
Non-notified transactions sent to CFIUS:	75	16	80

Committee for the Assessment of Foreign Participation in the U.S. Telecommunication Services Sector (Executive Order 13913)

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Team Telecom transactions assessed:	77	82	96
Team Telecom Agreements monitored:	45	58	71

Committee on Information Communication and Technology Supply Chain (ICTS) (Executive Order 13873)

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Transactions assessed (reviews commenced in Feb 2023):	6	30	35

Mergers and Acquisitions (M&A) (including Hart–Scott–Rodino Antitrust Improvements Act of 1976 (Public Law 94-435))

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
M&A transactions assessed:	42	80	100
M&A in-depth due diligence:	42	80	100
Non-notified transactions assessed:	120	200	300
Hart-Scott-Rodino monitored:	1	2	2

U.S. Investments in Certain National Security Technologies and Products in Countries of Concern (Outbound Investment)

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Investment transactions reviewed (reviews to commence in Oct 2025):	22	30	250

Section 1260H of the NDAA for FY 2021, List of "Chinese military companies"

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Number of Companies on the List	73	134	190
Number of Companies Reviewed	85	154	219

Due Diligence for GIES missions and investment across the Department in support of the Office of Strategic Capital (Section 903 of the NDAA for FY 2024), DPA Title III, and Industrial Base Analysis and Sustainment (10 U.S. Code § 4817 Industrial Base Fund)

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Number of Companies Reviewed	137	165	240

Major Program Title: APEX Accelerators

The program was established to expand the number of businesses capable of participating in government contracts and is administered by the DoW Office of Small Business Programs, in cooperation with states, local governments, and nonprofit organizations. The sections in Chapter 388 of 10 U.S.C. authorize the SECWAR to enter into cost-sharing cooperative agreements with state and local governments, nonprofit organizations, Indian tribal organizations, and Indian economic enterprises to establish and maintain APEX Accelerators (formerly known as the Procurement Technical Assistance Program (PTAP)). The purpose of the program is to modernize and enhance the industrial base by assisting businesses in obtaining and performing under contracts with DoW, as well as other federal agencies and state and local governments. The APEX Accelerators have a local presence in 49 states, Washington, D.C., Puerto Rico, and Guam. Under the PTAP statute, up to $1.5 million can be paid for statewide programs and $0.75 million for regional (less than statewide) programs during the fiscal year. Under the program, APEX Accelerators help large and small businesses pursue and perform under contracts with the Department of War, other federal agencies, state and local governments, and government prime contractors. Most of the assistance the APEX Accelerators provide is offered at no cost to the business. APEX Accelerators' support to businesses includes registration in federal procurement systems, such as the System for Award Management (SAM); readiness evaluation; identification of contract opportunities; assistance with understanding requirements; cybersecurity readiness; and preparation and submission of bids for government contracts. APEX Accelerators are also critical enablers of growing the defense industrial base by scouting small, non-traditional companies at the forefront of innovation. The Accelerators also facilitate cybersecurity training, foreign ownership and control (FOCI) training, conduct market research, and conduct commercial due diligence for the DoW. Additionally, they facilitate data sharing between small businesses and the Department. As a result of these efforts, APEX Accelerators help grow and modernize the defense industrial base by increasing the number of businesses able to perform on government contracts and provide preeminent solutions to the military, the Federal Government, and other state and local government agencies.

Major Program Title: Chemical and Biological Weapons Elimination (CBWE) Support Services

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Metric #1: Readiness level of equipment to assess and destroy Recovered Chemical Warfare Material (RCWM)	100%	100%	100%
Metric #2: Readiness level of personnel to execute the assessment and destruction of RCWM	100%	100%	100%
Metric #3: Readiness level of operational capability to conduct 18 assessments and 2 short-duration (<90-days) destruction operations of confirmed RCWM within the United States	50%	50%	50%

Chemical and biological weapon threats continue to evolve in response to changing geopolitics and emerging technologies. Investment in this area decreases risk to the warfighter and enables DoW action to achieve critical national security objectives. Funding maintains enduring chemical and biological warfare material assessment and destruction capabilities. The FY 2027 President's Budget Request partially funds four critical support functions required to meet Chemical Weapons Convention, U.S. law, and regulatory requirements for the assessment and destruction of recovered chemical warfare material within the U.S. The funding strengthens deterrence and contributes to achieving peace through strength by ensuring the U.S. has an enduring capability to assess and destroy foreign chemical and biological weapons threats in support of DoW priorities and special mission requirements. Funding also ensures the capability to assess suspects and destroy confirmed U.S.-origin chemical weapons identified/recovered abroad.

1. Maintenance of equipment: Provides comprehensive maintenance, logistics, and training to ensure that equipment is fully mission-capable to support the assessment of suspect and destruction of confirmed chemical and biological warfare (CBW) material.
2. Sustainment of personnel: Provides trained operators and personnel to plan, manage, and execute the assessment of suspect and destruction of confirmed CBW material.
3. Operations: Provides for the execution of up to 18 assessments of potential CBW material and 1 destruction operation of confirmed CBW material.
4. Program management: Provides the support necessary to execute assessment and destruction activities in a consistent, treaty-compliant manner that minimizes risk to human health and the environment.

Office of the Under Secretary of War, Comptroller (OUSW(C))/ Chief Financial Officer:

The OUSW(C) is the PSA and advisor to the SECWAR and DEPSECWAR for all DoW financial matters. This office oversees and sets policy for budget and fiscal matters, including financial management, accounting policy and systems, management control systems, budget formulation, execution, and contract audit administration. Performance Evaluation Metrics have been developed for the major programs under OUSW(C): Comptroller Initiatives, and Resource Management Systems (RMS). These programs account for 99% of the Comptroller's total Operation and Maintenance budget in FY 2027.

Major Program Title: Comptroller Initiatives

Measure/Description	Actuals	Enacted	Request
Financial Improvement and Audit Remediation	**FY 2025**	**FY 2026**	**FY 2027**
Metric #1: Percentage of 'total assets' of all entities with an unmodified or qualified audit opinion compared to the 'total assets' of all DoW entities.	51.3%	53.0%	55.3%

Metric #1
FY 2025 Actuals: The following received unmodified or qualified audit opinion in FY 2025: Military Retirement Fund (MRF), Medicare-Eligible Retiree Health Care Fund (MERHCF), U.S. Army Corps of Engineers (USACE) – Civil Works, Defense Health Agency (DHA) - Contract Resource Management, Defense Commissary Agency (DeCA), Defense Finance and Accounting Service (DFAS) Working Capital Fund (WCF), Defense Threat Reduction Agency (DTRA), DoW Office of Inspector General (OIG), National Reconnaissance Office (NRO), Defense Contract Audit Agency (DCAA), Defense Information Systems Agency (DISA) WCF, US Marine Corps (USMC), and Defense Logistics Agency (DLA) Transaction Fund.

FY 2026 Enacted: The following Components project to receive an unmodified or qualified audit opinion in FY 2026 and those maintain their favorable audit opinion in FY 2025: DISA General Fund, Defense Intelligence Agency (DIA), National Geospatial-Intelligence Agency (NGA), and Navy WCF.

FY 2027 Projected: The following Components project to receive an unmodified or qualified audit opinion in FY 2027 and those maintain their favorable audit opinion in FY 2026: Air Force WCF, Army WCF, DLA WCF, National Security Agency (NSA), and United States Transportation Command (USTRANSCOM).

Major Program Title: Comptroller Initiatives

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Metric: Sustain a professional, certified financial management (FM) workforce	95%	95%	95%

The DoW FM Certification Program (DFMCP) increases the technical FM and leadership competence of individual FM members (civilian and military), enabling support to the Department's mission. The OUSW(C) manages the effort to sustain the percentage of FM members in good standing at or above 95%, which represents the percentage of FM members who are compliant with both initial certification and continuing education training. Continuing education training for FM-certified members is measured continuously through random audits. Goals for FY 2026 and FY 2027 are stated in the table above as outlined in the Department's Annual Performance Plan.

The DoW FM workforce comprises approximately 52,000 civilian and military personnel across various FM disciplines. The DoW continued its steady progress toward the strategic objective of sustaining a well-trained workforce with the requisite FM knowledge, skills, and abilities to perform effectively across all FM career series. The OUSW(C) has several FM workforce programs, projects, and initiatives focused on meeting the Department's strategic objectives. The OUSW(C) sustained a professional and certified FM workforce through the following programs and initiatives:

- The DoW FM workforce completed 439,000 web-based course hours from the online selection of 83 courses maintained by the OUSW(C) that ensure DoW FM workforce members can complete FM requirements at no charge to the individual or their command.

- The Virtual Instructor-Led Training (VILT) offerings remained popular among DoW FM workforce members. The VILT courses provide a networking and dialogue opportunity not available through the WBC offerings. The OUSW(C) offered 83 courses and more than 27,000 CETs. These included the popular Leadership, Accounting, and Data Analytics courses.

- The OUSW(C) continued expanding the FM VisionExchange (fmVX), a monthly virtual speaker series focused on a variety of topics covering FM skills, leadership, and DoW priorities. The 24 virtual training sessions earned employees in the DFMCP more than 13,000 CETs. Demand has firmly established fmVX as an essential offering for the FM workforce, enabling emergent training.

Major Program Title: Resource Management System

Measure/Description	Actuals	Enacted	Request
	FY 2025	FY 2026	FY 2027
Metric #1: Number of Components/appropriations utilizing the Exhibition Automation System (EAS) tool.	52	52	52
Metric #2: Average Man-Hours saved using the EAS Tool	41%	41%	41%
Metric #3: Types of unique Exhibits Automated	75	77	110
Metric #4: Number of Components using NGRMS as a Service	0	0	2

The OUSW(C) maintains the OUSW(C) Resource Management System (RMS), a family of systems that deliver the capability to manage and support DoW Planning, Programming, Budgeting, and Execution activities.

In FY 2025, EAS subsumed the creation of the Volume III Medical Readiness Exhibits for the Defense Health Program justification book and new exhibits for the Pacific Deterrence Initiative (PDI) justification book, to directly support DoW budget documentation requirements for capturing the Department's efforts and investments that strengthen regional deterrence.

In FY 2026, additional structure was created in EAS for automated exhibits within the MILPERS accounts. A new PBA-19 Appropriation Highlights Summary exhibit was created for the Defense-Wide O&M account that automatically aggregates all agency entries into a single document for submission to Congress, and a Transfers-in/Transfers out exhibit that automatically captures all functional transfers in the OP-5 for each agency. The Defense-Wide O-1 Summary exhibit was also automated to leverage data in the source agency exhibits. Six new data calls were developed to aggregate data, build budget overviews, create spend plans, and generate reports for various programs and budget prioritization.

In FY 2027, further budget structures and exhibits will continue to be added in EAS to automate the Security Cooperation Book and the O&M Overview Book, streamlining the budget build process and reducing data re-entry errors to improve the efficiency and accuracy of building justification materials. Efforts will focus on refining capabilities for EAS users, including expanding automation to manual exhibits, enhancing machine-readable output format, expanding automated data feeds from source budget systems, such as the Next Generation Resource Management System (NGRMS), and improving data reporting. The NGRMS as a Service will reach Initial Operational Capability and expand its customer base across the DoW, including additional Components.

Office of the Under Secretary of War for Intelligence and Security (OUSW(I&S)):

The OUSW(I&S) is the PSA and advisor to the SECWAR and DEPSECWAR on defense intelligence, counterintelligence, security, law enforcement, sensitive activities, including cover, military deception, operations security, and other intelligence-related matters. The OUSW(I&S) exercises planning, policy, and strategic oversight over all DoW intelligence and security functions. The following evaluation metrics are samples from the OUSW(I&S) programs.

Major Program Title: MIP Management and Activities of the OUSW(I&S)

Measure/Description	Actuals	Enacted	Request
Human Intelligence (HUMINT) and Sensitive Activities - SASP	**FY 2025**	**FY 2026**	**FY 2027**
Clandestine Quarterly Reports	4 Reports	4 Reports	4 Reports
HUMINT Oversight Assessments	1 Assessments	0 Assessments	2 Assessments
HUMINT Operations Reviews/Coordination	30 Reviews	30 Reviews	40 Reviews
HUMINT Advanced Skills Training Programs Reviews	1 Programs	1 Programs	1 Programs

Per DoW Directive 5200.37, the OUSW(I&S) exercises oversight of all DoW HUMINT, establishes DoW HUMINT policies, guidance, and programs that ensure adherence to National HUMINT Manager guidance and core standards. The OUSW(I&S) oversees the implementation of DoW policy and guidance for the coordination and deconfliction of DoW HUMINT and related intelligence activities, and other human-derived information-gathering activities; monitors DoW HUMINT resource needs; and integrates them into DoW and national planning, programming, budgeting, execution, and staffing processes. The HUMINT and Sensitive Activities (H&SA) Directorate is responsible for overseeing enterprise development that enables the collection of information that provides decision advantage over adversaries, operationalizes partnerships with allies, and elevates security across the DoW and the Intelligence Community. A classified annex to the Annual Department of Defense Appropriations Act directs the DoW to provide quarterly reports on certain clandestine activities conducted by the Department. The H&SA Directorate compiles and reviews inputs from DoW Components and distributes the quarterly report to six congressional committees and senior Executive Branch officials. Electronic records management and the dissemination of quarterly reports are required to meet stringent information security measures. The Directorate also coordinates OSW-level approvals for certain compartmented activities, conducts periodic reviews of these activities, and prepares/coordinates reports for the OUSW(I&S), the SECWAR, and congressional oversight committees. Further, H&SA provides governance, oversight, coordination, and reporting on other sensitive activities and programs for which metrics are in place and available on classified mediums.

Major Program Title: MIP Management and Activities of the OUSW(I&S)

Measure/Description	Actuals	Enacted	Request
Strengthening the DoW Security Posture – CL&S	**FY 2025**	**FY 2026**	**FY 2027**
Complete value assessments on the Department's implementation of its Personnel Vetting Program and the cornerstone IT system for vetting reform, the National Background Investigation Services (NBIS).	5 value assessments	5 value assessments	5 value assessments
Oversee the deployment of electronic physical access control systems with IMESA functionality across DoW's 373 domestic installations to vet individuals continuously.	20 Bases	Expect Full Deployment	N/A
Complete value assessments on elements of the DoW Insider Threat Program, to include the role of the Defense Counterintelligence and Security Agency, Component Insider Threat hubs, and the Insider Threat case management system, the Defense Security Analysis and Threat System (DSATS).	N/A – new objective	3 value assessments	5 value assessments
Complete reviews of DoW component Operations Security (OPSEC) programs.	100%	100%	100%
OPSEC Oversight Reviews & Forums.	10 Reviews	10 Reviews	10 Reviews
Assess Component implementation, execution, and effectiveness of protecting and utilizing national security information at all levels; supplemented by Component-level inspections of subordinate organizations.	20 Assessments	40 Assessments	40 Assessments
Industrial Security (INDSEC). Assess DCSA implementation, execution, and effectiveness in enabling secure defense industrial base operations within a defined major area of the NISP (e.g., FOCI, DITMAC, Entity Vetting, Industry Personnel Security Support, Military Department Oversight).	1 Assessment	3 Assessments	3 Assessments
Security workforce and Defense-wide population training oversight/assessment.	5 Assessments	5 Assessments	5 Assessments

For Defense Security programs, the OUSW(I&S) serves as the DoW Senior Agency Official for Security pursuant to Executive Orders 12968, 13467, 13526, 13556, 13549, 13587, 13869 and 12977 and advises the Secretary and Deputy Secretary on the development of risk-managed security policies and programs to establish a more trusted and secure workforce and to enable the protection of critical technologies, information, personnel, and assets. Effective information security is the bedrock of mission success and decision advantage. This role has fundamentally shifted from

passive assessment to active, hands-on oversight to enforce accountability. This means both rigorously protecting national security information and aggressively combating the over-classification that stifles operational agility. Getting this balance wrong results in compromised operations and lost strategic advantage and is particularly harmful to Department priorities and acquisition partners. The resources do not maintain the status quo, but enable meeting this new, intensive standard of engagement required to protect information and the warfighter.

Industrial security is the foundation of information protection in the defense industrial base required for warfighter advantage. Adversaries are targeting the entire acquisition lifecycle. As the DoW moves to expand acquisition security to secure information from sophisticated threats earlier in the acquisition cycle, protection of classified information in the National Industrial Security Program (NISP) must also be modernized to turn security into a true enabler of speed and capability. The system must not take longer to vet a company than it does for adversaries to steal its technology. The FY 2027 President's Budget funds support transformation to modernize the NISP to enable today's operations within a process framework that has largely remained unchanged since its establishment in 1993, as well as essential OUSW(I&S) oversight improvements outlined in recent reports, including a Government Accountability Office study.

Major Program Title: MIP Management and Activities of the OUSW(I&S)

Measure/Description	Actuals	Enacted	Request
International Partnership Engagement Policies, Strategies and Oversight - OSIP	**FY 2025**	**FY 2026**	**FY 2027**
Provide the OUSW(I&S) with strategic recommendations for foreign partner engagements and guide the Defense Intelligence Components on foreign partnerships.	100%	100%	100%
Orchestrate drafting and approval of Defense Intelligence Enterprise (DIE) Action Plans on select priority issues from the foreign partner engagement strategy.	2 Plans	2 Plans	2 Plans
Monitor the progress of defense intelligence components in implementing the foreign partner engagement strategy by providing oversight of DIE Action Plans and select priority issues through the Defense Intelligence Partner Engagement Synchronization Board.	100%	100%	100%
Manage Defense Intelligence Strategic Dialogues (DISD) and other bilateral/multilateral senior-level committees with select foreign partners.	3 Events	3 Events	3 Events
Manage and support foreign delegation visits to the OUSW(I&S), trips overseas, and virtual engagements by providing the OUSW(I&S) with preparatory material, talking points, and foreign partner coordination support.	100%	100%	100%
Provide military intelligence foreign disclosure policy guidance and support to the OSW, OUSW(I&S), the DIE, and other IC Agencies, as required.	100%	100%	100%
Manage the operations of the Military Intelligence Disclosure Policy Committee (MIDPC), conducting Principals' meetings, and coordinating the Members' responses to actions brought before the committee in accordance with National Disclosure Policy (NDP-1).	4 Meetings	4 Meetings	4 Meetings

Sustain standardized training and certification of DoW Foreign Disclosure Officers through updates to the online introductory course and support to DIA's FDO Training & Certification Board of Governors.	100%	100%	100%

The Director for Defense Intelligence for Operational Support and International Partnership (OSIP) implements the National Defense Strategy (NDS) priorities to oversee and support intelligence for defending the Homeland and the Western Hemisphere; oversee and support intelligence for deterring China; and increase burden sharing with Allies. The DoW Directive 5143.01 (the OUSW(I&S) Charter) gives the OUSW(I&S) the responsibility to oversee, advance, and synchronize DIE foreign intelligence relationships, and to establish foreign Defense Intelligence relationships directly. All OSIP partner engagement (PE) activities execute the OUSW(I&S) charter responsibilities, NDS, and support the Department's initiative of "Succeed Through Teamwork". The OSIP oversees, advances, and synchronizes the DIE's foreign intelligence relationships by setting DIE-wide PE priorities in the USW(I&S) PE Strategy and promulgating consistent DIE PE actions and messaging through the interagency Defense Intelligence PE Synchronization Board and DIE Action Plans. The OSIP arranges forums and meetings that enable the OUSW(I&S) to establish and foster relationships with foreign counterparts. These forums include: Defense Intelligence Strategic Dialogues (DISD), Key Leader Engagements, and the FVEY Defense Intelligence Board. The DoW Directive 5143.01 also gives OUSW(I&S) the responsibility to establish and oversee the implementation of Defense intelligence policy, guidance, and strategy for intelligence information sharing, and to facilitate information-sharing activities. The OSIP implements these responsibilities by managing the Military Intelligence Disclosure Policy Committee (MIDPC) and providing guidance on military intelligence foreign disclosure policy across the Department.

Major Program Title: MIP Management and Activities of the OUSW(I&S)

Measure/Description	**Actuals**	**Enacted**	**Request**
Intelligence Analysis Policies, Strategies, and Oversight - PREM	**FY 2025**	**FY 2026**	**FY 2027**
Conduct analytic Oversight Program site visits of selected Defense Intelligence Components to evaluate the implementation of analysis policies.	4 Visits	4 Visits	4 Visits
Support the OUSW(I&S) senior designated chairperson of the Department's Defense Document and Media Exploitation (DOMEX) Council to strengthen the DoW DOMEX capability, including updating the DoW Directive; conduct oversight of the National Digital Exploitation and OSINT Center (NDOC).	100%	100%	100%

The Defense Analysis (DA) Team, under the Director for Defense Intelligence Programs, Resources, and Defense Analysis, leads the DIE in policy development and oversight of defense analysis to enable policymakers to make informed, accurate decisions. The DA team is responsible for evaluating current policies and developing new policies and procedures to structure and guide DoW intelligence analysis in meeting DoW policy, planning, operations, and acquisition requirements, and to enhance analytic capabilities. The DA team also provides oversight and guidance on crucial areas, including defense warnings, analysis, tools, training, education, and certification.

Major Program Title: Influence and Perception Management

Measure/Description	**Actuals**	**Enacted**	**Request**
Influence and Perception Management - SASP	**FY 2025**	**FY 2026**	**FY 2027**
Provide the OUSW(I&S) with recommendations for prioritizing the development of the competitive influence strategy, which will direct subordinate planning efforts across the Department.	100%	100%	100%
Develop broad thematic influence guidance focused on key adversaries.	2 Products	2 Products	2 Products
Promulgate competitive influence strategies focused on specific defense issues that direct subordinate planning for the conduct of influence-related activities.	2 Strategies	2 Strategies	2 Strategies
Develop DoW Issuance for DoW Perception Management Activities.	1 Issuance	1 Issuance	1 Issuance
Conduct Staff Assistance Visits and Compliance Inspections for DoW Perception Management Activities.	2 Visits	2 Visits	2 Visits
Provide governance of strategic Perception Management Activity executions.	1 Product	2 Products	2 Products

The Influence and Perception Management Office serves as the senior advisor to the OUSW(I&S) for strategic and operational influence and perception management (reveal and conceal) matters. It develops broad thematic influence guidance focused on key adversaries; promulgates competitive influence strategies focused on specific defense issues, which direct subordinate planning efforts for the conduct of influence-related activities; and fills existing gaps in policy, oversight, governance, and integration related to influence and perception management matters.

Major Program Title: MIP Management and Activities of the OUSW(I&S)

Measure/Description	Actuals	Enacted	Request
Strategy Coordination Program Office (SCPO) - SASP	**FY 2025**	**FY 2026**	**FY 2027**
Fiscal Year Annual Report	1 Report	1 Report	1 Report
Review of SC2 Annual Self-Assessment			1 Reports
Conduct Annual Assessments for Effectiveness of SCPO Activities			1 Assessment
Develop an Assessment Framework			1 Framework
Develop and Implement DoW Instruction for SCPO Oversight Activities			1 Instruction
SCPO Strategy Board Charter to Enable Decision-Support of SCPO Activities			1 Product
Conduct SCPO Senior Strategy Board (SSB) Meetings			2 Products
SCPO Communications and Engagement Strategy		1 Product	1 Product
Conduct DoW & Enterprise-Wide Summits for Prioritization and Synchronization	2 Summits	2 Summits	2 Summits
Conduct Staff Assistance Visits to DoW/Non-DoW Partners		2 Visits	4 Visits
Conduct Bi-Monthly Enterprise SC2 Synchronization Meetings	12	6	12-18
Conduct Monthly Enterprise SC2 Battle Rhythm Event	12	6	12
SCPO Engagement with Senior Steering Group for strategic decisions		1	2
SCPO Engagement with Partner(s)		4	6

The SCPO performs critical analyses and assessments of a variety of military, technical, and scientific programs, issues, and topics. The program coordinates among the Military Departments, Combatant Commands (CCMD), and other U.S. government departments and agencies, leveraging the whole-of-government enterprise through strategy coordination cells that provide tailored analyses, prioritized assessments, and recommended strategies to mitigate identified risks.

Major Program Title: OSW Red Team

Measure/Description	**Actuals**	**Enacted**	**Request**
OSW Red Team	**FY 2025**	**FY 2026**	**FY 2027**
Provide Analytic Insights to SECWAR and DEPSECWAR to inform strategic-level activities	100%	100%	100%
Adversary Representation for OSW, JS, Service strategic-level Wargames, TTXs, and Exercises	100%	100%	100%
American Academy for Strategic Education (AASE) Net Assessment Industry-Standard Certification	Certification for up to 20 PAX	Certification for up to 20 PAX	Certification for up to 20 PAX
Military Operations Research Society (MORS) Wargaming Industry-Standard Certification	Certification for up to 20 PAX	Certification for up to 20 PAX	Certification for up to 20 PAX
Red Representation Best Practices – COP for DoW	3 Events	3 Events	4 Events

Per DoW Directive 5105.88, the OSW Red Team serves the SECWAR and DEPSECWAR by providing insights on adversaries' highest-level perspectives and potential actions to inform strategic-level DoW activities. The Red Team's combination of operational and intelligence experts considers potential adversary calculus and military responses during the systematic deliberations that inform DoW policy, strategy, analysis, planning, resourcing, organizing, training, or equipping. The OSW Red Team operates with intellectual rigor and strategic foresight while using creative analytical formats to convey anticipated adversary perceptions, strategy, and decision-making. Its insights are contextualized within other, established DoW and IC channels of strategic and military analysis and assessment. This work inherently defends the homeland from PRC threats by informing senior decision-makers of PRC threat intentions and providing them with a standard-setting calculus to deter PRC aggression. The resulting insights provided by Red Team assist in deterring strategic attacks and enhance the mission readiness of the Joint Force by providing exquisite insight into the adversarial mindset.

Major Program Title: Advanced Intelligence Capabilities (AIC)

Measure/Description	Actuals	Enacted	Request
OSW Advanced Intelligence Capabilities (AIC)	**FY 2025**	**FY 2026**	**FY 2027**
Complete and submit the required congressional reports	100%	100%	100%
Synchronize combatant command, service, Intelligence Community, federal government, and other partner capabilities for optimized, cross- functional Unidentified Anomalous Phenomena (UAP) detection, tracking, mitigation, and recovery across the air, maritime, and space domains.	100%	100%	100%
Identify and report to appropriate authorities all UAP identified as safety risks to DoW, partner, or civil platforms in the air, maritime, and space domains.	100%	100%	100%
Identify and report to the appropriate authorities all UAP identified as national security risks	100%	100%	100%

The mission of AIC is to minimize technical and intelligence surprise by synchronizing scientific, intelligence, and operational detection, identification, attribution, and mitigation of unidentified and anomalous objects in the vicinity of national security areas.

Department of War Chief Information Officer (DoW CIO):

The DoW CIO is the principal advisor to the Secretary and Deputy Secretary of War on all information technology (IT) matters. The DoW CIO is responsible for the entire Department's information enterprise and develops the Department-wide strategy, enterprise architecture, and technical standards for all IT systems to ensure their security, interoperability, and operational effectiveness. In direct support of the National Security and National Defense Strategies, the DoW CIO's activities focus on modernizing key information capabilities, enhancing resiliency, and ensuring the DoW maintains a decisive technological advantage over its adversaries.

Major Program Title: Information Enterprise & Information Systems

Measure/Description	Actuals	Enacted	Request
DoW CIO/PSA activities to transform the DoW information enterprise and enable information systems capabilities through modernizing and developing advanced IT capabilities to enhance joint force readiness and lethality.	**FY 2025**	**FY 2026**	**FY 2027**
Metric #1a: Report progress on modernized positioning, navigation, and timing (PNT) capability deployment and fielding across priority platforms to operational requirements. Monitor and report Component progress on implementing military global positioning system (GPS) user equipment (MGUE); and review Component fielding plans and select priority issues linked to the PNT strategy through the PNT Oversight Council.	100%	100%	100%
Metric #1b: Provide strategic recommendations and guidance to implement a modular open-system approach to integrate DoW PNT enterprise capabilities to enable maximum flexibility and unpredictability in responding to the evolving navigation warfare (NAVWAR) threat environment.	100%	100%	100%
Metric #1c: Provide strategic recommendations and guidance to implement a unified approach to PNT situational awareness. This will be achieved by integrating DoW sensors with commercial data to establish a common operational picture for the PNT enterprise.	100%	100%	100%
Metric #2a: Develop, coordinate, and finalize the DoW directive guiding cognitive, dynamic, spectrum access, and sharing capabilities to provide the warfighter reliable electromagnetic spectrum (EMS) access when and where needed.	N/A	N/A	100%
Metric #2b: Conduct analytic oversight of programs that improve EMS understanding and SA capabilities to characterize and mitigate the risks from a congested and contested electromagnetic operational environment.	N/A	80%	80%
Metric #3a: Establish strategic direction, publish policy, and provide technical guidance to advance cloud adoption and implement modern software approaches, including enterprise cloud services adoption, enabling capability delivery at the speed of relevance and the warfighter's data advantage.	100%	100%	100%
Metric #3b: Optimize and oversee the defense business systems portfolio for performance, effectiveness, and cost. Establish and implement processes, governance, capabilities, data, architectures, and initiatives to enable effective portfolio management of the business and enterprise information environment mission areas.	100%	100%	100%
Metric #3c: Provide strategic policy and guidance on DoW Information Network modernization activities, to include eliminating legacy network technology, optimizing command and control systems, evolving the DoW data centers, and implementing the Mission Partner Environment.	100%	100%	100%

Average Annual Civilian Salary ($ in thousands)	**253.1**	**240.4**	**256.2**	**-12.7**	**15.8**
Contractor FTEs (Total)	**1,846**	**1,835**	**1,924**	**-11**	**89**

Personnel Summary Explanations:
This budget requests 2,937 civilian Full Time Equivalents (FTE), representing an increase of 490 FTEs from FY 2026. A combination of the following changes drives the increase:

1. +26 for Biosurveillance Program Transfer - OUSW(A&S)
2. +13 for Defense Civilian Personnel Advisory Service Realignment from Defense Human Resources Activity to the Assistant Secretary of War for Manpower and Reserve Affairs - OUSW(P&R)
3. +8 for Mission Partner Environment Transfer from Air Force - DoW CIO
4. +1 for Organizational Realignment from Defense Health Agency to OUSW(P&R) - OUSW(P&R)
5. +20 for Build and Scale Office of Strategic Capital Loan Infrastructure - OUSW(R&E)
6. +2 for Classified Increase 1 - SCO
7. +3 for Classified Increase 2 – SCO
8. +159 for Deferred Hiring and Functional Alignments - OSW
9. +10 for Direct Reporting Portfolio Manager for Critical Major Weapon Systems (CMWS) - SECWAR and Department Initiatives
10. +30 for Direct Reporting Portfolio Manager for Submarines - SECWAR and Department Initiatives
11. +1 for DoW Special Access Program Central Office Support to the Executive Office of the President - DA&M
12. +33 for Economic Defense Unit - OUSW(A&S)
13. +60 for Financial Management Initiatives - OUSW(C)
14. +75 for Industrial Base Analysis and Sustainment Support - OUSW(A&S): Increase of +75 FTEs to establish the Wartime Production Unit, Rapid Warfighter Support, and International Armaments Cooperation. The labor funding associated with this FTE increase is requested in the Department's FY 2027 mandatory funding request. The requested increase is for the reconciliation bin "Defense Industrial Base," with a total obligation authority of $103,948 thousand.

15. +2 for Legislative Liaison Support - OASW(LA)
16. +22 for Office of Strategic Capital - OUSW(R&E)
17. +9 for Presidential and SECWAR Travel Requirements - DoW CIO
18. +30 for Rebuild Analytic Capacity – OSW
19. +50 for Resource Realignment to Fund Manpower Increase - OUSW(R&E)
20. +28 for Resource Realignment to Fund Manpower Increase – TRMC
21. -9 for Manpower Transfer to U.S. Southern Command - OUSW(A&S)
22. -13 for Office of Command Climate and Well-Being Integration Realignment from Office of Force Resiliency from OUSW(P&R) to Defense Human Resources Activity - OUSW(P&R)
23. -1 for Organizational Realignment from OUSW(P&R) to Defense Health Agency - OUSW(P&R)
24. -69 for Deferred Hiring and Functional Alignments - OSW

OSW Cyber	104,132	2,431	14,736	121,299	2,401	-42,537	81,163

I. Description of Operations Financed:
The Office of the Secretary of War (OSW) is the principal staff of the Secretary of War (SECWAR) in the exercise of policy development, planning, resource/fiscal management, and program evaluation responsibilities. The OSW Principal Staff Assistants (PSA) supporting cyber activities are listed below:

OSW Offices/Principal Staff Assistants:
- Department of War Chief Information Officer (DoW CIO)
- Office of the Under Secretary of War for Policy (OUSW(P))
- Office of the Under Secretary of War for Research and Engineering (OUSW(R&E))
- Strategic Capabilities Office (SCO)

Civilian Pay: This provides the resources needed to support effective implementation by building a ready, capable civilian workforce. Funding includes all civilian personnel compensation and benefits required for the OSW's operations, as well as centrally funded oversight, policy, and control cyber services.

OSW Offices/Principal Staff Assistants Mission Descriptions:

Department of War Chief Information Officer (DoW CIO): As the principal advisor to the Secretary of War (SECWAR) and Deputy Secretary of War (DEPSECWAR) on all information technology (IT) matters, the DoW CIO is responsible for the entire Department's information enterprise. The DoW CIO develops the Department-wide strategy, enterprise architecture, and technical standards for all IT systems to ensure their security, interoperability, and operational effectiveness. In direct support of the National Security and National Defense Strategies (NDS), the DoW CIO's activities focus on modernizing key information capabilities, enhancing resiliency, and ensuring the DoW maintains a decisive technological advantage over its adversaries.

DoW CIO's strategic imperatives are to: spearhead the modernization of critical information capabilities; develop a premier cyber workforce; and deliver advanced IT and cybersecurity solutions that enhance readiness and lethality. Through implementing a zero-trust architecture, the CIO will ensure the Department maintains a decisive and persistent advantage over its adversaries in a contested digital environment.

The cybersecurity-related activities include:
1) Information Systems Security Program (ISSP)
2) Cybersecurity initiatives
3) Cybersecurity risk management oversight
4) Defense industrial base, cybersecurity/information assurance
5) Cyber scholarship and workforce development

Office of the Under Secretary of War for Policy (OUSW(P)): The OUSW(P) is the PSA and advisor to the SECWAR and DEPSECWAR on capabilities, force, and contingency plans necessary to implement the NDS, defense policy, and the integration and oversight of DoW policy and plans to achieve national security objectives. As specified in Section 392a of Title 10, United States Code, the Assistant Secretary of War for Cyber Policy, serving as the Principal Cyber Advisor (PCA) to the SECWAR, acts as the principal advisor to the SECWAR on military cyber forces and activities, and is responsible for the overall integration of Cyber Operations Forces activities relating to cyberspace operations, including associated policy and operational considerations, resources, personnel, technology development and transition, and acquisition.

Funding supports the Office of the Principal Cyber Advisor (OPCA) to oversee the development of United States Cyber Command (USCYBERCOM) and the Cyberspace Operations Forces (COF); establishes cyberspace operations policy and strategy; ensures the integration of activities in support of cyber, information, and electromagnetic spectrum operations; and drives implementation of the DoW Cyber Strategy and Cyber Posture Review. The OPCA also synchronizes and directs issues related to COF posture and readiness, and advises senior leadership on relevant policy, programmatic, and process gaps inhibiting operational effectiveness across the DoW. Funds ensure fiscal, budgetary, and programmatic oversight of the Department's annual Cyberspace Operations budget, in compliance with PCA budget certification authority as directed in Section 329a of Title 10; and support increased oversight and advocacy for USCYBERCOM responsibilities in Section 167B of Title 10

for organizing, equipping, and training the COF, in addition to development and acquisition efforts pursuant to joint cyberspace operational capabilities.

Office of the Under Secretary of War for Research and Engineering (OUSW(R&E)): The OUSW(R&E) is the PSA and advisor to the SECWAR and DEPSECWAR for all matters relating to research and engineering, and other related matters. The OUSW(R&E) serves as the Department's Chief Technology Officer and is responsible for unifying defense research, development, and prototyping activities across the enterprise. The OUSW(R&E) establishes policies on, and oversees, all defense research and engineering, technology development, technology transition, prototyping, experimentation, and development testing activities and programs. The OUSW(R&E) responsibilities also include: establishing a Department-wide, mission-focused roadmap for each of the Critical Technology Areas (CTA); developing and implementing a National Defense Science and Technology (S&T) Strategy; leading the establishment and implementation of Department-wide protection methodologies that mitigate the risk of loss of critical technologies to determined adversaries; initiating critical prototypes within the OUSW(R&E) identified capability thrust priorities; developing policy and guidance for DoW Mission and Enterprise Architectures; establishing Open Architecture Standards, piloting alternate rapid acquisition approaches.

The funding supports the OUSW(R&E) Damage Assessment Management Office (DAMO) oversight and coordination mission. The OUSW(R&E) DAMO develops and provides policy oversight of cyber incident damage assessments conducted by the military department DAMO organizations as mandated by Defense Federal Acquisition Regulations Supplement (DFARS) clause 252.204-7012 (Safeguarding Covered Defense Information and Cyber Incident Reporting). The purpose of the assessments is to analyze the impact of compromised information on US military capability underpinned by technology. In addition, OUSW(R&E) conducts cyber incident damage assessments for Components lacking organic DAMO capability.

Strategic Capabilities Office (SCO): Established as a field activity in FY 2026 in the DoW Innovation Ecosystem led by the OUSW(R&E), the SCO mission is to quickly deliver game-changing capabilities to the warfighter to counter near-peer adversaries in all phases of competition and conflict through leveraging near-term technologies and/or the unconventional use of existing programs to field disruptive capabilities that create new strategic effects (through deterrence, power projection, cost imposition, surprise, and overmatch). The SCO develops, demonstrates, and transitions operationally impactful capabilities to increase the lethality of the joint force in contested environments. The SCO serves as the senior advisor to the SECWAR, DEPSECWAR, and the OUSW(R&E), augmenting efforts within the Department with respect to strategic capabilities development and providing advice related to the identification, analysis, and introduction of disruptive applications and new and unconventional uses of existing systems and near-term technologies, for both U.S. Government and commercial capabilities, to create operational strategic effects.

The funding supports SCO's cyber project managers, who lead development of SCO's cyber projects in support of USCYBERCOM priorities.

8. Program Increases $21,904

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 .....$21,904

1) Compensation and Benefits - Average Annual Rate (AAR) Repricing - OSW $7,006
The increase is due to a change in the AAR result of new civilian compensation rates combined with fluctuations in the composition of civilian pay types. Each year, these rates are developed based on detailed execution and cost factor analyses to forecast civilian workforce costs accurately.
(FY 2026 Baseline: $8,014 thousand; 57 FTEs; +0 FTEs)

2) Compensation and Benefits - Enhanced Performance Award - OSW $318
The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $8,014 thousand; 57 FTEs; +0 FTEs)

3) Compensation and Benefits – Management Headquarters OSW – DoW CIO $266
Increase of +1 FTE to support the Cybersecurity Information Systems Security Program with the focus to secure DoW infrastructure through the DoW Cyber Workforce Framework (DCWF).
(FY 2026 Baseline: $8,014 thousand; 57 FTEs; +1 FTEs)

4) Compensation and Benefits - Management Headquarters OSW - SCO $545
Increase of +2 FTEs due to the required support of ongoing efforts related to classified cyber projects.
(FY 2026 Baseline: $8,014 thousand; 57 FTEs; +2 FTEs)

5) Mission Support - Classified - OUSW(P) $3,000
Classified
(FY 2026 Baseline: $5,226 thousand; 0 FTEs; +0 FTEs)

6) Mission Support - Cyber Security Information Assurance - DoD CIO $10,767
Increase due to the expansion of operations for the cyber workforce program.
(FY 2026 Baseline: $99,679 thousand)

7) Mission Support - Operation - OUSW(P).....$2
The increase reflects funding to support interagency agreements in FY 2027.
(FY 2026 Baseline: $5,226 thousand; 0 FTEs; +0 FTEs)

9. Program Decreases .....$-64,441

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases .....$-25,470

1) Program Increase - Cyber Academic Engagement Office .....$-10,210

2) Program Increase - Cyber Scholarship Program .....$-10,210

3) Program Increase - Unified Data Library.....$-5,050

c) Program Decreases in FY 2027 .....$-38,971

1) Compensation and Benefits - Federal Employee Retirement System - DoW.....$-63
Reduce funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $8,014 thousand; 57 FTEs; +0 FTEs)

2) Efficiency – Contract Services.....$-15,702
The reduction in funding for contract services is undertaken in direct support of the President's executive order, which prioritizes cost efficiency, transparency, and service consolidation. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $113,285 thousand; 0 FTEs; +0 FTEs)

3) Mission Support - Operations - DoW CIO .....$-3,091
Decrease due to the realignment of mission funds from the Information Systems Security Program (ISSP) to labor.
(FY 2026 Baseline: $99,679 thousand; 0 FTEs; +0 FTEs)

4) Mission Support - Operations - DoW CIO .....$-20,115
Decrease due to the improvement of cost efficiencies, increased transparency, and consolidation of operations to optimize the workforce while advancing mission-critical DIB efforts.
(FY 2026 Baseline: $99,679 thousand; 0 FTEs; +0 FTEs)

FY 2027 Budget Request $81,163

IV. Performance Criteria and Evaluation Summary:

Department of War Chief Information Officer (DoW CIO):

Major Program Title: Defense Industrial Base (DIB) Cybersecurity Activities

Measure/Description	Actuals	Enacted	Request
Expand and refine activities to bolster cybersecurity protections in the DIB.	FY 2025	FY 2026	FY 2027
Metric #1: National Security Agency (NSA) to provide a quarterly report detailing tips to companies, sanitized reports shared, and campaigns identified.	1	1	1
Metric #2: DoW Cyber Crime Center (DC3) produces an annual, aggregated report that details all known exfiltration incidents.	1	1	1
Metric #3: Total number of cyber incident reports received IAW DFARS 252.204-7012. {DC3}	710	720	730
Metric #3a: Total number of Cyber Incident Notifications (CIN) issued. {DC3}	30	40	45
Metric #3b: Percentage of reporting notification actions completed within 3 business days after receiving a DIB cyber incident report. {DC3}	100%	100%	100%
Metric #4: Number of cyber tabletop exercises conducted with DIB companies. {DC3}	2	0	0
Metric #5: Total number of companies participating in the voluntary DIB CS Program. {NSA}	1,300	1,500	1,500
Metric #6: Number of participants in the protective domain name system. {NSA}	1,100	1,500	3,000
Metric #7: Number of participants in attack surface management. {NSA}	1,100	1,500	3,000
Metric #8: Number of participants in threat intelligence collaboration. {NSA}	1,300	1,500	3,000

Major Program Title: Cybersecurity

Measure/Description	Actuals	Enacted	Request
Improve the adoption of security practices and reduce exposure to vulnerabilities and threats to the operating environment by limiting access to authorized users only and implementing technologies and processes that reduce risk from malicious activity.	FY 2025	FY 2026	FY 2027
Metric #1: Move all internet-facing servers to approved demilitarized zones (DMZ) on NIPRNet.	99%	99%	Metrics no longer tracked
Metric #2: Upgrade entire inventory of Windows workstations to Windows 10 secure host baseline NIPRNet.	97%	Metrics no longer tracked	Metrics no longer tracked

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027

Fiscal Year 2027 Budget Estimates

Office of the Secretary of War - Psychological Operations

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating forces

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
OSW-PSYOP	249,710	6,241	-48,315	207,636	4,361	113,612	325,609

I. Description of Operations Financed:
Psychological Operations (PSYOPs), previously identified as Military Information Support Operations (MISO), funds the operational employment of PSYOP to change the behavior of foreign target audiences to meet Department of War (DoW) objectives. These funds are distributed to, and executed by, the Combatant Commands (CCMD). The interconnectedness of global communication systems and the ability of our adversaries to use information trans-regionally requires the DoW to compete in the information domain at a strategic level.

The FY 2027 request of $325,609 thousand reflects the Department's approach to PSYOP budgeting by utilizing a central fund within the Office of the Secretary of War (OSW). The Office of the Assistant Secretary of War for Special Operations and Low Intensity Conflict (OASW(SO/LIC)) is responsible for PSYOP program management and budget formulation. A single PSYOP account increases transparency and enhances OASW(SO/LIC) oversight of PSYOP programming; FY 2027 represents the fifth year of the Department's utilization of a consolidated PSYOP budget to fund PSYOP operations and the fourth year the Department used a PSYOP Resource Request (PRR) process managed by OASW(SO/LIC) to prioritize and allocate resources amongst CCMDs.

The PSYOP program continues to use one program project code (Execution) as approved in FY 2024 which allows for better management and oversight of the program, better execution definitions, and easier congressional reporting.

These funds resource the operational employment of PSYOP to change the behavior of foreign target audiences and encompasses PSYOP planning, execution, assessment, and support. This includes the planning, analysis, production, translation, distribution, and dissemination costs associated with providing information to foreign audiences, through a variety of communication mechanisms (audio, visual, and audio-visual), designed to affect the foreign audiences' perceptions, reasoning, beliefs, motivations, decisions, and ultimately behavior. These funds are distributed to all Combatant Commands for requirements associated with PSYOP and utilized in accordance with DoW policies for PSYOP fund expenditures. These funds also include necessary travel expenses of civilian full-time equivalents (FTE) and contractor FTEs (CFTE) conducting PSYOP.

The FY 2027 request for Psychological Operations (PSYOPs) (previously Military Information Support Operations (MISO)) includes $325,609 thousand of discretionary and $0 thousand of mandatory for a total of $325,609 thousand.

The FY 2026 spend plan amount for Operations & Maintenance, Defense-Wide for OUSW(P) includes $207,636 thousand of discretionary and $18,000 thousand of mandatory (reconciliation) for a total of $225,636 thousand. Funding provided in Public Law 119-21, the One Big Beautiful Bill Act, and supported Section 20011 Border Support.

The FY 2025 spend plan amount for Operations & Maintenance, Defense-Wide for OUSW(P) includes $250,142 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $250,142 thousand.

8. Program Increases $114,580

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $114,580

1) Mission Support - Homeland Border Security Initiatives $19,000
Increase due to the Department's decision to establish, operationalize, and proactively deter threats to National Defense Areas in accordance with Executive Order 14167, "Clarifying the Military's Role in

Protecting the Territorial Integrity of the United States".
(FY 2026 Baseline: $207,636 thousand; 0 FTEs; +0 FTEs)

2) Mission Support - Operations $18,170
Increase enables Combatant Commands to continue the operational employment of PSYOP to change the behavior of foreign target audiences to meet DoW objectives. Most notably, increase enhances USSOUTHCOM's mission to accomplish the President's Homeland Defense and operational priorities in the Western Hemisphere. Also, increase enhances USSOCOM's Joint Military Information Support Operations Web Operations Center, that provides technology, oversight, and integration of the Joint Force's internet-based PSYOP capability.
(FY 2026 Baseline: $207,636 thousand; 0 FTEs; +0 FTEs)

3) Mission Support - USAFRICOM Critical Priorities $30,410
Increase due to the Department's decision to fund critical priorities in AFRICOM to advance the Department's top priorities. These critical priorities include the personnel, infrastructure, and capabilities required to plan, execute, and assess military operations in advancement of the Department's and Administration's top priorities. Further details are classified.
(FY 2026 Baseline: $207,636 thousand; 0 FTEs; +0 FTEs)

4) Mission Support - USEUCOM Critical Priorities $19,000
Increase due to the Department's decision to fund critical priorities in EUCOM to advance the Department's top priorities. These critical priorities include the personnel, infrastructure, and capabilities required to plan, execute, and assess military operations in advancement of the Department's and Administration's top priorities. Further details are classified.
(FY 2026 Baseline: $207,636 thousand; 0 FTEs; +0 FTEs)

5) Mission Support - USINDOPACOM Critical Priorities $28,000
Increase due to the Department's decision to fund critical priorities in INDOPACOM to advance the Department's top priorities. These critical priorities include the personnel, infrastructure, and capabilities required to plan, execute, and assess military operations in advancement of the Department's and Administration's top priorities. Further details are classified.
(FY 2026 Baseline: $207,636 thousand; 0 FTEs; +0 FTEs)

9. Program Decreases ..... $-967

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-967

1) Efficiency - Contract Services ..... $-967
Reduces contracts for Advisory and Assistance Services to promote efficiencies and advance the policies of the Administration in alignment with Executive Order 14222, “Implementing the President’s Department of Government Efficiency Cost Efficiency Initiative.”
(FY 2026 Baseline: $207,636 thousand; 0 FTEs; +0 FTEs)

FY 2027 Budget Request $325,610

IV. Performance Criteria and Evaluation Summary:

Office of the Under Secretary of War for Policy (OUSW(P)):

The OUSW(P) serves as the Principal Staff Assistant and advisor to the Secretary of War and Deputy Secretary of War for PSYOP. The OUSW(P) is responsible for the oversight of policy, strategy, planning, resource management, operational considerations, personnel, and technology development for PSYOP across the Department.

As the Department evolves to face current and anticipated malign adversary influence activities and adversary propaganda campaigns, agile policies and adequate resourcing are required to conduct PSYOPs. The interconnectedness of global communication systems and the ability of our adversaries to use information trans-regionally requires the DoW to compete in the information environment at a strategic level. In FY 2022, the Department was directed to centralize the operational PSYOP funds under OUSW(P). The PSYOP funds are for the operational employment of PSYOP to change the behavior of foreign target audiences. These funds are distributed to, and executed by, the CCMDs.

The DoW's Strategic Objectives for PSYOP:

1. Defend the Homeland;
2. Deter China in the Indo-Pacific;
3. Increase burden-sharing with allies and partners to address all threats.

Major Program Title: PSYOP Operational Funds

Measure/ Description	Actuals (FY 2025)	Enacted* (FY 2026)	Request (FY 2027)
Metric #1: PSYOP Resource Request Submissions (Percent funding to top two INDSG or follow-on NDS priorities (Target is 85%))	63%	85%	85%
Metric #2: PSYOP Annual review. This activity measures the previous year's PSYOP series. (Percent validated as PSYOP activities and assessment criteria w/measures of effectiveness that meet DoW priorities (Target is 90%))	93%	90%	90%
Metric #3: Percent of PSYOP activities integrated with other CCMD activities (Target is 70%)	65%	70%	70%

Metric #4: PSYOP activities that meet DoW's FY26 PSYOP Regional Guidance policy objectives (Target is 100%)	52%	100%	100%

I. Description of Operations Financed:
The United States Special Operations Command (USSOCOM) develops and employs the world's finest Special Operations Forces (SOF) to conduct global special operations and activities as part of the Joint Force, in concert with the U.S. Government Interagency, Allies, and Partners, to support persistent, networked, and distributed combatant command operations and campaigns against state and non-state actors to protect and advance U.S. policies and objectives. In support of this mission, the USSOCOM serves as the Coordinating Authority for Countering Violent Extremist Organizations (C-VEO), Countering Weapons of Mass Destruction (CWMD), and internet-based Psychological Operations (PSYOP) formerly Military Information Support Operations (MISO). The budget request reflects the Secretary of War focus on restoring the warrior ethos, rebuilding military capabilities, and enhancing national deterrence while simultaneously balancing readiness to create a strategic, asymmetric advantage for the nation by strengthening our force and their families, bolstering integrated deterrence capabilities, and ensuring our enduring advantage through innovation and modernization.

- **Budget Activity 01 (BA-01)/Operating Forces** - The units and/or functions associated with these Sub-Activity Groups (SAG) are:

  - 1PL6 - Combat Development Activities - Includes Joint and Component manpower authorizations, SOF-peculiar equipment, necessary facilities, and the associated costs specifically identified and attributable to the development of combat doctrine, organizational concepts, materiel requirements, and other developmental activities related to SOF. Also includes activities to support experimentation, tests, and project evaluations necessary to develop and/or validate new doctrine and organizations for special operations.

  - 1PLS - Cyberspace Activities - Includes cyber resources associated with computer network defense and information assurance, service contracts specifically intended to secure, defend, and preserve data, networks, net-centric capabilities, and other designated systems by ensuring security controls and measures are in place, and taking internal defense actions on the SOF Information Environment (SIE). This includes access to system controls, monitoring, administration, and integration of cybersecurity into all aspects of engineering and acquisition of cyberspace capabilities. In addition, these activities include implementation, evaluation, and disposal of information technology and services, as well as information resources management, and the management, storage, transmission, and display of data and information.

  - 1PLU - Intelligence - Includes all USSOCOM Headquarters (HQs) and/or Component funding to sustain USSOCOM equipment, systems, logistics, and maintenance required to perform/sustain USSOCOM Military Intelligence Programs (MIP). These programs support the Secretary of War's intelligence, counterintelligence, and related intelligence responsibilities. These programs, projects, and activities provide

capabilities to meet SOF warfighter operational and tactical requirements more effectively. These include intelligence, surveillance, and reconnaissance (ISR) systems and sustainment; processing, exploitation, and dissemination (PED) capabilities; tactical intelligence collection and analysis devices/systems/databases; and classified programs and activities.

- 1PL7 - Maintenance - Includes maintenance (to include installation of modification and conversion kits), contractor logistics support (CLS), and field service representatives (FSR) of weapons support systems and commodity groups associated with SOF activities. This also includes USSOCOM funds for reimbursement of Service industrial funds for depot maintenance of SOF-unique aircraft, maritime craft, and equipment. Includes reimbursement for maintenance activities at industrial funded naval shipyards and costs associated with non-industrial funded maintenance activities at Navy repair facilities.

- 1PLM - Management/Operational Headquarters - Includes manpower authorizations, SOF-peculiar and support equipment, necessary facilities and associated costs specifically identified and attributable to the U.S. Army Special Operations Command (USASOC), Air Force Special Operations Command (AFSOC), Naval Special Warfare Command (NSWC), and Marine Forces Special Operations Command (MARSOC) Component Command HQs, as well as the USSOCOM HQs and its management support activities. Also includes costs associated with the expenditure of funds in support of officially sanctioned activities used to maintain the standing and prestige of the United States by extending official courtesies to guests who promote the goals of the Commander, USSOCOM and the DoW.

- 1PLV - Operational Support - Includes SOF-peculiar support resources for communications, military construction (MILCON) collateral equipment, facility restoration and modernization projects, unit sustainment support, and acquisition program management. Funding provides civilian manpower authorizations, general contractor support, equipment sustainment, travel, and associated management costs. Communication capabilities support SOF Information Technology (IT) enterprise-wide services, SOF worldwide command and control systems, deployable communications, airtime, circuits, and bandwidth. Facility projects include SOF enterprise-wide Facility Sustainment, Restoration and Modernization (FSRM) activities and communications infrastructure. Acquisition program management includes sustainment, fielding, engineering, logistical, and operational test and evaluation support for SOF acquisition programs.

- 1PLR - Theater Forces - Provides for the U.S. Army John F. Kennedy Special Warfare Center and School (USAJFKSWCS), the U.S. Army Special Warfare Center Medical Training Facility, the Naval Special Warfare Center (NSWCEN), the Marine Special Operations School (MSOS), the U.S. Air Force Special Operations Air Warfare Center (SOAWC), and the SOF Language Office. The schools provide recruitment and training in both basic and advanced special operations skills and operations and educate American and Allied personnel in geopolitical and military aspects of joint special operations. Funding also provides SOF language training which produces language proficient personnel.

Supports Naval Special Warfare Groups, Special Boat Teams, Sea, Air, and Land (SEAL) Delivery Vehicle Teams, and other maritime operations. Includes Active and Reserve Navy manpower authorizations, SOF-Peculiar and support equipment, necessary facilities, and associated costs specifically identified to combatant and support craft assigned to NSWC.

Includes manpower authorizations, SOF-peculiar and support equipment, necessary SOF-unique facilities and other operational costs specifically associated with: SOF Active Army Rangers; Active and National Guard Army Special Forces activities; Active Army PSYOP units; Active and Reserve Army civil affairs units; Naval Special Warfare groups, units, teams, and detachments; Marine Corps special operations units and teams; and Active and Reserve SOF units and detachments, 24th Special Operations Wing (SOW), Air Force 720th and 724th Special Tactics Groups (STG), Special Tactics Squadrons (STS), Combat Control Squadrons, and SOF pararescue forces. Also included in this SAG is support for the Theater Special Operations Commands (TSOC). Humanitarian/Civic Assistance (H/CA) activities are carried out in conjunction with authorized military operations, which are subject to approval by the Secretary of State and Secretary of War. These activities promote security and foreign policy interests of the U.S. and the host nation and allow SOF to demonstrate commitment to priority partners supporting contingencies. The H/CA activities are a function of Title 10, United States Code, Section 401.

Provides for the conduct of, or participation in, strategic mobility, Commander-In-Chief-directed, and Joint Chiefs of Staff exercises participation by SOF and force related training through Joint Combined Exchange Training (JCET) events sponsored by the Commander, USSOCOM in support of regional Theater Commanders and the military Services. Includes USSOCOM HQs and/or Component manpower authorizations, SOF-peculiar and support equipment, necessary facilities, and the associated costs specifically identified and attributable to the conduct of SOF-related training.

Costs specifically identified and attributable to SOF active tactical aviation operational units, organizations, and SOWs and squadrons are also included in this SAG. Supports 5 active SOWs to include the 1st SOW, Hurlburt Field, FL; 492nd SOW Hurlburt Field, FL; 352nd SOW, RAF Mildenhall, UK; 27th SOW, Cannon AFB, NM; 58th SOW, Kirtland AFB, NM, and 1 Special Operations Group (SOG), the 353rd SOG, Kadena AB, Japan and their associated squadrons. Costs are also included for: the 919th Special Operations Reserve Wing located at Duke Field, FL; the 193rd Special Operations Air National Guard Wing, Harrisburg, PA; 137th Air National Guard Wing, Oklahoma City, OK; U.S. Army Special Operations Aviation Command (USASOAC); 160th Special Operations Aviation Regiment (SOAR) at Ft Campbell, KY, Hunter Army Airfield, GA, and Ft Lewis, WA. Funding supports flying hours, SOF-peculiar and support equipment, initial qualification, and recurring training of aircrews in SOF aircraft operations and tactics.

- **Budget Activity 03 (BA-03)/Training and Recruiting** - The units and/or functions associated with this SAG are:

A. 3EV8 - Professional Development Education - Includes the Joint Special Operations University (JSOU) at MacDill Air Force Base, FL, the U.S. Air Force Special Operations School (USAFSOS) at Hurlburt Field, FL, and the Naval Special Warfare Leadership Education and Development (NLEAD) Command at San Diego, CA. The JSOU is an institution of higher learning consisting of teaching and research facilities focused on producing Joint Special Operations strategic and operational analysis and education. As a Joint Special Operations Center of Excellence, JSOU is dedicated to building and maintaining a consortium of Joint special operations specialized learning activities focused on professional development of SOF leaders as well as non-SOF decision makers at the intermediate and senior levels. The USAFSOS offers education in irregular warfare, regional studies and cultural awareness, SOF professional development to educate Air

Commandos, the special operations community, services, and other U.S. Government agencies. The NLEAD Command provides SOF education and leadership growth for platoon leaders, lead petty officers, career counselors, and command leaders.

The FY 2027 request for USSOCOM O&M includes $10,891,050 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $10,891,050 thousand.

The FY 2026 spend plan amount for USSOCOM O&M includes $9,670,540 thousand of discretionary and $1,078,680 thousand of mandatory (reconciliation) for a total of $10,749,220 thousand. The mandatory funds enhance Special Operations Command equipment and readiness and the Joint Special Operations Command.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	2,303	2,150	2,251
Army	2,553	2,516	2,558
Marine Corps	151	135	145
Navy	1,178	1,145	1,205
Space Force	0	0	0
Total	**6,185**	**5,946**	**6,159**

Fiscal Year 2027 Budget Estimates

Combat Development Activities

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Combat Development Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Combat Development Activities	2,124,494	62,361	-70,518	2,116,337	13,715	459,331	2,589,383

I. Description of Operations Financed:
Combat Development Activities - Includes Joint and Component manpower authorizations, SOF-peculiar equipment, necessary facilities, and the associated costs specifically identified and attributable to the development of combat doctrine, organizational concepts, materiel requirements, and other developmental activities related to SOF. Also includes activities to support experimentation, tests, and project evaluations necessary to develop and/or validate new doctrine and organizations for special operations.

The FY 2027 request for 1PL6 – Combat Development Activities includes $2,589,383 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $2,589,383 thousand.

The FY 2026 spend plan amount for 1PL6 - Combat Development Activities includes $2,116,337 thousand of discretionary and $362,552 thousand of mandatory (reconciliation) for a total of $2,478,889 thousand. The mandatory funds enhance Special Operations Command equipment and readiness and the Joint Special Operations Command.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	106	114	114
Army	645	671	654
Marine Corps	0	0	0
Navy	353	385	385
Space Force	0	0	0
Total	**1,104**	**1,170**	**1,153**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	1,188	1,195	1,178
Army	1,630	2,198	2,169
Marine Corps	72	72	81
Navy	1,636	1,612	1,596
Space Force	1	1	2
Total	**4,527**	**5,078**	**5,026**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**421**	**368**	**432**

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

8. Program Increases $509,327

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $509,327

1) Civilian Pay Adjustments $1,847

The total increase for civilian pay is +$1,847 thousand and +1 civilian FTE.

+$869 thousand increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

+$832 thousand reflects the funding required to fully resource the civilian FTEs in this SAG based on FY 2026 actual rates to date and planned FY 2027 civilian pay rates.

+$146 thousand and +1 civilian FTE realignment from the 1PLTR-Theater Forces SAG.This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and Office of the Secretary of War (OSW) databases to properly align authorizations with the correct program element code (PEC).
(FY 2026 Baseline: $179,418 thousand; +1 FTEs)

2) Classified Submission $399,669
See Classified budget justification materials.
(FY 2026 Baseline: $1,488,069 thousand)

3) Other Classified $107,811
These programs are reported in accordance with Title 10, U.S. Code (U.S.C.), Section 119(a)(1) in the Special Access Program (SAP) Congressional Budget Justification Book (CBJB) to Congress.
(FY 2026 Baseline: $448,850 thousand)

9. Program Decreases ..... $-49,996

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases ..... $-25,000

1) Program increase - UAS tactics development and integration ..... $-25,000

c) Program Decreases in FY 2027 ..... $-24,996

1) Civilian Pay Adjustments ..... $-3,356
The total decrease for civilian pay is -$3,356 thousand and -18 civilian FTEs.

-$2,773 thousand and -18 civilian FTEs. Decrease reflects the FY 2027 reduction of FTEs made as part of strategic tradeoff decisions to further invest and align resources to sustain and strengthen deterrence, modernize capabilities, and build enduring advantages.

-$583 thousand reduces funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $179,418 thousand; -18 FTEs)

2) Classified Submission ..... $-10,991

See Classified budget justification materials.
(FY 2026 Baseline: $1,488,069 thousand)

3) Other Classified.....$-10,649
These programs are reported in accordance with Title 10, U.S.C., Section 119(a)(1) in the SAP CBJB to Congress.
(FY 2026 Baseline: $448,850 thousand)

FY 2027 Budget Request.....$2,589,383

IV. Performance Criteria and Evaluation Summary:

See Classified budget justification materials.

Contractor FTEs (Total)	**421**	**368**	**432**	**-53**	**64**

Personnel Summary Explanations:

USSOCOM military personnel are reported in Military Service Estimates. Military end strength numbers reflect authorized personnel.

Military End Strength net decrease of -52 personnel (-5 Officers and -47 Enlisted) due to:
-Continuation of strategic tradeoff decisions and technical corrections to align USSOCOM with OSW manpower databases.

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

Civilian net decrease of -17 budgeted FTEs due to:
+1 FTE reflects a realignment.
-18 FTEs reflects USSOCOM strategic tradeoff priorities.

Contractor net increase of +64 FTEs due to:
See Classified budget justification materials.

Fiscal Year 2027 Budget Estimates

Cyberspace Activities

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Cyberspace Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Cyberspace Activities	52,343	1,309	21,821	75,473	1,588	1,451	78,512

I. Description of Operations Financed:
Cyberspace Activities - Includes cyber resources associated with computer network defense and information assurance, service contracts specifically intended to secure, defend, and preserve data, networks, net-centric capabilities, and other designated systems by ensuring security controls and measures are in place, and taking internal defense actions on the SOF Information Environment (SIE). This includes access to system controls, monitoring, administration, and integration of cybersecurity into all aspects of engineering and acquisition of cyberspace capabilities. In addition, these activities include implementation, evaluation, and disposal of information technology and services, as well as information resources management, and the management, storage, transmission, and display of data and information.

The FY 2027 request for 1PLS - Cyberspace Activities includes $78,512 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $78,512 thousand.

The FY 2026 spend plan amount for 1PLS - Cyberspace Activities includes $75,473 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $75,473 thousand.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	0	0	0
Army	0	0	0
Marine Corps	0	0	0
Navy	0	0	0
Space Force	0	0	0

FY 2026 Normalized Current Estimate $75,473

6. Price Change $1,588

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $1,451

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $1,451

1) Cyber Defense Tools $58
See Classified budget justification materials.
(FY 2026 Baseline: $30,855 thousand)

2) Cyber Information Technology $328
+$328 thousand and +1 contractor FTE funds a cyber professional to operate penetration testing tools designed to help security teams assess and improve the USSOCOM security posture.
(FY 2026 Baseline: $11,298 thousand)

3) Information Assurance (IA) Tools $388
IA tools support Zero Trust Architecture (ZTA) efforts and continued execution of USSOCOM's Data Strategy Implementation Plan (DSIP), which is a comprehensive roadmap that builds on the foundation and structure required for USSOCOM to comply with 5 DoW data decrees directed in May 2021, as well as to transform USSOCOM into a data-centric command. The DSIP is formed around certain aspects of Zero Trust (ZT) pertaining to cybersecurity and requires identity, credential, and access management attribute-based access control, expanded system monitoring, comply to connect, and automation and orchestration.

Increase funds an additional 500GB of data usage associated with security information and event management activities in support of USSOCOM ZT requirements.
(FY 2026 Baseline: $9,550 thousand)

4) Insider Threat $125
Insider Threat capabilities allow USSOCOM to identify indicators with trained technicians operating and maintaining the In-Place Monitoring System (IPMS), a sensor array within USSOCOM facilities to detect electronic threats. Trained technicians operate and maintain user activity by monitoring proprietary tools that are integrated with advanced data analytics tools across multiple domains to rapidly detect, assess/triage and mitigate potential threats from malicious insiders seeking to do harm to the security of the United States government, its personnel, facilities, and/or information.

Increase funds IPMS sensor sustainment and lifecycle replacement of end-of-life sensors based on projected execution.
(FY 2026 Baseline: $4,294 thousand)

5) MARSOC Realignment $220
+$220 thousand reflects the realignment of MARSOC operations funding from the 1PLM-Management/Operational Headquarters SAG to where it is more appropriately executed.
(FY 2026 Baseline: $562 thousand)

6) Zero Trust Architecture (ZTA) $332
Increase funds the integration services associated with User Activity Monitoring, User Entity and Behavior Analytics, and User Activity Monitoring tools based on projected execution across multiple network enclaves

such as SOFNET-U and SOFNET-S.
(FY 2026 Baseline: $18,687 thousand)

9. Program Decreases $0

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $0

FY 2027 Budget Request $78,512

IV. Performance Criteria and Evaluation Summary:

Fiscal Year 2027 Budget Estimates

Intelligence

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Intelligence

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Intelligence	1,277,430	30,427	-135,231	1,172,626	20,061	-61,838	1,130,849

I. Description of Operations Financed:
Intelligence - Includes all USSOCOM HQs and/or Component funding to sustain USSOCOM equipment, systems, logistics, and maintenance required to perform/sustain USSOCOM's MIP. These programs support the Secretary of War's intelligence, counterintelligence, and related intelligence responsibilities. The USSOCOM MIP programs, projects, and activities provide capabilities to meet SOF operational and tactical requirements more effectively. These include ISR systems and sustainment; PED capabilities; tactical intelligence collection and analysis devices/systems/databases; and classified programs and activities.

The FY 2027 request for 1PLU- Intelligence includes $1,130,849 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $1,130,849 thousand.

The FY 2026 spend plan amount for 1PLU- Intelligence includes $1,172,626 thousand of discretionary and $111,200 thousand of mandatory (reconciliation) for a total of $1,283,826 thousand. The mandatory funds enhance Special Operations Command equipment and readiness.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	165	170	167
Army	452	471	459
Marine Corps	9	10	10
Navy	35	43	43
Space Force	0	0	0
Total	**661**	**694**	**679**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	127	139	141
Army	34	719	722
Marine Corps	41	41	32
Navy	49	49	50
Space Force	0	0	0
Total	**251**	**948**	**945**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**1,113**	**1,326**	**1,341**

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

6. Price Change $20,061

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $125,924

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $125,924

1) Civilian Pay Adjustments $595
The total increase for civilian pay is +$595 thousand.

+$595 thousand increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $122,820 thousand)

2) Counter-small Unmanned Aerial Systems (C-sUAS) $1,406
+$1,406 thousand supports increased Publicly Available Information collection to illuminate adversary supply chains in alignment with National Defense Strategy (NDS) priorities.
(FY 2026 Baseline: $48,365 thousand)

3) Distributed Common Ground/Surface Systems (DCGS) $5,968
The DCGS-SOF is a part of a family of systems providing Geospatial Intelligence ISR PED, and analytical capabilities at the Joint Task Force level and below through a combination of reach-back, forward support, and collaboration.

+$3,542 thousand. See Classified budget justification materials.

+$2,426 thousand increase to Undersea Tactical Maritime PED capability that collects subsea data from edge platforms during subsea and seabed missions.
(FY 2026 Baseline: $57,003 thousand)

4) Hostile Forces Tagging, Tracking and Locating (HF-TTL) $844
The HF-TTL program provides joint forces with enhanced situational awareness and targeting information and intelligence from an independent system of emplaced devices. The HF-TTL devices must be configurable in the field with the necessary technology to support the mission. Operational requirements for HF-TTL vary by SOF mission. Mission sets are comprised of different classes of tabs or sensors and their associated systems. See Classified budget justification materials.
(FY 2026 Baseline: $20,935 thousand)

5) Integrated Survey Program (ISP) $39
The ISP collects and produces detailed tactical planning data to support military operations against terrorist groups or individuals targeting U.S. facilities, personnel and interests. Increase supports development, integration, and sustainment of geospatial survey products, software, and applications used in support of detailed tactical planning.
(FY 2026 Baseline: $2,097 thousand)

6) Joint Threat Warning System (JTWS) $3,604
The JTWS System of Systems enables SOF cryptologic operators to collect, process, locate, and exploit threat communication signals of interest in order to provide timely, relevant, and responsive intelligence, enhanced target acquisition, and threat warning information directly to SOF commanders. See Classified budget justification materials.
(FY 2026 Baseline: $45,797 thousand)

7) MQ-1 Unmanned Aircraft System $111
The Medium Altitude Long Endurance Tactical MQ-1C UAS program provides SOF-unique modifications and capabilities to the common service equipment MQ-1C Gray Eagle systems received from the Army. Increase fully funds the services contract.
(FY 2026 Baseline: $3,952 thousand)

8) Other Classified $7,468
+$7,468 thousand and +2 contractor FTEs. These programs are reported in accordance with Title 10, U.S.C., Section 119(a)(1) in the SAP CBJB to Congress.
(FY 2026 Baseline: $128,460 thousand)

9) Sensitive Site Exploitation (SSE) $3,843
SSE Identity Intelligence (i2) supports contract personnel, infrastructure, software upgrades, computer equipment replacement and sustainment costs associated with providing web, mobile applications, database design, SharePoint development, and 24/7 on-call services to the SOCOM i2EX mission, required to maintain and support SOF Exploitation on various unclassified and classified portals plus Joint Worldwide Intelligence Communications System (JWICS) support essential to identity superiority and SSE PED capabilities to deployed global SOF locations.

+$2,653 thousand reflects the realignment of the Joint Exploitation Center (JETC) program funding from the 1PLR-Theater Forces SAG to the 1PLU-Intelligence SAG where it is more appropriately executed.

+$1,190 thousand and +4 contractor FTEs for SSE i2 reflects funds for SOFNET-S Net development and production cloud storage/infrastructure, and for increased cost of lease of the off-base facility and additional square footage.
(FY 2026 Baseline: $46,959 thousand)

10) Signal Intelligence Processing, Exploitation, and Dissemination (SIGINT PED) $305
SOF SIGINT PED is a family of products and services providing ISR, analytical, and exploitation capabilities in both garrison and deployed environments and supports all of SOF by providing the Components and Theater Special Operations Commands (TSOC) with a capability that interconnects warfighters, sensors,

and analytic tools to find, fix, finish, exploit, analyze, and disseminate high value targets as well as information sharing across the USSOCOM enterprise and DoW.

+$305 thousand supports costs for life cycle sustainment activities, Capital Equipment Replacement Program (CERP), combat service support area (CSSA) Phase III Fielding Support, Field Service Representatives, and Cybersecurity/Risk Management Framework support for garrison and deployed systems.
(FY 2026 Baseline: $29,978 thousand)

11) SOF Organic ISR.....$8,542
SOF Organic ISR provides commanders with operational flexibility to collect video, audio, and radio frequency signals of interest through crewed and uncrewed platforms. The crewed platform includes U-28A.Uncrewed platforms include Long Endurance Aircraft (LEA), Multi-Mission Tactical Uncrewed Aerial Systems, and Small Unmanned Systems (SUMS).The multiple variants of airborne ISR provide operational leadership with a menu of options to address mission criteria such as target location, elevation, transit time to and from, full motion video, and threat signal detection capabilities.

+$5,292 thousand supports the addition of small Uncrewed Ground Systems (sUGS) capability sets and associated payloads and procurement of various small Uncrewed Aerial Systems (sUAS) supporting SOF emergent equipment requirements.

+$2,550 thousand funds SUMS accelerated procurement of sUAS across multiple sizes, vendors, and capability sets. Expands operational flexibility, enhances mission responsiveness, and ensures rapid integration of emerging technologies to meet evolving threats.

+$700 thousand equips SOF operators with a diverse range of low-cost, American made sUAS developed by US engineers and Artificial intelligence experts.
(FY 2026 Baseline: $299,510 thousand)

12) Special Operations Forces Intelligence Support (SOFIS).....$90,100
The SOFIS program includes SOF-peculiar intelligence support to USSOCOM HQs, Components, and TSOCs that lie outside the scope of the Defense Intelligence Agency MIP intelligence support to Combatant Command program. SOFIS includes 8 distinct program areas: USSOCOM HQs Intelligence Directorate (J2) Operations, OSINT/PAI, Pattern Analysis Support (PAS), TSOC Intelligence Support, DICE funding authority, JSOC Intelligence Support, Digital Intelligence, Surveillance, and Reconnaissance (D-ISR), and AFSOC Intelligence Support.

+$21,423 thousand and +4 contractor FTEs for JSOC Intelligence Support. See Classified budget justification materials.

+$16,768 thousand reflects the realignment of Digital Intelligence, Surveillance, and Reconnaissance D-ISR funding from the Distributed Common Ground/Surface System (DCGS) program line in this SAG to the D-ISR program line in this SAG where it is more appropriately executed, there is no increase in program requirements.

+$12,000 thousand maintains and operates Special Operations Command Central Digital-ISR architecture and data streams that feed Command decision support tools and infrastructure that ensure system resiliency and future-readiness.

+$11,919 thousand reflects the realignment of USASOC PED program funding from the 1PLR-Theater Forces SAG to the 1PLU-Intelligence SAG where it is more appropriately executed.

+$10,990 thousand increase resources expansion of D-ISR capabilities to SIPR and ability to meet TSOC SOF specific data requirements.

+$7,000 thousand provides PAS geospatially based predictive analysis support to the Headquarters, components, and TSOCs for operational mission-planning requirements by combining analytical expertise in predictive geospatial analytics, All-Source analysis, and Socio-Cultural Analysis. Addresses the heightened operational demand by enhancing core capabilities to bolster the Department's joint combat force's warrior lethality in fusing multi-sourced empirical data into predictive, geospatially based characterizations of interest areas supporting SOF mission sets, expanding global presence and power projection to defend the Homeland and deter external threats.

+$4,613 thousand reflects the realignment of D-ISR funding from the Special Operations Forces Digital Ecosystems (SOF DE) program line in this SAG to the D-ISR program line in this SAG where it is more appropriately executed; there is no increase in program requirements.

+$2,813 thousand and +8 contractor FTEs funds continued global SOF Enterprise support and modernization through Artificial Intelligence/Machine Learning (AI/ML) injections in product development and request for information (RFI) management for CHASE-G.

+$1,596 thousand and +8 contractor FTEs reflect the realignment of operations funding for the MARSOC Intelligence Analysis Cell from the 1PLM-Management/Operational Headquarters SAG to the 1PLU-Intelligence SAG where it is more appropriately executed.

+$700 thousand reflects the realignment of USASOC's Special Warfare SIGINT Course at the John F. Kennedy Special Warfare Center and School from the 1PLR-Theater Forces SAG to the 1PLU-Intelligence SAG where it is more appropriately executed.

+$138 thousand supports PAS enterprise capability for advanced analytics and modeling for SOF specific global challenges.

+$122 thousand for Defense Intelligence for Counter-Intelligence Expense (DICE). See Classified budget justification materials.

+$18 thousand supports technical surveillance countermeasures (TSCM) activities to detect, deter, and neutralize foreign intelligence entities (FIE) technical intelligence operations directed against SOF core activities and operations globally.
(FY 2026 Baseline: $268,351 thousand)

13) Special Operations Forces Intelligence Training (SOFIT) $135
+$135 thousand funds lease and episodic event training.
(FY 2026 Baseline: $5,271 thousand)

14) Tactical Local Area Network (TACLAN) $19
The Tactical Local Area Network provides a tactical Command, Control, Communications, Computers and ISR architecture directly supporting SOF operational commanders and forward deployed force global mission. Increase supports life cycle sustainment of TACLAN suites.
(FY 2026 Baseline: $963 thousand)

15) USSOCOM Research, Analysis, and Threat Evaluation System (SOCRATES) $717
The SOCRATES is the SOF extension of the JWICS used to develop, acquire and support garrison automated intelligence system requirements for SOF organizations worldwide. SOCRATES provides capabilities to exercise command and control, planning, collection, collaboration, data processing, geospatial data processing, video mapping, a wide range of automated intelligence data analysis, intelligence dissemination, imagery tools, and applications to include secondary imagery dissemination as well as news and message traffic.

Increase supports information technology software licensing costs associated with establishment of NAVSPECWARCOM Seal Delivery Vehicle Team 3 (SDVT-3).
(FY 2026 Baseline: $33,201 thousand)

16) USSOCOM Support and Technical Enhancement (SSTE) $2,228
+$2,228 thousand and +6 contractor FTEs for Special Operations Forces, Planning, Rehearsal, and Execution Preparation (SOFPREP) increases support to existing specialized CTR FTE costs, and consequential hardware/software costs required to meet increased requirements for mission rehearsal and to support experimentation.
(FY 2026 Baseline: $21,333 thousand)

9. Program Decreases ..... $-187,762

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-187,762

1) Civilian Pay Adjustments ..... $-5,938
The total decrease for civilian pay is -$5,938 thousand and -15 civilian FTEs.

-$3,040 thousand reflects the decrease of funding required to resource the civilian FTEs in this SAG based on FY 2026 actual rates to date and planned FY 2027 civilian pay rates.

-$1,914 and -11 civilian FTEs reflects the FY 2027 reduction of FTEs made as part of strategic tradeoff decisions to further invest and align resources to sustain and strengthen deterrence, modernize capabilities, and build enduring advantages.

-$585 thousand and -4 civilian FTEs. Decrease reflects a realignment from the 1PLU-Intelligence SAG to the 1PLV-Operational Support SAG. This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and OSW databases to properly align authorizations with the correct PEC.

-$399 thousand reduces funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $122,820 thousand; -15 FTEs)

2) Distributed Common Ground/Surface System (DCGS) ..... $-16,768

-$16,768 thousand reflects the realignment of D-ISR funding from the DCGS program line in this SAG to the SOFIS D-ISR program line in this SAG where it is more appropriately executed; there is no decrease in program requirements.
(FY 2026 Baseline: $57,003 thousand)

3) Other Classified.....$-2,183
These programs are reported in accordance with Title 10, U.S.C., Section 119(a)(1) in the SAP CBJB to Congress.
(FY 2026 Baseline: $128,460 thousand)

4) Sensitive Site Exploitation (SSE) .....$-1,806
The SSE program provides biometric devices and a scientific analysis capability to positively identify persons of interest and exploit documents, electronic data, and materials on a sensitive site.

-$862 thousand reduces PM i2E maintenance and sustainment for program of record equipment based upon anticipated efficiencies.

-$699 thousand reduces analysis and fusion biometrics, forensics, and DOMEX in preparation of SOF i2 products based upon anticipated efficiencies.

-$245 thousand reflects the realignment of SSE funding from the 1PLU-Intelligence SAG to the 1PLV-OPS Support SAG where it is more appropriately executed.
(FY 2026 Baseline: $46,959 thousand)

5) SIGINT PED.....$-498
-$498 thousand for SIGINT PED operators, linguists, and analysts supporting PED of SOF ISR platforms based on anticipated divestment of ISR aircraft.
(FY 2026 Baseline: $30,445 thousand)

6) SOF Organic ISR .....$-134,246
-$81,908 thousand and -8 contractor FTEs reflect the savings associated with the complete divestment of Long Endurance Aircraft (LEA) by the end of FY 2026.

-$29,473 thousand reduction to U-28A Contractor Logistics Support (CLS) of CONUS training and simulator support consistent with aircrew transition to the OA-1K Skyraider II program.

-$22,865 thousand reflects the divestment of Multi-Mission Tactical Unmanned Aerial System (MTUAS) increment 2 requirement and sustainment of the MQ-27B.

(FY 2026 Baseline: $299,510 thousand)

7) SOFIS.....$-19,994
-$9,476 thousand for JSOC IS. See Classified budget justification materials.

-$6,082 thousand and -3 contractor FTEs for J2 Operations. See Classified budget justification materials.

-$3,426 thousand and -10 contractor FTEs for SOCCENT. See Classified budget justification materials.

-$1,010 thousand reduces funding based on anticipated efficiencies to open source intelligence (OSINT) collection and reporting capability across the SOF Enterprise.
(FY 2026 Baseline: $268,351 thousand)

8) Special Operations Forces Digital Ecosystems (SOF DE).....$-4,613
Enables user access to PAI and commercial data providing increased awareness by leveraging AI/ML technologies and state-of-the-art analytic tools.

-$4,613 thousand reflects the realignment of D-ISR funding from the SOF DE program line in this SAG to the D-ISR program line in this SAG where it is more appropriately executed; there is no decrease in program requirements.
(FY 2026 Baseline: $18,685 thousand)

9) Special Operations Tactical Video System (SOTVS).....$-1,004
The ground ISR TVS/reconnaissance, surveillance, and targeting acquisition program provides the baseline tools for special reconnaissance and surveillance through stand-off ground surveillance capability in day, night, or obscured conditions. System capabilities consist of close and long-range observation optical devices, augmented with Electro-Optical/Infrared (EO/IR) or night image intensifiers, man-packable radar, other multi-use, and modular trip-cue sensors (e.g., magnetic, seismic, acoustic, EO/IR, and microwave). These multi-spectral observation capabilities support crewed, semi-unattended, and uncrewed (fully automated) pre-programmable operations, capable of line of sight and beyond line-of-sight connectivity and interaction. These systems can be tailored for specific missions and optimized for specific geographic locations.

-$1,004 thousand reduction for five TVS Ops Kits and associated sustainment.
(FY 2026 Baseline: $18,946 thousand)

10) USSOCOM Support and Technical Enhancements (SSTE).....$-712
See Classified budget justification materials.

(FY 2026 Baseline: $21,333 thousand)

FY 2027 Budget Request $1,130,849

IV. Performance Criteria and Evaluation Summary:

	FY 2025	FY 2026	FY 2027
MIP Projects ($ in Thousands)	**Actuals**	**Enacted**	**Estimate**
Civilian Pay	118,503	122,820	117,818
Counter-small Unmanned Aerial Systems	0	48,365	50,680
Distributed Common Ground/Surface Systems	50,309	57,003	47,274
Hostile Forces, Tagging, Tracking, and Locating	24,030	20,935	22,172
Integrated Survey Program	2,132	2,097	2,175
Joint Threat Warning System	38,611	45,797	50,261
MALET MQ-1C	2,681	3,952	4,137
SOCOM Support and Technical Enhancements	27,818	21,333	23,250
Sensitive Site Exploitation	34,316	46,959	49,878
Signal Intelligence Processing, Exploitation, and Dissemination	32,781	29,978	30,348
Special Operations Command Research, Analysis, and Threat Evaluation System	35,470	33,201	34,542
Special Operations Forces Digital Ecosystems	0	18,685	14,423
Special Operations Forces Intelligence Systems	276,451	268,351	343,520
Special Operations Forces Intelligence Training	6,214	5,271	5,505
SOF Organic ISR	475,209	299,510	179,409
Special Operations Tactical Video System	17,563	18,946	18,298
Tactical Local Area Network	950	963	1,000
Other Classified	134,392	128,460	136,159
Total	**1,277,430**	**1,172,626**	**1,130,849**

Notes:

Beginning in FY 2026, funding was realigned from the SOFIS program line to newly created C-sUAS and SOF DE program lines for improved resource visibility. Funding was also internally realigned in FY 2026 for DICE from the SSTE program line to the SOFIS program line and SOFPREP funding was realigned from the SOFIS program line to the SSTE program line.

Beginning in FY 2027, funding was internally realigned from the DCGS program line and SOF DE program line to the SOFIS program line for improved resource visibility of the Digital ISR program.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Active Military End Strength (E/S) (Total)	**227**	**923**	**920**	**696**	**-3**
Officer	104	220	221	116	1

Officer	11	11	11	0	0
Enlisted	13	14	14	1	0
Civilian FTEs (Total)	**661**	**694**	**679**	**33**	**-15**
U.S. Direct Hire	661	694	679	33	-15
Total Direct Hire	**661**	**694**	**679**	**33**	**-15**
Average Annual Civilian Salary ($ in thousands)	**179.3**	**177.0**	**173.5**	**-2.3**	**-3.5**
Contractor FTEs (Total)	**1,113**	**1,326**	**1,341**	**213**	**15**

Personnel Summary Explanations:

USSOCOM military personnel are reported in Military Service Estimates. Military end strength numbers reflect authorized personnel.

Military End Strength net decrease of -3 personnel (+1 Officers and -4 Enlisted) due to:
Continuation of strategic tradeoff decisions and technical corrections to align USSOCOM with OSW manpower databases.

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

Civilian net decrease of -15 authorized FTEs due to:
-11 FTEs for modernization.
-4 FTEs reflect a realignment.

Contractor net increase +15 FTEs due to:
+8 FTEs supporting SOFIS CHASE G.
+8 FTEs supporting SOFIS MARSOC Intelligence Support.
+6 FTEs supporting SSTE SOFPREP.
+4 FTEs supporting JSOC Intelligence Support. See Classified budget justification materials.
+4 FTEs supporting SSE I2.
+2 FTEs supporting Other Classified.
-10 FTEs supporting SOCCENT Intelligence Support.
-8 FTEs supporting the SOF ORG ISR Long Endurance Aircraft program.
-3 FTEs supporting the SOFIS Foreign Disclosure.
+4 FTEs reflects a re-baseline of contractors in FY 2027 for the MQ-1 program (+7), the AFSOC Intelligence Support Program (-1), the C-sUAS program (-1), and the SIGINT PED SILENT DAGGER program (-1). Increase and decrease statements in Part III may not correspond directly with the re-baseline effort.

Fiscal Year 2027 Budget Estimates

Maintenance

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Maintenance

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Maintenance	1,258,776	30,972	20,003	1,309,751	27,631	51,483	1,388,865

I. Description of Operations Financed:
Maintenance - Includes maintenance (to include installation of modification and conversion kits), contractor logistics support (CLS), and field service representatives (FSRs) of weapons support systems and commodity groups associated with SOF activities. This also includes USSOCOM funds for reimbursement of Service industrial funds for depot maintenance of SOF-peculiar aircrafts, maritime craft, and equipment. Includes reimbursement for maintenance activities at industrial funded naval shipyards and costs associated with non-industrial funded maintenance activities at Navy repair facilities.

The FY 2027 request for 1PL7 - Maintenance includes $1,388,865 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $1,388,865 thousand.

The FY 2026 spend plan amount for 1PL7 - Maintenance includes $1,309,751 thousand of discretionary and $55,210 thousand of mandatory (reconciliation) for a total of $1,364,961 thousand. The mandatory funds enhance Special Operations Command equipment and readiness.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	0	0	0
Army	0	0	0
Marine Corps	0	0	0
Navy	0	0	0
Space Force	0	0	0
Total	**0**	**0**	**0**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	0	0	0
Army	0	0	0
Marine Corps	0	0	0
Navy	0	0	0
Space Force	0	0	0
Total	**0**	**0**	**0**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**441**	**482**	**486**

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action			
A. BA Subactivities	FY 2025 Actuals	Budget Request	Amount	Percent	Current Enacted	FY 2027 Request
Maintenance	$1,258,776	$1,273,409	$36,342	2.85%	$1,309,751	$1,388,865
Total	**$1,258,776**	**$1,273,409**	**$36,342**	**2.85%**	**$1,309,751**	**$1,388,865**

B. Reconciliation Summary	Change FY 2026/FY 2026	Change FY 2026/FY 2027
BASELINE FUNDING	**$1,273,409**	**$1,309,751**
Congressional Adjustments (Distributed)	55,828	
Congressional Adjustments (Undistributed)	-9,836

NORMALIZED CURRENT ESTIMATE	**$1,309,751**	**$1,388,865**

FY 2026 President's Budget Request (Amended, if applicable)	**$1,273,409**
1. Congressional Adjustments	$36,342
a) Distributed Adjustments	$55,828
1) Classified Adjustment	$26,900
2) Program increase - Multispectral Personal Signature Management	$28,928
b) Undistributed Adjustments	$-9,836
1) Historical Unobligated Balances	$-9,836
c) Adjustments to Meet Congressional Intent	$0
d) General Provisions	$-9,650
1) Sec. 8136 Savings from Efficiencies	$-9,650
FY 2026 Appropriated Amount	**$1,309,751**
2. Supplemental Appropriations	$0
a) Supplemental Funding	$0
3. Fact-of-Life Changes	$0
a) Functional Transfers	$0
b) Technical Adjustments	$0
c) Emergent Requirements	$0
FY 2026 Baseline Funding	**$1,309,751**

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $1,309,751

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $1,309,751

6. Price Change $27,631

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $188,104

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $188,104

1) AC-130J Power by the Hour (PBTH) $2,675
PBTH funds all off-wing engine/propeller repair, configuration management and all spares/parts support for the AC-130J program. Increase reflects the PBTH engine contract rate increase. The rate increases $66.02 per hour, per engine, from $875.64 in FY 2026 to $941.66 in FY 2027.
(FY 2026 Baseline: $24,211 thousand)

2) Adaptive Airborne Enterprise (A2E) $2,123

The Adaptive Airborne Enterprise (A2E) is AFSOCs modernization effort to enhance Intelligence, Surveillance, Reconnaissance (ISR), Electronic Warfare (EW), and precision strike capabilities. It leverages autonomous UAS platforms connected through resilient Command and Control (C2) and targeting networks, a common control architecture, and a SOF and Service-compatible autonomy baseline. As an interoperable system of systems (SoS), A2E supports C2, tactical networking, and autonomous operations to close long-range kill chains and establish scalable sensor networks in contested and denied environments. Increase supports sustainment of an increased number of Group 2 Air Launched Effects (ALE).
(FY 2026 Baseline: $6,024 thousand)

3) AFSOC Support.....$2,476
AFSOC support includes engineering, maintenance, cyber security, spares, logistics, and management required to maintain the training enterprise for aircrew MC-130J, AC-130J, CV-22, U-28, and C-146A training devices. The AFSOC training system supports unit training requirements to attain qualification, upgrade qualifications, and maintain currency and proficiency and provides the distributed mission training, live-virtual-constructive operations training through network, mission planning and mission execution support for all AFSOC aircraft.

+$1,324 thousand funds additional Department of the Air Force cyber security requirements across all training locations including Hurlburt Field, Duke Field, Cannon AFB, RAF Mildenhall, Yokota AB, and Kadena AB.

+$778 thousand funds mission operations requirements increase to comply with policy to leverage the SOF training and exercise network impacting all training locations to include Hurlburt Field, Cannon AFB, RAF Mildenhall, Yokota AB, and Kadena AB.

+$374 thousand supports an additional weapon system trainer simulator move to Kadena AB as required by the AFSOC MC-130J Capability Release-2 roadmap.
(FY 2026 Baseline: $74,419 thousand)

4) Ammunition.....$3,074
The program provides ammunition for training, operations, and reserve stockpiles. The program consists of multiple platforms ranging from small caliber individual and crew-served munitions to large bore munitions, air loitering munitions, and precision strike systems. Additional funding is needed for storage expansion and new requirements such as man-packable Vertical Take-Off & Landing (VTOL) Area Loitering Munitions (ALM) and Direct Attack All-Up-Round (AUR). Various VTOL ALM options are designed for SOF use within close and beyond-line-of-sight ranges. Increase in funding will support training, sustainment, and +5 contractor FTEs for SOCOM program acquisitions. It covers munitions storage, system screening, and testing for required maintenance, purchasing necessary materials and spares, maintaining inventory, and

test equipment to support precision strike systems. It also enables new ground-based precision strike system testing, fielding, and equipping.
(FY 2026 Baseline: $4,062 thousand)

5) Armed Overwatch (OA-1K Skyraider II) $19,666
OA-1K Skyraider II provides a cost-effective, multi-role, rapidly deployable, irregular warfare platform capable of austere operations. The aircraft will perform close air support, armed ISR, and precision strike via multiple sensors, robust communications suite, precision munitions, and adaptability for new and diverse mission sets. Program funds the Air Force Life Cycle Management Center program management, logistics, financial management, contracting, test, and engineering support to execute USSOCOM OA-1K Skyraider II sustainment efforts at Wright Patterson AFB, OH. The reimbursable civilian and contractor FTE support manages aircraft acceptance, airworthiness, weapons carriage and weapons release certifications, and fielding.

+$17,756 thousand funds the contractor logistics support & sustainment across three locations, as well as hardware and software sustainment costs for 36 aircraft delivered by the end of FY 2027.

+$1,910 thousand provides flight and ground training at four locations and engineering change proposals and contract modifications for the training systems.
(FY 2026 Baseline: $68,603 thousand)

6) Combat Craft Heavy (CCH).....$114
CCH provides platoon-sized maritime surface mobility with a fully enclosed, climate controlled, semi-submersible craft that operates in maritime environments up to high-threat. Increase supports an increased CCH operational tempo, requiring craft overhauls/maintenance in FY 2027.
(FY 2026 Baseline: $4,996 thousand)

7) Combatant Craft Assault (CCA) $548
The CCA is a combatant craft for squad-size maritime mobility operations in contested environments and the craft of choice for maritime interdiction and boarding operations. Increase supports Combatant Craft Forward Looking Infrared II mast sparing, repair materials, and ancillaries.
(FY 2026 Baseline: $24,106 thousand)

8) Combatant Craft Medium (CCM).....$11,340
CCM is a semi-enclosed, multi-mission combatant craft for platoon-size operations, capable of irregular warfare in the maritime environment.

+$5,000 thousand increase supports lifecycle sustainment management, maintenance overhauls, and modernization of CCM craft in support of NSW 3.0 deployment operations.

+$5,845 thousand increase for yard maintenance to support 2 additional CCM craft in each yard overhaul cycle.

+$495 thousand increase for lifecycle sustainment management of an additional detachment of 2 crafts that will be supporting increased operational support in USINDOPACOM area of responsibility (AOR).
(FY 2026 Baseline: $36,059 thousand)

9) Counter Uncrewed Systems (CUxS) $40,793
+$40,793 thousand reflects the programmatic change as a result of the realignment of FY 2026 discretionary funding to mandatory (reconciliation) to enhance USSOCOM mission readiness. There is no increase in total program requirements.
(FY 2026 Baseline: $71,496 thousand)

10) CV-22 PBTH $17,725
PBTH funds all off-wing engine/propeller repair, configuration management and all spares/parts support for the CV-22 program. Increase reflects the PBTH engine contract rate increase due to the contract restructure.
(FY 2026 Baseline: $10,636 thousand)

11) Dry Combat Submersible (DCS) $269
DCS provides a surface-launched, dry, diver lock-in/lock-out vessel capable of inserting and extracting SOF and payloads into denied areas. Program funds engineering support, spares, and maintenance support for all 3 DCS vehicles which have reached Full Operational Capacity (FOC). Increase reflects DCS maintenance availability for increased operations.
(FY 2026 Baseline: $13,838 thousand)

12) Dry Deck Shelter (DDS) $2,274
See Classified budget justification materials.
(FY 2026 Baseline: $19,855 thousand)

13) Electromagnetic Warfare Family of Systems (EWFOS) $476
The EWFOS program provides Special Operations Forces (SOF) with specialized EW capabilities to enhance maneuvers, situational awareness, and force protection. The overall objective of the EWFOS program is to acquire a flexible and multi-domain family of systems. This includes ground, sea, air, and space. The EWFOS uses mounted, dismounted, and unmanned systems to deliver electronic attack (EA), support (ES), and protection (EP). Increased funding is accelerating the acquisition and deployment of this technology to meet diverse mission needs.
(FY 2026 Baseline: $2,587 thousand)

14) Family of Special Operations Vehicle (FSOV).....$895
The FSOV program applies SOF-peculiar modifications to service common and COTS vehicles such as the Ground Mobility Vehicle (GMV) 1.0/1.1, Non-Standard Commercial Vehicles (NSCV), Lightweight All-Terrain Vehicles (LTATV), Mine Resistant Ambush Protected (MRAP) vehicles, and Joint Light Tactical Vehicles (JLTV) with SOF modifications. Increase provides sustainment of repair parts for 60 GMV 1.1s, 25 LTATVs, 35 NSCVs, and SOF modifications for 35 MRAP All-Terrain Vehicles and 60 JLTVs.
(FY 2026 Baseline: $129,469 thousand)

15) Joint Operational Stock Contract (JSTOK).....$128
The JSTOK program is utilized as a revolving inventory of essential items available to U.S. Special Forces. The system is designed to ensure operational units have access to the necessary equipment and supplies without the need for extensive stockpiling. Increase supports the maintenance and sustainment of JSTOK inventory.
(FY 2026 Baseline: $7,830 thousand)

16) Maritime Launched Effects (MLE).....$1,172
Program funds sustainment for manned underwater pressurized and electrically powered systems and life support systems essential to mission effectiveness that directly support the warfighter. Increase supports SOF in-service engineering agent, logistics, and inspections of items.
(FY 2026 Baseline: $0 thousand)

17) MC-130J.....$2,760
The MC-130J flies clandestine, or low visibility, single or multi-ship, low level infiltration, exfiltration, and resupply of SOF, by airdrop or airland and air refueling missions for special operations helicopters and tiltrotor aircraft, intruding politically sensitive or hostile territories. Increase funds the first full year of initial sustainment of Combat Talon III Capability Release 2M modified aircraft. This funding aligns with the terrain following/terrain avoidance system covering Silent Knight Radar software and operational flight profile sustainment, system software integration sustainment, and developmental testing support. These activities are essential to fully integrate with defensive systems and airborne mission networking systems, directly contributing to improved survivability and enhanced situational awareness for AFSOC crews in contested environments.
(FY 2026 Baseline: $35,332 thousand)

18) MH6/47/60.....$5,955
This program supports flight operations sustainment and life cycle contractor support for all 4 aircraft. Encompasses logistics support, on-site repair, overhaul maintenance, engineering change proposals, training support, and on-site technical support.

+$563 increase funds +3 contractor FTEs due to additional maintenance of added airborne mission networking equipment.

+$5,392 increase funds troubleshooting and repair efforts for hardware systems on 181 rotary wing aircraft.
(FY 2026 Baseline: $69,125 thousand)

19) Multi-Mission Dry Submersible (MMDS).....$14,030
See Classified budget justification materials.
(FY 2026 Baseline: $0 thousand)

20) Multi-Mission Tactical Unmanned Aerial System (MTUAS) $5,200
Multi-Mission Tactical Unmanned Aerial System (MTUAS), program sustains unmanned aircraft systems (UAS) that support USSOCOM with high-range autonomous sensor unmanned aerial vehicle (UAV) platforms and organic intelligence, surveillance, and reconnaissance capability. This program sustains and replaces UAS, special operations peculiar mission kits, mission payloads, air vehicles, training systems, and ground control stations (GCS). Increase supports the of integration, sustainment, and replacement of high-range autonomous sensor UAV platforms.
(FY 2026 Baseline: $0 thousand)

21) Naval Special Warfare (NSW) Equipment Sustainment.....$360
The NSW Equipment Peculiar Weapons Sustainment program sustains existing weapons program of record systems such as rifles, sniper, machine guns, and handguns while assessing lifecycle/spiral upgrades and technology advancements.
Increases weapons equipment and gear to support the establishment of a fleet integration team.
(FY 2026 Baseline: $803 thousand)

22) Non-Standard Aviation (NSAv).....$14,497
The NSAv program provides USSOCOM intra-theater airlift and support to include austere short take-off and landing, casualty evacuation, non-combatant evacuation operations, and humanitarian assistance. In FY 2027, USSOCOM will begin replacing existing NSAv C-146A aircraft with an updated and commercially available aircraft with lower lifecycle and operating costs. Increase reflects higher maintenance and sustainment costs as the existing fleet of C-146A aircraft are approaching end-of-life.
(FY 2026 Baseline: $113,029 thousand)

23) NSW Visual Augmentation Systems (VAS).....$351
Visual Augmentation Systems (VAS) Program provides night vision, thermal imaging, lasers and other systems in support of NSW operators. VAS also includes the repair/sustainment, storage, tracking, logistical movement and program management of equipment by the in-service engineering activity (NSWC Crane) as

well as systems training for NSW operators and maintainers. Increases VAS equipment and gear to support the establishment of a fleet integration team.
(FY 2026 Baseline: $1,444 thousand)

24) Precision Strike Package (PSP).....$2,039
The PSP is a modular and scalable kit developed for SOF C-130s to provide close air support, armed reconnaissance, and armed over-watch capabilities. The system includes precision guided munitions, a medium-caliber gun, electro-optical/infrared sensors, SOF-peculiar communications equipment, and an integrated fire control and mission management system.

+$1,565 thousand and +8 contractor FTEs to maintain the Global Positioning System (GPS) Enhanced Mission Operator Pallet (GMOP)/PSP and gun weapons system at the Flight Training Unit at Kirtland AFB, NM and Cannon AFB NM.

+$444 thousand increase provides required spares and repairs of GMOP/PSP and gun weapon systems.

+$30 thousand increase represents a transfer of funding from Procurement, DW to O&M, DW for proper execution of travel requirements for the program.
(FY 2026 Baseline: $86,167 thousand)

25) Simulator Block Upgrades-Fixed Wing (SBUD-FW).....$3,641
Provides AR/VR/MR based solutions to improve or augment Air Force Special Operations Command (AFSOC) fixed-wing aircrew, maintenance, and special tactics training to reduce dependency on low-density, high-demand training systems.

+$3,503 Realignment of funding from RDT&E, DW (R-1, Aviation Systems) to O&M, DW to support increased operational enhancements to the Battle Management System training functionality as well as other extended reality enhancements and associated sustainment requirements.

+$138 thousand sustains additional fielded augmented reality (AR) and virtual reality (VR) equipment (handsets and headsets), and software (virtual environment) as well as sustains and manages the AR/VR cloud repository and developmental environment infrastructure.
(FY 2026 Baseline: $3,276 thousand)

26) Simulator Block Upgrades-Rotary Wing (SBUD-R) $634
This effort funds proactive hardware and software upgrades for simulators to expand virtual and mixed-reality integration capabilities, enhance scenario generation, and robust data analytics for improved Air to Air Refueling (AAR). High-fidelity simulators are essential in providing a cost-effective means to replicate diverse and challenging scenarios unavailable in live flight. Aging hardware and rapidly evolving platform

technologies necessitate continuous upgrades and require proactive hardware and software modernization to ensure simulators accurately reflect current aircraft configurations and emerging threats, preventing the development of negative training habits. Additionally, modifications allow for expanded capabilities like virtual and mixed-reality integration, enhanced scenario generation, and robust data analytics for improved AARs.

+$634 thousand funds increase for contractor logistics and maintenance support.
(FY 2026 Baseline: $5,972 thousand)

27) Small Unmanned Surface Vehicle (SUSV) $1,704
The SUSV enables access to contested/denied areas in the maritime domain, provides maritime special reconnaissance capabilities and reduces risk to personnel and manned platforms. This program procures COTS modular systems that house government-off-the-shelf payloads. Increase supports the hardware and software sustainment and operational testing for 12 Long Endurance Unmanned Surface Vehicle systems prior to fielding.
(FY 2026 Baseline: $2,577 thousand)

28) Small Unmanned Systems (SUMS) $12,915
Establishes sustainment of Group One and Group Two small Uncrewed Aerial Systems (sUAS), small Uncrewed Ground Systems and specialized payloads that empower SOF operators with unparalleled ISR capabilities that meet the unique demands of SOF missions across multiples domains in the most challenging environments. Increase will ensure these advanced capabilities are consistently available by providing sustainment and maintenance for the entire portfolio of small uncrewed air and ground systems and their specialized payloads. This will enable peak operational readiness so expeditionary forces can rely on these critical ISR and targeting assets for missions in the most challenging environments.
(FY 2026 Baseline: $0 thousand)

29) SOF Combat Diving (CBDIV).....$5,017
The SOF CBDIV program enables the delivery of SOF to denied or hostile areas and provides direct support to the Navy's ability to conduct special operations. CBDIV fields SOF-peculiar life support systems, marine environmental protection, navigation, propulsion communication systems and signature management to enable the combat diver to achieve the last leg of the maritime domain insertion from all USSOCOM platforms, to fully engage the enemy. Increase supports SOF CBDIV in-service engineering agent logistics, and inspections of the fielded items which are required for manned underwater pressurized and electrically powered systems as well the required life support systems sustainment of critical system safety criteria essential to mission effectiveness directly supporting the warfighter.
(FY 2026 Baseline: $7,939 thousand)

30) SOF Personnel Equipment Advanced Requirements (SPEAR) $3,540

SPEAR is USSOCOM's modernization effort for the joint SOF operator. SPEAR focuses on improvement in personal equipment to produce a modular equipment system which focuses on mission tailoring, enhanced survivability, and enhanced mobility while reducing weight, bulk, and heat stress. Increase reflects the sustainment required across the SPEAR portfolio with primary increase supporting 466 Block II upgrades for the modular communications accessory suite.
(FY 2026 Baseline: $65,847 thousand)

31) Special Operations Acquisition and Logistic (SOAL) $102
SOAL provides full lifecycle materiel management of enterprise assets, including tracking procurement, delivery, sustainment, and disposition, along with accountable inventory officers within the enterprise warehouse. Increase supports growth in materiel procurement, ensuring continued operational efficiency and accountability.
(FY 2026 Baseline: $5,199 thousand)

32) Stand-Off Precision Guided Munitions (SOPGM) $5,903
Realignment of funding from Procurement, DW (P-1, Ordnance) to O&M, DW for proper execution of maintenance and sustainment activities performed on the GBU-69 Small Glide Munition (SGM) and GBU-39B/B Laser Small Diameter Bomb (LSDB) service contracts.
(FY 2026 Baseline: $6,495 thousand)

33) Tactical Combat Casualty Care Equipment (TCCCE) $1,150
The TCCCE program provides lifesaving medical devices, operator kits, medic kits, ancillary equipment, casualty evacuation (CASEVAC) sets, and brain health equipment for SOF. Increase will sustain 809 Blast Exposure Monitor (BEMO) systems and 27 CASEVAC sets.
(FY 2026 Baseline: $11,787 thousand)

34) Unmanned Undersea Vehicle (UUV) $1,474
Increase supports maintenance and sustainment growth for an increased inventory of Lionfish Small Uncrewed undersea vehicles (SUUV) systems to be delivered following government acceptance testing and provisioning in Q3 FY 2027.
(FY 2026 Baseline: $1,109 thousand)

35) Visual Augmentation Systems $921
See Classified budget justification materials.
(FY 2026 Baseline: $9,420 thousand)

36) Weapons $163
SOF Weapons Program provides increased capabilities needed for high priority missions that demand improved range, precision, and reduced weight over conventional systems. This also includes the repair/sustainment, storage, tracking, logistical movement, and program management of all equipment by the in-service engineering activity at NSWC-Crane. With 3 weapon systems transitioning to O&M in FY

2026, this increase facilitates these additional costs.
(FY 2026 Baseline: $11,155 thousand)

9. Program Decreases .....$-136,621

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases .....$-55,828

1) Classified Adjustment .....$-26,900

2) Program increase - Multispectral Personal Signature Management .....$-28,928

c) Program Decreases in FY 2027 .....$-80,793

1) 160th SOAR .....$-2,013
The 160th SOAR's mission is to organize, equip, train, resource, and employ Army special operations aviation forces worldwide in support of contingency missions and combatant commanders. Decrease reflects a revised contract support solution designed to optimize resource allocation and improve efficiency while eliminating -12 contractor FTEs.
(FY 2026 Baseline: $40,112 thousand)

2) Combatant Craft Forward Looking Infrared (CCFLIR) .....$-846
The CCFLIR program consists of legacy CCFLIR and CCFLIR 2 which provides SOF with a multi-sensor, electro-optic system that enhances effectiveness by improving the ability to detect, recognize, identify, range, track, and highlight objects of interest. CCFLIR 2 is required to be installed on all Combatant Craft Assault, Combatant Craft Heavy, and Combatant Craft Medium by the 2Q FY 2027. Decrease is due to completion of CCFLIR System integration lab material sustainment in December 2026.
(FY 2026 Baseline: $8,960 thousand)

3) CV-22B .....$-4,686
The CV-22B is a SOF variant V-22 vertical medium lift, multi-mission aircraft providing long-range, high-speed infiltration/exfiltration and resupply to SOF in hostile, denied and politically sensitive areas. Reduction reflects continued right-sizing of the CV-22 CLS budget with the end of the Performance Based Logistics and Engineering (PBL&E) contract.
(FY 2026 Baseline: $44,779 thousand)

4) FSOV Realignment .....$-11,000

Decrease reflects a realignment of FSOV funding from O&M DW to Procurement, DW (P1, Tactical Vehicles) where it is more appropriately executed.
(FY 2026 Baseline: $129,469 thousand)

5) MC-130J PBTH .....$-523
PBTH funds all off-wing engine/propeller repair, configuration management and all spares/parts support for the MC-130J program. Decrease reflects reduced PBTH costs as the C-130J fleet flies less hours in FY 2027.
(FY 2026 Baseline: $68,402 thousand)

6) MQ-9 .....$-2,953
The MQ-9 is an ISR and offensive strike UAV providing a SOF-unique capability to perform strike, coordination, and reconnaissance against high-value, fleeting, and time-sensitive targets. Funding provides CLS, tactical situational awareness sustainment, operations center sustainment and repairs, and a single line of government owned, contractor operated MQ-9 ISR capability. Decrease in funding is due to cost efficiencies realized as USSOCOM transitions from CLS to Government Owned Government Operated (GOGO) operations.
(FY 2026 Baseline: $106,176 thousand)

7) NSAv .....$-55,000
The existing fleet of C-146A aircraft are approaching end-of-life and are incurring increased operation and maintenance costs, USSOCOM will begin replacing existing NSAv C-146A aircraft with an updated and commercially available aircraft with lower lifecycle and operating costs. Decrease reflects realignment of $55,000 thousand from O&M, DW to Procurement, DW to procure three NSAv Next aircraft, spares, support equipment, associated systems engineering, and other government costs.
(FY 2026 Baseline: $113,029 thousand)

8) Personal Signature Management (PSM) .....$-536
The program provides PSM capabilities to the SOF operator. Decrease reflects a reduction in planned sustainment costs with the reduction of 6,900 systems in FY 2027.
(FY 2026 Baseline: $32,565 thousand)

9) Shallow Water Combat Submersible (SWCS)/SEAL Delivery Vehicle (SDV) .....$-2,190
The SDV-Mk8 and SDV-Mk11 are free-flooding combat submersible mobility platforms suitable for transporting and deploying SOF and their payloads for a variety of maritime missions. Decrease reflects the discontinuation of overhauls associated with the reduction of 3 SDV-MK8s in FY 2027.
(FY 2026 Baseline: $30,445 thousand)

10) Simulator Block Upgrades-Maritime (SBUD-M) .....$-1,046
SBUD-M supports the DCS cockpit simulator and is a phased effort to train operators to pilot in open water and in a controlled environment. The effort ensures pilots and co-pilots receive crucial training and

maintain proficiency operating underwater. The simulator transitions from a desktop simulator to a tactile representative simulator, adding physics-based modeling to emulate a representative environment for pilots to train, maintain and qualify on without the burden of putting a DCS to sea. Real world environmental replication is critical to all major systems onboard to give correct simulation (e.g., SONAR, ballast, etc.). Reduction reflects a steadier state in the cockpit and lock-in/out swimmer (LIO SWMR) simulators upgrade after an initial ramp-up in FY 2026.
(FY 2026 Baseline: $5,628 thousand)

FY 2027 Budget Request $1,388,865

IV. Performance Criteria and Evaluation Summary:

Contractor Logistics Support		FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Aircraft				
Basic Aircraft	AC-130J PSP Sustainment	87,570	86,167	90,016
	Armed Overwatch (OA-1K Skyraider II)	8,139	65,024	89,710
	CASA-212/C-27J	20,187	0	0
	CV-22B Sustainment	41,223	44,779	41,033
	EC-130J Sustainment	1,210	591	0
	MC-130J Sustainment	35,029	35,332	38,797
	MQ-9 (A/B)	104,032	106,176	105,453
	MC-12W ANG	29,985	3,579	0
	MH-47G, MH-60M, & A/MH-6M/R	96,397	109,237	115,473

This exhibit shows the Maintenance SAG budget for all programs that utilize Depot Maintenance.
This is a subset of the information that is included in the USSOCOM Depot Maintenance exhibit.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Contractor FTEs (Total)	**441**	**482**	**486**	**41**	**4**

Personnel Summary Explanations:

Contractor net increase of +4 contractor FTEs due to:
+5 FTEs supporting the Ammunition program
+3 FTEs supporting the MH6/47/60 program.
+8 FTEs supporting the PSP program.
-12 FTEs supporting 160th SOAR program.

Fiscal Year 2027 Budget Estimates

Management/Operational Hqtrs

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Management and Operational Headquarters

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Management/Operational Headquarters	194,646	3,268	-16,891	181,023	1,730	-2,062	180,691

I. Description of Operations Financed:
Management/Operational Headquarters - Includes manpower authorizations, SOF-peculiar and support equipment, necessary facilities and associated costs specifically identified and attributable to the USASOC, AFSOC, NSWC, and MARSOC Component Command HQs, as well as the USSOCOM HQs and its management support activities. Also includes costs associated with the expenditure of funds in support of officially sanctioned activities used to maintain the standing and prestige of the United States by extending official courtesies to guests who promote the goals of the Commander, USSOCOM and the DoW.

The FY 2027 request for 1PLM – Management/Operational Headquarters includes $180,691 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $180,691 thousand.

The FY 2026 spend plan amount for 1PLM – Management/Operational Headquarters includes $181,023 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $181,023 thousand.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	466	431	433
Army	231	220	220
Marine Corps	20	19	19
Navy	46	23	52
Space Force	0	0	0
Total	**763**	**693**	**724**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	344	346	347
Army	327	249	249
Marine Corps	73	73	73
Navy	87	87	86
Space Force	2	2	2
Total	**833**	**757**	**757**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**187**	**194**	**198**

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $8,337

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $8,337

1) Civilian Pay Adjustments $5,086
The total increase for civilian pay is +$5,086 thousand and +31 civilian FTEs.

+$4,537 thousand and +31 civilian FTEs reflects a realignment from the 1PLR-Theater Forces SAG. This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and OSW databases to properly align authorizations with the correct PEC.

+$549 thousand increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long term capability for the Department.
(FY 2026 Baseline: $113,821 thousand; +31 FTEs)

2) HQ USSOCOM.....$1,412
+$1,412 thousand and +9 contractor FTEs provide contract support for:
+3 contractor FTEs dedicated to social media management, photography, and the production of headquarters-level media such as Tip of the Spear publications and Fact book materials.
+4 contractor FTEs responsible for managing the full lifecycle of Freedom of Information Act requests received by USSOCOM.
+1 contractor FTE focused on video production, including filming, editing, and the creation of command-level video products.
+1 contractor FTE supporting the Chief of Staff, Deputy Chief of Staff, and Secretary Joint Staff by reviewing headquarters-level staffing packages such as publications, Star Notes, and information papers, ensuring compliance with USSOCOM policy and facilitating final approval.
(FY 2026 Baseline: $4,819 thousand)

3) J8 Operations $1,839
+$1,839 thousand and +3 contractor FTEs will enable USSOCOM J8 to enhance its ability to evaluate the effectiveness of its programs, determine alignment with strategic objectives, and propose alternative resource allocation strategies. The J8 will conduct efficiency analyses on selected programs and portfolios to identify resource realignment options in time for inclusion in POM development cycles. This involves reviewing program groups for requirements, acquisition status, strategic alignment, funding trends, and efficiencies resulting in potential adjustments to acquisition goals, alternative solutions, risk assessments, resourcing levels, and implementation plans.
(FY 2026 Baseline: $1,610 thousand)

9. Program Decreases .....$-10,399

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-10,399

1) Civilian Pay Adjustments ..... $-4,487
The total decrease for civilian pay is -$4,487 thousand.

-$4,111 thousand reflects the decrease of the annual civilian salary for the 724 requested FTEs based on FY 2026 actuals to date and planned FY 2027 pay rates.

-$376 thousand reduces funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $113,821 thousand)

2) MARSOC Realignment ..... $-4,153
MARSOC is implementing an improved budget structure to better track requirements.

-$1,596 thousand and -8 contractor FTEs reflects the realignment of MARSOC operations funding for the MARSOC Intelligence Analysis Cell to the 1PLU-Intelligence SAG where it is more appropriately executed.

-$220 thousand decrease reflects the realignment of MARSOC operations funding to the 1PLS-Cyberspace Activities SAG where it is more appropriately executed.

-$2,337 thousand decrease reflects the realignment of MARSOC C4I funding to the 1PLV-Operational Support SAG where it is more appropriately executed.
(FY 2026 Baseline: $6,153 thousand)

3) NSW HQs ..... $-440
-$440 thousand decrease reflects the reduction in NSW HQs travel to support site visits and program assessments.
(FY 2026 Baseline: $4,370 thousand)

4) USASOC HQs ..... $-1,319
-$610 thousand decrease reflects the realignment of USASOC operations funding to the 1PLV-Operational Support SAG where it is more appropriately executed.

-$709 thousand reduces travel costs for USASOC HQs based on execution.

(FY 2026 Baseline: $6,374 thousand)

FY 2027 Budget Request $180,691

Contractor FTEs (Total)	**187**	**194**	**198**	**7**	**4**

Personnel Summary Explanations:

USSOCOM military personnel are reported in Military Service Estimates. Military end strength numbers reflect authorized personnel.

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

Civilian net increase of +31 authorized FTEs due to a realignment.

Contractor net increase of +4 FTEs due to:

+3 FTEs supporting J8 Operations.
+9 FTEs supporting HQ USSOCOM.
-8 FTEs support MARSOC Operations.

Fiscal Year 2027 Budget Estimates

Operational Support

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Operational Support

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Operational Support	1,434,368	33,999	-18,425	1,449,942	28,698	318,211	1,796,851

I. Description of Operations Financed:

Operational Support – Funds SOF-peculiar support resources for communications, Military Construction (MILCON) collateral equipment, FSRM projects, unit sustainment support, and acquisition program management. Funding provides civilian manpower authorizations, general contractor support, equipment sustainment, travel, and associated management costs. Communication capabilities support SOF IT enterprise-wide services, SOF worldwide command and control systems, deployable communications, airtime, circuits, and bandwidth. Facility projects include SOF enterprise-wide FSRM activities, and communication infrastructure. Acquisition program management includes sustainment, fielding, engineering, logistical, and operational test and evaluation support for SOF acquisition programs.

The FY 2027 request for 1PLV – Operational Support includes $1,796,851 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $1,796,851 thousand.

The FY 2026 spend plan for 1PLV – Operational Support includes $1,449,942 thousand of discretionary and $196,603 thousand of mandatory (reconciliation) for a total of $1,646,545 thousand. The mandatory funds enhance Special Operations Command equipment and readiness.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	308	308	322
Army	395	358	425
Marine Corps	0	0	0
Navy	0	0	0
Space Force	0	0	0
Total	**703**	**666**	**747**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	256	259	259
Army	2,191	2,040	2.003
Marine Corps	6	6	6
Navy	11	11	11
Space Force	0	0	0
Total	**2,464**	**2,316**	**2,279**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**1,576**	**1,597**	**1,578**

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action			
A. BA Subactivities	FY 2025 Actuals	Budget Request	Amount	Percent	Current Enacted	FY 2027 Request
Operational Support	$1,434,368	$1,579,137	$-129,195	-8.18%	$1,449,942	$1,796,851
Total	**$1,434,368**	**$1,579,137**	**$-129,195**	**-8.18%**	**$1,449,942**	**$1,796,851**

B. Reconciliation Summary	Change FY 2026/FY 2026	Change FY 2026/FY 2027

NORMALIZED CURRENT ESTIMATE	**$1,449,942**	**$1,796,851**

FY 2026 President's Budget Request (Amended, if applicable) $1,579,137

1. Congressional Adjustments ..... $-129,195

a) Distributed Adjustments $2,000

1) Program Increase - SOF Training Support Facility $2,000

b) Undistributed Adjustments ..... $-96,849

1) Historical Unobligated Balances ..... $-98,849

2) Program Increase -Travel Allowance for Members of the Armed Forces Assigned to Alaska $2,000

c) Adjustments to Meet Congressional Intent $0

d) General Provisions ..... $-34,346

1) Sec. 8136 Savings from Efficiencies ..... $-34,346

FY 2026 Appropriated Amount $1,449,942

2. Supplemental Appropriations $0

a) Supplemental Funding $0

3. Fact-of-Life Changes $0

a) Functional Transfers $0

b) Technical Adjustments $0

c) Emergent Requirements $0

FY 2026 Baseline Funding $1,449,942

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $1,449,942

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $1,449,942

6. Price Change $28,698

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $402,041

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $39,700

1) Collateral Equipment $39,700

One-time increases for O&M collateral equipment and C4I requirements for USSOCOM MILCON projects programmed for completion and occupation in FY 2027.

AFSOC - $4,008 thousand - FY 2027 Projects (1391 Estimates):
+$1,567 thousand - Project Pre-Design;
+$2,441 thousand, 75442, Operations Center, Hurlburt Field, FL.

JSOC - $383 thousand, FY 2027 Projects (1391 Estimates):
+$383 thousand - Project Pre-Design.

MARSOC - $5,580 thousand, FY 2027 Projects (1391 Estimates):
+$1,247 thousand - Project Pre-Design;
+$4,333 thousand, P1538, SOF Armory, Camp Lejeune, NC.

NSWC - $13,497 thousand - FY 2027 Projects (1391 Estimates):
+$5,181 thousand, P909, SOF Operation Support Facility, JEBLC, FT Story, VA;
+$3,258 thousand, P325, SOF Training Center, JEBLC, FT Story, VA;
+$2,353 thousand, 92352, Support Annex, Baumholder, GE;
+$1,818 thousand, P502, SOF Training Center, Keyport, WA;
+$887 thousand, Project Pre-Design.

SOCE - $2,840 thousand - FY 2027 Projects (1391 Estimates):
+$2,516 thousand, 92243, SOF Operations Annex Baumholder, GE;
+$324 thousand, 90025, SOF Operations Facility, Estonia, EE.

USASOC - $12,636 thousand - FY 2027 Projects (1391 Estimates):
+$5,043 thousand, 81906, SOF Training Complex, Yuma, AZ;
+$2,410 thousand, 81905, SOF Rigging Facility, Hunter, GA;
+$2,379 thousand, 92242, SOF Battalion Annex, Baumholder, GE;
+$1,791 thousand, 86027, SOF Operations Facilities, FT Bragg, NC;
+$878 thousand, Project Pre-Design;
+$135 thousand, 69262, SOF Military Working Dog Kennel Facility, Hunter, GA.

USSOCOM HQs - $756 thousand - FY 2027 Projects (1391 Estimates):
+$756 thousand, 92351, Communication Annex, Baumholder, GE.
(FY 2026 Baseline: $32,981 thousand)

c) Program Growth in FY 2027 ..... $362,341

1) 10th Special Forces Group $362
The 10th Special Forces Group is headquartered at Fort Carson, Colorado and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USEUCOM AOR.

+$200 thousand increases Medical Proficiency Training to enable 3 personnel per month to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$162 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.
(FY 2026 Baseline: $3,288 thousand)

2) 1st Special Forces Group $414
The 1st Special Forces Group is headquartered at Joint Base Lewis–McChord, Washington and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USINDOPACOM AOR.

+$200 thousand increases Medical Proficiency Training to enable 3 personnel per month to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$214 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.
(FY 2026 Baseline: $3,780 thousand)

3) 3rd Special Forces Group $414
The 3rd Special Forces Group is headquartered at Fort Bragg, North Carolina and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism,

information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USAFRICOM AOR.

+$200 thousand increases Medical Proficiency Training to enable 3 personnel per month to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$214 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.
(FY 2026 Baseline: $3,780 thousand)

4) 5th Special Forces Group $415
The 5th Special Forces Group is headquartered at Fort Campbell, Kentucky and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USCENTCOM AOR.

+$200 thousand increases Medical Proficiency Training to enable 3 personnel per month to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$215 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.
(FY 2026 Baseline: $3,779 thousand)

5) 75th Ranger Regiment $451
+$200 thousand increases Medical Proficiency Training to enable 3 personnel per month to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$251 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.

(FY 2026 Baseline: $4,478 thousand)

6) 7th Special Forces Group $415
The 7th Special Forces Group is headquartered at Eglin Air Force Base, Florida and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance primarily supporting the USSOUTHCOM AOR.

+$200 thousand increases Medical Proficiency Training to enable 3 personnel per month to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$215 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.
(FY 2026 Baseline: $3,778 thousand)

7) Advanced Tactical Flotation Family of Systems (ATFFOS) $2,636
The ATFFOS program provides sustainment for advanced tactical flotation systems to reduce the risk of drowning should an individual operator enter the water during maritime operations.

+$2,391 thousand increase funds 1,285 Advanced Tactical Flotations systems.

+$245 thousand reflects the realignment of SSE funding from the 1PLU-Intelligence SAG to where it is more appropriately executed.
(FY 2026 Baseline: $0 thousand)

8) AFSOC FSRM $9,171
+$9,171 thousand provides for four additional minor construction projects supporting the stand-up of the Armed Overwatch (OA-1K Skyraider II) units at Hurlburt Field AFB, Cannon AFB, and Will Rogers ANG.
(FY 2026 Baseline: $7,773 thousand)

9) AFSOC Operations.....$1,827
Funds operational program costs for the newly established mission enclave node and network distribution hub for Davis-Monthan AFB, AZ.

+$1,105 thousand establishes the performance-based contract to support 492 SOW flying units at Davis-Monthan AFB, AZ.

+$430 thousand funds 1 firewall license, 1 identity service engine network anti-spoofing license, 1 Cisco DNA license, 1 DISA cybersecurity services provider connection fee, 1 internet service provider and 7 equipment refresh parts (5 Wi-Fi access points, 1 multi-port router, and 1 multi-port switch).

+$292 funds the performance-based contract that provides SOF Information Enterprise (SIE) support for AFSOC units at Davis-Monthan AFB, AZ.
(FY 2026 Baseline: $13,673 thousand)

10) AFSOC Satellite Operations.....$1,807
+$1,807 thousand funds two additional proliferated low earth orbit service lines providing satellite airtime for the MQ-9 program which connects to ground stations for remotely piloted aircraft control and real-time video dissemination.
(FY 2026 Baseline: $13,630 thousand)

11) Ammunition.....$640
+$640 thousand increase provides storage for assets and sustains off-site personnel to manage the ammunition program.
(FY 2026 Baseline: $1,380 thousand)

12) Army Special Ops Aviation Command (ARSOAC).....$379
+$83 thousand increases Medical Proficiency Training to enable 15 personnel to participate in medical training experiences in major urban trauma centers and teaching hospitals to fulfill regulatory medic requirements of 4 weeks of training (160 hours) every 4 years, or a minimum of 2 weeks of training (80 hours) every 2 years.

+$85 thousand increases military intelligence readiness and directly supports tactical intelligence readiness training and intelligence sustainment requirements used to meet individual or collective training requirements. Also provides support for CONUS based intelligence operations.

+$211 thousand provides enhanced ARSOAC network support and information assurance to ~5000K users.
(FY 2026 Baseline: $3,505 thousand)

13) Artificial Intelligence Portfolio Core Services.....$29,808
+$25,361 thousand provides AI capabilities to the SOF enterprise by supporting cloud/edge-based development and security pipeline solutions with access to SOF and commercial data through a unified

fabric. These efforts are designed to drive operational efficiency and foster a data-centric approach by focusing on automating cumbersome manual processes to streamline capabilities into production environments while ensuring reliable secure data accessibility.

+$4,447 thousand increase reflects the realignment of artificial intelligence funding from the 1PLR-Theater Forces SAG to where it is more appropriately executed.
(FY 2026 Baseline: $0 thousand)

14) Blue Force Tracking $775
Blue Force Tracking is a GPS-enabled system that provides military commanders and forces with location information about friendly and hostile military forces. Sustainment activities include software/firmware updates required to maintain cyber accreditation, configuration management, and design changes related to parts obsolescence.

+$775 thousand increase will provide 41 additional spare kits for River Jack transmitters and Lightning Bolt handheld devices.
(FY 2026 Baseline: $5,502 thousand)

15) C4 Information Automation Systems (C4IAS) $24,891
+$6,374 thousand increase reflects the additional cost to comply with NSA's updated dual data-at-rest policy required for USSOCOM'S 2,301 SIPRNET mobile capability kits.

+$8,797 thousand increase supports the cost of 77,402 E5 licenses/Microsoft ELA contract recompete.

+$8,422 thousand supports the purchase of memory and storage across the computer hardware enterprise for 3,810 systems.

+$1,298 thousand supports the Component and TSOC requirements related to life cycle replacement of end-of-life internet-based phones.
(FY 2026 Baseline: $202,338 thousand)

16) Civilian Pay Adjustments $12,344
The total increase for civilian pay is +$12,344 thousand and +81 civilian FTEs.

+$10,537 thousand and +72 civilian FTEs reflect a realignmentfrom the 1PLR-Theater Forces SAG. This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and OSW databases to properly align authorizations with the correct PEC.

+$585 thousand and +4 civilian FTEs reflect a realignment from the 1PLU-Intelligence SAG. This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and OSW databases to properly align authorizations with the correct PEC.

+$504 thousand increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.

+$400 thousand and +3 civilian FTEs for the vendor threat mitigation capability to identify, vet, and address threats posed by vendors that oppose U.S., allies', and partners' interests or pose a threat to national security, and to mitigate risks as appropriate.

+$318 thousand and +2 civilian FTEs is a technical correction to align USSOCOM with OSW manpower databases.
(FY 2026 Baseline: $104,678 thousand; +81 FTEs)

17) Combat Craft Medium (CCM).....$241
The Combat Craft Medium is a semi-enclosed, multi-mission combatant craft for platoon size operations in the maritime environment.

+$241 thousand increase sustains program management and continued contractor acquisition support costs for CCM MK1.
(FY 2026 Baseline: $2,219 thousand)

18) Combatant Craft Assault (CCA) $58
The CCA is a combatant craft for squad size maritime mobility operations in contested environments and the craft of choice for maritime interdiction and boarding operations.

+$58 thousand increase sustains program management support costs.
(FY 2026 Baseline: $538 thousand)

19) Combatant Craft Forward Looking Infrared Radar (CCFLIR).....$87
The CCFLIR sensor is an offensive/defensive sensor on Combatant Crafts and provides Special Operations Forces with a multi-sensor, electric-optic system that enhances SOF effectivities improving their ability to detect, recognize, identify, range, track, and highlight objects of interest.

+$87 thousand increase sustains program management support costs for legacy CCFLIR and CCFLIR 2.

(FY 2026 Baseline: $491 thousand)

20) Command Digital and Artificial Intelligence Office (CDAO) $861
+$861 thousand increase supports CDAO travel and supplies for office personnel, including Dell annual cost share and Studio for NIPR and SIPR supporting the analytical development environment.
(FY 2026 Baseline: $0 thousand)

21) Dry Deck Shelter (DDS) $173
The DDS is a certified diving system that attaches to modified host submarines and provides insertion of Special Operations Forces and platforms.

+$173 thousand sustains program management costs for operational support.
(FY 2026 Baseline: $1,594 thousand)

22) Electromagnetic Warfare Family of Systems $33,145
See Classified budget justification materials.
(FY 2026 Baseline: $0 thousand)

23) Family of Special Operations Vehicles $812
+$812 thousand funds +5 contractor FTEs for integration, ground autonomy, and cyber security support needed to modernize the tactical ground mobility portfolio.
(FY 2026 Baseline: $7,131 thousand)

24) Fly-Away Broadcast System (FABS) $339
FABS is a third-generation system that uses FM, TV, VHF, UHF (in digital/analog format), and cellular multi-media messaging service/short message service broadcasts. Next Generation FABS is the Broadcast Dissemination Platform (BDP) which integrates additional capabilities to enhance PSYOP broadcasts, reduces size, weight, and power (SWAP), and consists of three variants (Light, Medium, Heavy). This capability serves to deter adversarial aggression and counters social/political propaganda that threatens the U.S vital interests.

+$339 thousand increase sustains logistics support costs for 12 BDP Light systems.
(FY 2026 Baseline: $1,879 thousand)

25) HQ Command, Control, Communications, Computers, and Intelligence (C4I) $31,431
+$29,000 thousand supports enhanced Tactical Mission Network (TMN) capabilities that serve as an enabler to the SOF Common Core Architecture (SCCA), connecting commercial sensors, as well as the SOF Family of Systems to effectors and the greater Joint Fires Network (JFN). The enhanced capability interconnects the

SOF TMN with conventional services as well as mission partner environment TMNs; thereby, increasing collaboration and overall mission effectiveness.

+$2,431 thousand increase supports the demand signal to leverage commercial cloud services to execute TMN data transformation as well as the use of commercial data transfer services to move data from Gov clouds to air-gapped commercial Secret clouds.
(FY 2026 Baseline: $121,263 thousand)

26) HQ SOCOM FSRM $207
+$207 thousand supports the Uninterruptible Power Supply (UPS) maintenance contract adjustment for periodic battery replacement and repair parts at the USSOCOM HQ Campus.
(FY 2026 Baseline: $1,835 thousand)

27) Identity Management Operations $3,226
See Classified budget justification materials.
(FY 2026 Baseline: $20,706 thousand)

28) Maritime Launched Effects (MLE) $976
+$976 thousand increase funds +2 contractor FTEs for warfare center labor of principle of safety support and program management office support.
(FY 2026 Baseline: $0 thousand)

29) Maritime Scalable Effects (MSE).....$3,011
+$2,930 Increase reflects the realignment of mobility operation funding from Procurement, DW (P-1 #62, Ordnance Items <$5M) to O&M DW engineering development and test and evaluation where it is more appropriately executed.

+$81 thousand increase sustains program management office support costs.
(FY 2026 Baseline: $474 thousand)

30) MARSOC FSRM.....$270
+$270 thousand provides for renovation of Rifle Range 452 at Camp Lejeune, NC.
(FY 2026 Baseline: $0 thousand)

31) MARSOC Operations $4,924
+$2,337 thousand increase reflects the realignment of MARSOC C4I funding from the 1PLM-Management/Operational Headquarters SAG to the 1PLV-Operational Support SAG where it is more appropriately executed.

+$1,643 thousand increase reflects the realignment of MARSOC C4I funding from the 1PLR-Theater Forces SAG to the 1PLV-Operational Support SAG to where it is more appropriately executed.

+$944 thousand and +2 contractor FTEs fund 1 cloud administrator and 1 power applications administrator to support the capability to sense, make sense, and act across all domains and to collaborate with mission partners to deliver the information advantage at the speed of relevance.
(FY 2026 Baseline: $0 thousand)

32) Mission Command System/Common Operating Picture (MCS/COP) $5,339
+$5,339 thousand provides additional data integration support within the Strategic Common Operational Picture (COP) and increases automation of software monitoring and configuration management of deployed software applications supporting SOF Unit Denied, Degraded, Intermittent, and Low-Bandwidth (DDIL) use-cases.
(FY 2026 Baseline: $18,718 thousand)

33) Multi-Mission Dry Submersible (MMDS) $1,521
See Classified budget justification materials.
(FY 2026 Baseline: $3,777 thousand)

34) Naval Special Warfare Group 8 ..... $660
+$660 thousand increase supports sustainment of non-FTE network services contract required to protect data communications infrastructure amidst a growing digital threat environment.
(FY 2026 Baseline: $6,041 thousand)

35) Radio Integration System (RIS) $9,286
The RIS provides command, control, and communication between deployed SOF bases, liaison teams, SOF HQs, and SOF support elements.

+$9,286 thousand provides life cycle sustainment of 42 fielded digital aided close air support-gateway SOF systems.
(FY 2026 Baseline: $8,506 thousand)

36) Remote Advise and Assist Virtual Accompany Kit (RAA/VAK) $3,642
The RAA/VAK provides partner forces with a tactical picture that SOF can monitor while maintaining seamless connectivity, situational awareness, and mutual support during accompanied and unaccompanied missions.

+$1,890 thousand supports the purchase of 30 additional Starlink licenses.

+$1,752 thousand for lifecycle sustainment, data dissemination and visualization, and field service support.
(FY 2026 Baseline: $23,183 thousand)

37) SCAMPI.....$2,605
SCAMPI is a telecommunications system created to allow dissemination of C4I data between USSOCOM HQs, SOF deployed forces, its components and their major subordinate units, the TSOCs, and selected government agencies and activities directly associated with the special operations community.

+$718 thousand supports the increased cost of maintaining and sustaining the SCAMPI system.

+$1,440 thousand supports the increased cost of 22 multi-beam hub licenses.

+$447 thousand supports the increased cost of 575 concurrent call licenses.
(FY 2026 Baseline: $24,079 thousand)

38) SEAL Delivery Vehicle (SDV).....$333
The MK-11 SDV, previously referred to as the Shallow Water Combat Submersible (SWCS), is a free-flooding combat submersible and mobility platform suitable for transporting and deploying SOF personnel and payloads.

+$333 thousand sustains engineering, logistics, and quality assurance program management support costs for operational SDVs.
(FY 2026 Baseline: $3,178 thousand)

39) Simulator Block Update Rotary Wing.....$253
+$253 thousand increase sustains subject matter expertise required to program and maintain new MH-47 Simulators.
(FY 2026 Baseline: $2,336 thousand)

40) SOCOM Materiel Management Activity (MMA).....$309
The SOCOM MMA provides direct support to USSOCOM, the component commands, and the TSOCs through the performance of cataloging, supply chain, and accountability functions which support the acquisition and fielding of special operations peculiar equipment. In addition, the capability supports the J4 Director as the designated Component Property Lead (CPL) for USSOCOM to ensure the Command meets its Title 10 and OSW/DoW mandates for USSOCOM equipment accountability and audit compliance.

+$309 thousand increase funds the three percent increase by Defense Contract Management Agency for the Global Logistics Support Services contract.
(FY 2026 Baseline: $2,688 thousand)

41) SOF Deployable Node (SDN).....$11,122
SDN is a family of deployable, super high frequency, multi-band satellite communications systems providing deployed SOF users with the transport path for access to the SIE for high-capacity, voice, data, and video at all levels of classification. The SDN supports the SDN sub-programs, transport of intelligence variants, technology insertions, and equipment refresh and replacement.

+$10,407 thousand sustains the application with Cisco SmartNet and DNA Center support and 1,525 Manage Express Virtual Office application licenses.

+$630 thousand increase addresses the heightened operational demand by enhancing core capabilities to bolster the Department's joint combat force's warrior lethality in SDN core readiness capability such as Cisco Smartnet Communications expanding global presence and power projection to defend the Homeland and deter external threats.

+$85 thousand sustains annual contract costs for engineering support.
(FY 2026 Baseline: $48,180 thousand)

42) SOF Digital Ecosystems.....$2,436
See Classified budget justification materials.
(FY 2026 Baseline: $36,200 thousand)

43) SOF Personal Equipment Advanced Requirements (SPEAR).....$363
+$363 thousand adds support for body armor upgrades and three additional development and operational test events across all SPEAR commodities critical to completing the MCAS BLK II upgrade.
(FY 2026 Baseline: $4,358 thousand)

44) SOF Tactical Communications.....$5,244
The SOF Tactical Communications program includes sustainment for radios and equipment providing real time, hostile and friendly force information, Line of Sight (LOS) and beyond LOS communications, and access to situational awareness in the form of intelligence inputs, broadcasts, and networks.

+$4,683 thousand supports cyber security operations integrators at the components for Field Computing Devices-Wearable (FCD-W), modular payload technical management, and code support for network operations center.

+$463 thousand supports the full lifecycle replacement of 87 field computing device-wearable kits and ancillaries.

+$98 thousand supports the increase in costs for operational test travel.
(FY 2026 Baseline: $43,570 thousand)

45) SOFC4I Airtime $8,787
The SOFC4I Airtime program funds the acquisition of commercially leased and government provided long-haul, wideband telecommunications circuits for terrestrial and satellite terminals.

+$8,787 thousand increases bandwidth for tactical satellite terminals training efforts.
(FY 2026 Baseline: $63,496 thousand)

46) Special Access Program Network (SAPNET) $4,230
Funding increase supports the SAPNET:

+$1,017 thousand executes life cycle replacement for 598 workstations.

+$554 thousand maintains support for 40 codecs.

+$805 thousand maintains hardware and software maintenance and support for 110 routers associated with LAN consolidation initiatives.

+$1,854 thousand supports the consolidation of operations and maintenance services associated with operating and managing the consolidation of SAPNET local area networks.
(FY 2026 Baseline: $20,231 thousand)

47) Special Communications Enterprise (SCE).....$2,863
The SCE is comprised of services networks, systems and subsystems, and devices. In accordance with special communications community approved practices and processes, the enterprise provides and manages obfuscated exchange of information between elements (field to field, filed to base, base to field). SCE consists of four segments: 1) Field Segment, 2) Transport Segment, 3) Enterprise Control Segment, and 4) Base-End Segment.

+$2,863 thousand supports the sustainment of 162 Monocle licenses.
(FY 2026 Baseline: $31,158 thousand)

48) Special Operations Acquisition and Logistic Center Operations (SOAL) $1,071
+$1,071 thousand provides support for a complex advanced contracting system which is designed to leverage next-generation technology to streamline workflow, create efficiencies, and reduce cognitive and administrative load on contracting.
(FY 2026 Baseline: $3,285 thousand)

49) Special Operations Forces Support Activity (SOFSA).....$692
+$692 thousand maintains current lease costs with Bluegrass Station, Lexington, Kentucky.
(FY 2026 Baseline: $12,745 thousand)

50) Special Operations Information Technology Enterprise Contract (SITEC) $112,485
SITEC plays a critical role in USSOCOM mission success by rapidly deploying innovative IT solutions on a resilient global network to connect highly mobile SOF professionals with the data they need, 24 hours a day, 7 days per week. SITEC also leverages industry experts in cybersecurity, IT optimization/automation, managed network services, and system administration, while capitalizing on the latest technological advancements to ensure the interoperability of USSOCOM IT worldwide to adapt to the evolving threat and ever-changing strategic environment.

$98,901 thousand increase reflects the programmatic change as a result of the realignment of FY 2026 discretionary funding to mandatory (reconciliation) to enhance USSOCOM mission readiness.

$13,584 thousand increase fully funds the FY 2024 re-competed SITEC-3 contract costs for FY 2027, which transitioned from a manpower augmentation-based contract to a performance-based contract that consolidates critical applications across the USSOCOM enterprise.
(FY 2026 Baseline: $254,101 thousand)

51) Special Operations Mission Planning Environment (SOMPE) $1,272
+$1,058 thousand and 3+ contractor FTEs, provides tactical system engineering support for TSOC implementation of SOMPE equities within the SOF Enterprise Mission Environment (SEME) tactical mission network.

+$214 thousand increases the SOF Components support to tactical system engineering with automation of deployment pipelines.
(FY 2026 Baseline: $11,768 thousand)

52) Special Warfare Center and School (SWCS).....$225
The SWCS program funds critical equipment, equipment sustainment, communications, and SOF information technology.

+$225 thousand increases the lifecycle replacement of 4 pieces of classroom automation equipment (projector, 2 screens, and smart board)
(FY 2026 Baseline: $5,985 thousand)

53) Tactical Combat Casualty Care Equipment.....$140
+$140 thousand funds +1 contractor FTE for increased cybersecurity and safety.
(FY 2026 Baseline: $1,335 thousand)

54) Tactical Local Area Network (TACLAN).....$11,045
TACLAN extends C4I to tactical SOF locations to facilitate the timely exchange of information between deployed and garrison SOF HQs and main operating locations, while facilitating liaison and coordination with the regional combatant commands, military Services, DoW, and national agencies providing SOF operational support.

+$4,025 thousand supports the full life cycle replacement of 1,150 tactical workstations.

+$7,020 thousand purchases 189 software licenses to increase communication capabilities for voice, message, and video distribution.
(FY 2026 Baseline: $43,513 thousand)

55) Technical Applications Program Office (TAPO).....$876
+$876 thousand increase funds troubleshooting and repair efforts for survivability systems on 192 rotary wing aircraft.
(FY 2026 Baseline: $7,699 thousand)

56) Terrain Following/Terrain Avoidance Silent Knight Radar.....$141
+$141 thousand sustains program management office support requirement costs.
(FY 2026 Baseline: $33,849 thousand)

57) Unmanned Systems Autonomy & Interoperability.....$5,136
See Classified budget justification materials.
(FY 2026 Baseline: $37,319 thousand)

58) USASOC Realignment.....$610

+$610 thousand increase reflects the realignment of USASOC HQs operational funds from 1PLM-Management Headquarters to where it is more appropriately executed.
(FY 2026 Baseline: $0 thousand)

59) Zero Trust.....$3,145
+$3,145 thousand supports the sustainment costs of Zero Trust Identity, Credential, Access, Management (ICAM) tools.
(FY 2026 Baseline: $28,375 thousand)

9. Program Decreases.....$-83,830

a) Annualization of FY 2026 Program Decreases.....$0

b) One-Time FY 2026 Increases.....$-32,981

1) Collateral Equipment.....$-32,981
One-time decreases for O&M collateral equipment and C4I requirements for USSOCOM MILCON projects programmed for completion and occupation in FY 2026.

AFSOC - $3,180 thousand - FY 2026 Projects (1391 Estimates):
-$564 thousand Project Pre-Design;
-$484 thousand, 53953, SOF Composite Maintenance Facility, Kadena AB, Japan;
-$2,132 thousand, 03021, Hangar, Kadena AB, Japan.

MARSOC - $496 thousand, FY 2026 Projects (1391 Estimates):
-$496 thousand - Project Pre-Design.

NSWC - $12,518 thousand - FY 2026 Projects (1391 Estimates):
-$5,956 thousand, P821, SOF Operation Support Facility, Coronado, CA;
-$2,774 thousand, P823, Operations Support Facility, Coronado, CA;
-$2,400 thousand, 92352, Support Annex, Baumholder, GE;
-$1,388 thousand, Project Pre-Design.

SOCE - $2,560 thousand, 92243, SOF Operations Annex Baumholder, GE.

USASOC - $12,553 thousand - FY 2026 Projects (1391 Estimates):

-$5,508 thousand, 81907, SOF Rigging Facility, JB Lewis-McChord, WA;
-$3,644 thousand, 96409, SOF Company Operations Facilities, Baumholder, GE;
-$2,300 thousand, 92242, SOF Battalion Annex, Baumholder, GE;
-$1,101 thousand, Project Pre-Design.

USSOCOM HQs - $1,674 thousand - FY 2026 Projects (1391 Estimates):
-$839 thousand, 91977, Joint Parachute Rigging Facility, Baumholder, GE;
-$835 thousand, 92351, Communication Annex, Baumholder, GE.
(FY 2026 Baseline: $29,219 thousand)

c) Program Decreases in FY 2027 ..... $-50,849

1) 528th Special Operations Sustainment Brigade..... $-529
The 528th Sustainment Brigade sets operational-level logistics conditions to enable Army SOF and joint element missions by providing tailored logistics, signal, medical and intelligence support to the global SOF network. The program line funds the Advanced Technical Training services contract which provides advanced technical training for Special Operations communicators and advanced technical solutions for the command.

-$269 thousand reduces travel based on execution.
-$160 thousand defers laptop replacement to future years.
-$100 thousand reduces contracted services.
(FY 2026 Baseline: $4,981 thousand)

2) AFSOC Operations ..... $-1,955
Command and control mission systems provide Special Automated Mission Suite (SAMS)-enhanced situational awareness such as Link-16, Beyond Line of Sight (BLOS) Airborne Broadband (AB2), Mission Planning (MP), Electronic Flight Bag (EFB), and SAMS-Mission Enclave - hard-wired and wireless network for MP and EFB, as well as supporting exercises and deployments.

-$1,185 thousand discontinues cloud services supporting AFSOC's EFB program.

-$770 thousand reduces CERP for 962 EFBs.
(FY 2026 Baseline: $7,780 thousand)

3) Civilian Pay Adjustments..... $-10,315
The total decrease for civilian pay is -$10,315 thousand.

-$9,966 thousand reflects the decrease of the annual civilian salary for the 747 requested FTEs.

-$349 thousand reduces funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $104,678 thousand; +0 FTEs)

4) Dry Combat Submersible (DCS) .....$-612
DCS provides a surface-launched, dry, diver lock-in/lock-out vessel capable of inserting and extracting SOF and their payloads into denied areas. DCS performs clandestine missions while fielding affordable, undersea mobility capabilities in support of NDS priorities.

-$612 thousand reduces contract system engineering and operational testing support as a result of efficiencies.
(FY 2026 Baseline: $2,651 thousand)

5) Joint MISO Web Operations Center (JMWC).....$-2,300
-$2,300 thousand eliminates the office space leased from the U.S. Army Corps of Engineers supporting the USSOCOM's JMWC on MacDill AFB, FL.
(FY 2026 Baseline: $2,253 thousand)

6) Next Generation Loudspeakers Systems Family of Systems (NGLS/FOS).....$-864
NGLS/FOS are transportable audio broadcast systems that provide USSOCOM's psychological operations forces the ability to effectively reach target audiences with high quality transmissions in friendly, denied, hostile or deep territory.

-$864 thousand defers lifecycle sustainment management Capital Equipment Replacement Program (CERP) of 185 next generation loudspeaker dismounted systems.
(FY 2026 Baseline: $1,199 thousand)

7) NSWC FSRM .....$-459
-$459 thousand decrease based on fewer FSRM planned projects in FY 2027.
(FY 2026 Baseline: $10,222 thousand)

8) SOCCEUR FSRM .....$-3,673

-$3,673 thousand decrease based on fewer FSRM planned projects in FY 2027.
(FY 2026 Baseline: $3,597 thousand)

9) SOFC4I Realignment ..... $-9,176
-$9,176 thousand reflects the realignment of SOFC4I operations funding from O&M, DW to Procurement, DW (P-1, #69, Warrior Systems <$5M) where it is more appropriately executed.
(FY 2026 Baseline: $106,752 thousand)

10) Special Communications ..... $-1,994
-$1,994 thousand reduces the sustainment of 162 licenses.
(FY 2026 Baseline: $31,158 thousand)

11) Tactical Local Area Network (TACLAN) ..... $-6,239
TACLAN extends C4I to tactical SOF locations to facilitate the timely exchange of information between deployed and garrison SOF HQs, and main operating locations, while facilitating liaison and coordination with regional combat commands, Services, DoW, and national agencies concerning SOF operational support.

-$3,619 thousand defers the lifecycle replacement of 1,165 tactical workstations to future years.

-$2,620 thousand defers the renewal of 90 software licenses.
(FY 2026 Baseline: $43,854 thousand)

12) USASOC - 1st Special Fores Command ..... $-416
-$416 thousand defers the 1st Special Forces Command lifecycle replacement efforts.
(FY 2026 Baseline: $3,241 thousand)

13) USASOC FSRM ..... $-237
-$237 thousand decrease based on fewer FSRM planned projects in FY 2027.
(FY 2026 Baseline: $7,673 thousand)

14) USASOC HQs - Information Warfare Center (IWC) ..... $-4,070
The IWC is a CONUS-based, operationally focused, standing task force designed to support GCCs, TSOCs, and joint, interagency, inter-governmental, and multinational partners to identify, expose, exploit, and disrupt adversary influence campaigns. The IWC integrates cross functional capabilities from psychological operations, intelligence, cyber, IO, and other information-related capabilities to mass effects against global competitors in the information environment.

-$354 thousand and -4 contractor FTEs reduces cultural and linguist expertise.
-$1,659 thousand and -8 contractor FTEs reduces the data science team.
-$224 thousand and -2 contractor FTEs reduces counter threat finance support.
-$218 thousand eliminates 6 individual information warfare training courses that support 16 team members annually.
-$1,615 thousand reduces 19 software licenses.
(FY 2026 Baseline: $10,120 thousand)

15) USASOC Operations.....$-7,897
USASOC HQs Operations reductions:

-$1,798 thousand reduces the HQs lifecycle replacement efforts.
-$1,456 thousand reduces network costs associated with hardware.
-$3,630 thousand and -18 contractor FTEs reflect reduced SITEC contract support.
-$472 thousand reduces travel based on execution.
-$541 thousand reduces supplies and services.
(FY 2026 Baseline: $9,556 thousand)

16) USASOC SOF Multi-Purpose Canine Operations (SOFMPC).....$-113
The SOFMPC program capabilities include attack, apprehension, explosive detection of arms, ammunition, and various explosives, tracking specific individuals, and off-leash capabilities to cover large land swaths in search of improvised explosive devices and weapon caches. Also includes capabilities for target infiltration through various methods and platforms including vehicles, boats, and rotary wing.

-$113 thousand reflects the divestment of the basic handler course for trainers.
(FY 2026 Baseline: $1,221 thousand)

FY 2027 Budget Request $1,796,851

IV. Performance Criteria and Evaluation Summary:

	FY 2025 Enacted	FY 2026 Enacted	FY 2027 Request
Acquisition/Program Management	$120,352	$115,549	$164,503
Base Support	$24,175	$42,096	$49,699
Communications	$1,023,008	$1,035,427	$1,318,176
Operational Support	$266,833	$256,870	$264,473
Operational Support Total	**$1.434,368**	**$1,449,942**	**$1,796,851**

Description:

Funds SOF-peculiar support resources for communications, MILCON collateral equipment, FSRM projects, unit sustainment support, and acquisition program management. Funding provides civilian manpower authorizations, general contractor support, equipment sustainment, travel, and associated management costs. Communication capabilities support SOF IT enterprise-wide services, SOF worldwide command and control systems, deployable communications, airtime, circuits, and bandwidth. Facility projects include SOF enterprise-wide FSRM activities, and communication infrastructure. Acquisition program management includes sustainment, fielding, engineering, logistical, and operational test and evaluation support for SOF acquisition programs.

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Active Military End Strength (E/S) (Total)	**2,460**	**2,313**	**2,276**	**-147**	**-37**
Officer	578	576	550	-2	-26

Officer	2	2	2	0	0
Enlisted	2	1	1	-1	0
Civilian End Strength (Total)	**703**	**666**	**747**	**-37**	**81**
U.S. Direct Hire	703	666	747	-37	81
Total Direct Hire	**703**	**666**	**747**	**-37**	**81**
Active Military Average Strength (A/S) (Total)	**2,460**	**2,313**	**2,276**	**-147**	**-37**
Officer	578	576	550	-2	-26
Enlisted	1,882	1,737	1,726	-145	-11
Reservists on Full Time Active Duty (A/S) (Total)	**4**	**3**	**3**	**-1**	**0**
Officer	2	2	2	0	0
Enlisted	2	1	1	-1	0
Civilian FTEs (Total)	**703**	**666**	**747**	**-37**	**81**
U.S. Direct Hire	703	666	747	-37	81
Total Direct Hire	**703**	**666**	**747**	**-37**	**81**
Average Annual Civilian Salary ($ in thousands)	**175.3**	**157.2**	**143.2**	**-18.1**	**-13.9**
Contractor FTEs (Total)	**1,576**	**1,597**	**1,578**	**21**	**-19**

Personnel Summary Explanations:
USSOCOM military personnel are reported in Military Service Estimates. Military end strength numbers reflect authorized personnel.

Military End Strength net decrease of -37 officer personnel due to:
Technical corrections to align USSOCOM databases with OSW manpower databases.

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

Civilian net increase of +81 budgeted FTEs due to:
+72 FTEs reflects a realignment.
+4 FTEs reflects a realignment.
+3 FTEs for vendor threat.
+2 FTE reflects technical correction.

Contractor net decrease of -19 FTEs due to:
+2 FTEs supporting MARSOC HQs operations
+3 FTEs supporting the SOMPE program.
+5 FTEs supporting FSOV program.
+2 FTEs supporting MLE Program.
+1 FTE supporting TCCCE program.
-14 FTEs supporting the USASOC-IWC program.
-18 FTEs supporting USASOC HQs operations.

Fiscal Year 2027 Budget Estimates

Theater Forces

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Theater Forces

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Theater Forces	3,408,381	121,456	-192,775	3,337,062	30,979	327,818	3,695,859

I. Description of Operations Financed:

Theater Forces - Provides for the USAJFKSWCS, the U.S. Army Special Warfare Center Medical Training Facility, the NSWCEN, the MSOS, the U.S. Air Force Special Operations Air Warfare Center (SOAWC), and the SOF Language Office. The schools provide recruitment and training in both basic and advanced SOF skills and operations and educate American and Allied personnel in geopolitical and military aspects of joint special operations. Funding also provides SOF language training to produce language proficient personnel.

Supports Naval Special Warfare Groups; Special Boat Teams; SEAL Delivery Vehicle Teams; and other maritime operations. Includes Active and Reserve Navy manpower authorizations, SOF-peculiar and support equipment, necessary facilities, and associated costs specifically identified to combatant and support craft assigned to the NSWC.

Includes manpower authorizations, SOF-peculiar and support equipment, necessary SOF-peculiar facilities and other operational costs specifically associated with: SOF Active Army Rangers; Active and National Guard Army special forces activities; Active Army PSYOP units; Active and Reserve Army civil affairs units; Naval Special Warfare groups, units, teams, and detachments; Marine Corps special operations units and teams; Active and Reserve SOF units and detachments; 24th SOW; Air Force 720th and 724th STGs; STSs; combat control squadrons; and SOF pararescue forces. Also included is support for the TSOCs. H/CA activities are carried out in conjunction with authorized military operations, subject to approval by the Secretary of State and Secretary of War. These activities promote security and foreign policy interests of the U.S. and the host nation and allow SOF to demonstrate commitment to priority partners supporting contingencies; H/CA activities are a function of Title 10, U.S. Code, section 401.

Provides for the conduct of, or participation in, strategic mobility, Commander-In-Chief directed, and Joint Chiefs of Staff exercises participation by SOF and force related training through JCET events sponsored by the Commander, USSOCOM in support of regional Theater Commanders and the military Services. Includes USSOCOM HQs and/or Component manpower authorizations, SOF-peculiar and support equipment, necessary facilities, and the associated costs specifically identified and measurable to the conduct of SOF-related training.

Supports 5 active SOWs to include the 1st SOW, Hurlburt Field, FL; 492nd SOW Hurlburt Field, FL; 352nd SOW, RAF Mildenhall, UK; 27th SOW, Cannon AFB, NM; 58th SOW, Kirtland AFB, NM; and the 353rd SOG, Kadena AB Japan and their associated squadrons. Costs are also included for: 919th Special Operations Reserve Wing located at Duke Field, FL; 193rd Special Operations Air National Guard Wing, Harrisburg, PA; 137th Air National Guard Wing, Oklahoma City, OK; USASOAC; 160th SOAR, Ft Campbell, KY, Hunter Army Airfield, GA, and Ft Lewis, WA. Funding supports flying hours, SOF-peculiar and support equipment, initial qualification, and recurring training of aircrews in SOF aircraft operations and

tactics. Costs specifically identified and attributable to SOF active tactical aviation operational units, organizations and special operation wings and squadrons are also included.

The FY 2027 request for 1PLR – Theater Forces includes $3,695,859 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $3,695,859 thousand.

The FY 2026 spend plan for 1PLR – Theater Forces includes $3,337,062 thousand of discretionary and $353,115 thousand of mandatory (reconciliation) for a total of $3,390,177 thousand. The mandatory funds enhance Special Operations Command equipment and readiness.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	1,180	1,058	1,145
Army	830	796	800
Marine Corps	122	106	116
Navy	744	694	725
Space Force	0	0	0
Total	**2,876**	**2,654**	**2,786**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	12,634	14,650	14,650
Army	25,660	29,778	29,162
Marine Corps	3,189	3,189	3,189
Navy	8,738	8,777	8,847
Space Force	17	19	18
Total	**50,238**	**56,413**	**55,866**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**2,222**	**2,021**	**2,137**

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action

6. Price Change	$30,979
7. Functional Transfers	$0
a) Transfers In	$0
b) Transfers Out	$0
8. Program Increases	$447,729
a) Annualization of New FY 2026 Program	$0
b) One-Time FY 2027 Increases	$0
c) Program Growth in FY 2027	$447,729
1) Airlift	$36,969

Reflects the increase to USSOCOM's centrally managed airlift program based on execution, planned force rotations, and operational demands.
(FY 2026 Baseline: $187,224 thousand)

2) Civilian Pay Adjustments.....$55,250
The total increase for civilian pay is +$55,250 thousand and +243 civilian FTEs.

+$35,000 thousand and +243 civilian FTEs. In FY 2026, USSOCOM anticipated not executing 243 FTEs based on expected vacancies and hiring timelines. Due to aggressive USSOCOM hiring efforts, USSOCOM anticipates having all of these FTEs on board beginning in FY 2027.

+$18,237 thousand reflects the increase of funding required to resource the civilian FTEs in this SAG based on FY 2026 actual rates to date and planned FY 2027 civilian pay rates.

+$2,013 thousand increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $383,536 thousand; +243 FTEs)

3) Combatant Craft Assault (CCA).....$162
The CCA is a small surface craft that is capable of insertion and extraction in shallow-water operations. Funds support deployment travel, training and supplies for theater driven operational requirements.

Increase funds the mission related travel and training in support of operations.
(FY 2026 Baseline: $10,975 thousand)

4) Flying Hour Program (FHP).....$42,448
The FY 2027 flying hour program is $770,898 thousand and has a total programmatic increase of $42,448 thousand. The overall program increase is primarily a result of the CV-22 program’s prop-rotor gear box (PRGB) issues and a 22 percent increase in MH-47G US Army working capital fund depot level reparable price along with a SOF commercial parts contract increase for the Advanced Threat Warning (ATW) system. Additional factors impacting the change in the flying hour program are outlined by platform in Part IV.
(FY 2026 Baseline: $711,355 thousand)

5) Integrated Mission Assurance $12,862
See Classified budget justification materials.
(FY 2026 Baseline: $0 thousand)

6) Joint Combined Exchange Training (JCET) $14,854
JCET events are used to train USSOCOM SOF by improving readiness through accomplishing joint and/or combined training events with friendly foreign forces at overseas locations, improving SOF unconventional warfare and foreign internal defense core mission tasks.

Increase reflects the number of JCET events being adjusted from 95 in FY 2026 to 133 in FY 2027. The number of events is subject to change in the year of execution based on prioritization, availability of personnel, and partner nation availability.
(FY 2026 Baseline: $42,216 thousand)

7) Joint Task Force Special Reconnaissance and Enabling Command (JTF-SREC) $1,109
See Classified budget justification materials.
(FY 2026 Baseline: $9,864 thousand)

8) Marine Forces Support Operations $2,209
Increase funds deployment travel to support increased SOTF mission requirements within the USINDOPACOM and USAFRICOM AORs.
(FY 2026 Baseline: $53,518 thousand)

9) Naval Special Warfare Group One (NSWG-1) $1,377
NSWG-1 is headquartered in Coronado, California and organizes mans, trains, equips, supports and deploys forces to conduct full-spectrum special operations across a full range of political and operational environments, with primacy in the maritime domain, in support of TSOC and GCC objectives in the USCENTCOM and USINDOPACOM AORs. Increase supports training and mission related travel, supplies, services, and equipment to support activities in the USINDOPACOM AOR.

+$993 thousand and +4 contractor FTEs increase training coordinators contract support.

+$384 thousand increases the non-FTE contracted services.
(FY 2026 Baseline: $62,259 thousand)

10) NSW's Planning, Innovation, Technology, and Strategy Operations $3,680
Program funds requirements issued from NSW CN5, N9, and Command Technology Officer (CTO). N5 responsibilities include formalized great power competition planning, engagement, doctrine, experimentation,

and wargaming resources. N9 conducts ideation, refinement, and detailed analysis for NAVSOF's future operating environment (FOE), new future operational concepts and identifies capability gaps and opportunities following doctrinal process. The CTO accelerates digital transformation and modernization, cross-functional design, reduces redundancies and inefficiencies, facilitates rapid software innovation and operational deployment of software and architecture to ensure UxS interoperability and autonomy, and aligns NSW with Deputy Secretary of War guidance on data and interoperability.

Funds +8 contractor FTEs in highly technical fields in software engineering, artificial intelligence, and machine learning to support technical initiatives and maintain the CTO Human Weapons System (HWS) integration.
(FY 2026 Baseline: $2,581 thousand)

11) Preservation of the Force and Family (POTFF) $1,646
POTFF optimizes and sustains SOF mission readiness, longevity, and performance through integrated and holistic human performance programs designed to strengthen the force and family.

+$872 thousand and +6 contractor FTEs increase the POTFF behavioral health workforce capabilities at SOCEUR (1), JSOC (1), USASOC (2), and NSW (2).

+$633 thousand and +3 contractor FTEs increase the POTFF physical and human performance capabilities at USSOCOM HQs.

+$88 thousand increases the POTFF family program based on projected activities.

+$41 thousand increases the POTFF cognitive performance capabilities at USSOCOM HQs.

+$12 thousand increases the POTFF spiritual performance programs for education and training of religious support teams.
(FY 2026 Baseline: $124,510 thousand)

12) SOF Autonomous Warfare Center $50,565
Establishes a baseline for the SOF Autonomous Warfare Center. See Classified budget justification materials.
(FY 2026 Baseline: $0 thousand)

13) Sonic Spear $42,171
Sonic Spear will stress global integration of the force across multiple levels of command and control in while conducting Joint All Domain Operations with select CCMDs and TSOCs to execute a campaign of exercises

and training events that prepare the Joint Force for a transregional, multi-functional and multi-domain conflict against near-peer adversaries. Sonic Spear operationalizes USSOCOM's contribution to the Joint Warfighting Concept (JWC) through integrated events with CCMDs, Services, and Interagency partners; priorities are to adapt Joint Force readiness to the changing global operating environment across all domains, exercise options for rapid decision making in global conflict, identify solutions for rapid mobilization and deployment of forces, expand integration and interoperability among the interagency and Allies and Partners.

+$12,500 thousand funds +28 contractor FTEs for exercise design in highly technical fields of software engineering, artificial intelligence, and machine learning to support technical initiatives and maintain the CTO Human Weapons System (HWS) integration.
+$12,171 thousand for travel.
+$4,700 thousand in non-GSA maritime vessel and aircraft rental.
+$4,000 thousand in commercial transportation.
+$4,000 thousand for professional support level of services.
+$3,370 thousand for inter-government range costs.
+$1,170 thousand non-GSA facilities rental.
+$260 thousand for equipment purchases.
(FY 2026 Baseline: $0 thousand)

14) Theater Special Operations Commands (TSOC).....$37,014
TSOCs perform continuous command and control of special operations in support of GCC steady-state requirements and national objectives. As a deployable operational headquarters, TSOCs are the regional hubs of the Global SOF network.

+$17,349 thousand increase funds SOCEUR operations. See Classified budget justification materials.
(FY 2026 Baseline: $93,255 thousand)

+$10,250 thousand funds two SOCNORTH manpower contracts to enable increased operations.
+$4,325 thousand funds +25 contractor FTEs in highly technical fields including: SIGINT (5 FTEs), HUMINT (3 FTEs), GEOINT (3 FTEs), OSINT (3 FTEs), all source analysis (9 FTEs), project leads (1 FTE), and counter threat finance (1 FTE) in support of SOCNORTH Cryptologic Support Element (CSE), Counter Threat Finance (CTF), and Joint Intelligence Support Element (JISE) capabilities.
+$5,925 thousand funds +27 contractor FTEs in support of multiple staff functions to include: executive administration functions (5 FTEs), logistics operations planning and support (4 FTEs), operations analysis (8 FTEs), strategic analysis and planning (8 FTEs), financial audit (1 FTE) and public affairs (1 FTE).
(FY 2026 Baseline: $5,468 thousand)

+$9,415 thousand increase funds +59 Contractor FTEs to fill SOCPAC's military and civilian authorization gaps supporting operations and technical analysis. This includes operations, logistics, and strategic planning (21 FTEs), exercise planning and support (5 FTEs), IT and Enterprise Knowledge Management (EKM) (17 FTEs), security analysis and support (9 FTEs), and financial audit and accountability (6 FTEs), unit armorer and weapons maintenance expert (1 FTE).
(FY 2026 Baseline: $24,812 thousand)

15) Title 10 U.S. Code, Section 127d Authority $29,600
Support of Special Operations for Irregular Warfare. See Classified budget justification materials.
(FY 2026 Baseline: $20,000 thousand)

16) Title 10 U.S. Code, Section 127e Authority $14,022
Support of Special Operations to Combat Terrorism. See Classified budget justification materials.
(FY 2026 Baseline: $53,515 thousand)

17) Title 10 U.S. Code, Section 127f Authority $5,045
Clandestine Operational Preparation of the Environment (COPE) and Non-Conventional Assisted Recovery (NAR). See Classified budget justification materials.
(FY 2026 Baseline: $5,547 thousand)

18) USSOCOM Operational Deployments $96,500
Increase addresses the heightened operational demand by enhancing core capabilities to bolster the Department’s joint combat force’s warrior lethality in campaigning and exercise training within the USINDOPACOM, USSOUTHCOM, and USNORTHCOM AORs by expanding global presence and power projection to defend the Homeland and deter external threats.
(FY 2026 Baseline: $0 thousand)

19) Wet Combat Submersible Operations.....$246
Wet Combat Submersible Operations provides support and sustainment for the SEAL Delivery Vehicle, the Dry Deck Shelter and the Shallow Water Combat Submersible.

Funds travel costs for additional planned force generation activities.
(FY 2026 Baseline: $36,714 thousand)

9. Program Decreases .....$-119,911

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-119,911

1) 10th Special Forces Group.....$-649
The 10th Special Forces Group is headquartered at Fort Carson, Colorado and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USEUCOM AOR.

-$649 thousand reduces travel by limiting non-critical temporary duty travel requirements (non-training; non-operational) by leveraging VTC and online meeting communication applications and finding efficiencies in operational and persistent rotations in the USEUCOM AOR.
(FY 2026 Baseline: $24,177 thousand)

2) 1st Special Forces Command .....$-819
The 1st Special Forces Command is headquartered at Fort Bragg, North Carolina and organizes, equips, trains, and conducts full-spectrum special operations in support of the USSOCOM mission.

Reduces non-critical temporary duty travel requirements (non-training; non-operational), to include site visits, conferences, and symposiums by leveraging VTC and online meeting communication applications.
(FY 2026 Baseline: $75,537 thousand)

3) 1st Special Forces Group.....$-579
The 1st Special Forces Group is headquartered at Joint Base Lewis–McChord, Washington and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USINDOPACOM AOR.

Reduces non-critical temporary duty travel requirements (non-training; non-operational), to include site visits, conferences, and symposiums by leveraging VTC and online meeting communication applications.
(FY 2026 Baseline: $20,365 thousand)

4) 3rd Special Forces Group .....$-726

The 3rd Special Forces Group is headquartered at Fort Bragg, North Carolina and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USAFRICOM AOR.

Decrease reduces non-critical temporary duty travel requirements (non-training; non-operational), to include site visits, conferences, and symposiums by leveraging VTC and online meeting communication applications.
(FY 2026 Baseline: $15,462 thousand)

5) 4th Psychological Operations Group.....$-6,153
The 4th Psychological Operations Group plans, develops, deploys and conducts civil affairs and psychological operations in support of the USSOCOM mission.

-$4,756 thousand reduction reflects cost efficiencies associated with aligning Psychological Battalions with active-duty Special Forces Groups (SFG) based on AOR regional alignment requirements, consolidating large scale training activities to include external evaluations and collective training events with the associated SFG, and reducing duplicative training events.

-$1,397 thousand reduction reflects additional travel efficiencies.
(FY 2026 Baseline: $6,485 thousand)

6) 5th Special Forces Group.....$-649
The 5th Special Forces Group is headquartered at Fort Campbell, Kentucky and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance supporting primarily the USCENTCOM AOR.

Decrease reduces non-critical temporary duty travel requirements (non-training; non-operational), to include site visits, conferences, and symposiums by leveraging VTC and online meeting communication applications.
(FY 2026 Baseline: $4,941 thousand)

7) 75th Ranger Regiment.....$-3,082
The 75th Ranger Regiment is headquartered in Fort Benning, Georgia and plans, trains, equips and deploys to conduct special missions in support of the USSOCOM mission.

-$1,384 thousand reduces non-critical temporary duty travel requirements (non-training; non-operational), to include site visits, conferences, and symposiums by leveraging VTC and online meeting communication applications.

-$650 thousand eliminates long-range one-way attack UAS training from the 75th Ranger Regiment's Military Intelligence Battalion.

-$600 thousand reduces half of the medical supplies normally utilized for combat operations and pre-deployment training.

-$448 thousand removes 80 systems of small unmanned aerial systems (sUAS) across the platoon and company levels from Ranger Battalions.
(FY 2026 Baseline: $38,660 thousand)

8) 7th Special Forces Group.....$-604
The 7th Special Forces Group is headquartered at Eglin Air Force Base, Florida and conducts unconventional warfare, foreign internal defense, direct action, counterinsurgency, special reconnaissance, counterterrorism, information operations, counterproliferation of weapons of mass destruction and security force assistance primarily supporting the USSOUTHCOM AOR.

Decrease reduces non-critical temporary duty travel requirements (non-training; non-operational), to include site visits, conferences, and symposiums through the use of VTC and online meeting communication applications.
(FY 2026 Baseline: $19,395 thousand)

9) AFSOC Operations .....$-18,794
Eliminates participation in 3 USEUCOM, 3 USNORTHCOM, 1 USSOUTHCOM, 1 USAFRICOM, 1 USCENTCOM, and 1 USINDOPACOM theater specific combat mission readiness and certification, verification, and validation events.
(FY 2026 Baseline: $91,186 thousand)

10) Army Special Operations Aviation Command (ARSOAC).....$-2,208
This contract efficiency eliminates one class on the special operations aviation training contract with an end date that overlaps fiscal years. Contract provides flight and combat skills instructors that teach special operations aviation unique skillset training.
(FY 2026 Baseline: $60,695 thousand)

11) Artificial Intelligence Realignment .....$-4,447

Decrease reflects the realignment of artificial intelligence funding to the 1PLV-Operations Support SAG where it is more appropriately executed.
(FY 2026 Baseline: $4,432 thousand)

12) Civil Affairs Battalion .....$-3,193
Decrease reflects cost efficiencies associated with aligning Psychological Battalions with active-duty SFGs based on AOR regional alignment requirements, consolidating large scale training activities to include external evaluations and collective training events with the associated SFG, and reducing duplicative training events.
(FY 2026 Baseline: $10,026 thousand)

13) Civilian Pay Adjustments.....$-17,634
The total decrease for civilian pay is -$17,634 thousand and -111 civilian FTEs.

-$15,366 thousand and -105 civilian FTEs realignment from the 1PLR-Theater Forces SAG. This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and OSW databases to properly align authorizations with the correct PEC.

-$1,390 thousand reduces funding to align with the adjusted Federal Employees Retirement System (FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.

-$878 thousand and -6 civilian FTEs. Decrease reflects the FY 2027 reduction of FTEs made as part of strategic tradeoff decisions to further invest and align resources to sustain and strengthen deterrence, modernize capabilities, and build enduring advantages.
(FY 2026 Baseline: $383,536 thousand; -111 FTEs)

14) Combat Craft Riverine (CCR).....$-681
The CCR inserts and extracts Special Operations Forces in river and near-shore environments. The craft can navigate in restricted and shallow rivers, estuaries, and bays.

Reduces travel associated with CCR training with partner forces in USEUCOM AOR.
(FY 2026 Baseline: $4,459 thousand)

15) Combatant Craft Medium (CCM).....$-265
The CCM is a semi-enclosed, multi-mission craft that provides the range and payload necessary to meet global NSW missions.

Reduces mission related travel and training in support of special operations.
(FY 2026 Baseline: $18,617 thousand)

16) Deployment Cell Realignment.....$-5,844
See Classified budget justification materials.
(FY 2026 Baseline: $5,136 thousand)

17) Marine Raiders Regiment.....$-1,643
Decrease reflects the realignment of MARSOC C4I funding to the 1PLV-Operational Support SAG where it is more appropriately executed.
(FY 2026 Baseline: $36,144 thousand)

18) Naval Special Warfare Center (NSWCEN) .....$-3,789
NSWCEN is NSWC's schoolhouse where candidates are selected, trained, and qualified to become SEALs and special warfare combat crewmen and is where advanced individuals skills training is provided to the NSW SOF community.

Reduces course consumable items related to training based on prior year actuals.
(FY 2026 Baseline: $35,699 thousand)

19) Naval Special Warfare Group Two (NSWG-2).....$-658
NSWG-2 is headquartered in Little Creek, Virginia and organizes, mans, trains, equips, supports and deploys forces to conduct full-spectrum special operations across a full range of political and operational environments, with primacy in the maritime domain, in support of Theater Special Operations and Geographic Combatant Command objectives in the USEUCOM Area of Responsibility. Increase supports training and mission related travel, supplies, and equipment to support the USEUCOM AOR.

-$391 thousand decreases deployment travel.

-$267 thousand decreases supplies and materials.
(FY 2026 Baseline: $62,597 thousand)

20) NSW Continuum of Leadership Development (CLD).....$-179
CLD is a comprehensive feedback appraisal program designed to record, monitor, assess, and facilitate development and improvement of individual performance and character throughout every phase of NSW operator's training and career progression.

Reduces -1 contractor FTE supporting completion of a Government Off the Shelf (GOTS) system transition.

(FY 2026 Baseline: $2,497 thousand)

21) NSW Contracted Training Program.....$-338
The Contracted Training Program provides NSW operators and technicians with pre-deployment training skills with realistic, potentially life-saving training in maritime, open terrain and urban environment. The program supports a wide range of enterprise training requirements from documentation and curriculum control to overall programmatic management.

Reduces a non-FTE related contracted service for the contested high end threat analysis program.
(FY 2026 Baseline: $8,509 thousand)

22) NSW Force Protection Program.....$-1,384
Force Protection program is comprised of two parts: Integrated Electronic Security System (IESS) and Knowledge Management (KM). IESS provides technical services for the life-cycle support of systems across its enterprise. The KM program is responsible for matters pertaining to knowledge management strategy, policy, processes, programs, and resources for the NSW enterprise. Decrease reduces contract support services for enterprise KM and IESS.

-$716 thousand and -4 contractor FTEs reduces the contract for KM support services at Headquarters supporting database analyst, knowledge system specialist, and business intelligence.

-$668 thousand reduces the contract for IESS services.
(FY 2026 Baseline: $4,261 thousand)

23) NSW Range .....$-1,294
The NSW Range Program supports range operations and range sustainment/maintenance, restoration and modernization. The NSW Range Program delivers NSW operators live-fire ranges and training areas designed/built to meet NSW operator and NSW weapon training requirements.

-$964 thousand and -7 contractor FTEs reduces contract for range maintenance and support services and contractor travel cost.

-$330 thousand reduces consumables related to range maintenance.
(FY 2026 Baseline: $16,499 thousand)

24) Special Warfare Center.....$-2,653

Decrease reflects the realignment of Joint Exploitation Training Center (JETC) program funding to the 1PLU-Intelligence SAG where it is more appropriately executed.
(FY 2026 Baseline: $38,038 thousand)

25) Surface Support Vessels (SSV) .....$-237
NSWC SSVs provide safety and administrative functions for undersea training, certification operations, and mission rehearsals necessary for conducting NSW undersea operations.

This contract efficiency reduces remotely operated vehicle operations support services.
(FY 2026 Baseline: $41,389 thousand)

26) Sustainment Brigade .....$-11,919
Decrease reflects the realignment of USASOC PED program funding to the 1PLU-Intelligence SAG where it is more appropriately executed.
(FY 2026 Baseline: $11,920 thousand)

27) Theater Special Operations Commands (TSOC).....$-15,711
TSOCs perform continuous command and control of special operations in support of GCC steady-state requirements and national objectives. As a deployable operational headquarters, TSOCs are the regional hubs of the Global SOF network.

-$1,480 thousand reduces SOCAFRICA funding of staff operations, supplies, and travel.
(FY 2026 Baseline: $38,850 thousand)

-$11,052 thousand reduces SOCCENT operations.

-$5,618 thousand and -11 contractor FTEs supporting Combined Special Operations Joint Task Force (CSOJTF) operations. Reduces information warfare capabilities to include (-3) regional assessment and messaging support efforts; a reduction of (-8) cultural advisors supporting local social, cultural, and linguistic nuances for forces and leadership, and reduces the Joint Network Engineering and Emerging Operations (JNEEO) program reducing survey capabilities across the CENTCOM area of responsibility.

-$2,086 thousand and -7 contractor FTEs reduces the environmental analysis program support contract For the Joint Operations Cell (JOC) and functional support to exercises, logistics, and finance disciplines.

-$1,188 thousand and -4 contractor FTEs reduces property book officer contract supporting inventory management.

-$1,424 thousand and -2 contractor FTEs reducing staffing levels for the joint program advisors (JPA) tasked with case officer mentorship, case management, and lead development.

-$736 reduces mission leader exercises expenses including travel, housing leases, and training

materials.
(FY 2026 Baseline: $93,469 thousand)

-$813 thousand reduces SOCKOR operations.
-$798 thousand and -3 contractor FTEs to service contract support.
-$15 thousand reduces travel for key leader engagement efforts with SOF FVEY partners.
(FY 2026 Baseline: $9,434 thousand)

-$2,366 thousand reduces SOCSOUTH operations.
-$496 thousand and -5 contractor FTEs reducing a service contract for support functions.
-$1,396 thousand reduces staff operations for readiness requirements, logistical and maintenance requirements, and procurement of lifecycle communications equipment.
-$474 thousand reduces travel for key leader engagement efforts with partner nations.
(FY 2026 Baseline: $27,039 thousand)

28) U.S Army John F. Kennedy Special Warfare Center and School (USAJFKSWCS) .....$-700
The USAJFKSWCS provides training for all U.S. Army civil affairs, psychological operations, and special forces doctrine.
Decrease reflects the realignment of USASOC's Special Warfare SIGINT course at the John F. Kennedy Special Warfare Center and School funding to the 1PLU-Intelligence SAG where it is more appropriately executed.
(FY 2026 Baseline: $38,078 thousand)

29) USSOCOM Headquarters J10 Directorate.....$-12,576
Reduction reflects the disestablishment of the J10 directorate, directed by CDRUSSOCOM. The functions of the J10 directorate are transferred to USSOCOM Washington Office and the SOF peculiar CBRN defense train and equip functions to the complementary Directorates within the Command.
(FY 2026 Baseline: $11,940 thousand)

30) Warrior Rehabilitation Program (WRP) .....$-503
Reduces enterprise-wide sustainment based on projected requirements to replace equipment.
(FY 2026 Baseline: $18,229 thousand)

FY 2027 Budget Request $3,695,859

IV. Performance Criteria and Evaluation Summary:

Table I – USSOCOM Preservation of the Force and Family Lines of Effort

Lines of Effort	FY 2025 Actuals ($K)	FY 2026 Enacted ($K)	FY 2027 Request ($K)
Human Performance	63,672	64,240	66,158
Behavioral Health	19,520	24,857	26,402
Cognitive Performance	11,110	8,856	9,074
Family Readiness	7,443	7,300	7,358
Spiritual Program	865	1,028	1,061
Warrior Rehabilitation	17,659	18,229	18,092
Total	**120,269**	**124,510**	**128,145**

Lines of Effort / Domains Descriptions:

Human Performance (Physical Domain): Enhances SOF mission readiness and operational availability through sports medicine and strength and conditioning to optimize physical training, mitigate injury, and increase longevity.

Behavioral Health (Psychological Domain): Maximizes the psychological performance, health, and resilience of SOF to meet operational demands now and in the future.

Cognitive Performance (Cognitive Domain): Enhances, monitors, advances, and protects the cognitive health and performance of the SOF Service member to meet operational demands now and in the future.

Family Readiness (Social and Family Domain): Strengthens the social and family health and resilience of SOF service members and their families to encourage strong networks to support SOF operational demands.

Spiritual Performance (Spiritual Domain): Provides, connects, strengthens, and assesses the spirituality of the SOF service member to strengthen their core spiritual, ethical, and moral beliefs and values.

Warrior Rehabilitation: Provides comprehensive support to SOF personnel who have sustained physical, psychological, or emotional injuries during their service.

Flying Hours Discussion of Changes from FY 2025 to FY 2026:

The FY 2027 flying hour program is $770,898 thousand and has a total programmatic increase of $42,448 thousand. The overall program increase is primarily a result of the CV-22 program's prop-rotor gear box (PRGB) issues and a 22 percent increase in the MH-47G US Army working capital fund depot level reparable price along with a SOF commercial parts contract increase for the Advanced Threat Warning (ATW) system. Additional factors impacting the change in the flying hour program cost changes are outlined by platform below.

+$1,723 thousand - The AC-130J Cost Per Flying Hour (CPFH) rate increases by $17 from $6,503 in FY 2026 to $6,520 in FY 2027 primarily due to increased annual consumption of main landing gear tires and headset microphones coupled with a 14 percent price increase for both items. The hours increased by 312 from 5,779 in FY 2026 to 6,091 in FY 2027 due to refinement of aircrew training requirements as well as an influx of new copilots requiring training.

+$34,672 thousand - The CV-22B CPFH rate increases by $5,807 from $35,896 in FY 2026 to $41,703 in FY 2027 due to an eight percent overall price increase for rotor system parts comprised of rotor blades, PRGB, input quill assemblies, and swash plates. Most notably, the input quill assembly (which houses the clutch assembly) price increases by 11 percent. PRGB assemblies as well as rotor blades increased by eight percent, which increased the annual costs by $250 thousand per airframe in FY 2027. The hours increase by 31 from 6,162 in FY 2026 to 6,193 in FY 2027 due to combined changes in updated aircrew event training tables due to a backlog of students resulting from the standdown in FY 2024.

+$640 thousand - The MC-130J CPFH rate increases by $558 from $7,382 in FY 2026 to $7,940 in FY 2027 due to an increase in avionics parts costs. The Large Aircraft Infrared Countermeasures (LAIRCM) transmitter price increased by 25 percent from $171 thousand to $214 thousand and consumption increased from 23 to 68. Additionally, receiver-transmitter prices increased by 12 percent from $69 thousand to $77 thousand with annual consumption increasing from 27 to 52. The hours decreased by 969 from 17,448 in FY 2026 to 16,479 in FY 2027 due to increased use of simulators for Aircrew Proficiency and a change in maintenance formulas.

-$1,354 thousand – There are no FY 2027 program costs for the EC-130J that was divested.

+$12,872 thousand - The A/MH-6M CPFH rate increases by $7 from $3,505 in FY 2026 to $3,512 in FY 2027 staying consistent with forecasted rates. The A/MH-6M hours increase by 3,857 from 5,081 in FY 2026 to 8,938 in FY 2027 due to a change in the transition plan from A/MH-6Ms to A/MH-6Rs.

-$15,584 thousand - The A/MH-6R CPFH rate increases by $46 from $3,632 in FY 2026 to $3,678 in FY 2027 staying consistent with forecasted rates as described above. The A/MH-6R hours decrease by 4,104 from 4,958 in FY 2026 to 854 in FY 2027 due to a change in the transition plan from A/MH-6Ms to A/MH-6Rs.

+$9,492 thousand - The MH-47G CPFH rate increases by $1,075 from $10,407 in FY 2026 to $11,482 in FY 2027 due to increased average annual consumption of landing gear wheels from 18 to 24; Army working capital fund price increases in FY 2027 by 51 percent for rotary wing blades, 25 percent for transmissions; and SOF commercial parts contract increase by 132 percent for the Advanced Threat Warning (ATW) system. The hours remain consistent, decreasing slightly by 7 from 14,512 in FY 2026 to 14,505 in FY 2027.

-$13 thousand - The MH-60M CPFH rate increases by $394 from $8,056 in FY 2026 to $8,450 in FY 2027 due to increased average annual consumption of cylinder assemblies from 7 to 19, hydraulic pumps from 8 to 17, and turbine engine starters from 3 to 15; and Army price increases in FY 2027 by 200 percent for control indicators, and 38 percent for flutter dampeners; and SOF commercial parts increase by 132 percent for the ATW system. The hours decrease by 146 from 16,832 in FY 2026 to 16,686 in FY 2027 due to refinements in aircrew training iterations.

Table IV – Aircraft Inventory

Aircraft Type Model Series (TMS)	FY 2025	FY 2026	FY 2027

Total Direct Hire	**2,876**	**2,654**	**2,786**	**-222**	**132**
Average Annual Civilian Salary ($ in thousands)	**155.3**	**144.5**	**151.5**	**-10.8**	**7.0**
Contractor FTEs (Total)	**2,222**	**2,021**	**2,137**	**-201**	**116**

Personnel Summary Explanations:

USSOCOM military personnel are reported in Military Service Estimates. Military end strength numbers reflect authorized personnel.

Military End Strength net decrease of -540 personnel (+16 Officers and -556 Enlisted) due to:
Continued force modernization efforts and technical corrections to align USSOCOM with OSW databases.

Reservists on Full Time Active Duty end Strength net decrease of -1 due to:
Continued force modernization efforts and technical corrections to align USSOCOM with OSW databases.

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

Civilian Authorized FTE net increase of +132 FTEs due to:
+243 FTEs for expected execution.
-105 FTEs for realignment.

-6 FTEs for modernization.

Contractor net increase of +116 FTEs due to:
+8 FTEs supporting NSW's highly technical fields in software engineering, artificial intelligence and machine learning to support technical initiatives and maintain the CTO Human Weapons System (HWS) integration.
+4 FTEs supporting NSW Group 1 training coordinators contract support.

+3 FTEs supporting POTFF physical and human performance capabilities at USSOCOM HQS.
+6 FTEs supporting the POTFF behavioral health workforce capabilities at SOCEUR (1), JSOC (1), USASOC (2), NSW (2).
+28 FTEs supporting Sonic Spear's exercise in highly technical fields.
+25 FTEs supporting SOCNORTH's SIGINT (5), HUMINT (3), GEOINT (3), OSINT (3), All source analyst (9), project Leads (1), Counter Threat Finance (1).
+27 FTEs supporting SOCNORTH's staff functions including executive administration functions (5), logistics operations planning & support (4), operations analysis (8), strategic analysis & planning (8), financial audit (1) and public affairs (1).
+59 FTEs supporting SOCPAC's operations, logistics, and strategic planning (21), exercise planning and support (5), IT and Enterprise Knowledge Management (17), security analysis and support (9), and financial audit and accountability (6), unit armorer and weapons maintenance expert (1).
-5 FTEs reducing SOCSOUTH’s service contract for support functions.
-1 FTE supporting Government Off the Shelf (GOTS) system transition for NSW CLD operations.

-4 FTEs providing contract support services for NSW's enterprise KM support services for database analyst, knowledge system specialist, and business intelligence.
-7 FTEs supporting NSW's range maintenance and support services.
-3 FTEs supporting SOCKOR’s service contract support.
-2 FTEs supporting SOCCENT's JPAs tasked with case officer mentorship, case management, and lead development.
-11 FTEs supporting SOCCENT's CSOJTF-C operations support for threat, CISR, exercises, operations, and information services contract.
-4 FTEs reduces property book officer contract supporting inventory management.
-7 FTEs reduces environmental analysis program support contract supporting JOC operations and functional support to exercises, logistics, and finance disciplines.

VI. OP 32 Line Items as Applicable (Dollars in thousands):

Fiscal Year 2027 Budget Estimates

Professional Development Education

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 3: Training and Recruiting/Professional Development

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Professional Development Education	31,345	630	-3,649	28,326	406	1,308	30,040

Professional Development Education - Includes the Joint Special Operations University (JSOU) at MacDill Air Force Base, Florida, the U.S. Air Force Special Operations School (USAFSOS) at Hurlburt Field, Florida, and the Naval Special Warfare Leadership Education and Development (NLEAD) Command at San Diego, California. The JSOU is an institution of higher learning consisting of teaching and research facilities focused on producing joint special operations strategic and operational analysis and education. As a Joint Special Operations Center of Excellence, JSOU is dedicated to building and maintaining a consortium of joint special operations specialized learning activities focused on professional development of SOF leaders as well as non-SOF decision makers at the intermediate and senior levels. The USAFSOS offers education in irregular warfare, regional studies and cultural awareness, SOF professional development to educate Air Commandos, the special operations community, Services and other U.S. Government agencies. The NLEAD Command provides SOF education and leadership growth for platoon leaders, lead Petty Officers, career counselors, and command leaders.

The FY 2027 request for 3EV8 – Professional Development Education includes $30,040 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $30,040 thousand.

The FY 2026 spend plan for 3EV8 – Professional Development Education includes $28,326 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $28,326 thousand.

II. Force Structure Summary:

USSOCOM military personnel are reported in Military Service Estimates. The following personnel information is provided as a memo entry.

Civilian FTEs	FY 2025	FY 2026	FY 2027
Air Force	70	69	70
Army	0	0	0
Marine Corps	0	0	0
Navy	0	0	0
Space Force	0	0	0
Total	**70**	**69**	**70**

Military End Strength	FY 2025	FY 2026	FY 2027
Air Force	31	33	33
Army	32	32	32
Marine Corps	2	2	2
Navy	4	4	4
Space Force	0	0	0
Total	**69**	**71**	**71**

Contractor FTEs	FY 2025	FY 2026	FY 2027
Total	**38**	**28**	**28**

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

III. Financial Summary ($ in Thousands):

		FY 2026

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $1,461

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $1,461

1) Civilian Pay Adjustments $192

The total increase for civilian pay is +$192 thousand and +1 civilian FTE.

+$146 thousand and +1 civilian FTE realignment from the 1PLR-Theater Forces SAG. This adjustment represents a reconciliation of budgeted FTEs across the USSOCOM databases, manning documents, and

OSW databases to properly align authorizations with the correct PEC.

+$46 thousand increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long term capability for the Department.
(FY 2026 Baseline: $10,344 thousand; +1 FTEs)

2) Joint Special Operations University (JSOU).....$1,269
+$1,269 thousand increase funds technology modernization for three JSOU classrooms, including a complete refresh of the information technology support architecture to ensure compliance with USSOCOM's cyber security policy and enterprise operational requirements. Life cycle replacement includes visual displays, audio-visual bridge, video routing, touch panels, wireless microphone kit, and new rack with credenza configuration which enables JSOU to reduce power consumption, heat signature, and suppress ambient equipment noise, ensuring a higher standard of audio fidelity and significantly enhancing the overall student learning experience.
(FY 2026 Baseline: $13,696 thousand)

9. Program Decreases .....$-153

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-153

1) Civilian Pay Adjustments.....$-153
The total decrease for civilian pay is -$153 thousand.

-$119 thousand reflects the decrease of funding required to resource the civilian FTEs in this SAG based on FY 2026 actual rates to date and planned FY 2027 civilian pay rates.

-$34 thousand reduces funding to align with the adjusted Federal Employees Retirement System

(FERS) contribution rates. These adjustments incorporate updated actuarial assumptions, workforce demographics shifts, and revised projections of retirement liabilities.
(FY 2026 Baseline: $10,344 thousand; +0 FTEs)

FY 2027 Budget Request $30,040

IV. Performance Criteria and Evaluation Summary:

	FY 2025 Actuals			FY 2026 Enacted			FY 2027 Estimate		
	Input	Output	Workload	Input	Output	Workload	Input	Output	Workload
Professional Military Education (PME)									
Joint Special Operations University	1,595	1,595	156	660	660	181	735	735	187
Air Force Special Operations School	2,988	2,873	357	4,590	4,590	542	4,590	4,590	542

Total Professional Military Education	**5,062**	**4,947**	**644**	**5,839**	**5,839**	**880**	**5,906**	**5,906**	**886**

	FY 2025 Actuals			FY 2026 Enacted			2027 Estimate		
	Input	Output	Workload	Input	Output	Workload	Input	Output	Workload
Professional Continuing Education (PCE)									
Joint Special Operations University	7,714	7,689	968	8,273	7,703	1,019	8,288	7,718	1,014
Total Professional Continuing Education	**7,714**	**7,689**	**968**	**8,273**	**7,703**	**1,019**	**8,288**	**7,718**	**1,014**
Sub-activity Group Total	**12,776**	**12,636**	**1,612**	**14,112**	**13,542**	**1,899**	**14,194**	**13,624**	**1,900**

Note: Input/Output represents Component Schoolhouse students only. Numbers do not include tuition-based course attendance.

Definitions:

Input = number of students entering a given fiscal year

Output = number of students graduating during a given fiscal year

Workload (student-year equivalent) = {(entrants + graduates)/2} x {(course length in days)/days per year)}

PME - Includes the broad body of knowledge that develops the habits of mind essential to the military professional's expertise in the art and science of war. SOF-specific education complements and supplements existing Joint, Component, Service, and Joint PME programs to ensure and enhance SOF operational readiness and strategic thinking.

PCE - SOF-specific learning activity that expands professional knowledge and provides up-to-date information on new developments. The outcome generally leads to the issuance of certificates or continuing education units for the purpose of documenting attendance at a designated seminar or course of instruction.

Explanation of Changes:
1) Factors influencing workload include course iterations, course length, inputs, and outputs.

2) Input numbers reflect estimated student entries and completion.

3) FY 2025 to FY 2026:
- AFSOS planned capacity and workload for FY 2025 was much higher than actual execution, FY 2026 remained consistent with the planned FY 2025 course level, after reducing the capacity for several courses including:
    - Orientation/Operations courses for USAFRICOM, USCENTCOM, USEUCOM, USINDOPACOM, and USSOUTHCOM
    - Cross Cultural Engagement
    - Negotiations for AFSOF
    - Force Protection for Air Commandos
- NLEAD reduced the capacity and workload based on FY 2025 actual execution and added additional participants for the NSW Platoon Leader (PLC) Course in FY 2026.
- JSOU PME reduced the capacity and workload based on FY 2025 actual execution and increased the Joint Special Operations Forces Senior Enlisted Academy from 202 to 225 entrants.
- JSOU PCE reduced the capacity and workload for several courses:
    - Introduction to Irregular Warfare Course (I2WC)
    - Introduction to Special Operations Forces (ISOF)
    - SOF Sensitive Activities Foundation Course (SSAF)

4) FY 2026 to FY 2027:
- AFSOS capacity and workload remain consistent between FY 2026 and FY 2027.
- NLEAD remains consistent between FY 2026 and FY 2027.
- JSOU PME increased the capacity and workload for the Design and Various Requested Seminar courses in FY 2027.
- JSOU PCE increased the capacity and workload for two Faculty Development Program courses in FY 2027:
    - Educational Technology
    - Instructor Development and Curriculum Creation

V. Personnel Summary:

Average Annual Civilian Salary ($ in thousands)	**161.7**	**149.9**	**148.7**	**-1.4**	**0.1**
Contractor FTEs (Total)	**38**	**28**	**28**	**-10**	**0**

Personnel Summary Explanations:

USSOCOM military personnel are reported in Military Service Estimates. Military end strength numbers reflect authorized personnel.

The Civilian column reflects actual FTEs in FY 2025, enacted FTEs in FY 2026, and budgeted FTEs in FY 2027.

Civilian net increase of +1 budgeted FTE due to realignment.

Fiscal Year 2027 Budget Estimates

The Joint Staff

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
The Joint Staff (TJS)

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
TJS	1,281,451	24,781	174,437	1,480,669	21,945	1,039,905	2,542,519

I. Description of Operations Financed:
Budget Activity 01 (BA-01)/Operating Forces

The Joint Staff (TJS) Operations ($534,218 thousand) – Twelve major program area*s* make up the Joint Staff Direct Operation and Maintenance funding for FY 2027: The major programs are (1) Joint Staff Operations Suffolk, MHA; (2) Joint Staff Analytical Support (JSAS); (3) Combatant Commander Initiative Fund (CCIF); (4) Joint Force Development and Design (JFDD); (5) Management Headquarters; (6) Pentagon Reservation Maintenance Revolving Fund (PRMRF); (7) Facilities Sustainment, Restoration & Modernization; (8) Facility Operations; (9) Direct Support to Joint Training Exercise Evaluation Program (JTEEP) Facility Operations; (10) Analysis Working Group Support; (11) Pentagon Reservation (PRMRF) Raven Rock Mountain Complex (RRMC), (12) Office of the Chief Digital and Artificial Intelligence Officer (OCDAO). Analytical Support to Force planning transferred to the Office of the Secretary of War (OSW) in the FY 2025 President's Budget. Non-Conventional Assisted Recovery (NAR) program transferred to United States Special Operations Command (USSOCOM). Direct Support to Joint Training Exercise Evaluation Program (JTEEP) Joint Staff Activities Program transferred into the JTEEP Budget Line item 8PL1.

TJS Cyber ($9,103 thousand) – The Joint Staff Cyber Program delivers cybersecurity capabilities and support to the Joint Staff Chief Information Office (CIO) and Joint Staff environments by implementing the Risk Management Framework for mission networks and applications and by developing and overseeing cybersecurity processes and compliance. It manages and reports on the Cyber workforce and administers the Enterprise Mission Assurance Support Service for Joint Staff use and for Combatant Command users. A key component of this effort is the Department of War (DoW) Enterprise Cyber Range Environment (DECRE), which operates within the Cyber and Command and Control Operational Development Division (C3OD2). DECRE offers expert planning and execution for cyber assessments, supporting testing, training, and exercises. DECRE Command and Control (C2) Information Systems is one of three designated DoW Cyber Ranges which also includes the National Cyber Range Complex, Joint Information Operations Range, and Joint Mission Environment Test Capability's Multiple Independent Layers of Security. C3OD2 provides assessment planning and execution expertise to support cyber project objectives, including testing, training, and exercise support. It delivers commonly deployed joint C2 systems, such as the Global Command and Control System (Joint), Advanced Deep Operations Coordination System, and Joint Range Extension, as well as additional systems as required by each project. It provides the operational environment needed to run these C2 systems, along with the system operators necessary to generate realistic data exchanges or evaluate cyber impacts on system functionality. C3OD2's cyber projects span activities from assessing cyber effects on individual C2 systems to conducting mission rehearsals for real-world scenarios, to training cyber mission teams, and supporting large-scale cyber exercises sponsored by United States Cyber Command and other DoW organizations.

Joint Training Exercise Evaluation Program (JTEEP) ($1,393,798 thousand) – JTEEP enables joint force readiness, future force development and design, strategic messaging and posture (deterrence and assurance), inter-agency integration, multi-national interoperability and strengthening of relationships with our allies and partners. JTEEP funding is the key resource used for the joint training requirements of the Department of War to include exercises for eleven Combatant Commands as well as training that prepares the Services to operate as part of a joint force. These training events and exercises are key to improving mission essential task-based readiness levels as well as supporting the threat based global campaign plans. The priority use of these funds is for the readiness of U.S. forces and the Combatant Command Staffs to execute missions assigned to them by national command authorities. JTEEP includes 11 major sub-programs: (1) Joint Exercise Transportation Program (JETP); (2) Service Incremental Funding (SIF), (3) Joint Support to Combatant Command Exercises; (4) Combatant Command Training and Exercises; (5) Joint National Training Capability (JNTC); (6) Joint Training Coordination Program (JTCP); (7) Joint Knowledge Online (JKO); (8) Joint Training Information Management System (JTIMS); (9) Joint Interoperability & Data Link Training Center (JID-TC); (10) Joint Targeting School (JTS); and (11) Joint Deployment Training Center.

Budget Activity 03 (BA-03)/Training – The Joint Staff activity funded in this budget activity is:

TJS Training/National Defense University (NDU) ($173,748 thousand) - The NDU is the premier center for joint professional military education and the intelligence community, with a main campus on Fort McNair in Washington, D.C. There are three additional campuses supporting the NDU mission: The Joint Forces Staff College located at Norfolk, VA; The Joint Special Operations Master of Arts (JSOMA) program located at Fort Bragg, NC; and the National Intelligence College (NIC) located at Bethesda, MD. The Middle States Commission on Higher Education accredits the NDU. The NDU conducts world-class Joint Professional Military Education (JPME), seminars, symposia, and professional development and conferencing for DoW and Congressional representatives.

The NDU is composed of the following colleges, institutions, and budget activities located at Ft. McNair, Washington, DC, and Norfolk, VA:

- CAPSTONE / PINNACLE / KEYSTONE
- College of International Security Affairs (CISA)
- Dwight D. Eisenhower School of National Security and Resource Strategy
- College of Information Cyberspace (CIC) (formerly Information Resources Management College)
- Institute for National Strategic Studies (INSS)
- Joint Forces Staff College (JFSC)
- National War College (NWC)
- National Intelligence College (NIC)
- NDU Operations

- NDU – Headquarters Activities

Budget Activity 04 (BA-04)/ Administration and Service-wide Activities

Joint Inter-Agency Task Force 401 (JIATF 401) ($431,652 thousand) - The Joint Interagency Task Force 401 (JIATF 401) is the Department of War (DoW) lead organization to counter small Unmanned Aerial Systems (C-sUAS). JIATF 401 synchronizes C-UAS efforts across the DoW to rapidly deliver joint capabilities at scale to defend the homeland, protect U.S. and allied forces, defend critical infrastructure, and assist federal agencies. The task force has a global focus and is a multifaceted organization leading DoW C-sUAS activities at the nexus of OSW, the Joint Staff, Combatant Commands, and the Services. The JIATF 401 will also exercise oversight and funding allocation for the Joint C-sUAS University (JCU) which provides standardized institutional training to the warfighter and government partners. The JIATF 401 is innovative, scalable, and threat adaptive. We have one measure of effectiveness: quickly deliver state of the art c-UAS capability to the warfighter at home and abroad. The Secretary of War designated the Secretary of the Army as the DoW's Executive Agent (EA) for Counter-small Unmanned Aircraft Systems (C-sUAS) and aligned the JIATF 401 as a Chairman's Controlled Activity (CCA) in the Joint Staff. The EA holds the acquisition and procurement authority and oversight for the JIATF 401.

The F 2027 re for Joint Staff includes $2,542,519 thousand of discretionary and $11,530 thousand of mandatory (reconciliation) for a total of $2,554,049 thousand.
The FY 2026 spend plan amount for Joint Staff Operations includes

TJS Activities	461,533	-143	-54,123	407,267	6,283	120,668	534,218

I. Description of Operations Financed:

The Joint Staff, FY 2027: $534,218 thousand: There are 11 major programs areas that make up this Joint Staff (JS) budget. The details are provided below by each major program area.

1. Joint Staff Operations Suffolk – Management Headquarters Activities: This funding supports JS operations at the DoW Complex located in Suffolk, VA. This includes the JS J7 Joint Warfighting Development, Joint Training and Office of Support Services, Directorate of Management and J6 Deputy Directorate South. Elements of this program include facility maintenance, security, information technology and communication services, administrative, and logistical support.

2. Joint Staff Analytical Support (JSAS) Program: This program delivers advanced analytical support capabilities to the Chairman of the Joint Chiefs of Staff (CJCS) and Combatant Commands (CCMD). It provides the tools, infrastructure, and expertise necessary to conduct comprehensive analyses and present actionable insights, enabling the CJCS to fulfill statutory responsibilities effectively. Core outputs of the JSAS Program include extensive force structure evaluations, development of joint force courses of action, synthesis of lessons learned, and decision-support studies. These efforts facilitate informed decision-making and the implementation of timely, cost-efficient initiatives to enhance operational effectiveness of the Joint Force. Summary-level descriptions of the seven JSAS sub-categories include:

2.1 Joint Collaborative Analysis (JCA): The JCA provides essential analytical capabilities to support the CJCS in decision-making related to force structure assessments and Global Force Management. The JCA encompasses readiness, availability, and employment data analysis; development of joint courses of action; and joint and coalition analyses that directly support the missions of the CCMDs and JS. These capabilities enable the delivery of globally integrated, prioritized, and risk-informed recommendations, ensuring the most effective and efficient use of forces to achieve the objectives of the National Military Strategy, all while leveraging cost-effective solutions tailored to meet the Chairman's requirements.

2.2 Functional Capabilities Boards (FCB): The FCBs provide analytic support for the Joint Requirements Oversight Council (JROC) and support the JROC by integrating stakeholder views (OSW, CCMDs, Services, Defense Agencies, JS, and other federal agencies) in concept development, capabilities planning, and force development and design to ensure the U.S. military can execute assigned missions. The FCBs provide assessments and recommendations that enhance capabilities integration, examine concept required capabilities, examine joint priorities among existing and future programs, assess program alternatives (including unclassified, collateral, compartmented, and special access programs),

minimize duplication of effort throughout the Services, and provide oversight in the management Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, Facilities and Policy (DOTMLPF-P) of materiel and non-materiel changes that support the National Defense Strategy and military strategies to achieve optimum effectiveness and efficiency of the Armed Forces.

2.3 Joint Logistics: This provides strategic guidance with a global perspective to the joint logistics enterprise to advocate for CCMD requirements while accounting for Service responsibilities enabling timely, effective, and efficient initiatives to improve logistics processes, practices, capabilities, and advanced technologies for the Joint Force. This group provides the best possible focused logistics advice to the CJCS through developed detailed readiness assessments, concept development and analyses, multi-national and interagency partnerships, joint doctrine and education development, and a comprehensive understanding of resources, supply, maintenance, distribution, operational contract support and services, preferred munitions and engineering and cross-servicing arrangements.

2.4 Joint Planning and Execution: This establishes an analytic baseline for developing scenarios, contingency operations, force requirements, and necessary equipment required for effective operational planning and execution. Additionally, Joint Planning and Execution serves as the cornerstone for strategic analysis supporting the Planning, Programming, Budgeting, and Execution process.

2.5 Management of Joint Training Programs: This provides policy guidance and technical support for joint training programs throughout the Joint Force to facilitate improvements in comprehensive joint readiness. Through a four-phased, plans-based methodology, ensures joint training programs align with assigned missions consistent with command priorities, required capabilities, and available resources. Joint training programs include a range of individual and collective training activities across academic, simulated and realistic field training settings executed to assess the organization's capability to perform its mission(s) and address any gaps in required proficiency.

2.6 Chairman's Exercise Program: This improves the capability and readiness of U.S. forces as well as Interagency and Interorganizational partners to ensure a whole of government approach to the conflict continuum through the conduct of regularly scheduled strategic, national level, and globally integrated exercises and senior leader events. These exercises and events examine plans, policies, and procedures under a variety of real-world and simulated crises addressing the Nation's priority strategic challenges through multi-agency collaboration and alignment.

2.7 Chairman's Joint Lessons Learned Program (JLLP): Fulfills the CJCS Title 10 requirement to provide policy, processes, and infrastructure for a lessons learned program for the Armed Forces in support of Joint Force Development and Design. Provides policy to build integrated and interoperable processes for a lessons learned community of practice across the JS, CCMDs, Services, Combat Support Agencies, and Chairman's Controlled Activities plus Multinational and Interagency partners. The JLLP provides analytical capability to conduct collection, analysis and assessment of lessons learned for CJCS designated operations, exercises, training, wargames, rehearsals, and experiments. The primary focus of the JLLP is on Joint Strategic Level issues to promote Global Integration and the assessment of ELITE CONSTELLATION and Joint Warfighting Concept implementation. This provides issue resolution processes required to institutionalize improvements in DOTMLPF-P across the Joint Force and provides the Joint Lessons Learned Information System as the common knowledge management infrastructure for the JLLP community of practice.

2.8 The Allies and Partners Force Development Division (APFDD): The APFDD develops collaborative Force Development capabilities between the Joint Force, Allies and Partners through coordinated engagements to prevail in competition and conflict. The APFDD directly contributes to our allies and partners development of future capabilities and forces that are interoperable with the U.S. Understanding the U.S. development plan for future forces ensures that Allies and partners develop their own forces with complimentary capabilities. This ensures that in the future the JS will be able to rely on key allies and partners for a coordinated approach to threats throughout the world. The APFDD is divided into two branches: 1) the Engagement Branch supports senior O-6/O-5 liaison officers from 23 separate nations and develops relationships between force development senior leaders through Key Leader Exchanges both in the U.S. and abroad; and 2) the Multi-national Capability Development Campaign leads the efforts of 25 nations/inter-governmental organizations to deliver non-materiel capability development interoperability. Funding supports U.S. led projects and other engagements with multinational and coalition partners.

3. Combatant Commander Initiative Fund: This enables the CJCS to act quickly to support the CCMDs when they lack flexibility or resources to solve emergent challenges and unforeseen contingency requirements critical to joint war fighting readiness and national security interests. Initiatives are evaluated on their individual merits, with the strongest candidates for approval supporting CCMD activities and functions, enhancing interoperability, and yielding high benefits at low cost. Initiatives support authorized activities such as force training, joint exercises, contingencies, command and control, military education and training of foreign personnel, defense personnel expenses for bilateral or regional cooperation programs, urgent and unanticipated humanitarian relief and reconstruction assistance, force protection, and joint war fighting capabilities.

4. Joint Force Development Design: This is an enterprise approach to enhance DoW decision making for current and future readiness by aligning force development and design to mitigate future joint force deficiencies. This synergized and synchronized way forward accelerates the development, implementation, and integration of new threat-based Joint Warfighting Concepts and concepts of operation through experimentation, wargaming, doctrine, professional military education, and information architecture integration and development to gain and maintain the competitive advantages necessary to deter and defeat adversaries. The FY 2027 request focuses on support to ELITE CONSTELLATION (EC) program improvements of capabilities established with the Joint Force Development and Design effort and provide the ability to address ELITE CONSTELLATION requirements in exercises; Universal Joint Task List analytical support gaps directly related to EC; inclusion of EC elated revisions into joint doctrine publications; facilitates integration coordination of whole of government interagency participation in EC events; address Application Programming Interface and single sign on capabilities, encryption of data and cataloguing to ensure content is captured, integrated, and cross-walked into tools supporting EC; and further identify relevant capabilities to advance Joint Warfighting Concept implementation.

5. Core Management Headquarters: Provides general support of the Joint Staff in following key areas:

5.1 Office of the Joint Staff Comptroller: Operates an auditable accounting system for JS time and attendance, budget formulation for congressional justification books, recording financial transactions, accounting, financial reporting, acquisition package development, audit sustainment, and management of official representation funds.

5.2 Command, Control, Communications and Computers/Cyber Directorate, Joint Staff Chief Information Officer (J-6): The J-6 provides expertise in support of the CJCS's core responsibilities and in advancing C4/Cyber across all domains to enable a globally integrated Combined/Joint Force. The J-6 Directorate is the lead JS advocate for the integration, modernization, and innovation of C4/Cyber capabilities for the Combined/Joint Force. The J-6 provides CJCS military advice in advancing cyber defense, Joint/Coalition interoperability, and C2 systems capabilities required by the Joint Force. The J-6 fulfils crucial JS Chief Information Officer responsibilities by implementing rigorous management frameworks and oversight processes that secure, sustain, and enhance JS mission-critical networks.

5.3 Joint Staff Security Office: The Joint Staff Security Office provides enterprise-wide program management and operational oversight of multiple security programs in support of the CJCS and the JS. Also provides armed security forces for the protection of the National Military Command Center.

5.4 Office of the Secretary, Joint Staff (SJS): The SJS provides the Nation's top military leadership with effective and timely action processing and information management operations that enable the corporate decision-making process for the CJCS and other JS leaders. The Joint Secretariat manages the JS action process, provides enterprise-wide business tools training to incoming members of the JS using the Enterprise Task Management Software platform as the decision-making tool, ensures statutorily compliant records management on the JS and for the CCMDs, manages the JS Freedom of Information Act and declassification review processes as directed by law, directs JS knowledge management resources, NIPR/SIPR portal administration, and National Miliary Command Center Support, and provides administrative services to the Top-4, all in support of the CJCS's role as the Principal Military Advisor to the President, Secretary of War, and National Security Council.

5.5 Joint Staff Force Development Directorate (J-7): The J-7 leads the development of the Joint Force through joint training, leader development, capability and concept development supporting successful execution of the National Military Strategy. The J-7 is a learning organization focused on leading Joint Force Development, whose cohesive teams leverage partners and communicates relentlessly to enable a global Joint Force optimized for a dynamic and ever-changing security environment. The J-7 accomplishes its mission through the Deputy Director, Joint Training, Joint Warfighting Development (DDJWD) and Deputy Director for Joint Force Integration (DDJFI). The Deputy Director, Joint Training provides distributed training platforms for the entire DoW through the development, delivery, and enabling of a continuum of individual, staff, and collective joint training to enhance the operational effectiveness of the current and future Joint Force. It is responsible for the planning and execution of ELITE CONSTELLATION campaign and ensures the execution and provisioning for joint training capabilities resident at the Suffolk compound that provides 24/7 online training and education support to the Joint Force. The DDJWD provides Joint Education and Doctrine, Allies and Partners Force Development, Futures and Concepts, and Joint Experimentation, Wargaming and Knowledge and Data actions, activities, capabilities, services, and support to execute the J-7 Joint Force Development Design mission.

5.5.1 Joint Wargaming and Experimentation Division (DDJFI): This funding supports the Title 10 and CJCS requirements to plan, design and execute the Globally Integrated Wargame series and to develop a campaign approach to joint experimentation. This approach includes an annual Joint Experimentation Forum, promulgating experimentation guidance, and operations and maintenance for the Joint Experimentation Network. Funding provides travel and training and supports analysis subject matter expertise that work across the Joint Wargaming Experimentation

Division organization to support analytic efforts necessary for Joint Force Development and Design to evaluate the Joint Warfighting Concept and its Key Operational Problems and Concept Required Capabilities.

5.5.2 Futures and Concepts Division, DDJWD: This funding supports the Title 10 and CJCS requirements to include threat-informed joint concepts that drive capability development. Specifically, joint futures and concepts are the CJCS's responsibility to express a vision for the future joint force; addressing operational problems on a 20-year horizon; identifying Joint Force development and Design implications; and identifying capabilities required to mitigate and solve future joint warfighting gaps.

5.5.3 Joint Doctrine and Education Division, DDJWD: This fulfills Title 10 and CJCS requirements to provide policy guidance for joint professional military education (JPME), ensure policy compliance, improve effectiveness and support the conduct of assessments of JPME program outcomes to determine if Combatant Commanders and the CJCS are receiving the officers with the right skills to conduct global campaigns, combatant command campaigns, and execute joint warfighting in armed conflict. This fulfills requirements to manage the CJCS joint doctrine process, maintain and operate the CJCS electronic publishing effort, DoW terminology program, manage the information technology family of systems for all of DoW; oversee the CJCS doctrine development system by revising current joint doctrine and developing new joint doctrine; act as the Chairman's assessment agent for joint doctrine; manage the Universal Joint Task List used by Combatant Commanders to determine and report mission readiness.

5.5.4 Office of Irregular Warfare & Competition, DDJFI: The Office of Irregular Warfare & Competition assesses, conceptualizes, develops, and contributes to the employment of the Joint Force in irregular wars and strategic competition to implement the Joint Warfighting Concept, the Joint Concept for Competing and to integrate these into force development and design. Funding provides travel, training, and analytic support required to execute these tasks assigned to CJCS. These requirements include the annual Joint Irregular Warfare Assessment, quarterly Irregular Warfare/ Executive Steering Committee and monthly working groups as required by DoDD 3000.07; and integrating the roles and responsibilities of the Joint Force in competition into force development in accordance with CJCSI 3030.01. Additionally, Office of Irregular Warfare & Competition serves as the CJCS's principal staff advisor regarding irregular warfare and the Joint Force in competition in all joint strategic planning, assessment, development, requirement, and other related processes.

5.6 Joint Staff Support Service Office: This provides maintenance support for facilities and new construction and renovation of existing spaces and also executes rent costs, facilities, and utilities located in the Pentagon and Hampton Roads, VA.

5.7 Information Technology Customer Relations Division: This coordinates across the JS and oversees, funds, and facilitates the provisioning, operation, and life cycle maintenance of Information Technology capabilities and services for the JS.

6. Pentagon Reservation Maintenance Revolving Fund (PRMRF): This funds the JS share of the maintenance, sustainment, protection, repair, and renovation of the Pentagon Reservation. The PRMRF budget request includes TJS rent, force protection provided by the Pentagon Force Protection Agency, and real property operations to include standard maintenance, repair, and utilities. Annual funding requirements also include

the costs of real property operations and security of Raven Rock Mountain Complex. The Washington Headquarters Service (WHS) is the executive agent for Raven Rock Mountain Complex, and tenants share financing of operations via the PRMRF Defense Working Capital Fund. The JS share of construction and maintenance of the Unified Command Center, which includes the National Military Command Center, Resource Situational Awareness Center, and National Joint Operations and Intelligence Center, is also included in the PRMRF line.

7. Facilities Sustainment, Restoration & Modernization: This funds facility and life cycle maintenance support functions including maintenance and repair projects and minor construction accomplished by the Pentagon's in-house and contracted workforce. The program executes work orders for facility related repairs/upgrades and plans and executes minor construction and renovation projects supporting the annual improvement program and various JS directorates.

8. Facility Operations: This funds facility leases and utilities that are not considered a Management Headquarters Activity in nature but support the remainder of the JS not associated with the JTEEP program.

9. Direct Support to JTEEP Facility Operations: Funding supports JS operations at the DoW Complex located in Suffolk, VA. Elements of support include facility leases and utilities. The Joint warfighting operational readiness support hub is a premier facility that supports the planning, execution, and evaluation of joint exercises, wargames, and integration activities. The facility provides technical control for joint enterprise networks and simulations, as well as joint integration and interoperability labs. With its highly adaptable and secure spaces, including SCIFs, the facility enables the joint forces to conduct global warfighter training as scale in a realistic environment, enhancing warfighter readiness, and joint force development and interoperability.

10. Analysis Working Group Support: This provides support to execute prioritized studies and reform the analytical enterprise through enhanced modeling and simulation and infrastructure improvements. The AWG supports modeling and simulation tools and methods, computational capacity, portfolio expansion, and workforce challenges. Initial lines of effort focus on analytic infrastructure reform, knowledge management reform, improved integration for campaign analysis, and rapid capability Concept of Operations (CONOPS) development. Resources fund allies and partner data sets to support rapid CONOPS development; development of CONOPS Red Teams; and maintenance and development of specialized modeling and simulation toolsets.

11. Office of the Chief Digital and Artificial Intelligence (AI) Officer (OCDAO): The OCDAO was established effective August 20, 2024, to lead and synchronize JS digital modernization working in collaboration with each of the JS Directorates, the Office of the Secretary of War (OSW), the Services, and the CCMDs. The JS OCDAO integrates data, analytics, and AI into JS core functions and empowers the JS with access to data products and digital platforms to enhance decision-making, operational efficiency, and warfighting decision advantage.

The FY 2026 spend plan amount for Joint Staff Operations includes $407,267 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $407,267.

The FY 2027 request for Joint Staff Operations includes $534,218 thousand of discretionary and $11,530 thousand of mandatory (reconciliation) for a total of $545,748. FY 2027 mandatory funding invests in Joint Staff Facilities, Sustainment, Restoration, and Modernization.

c) Emergent Requirements $0

FY 2026 Baseline Funding $407,267

4. Reprogrammings (Requiring 1415 Actions) $0

a) Increases $0

b) Decreases $0

Revised FY 2026 Estimate $407,267

5. Less: Item 2, Supplemental Appropriation and Item 4, Reprogrammings $0

a) Less: Supplemental Funding $0

FY 2026 Normalized Current Estimate $407,267

6. Price Change $6,283

7. Functional Transfers $27,255

a) Transfers In $27,255

1) Analytic Wargaming Tool $22,955
Transfers funding and responsibility for the Analytic Wargaming Tool from Operation and Maintenance, Army to Operation and Maintenance, Defense-Wide for execution by the Joint Staff.
(FY 2026 Baseline: $0 thousand)

2) Orion $4,300
Transfers program Operations and Maintenance baseline for the Orion effort from the Office of the Secretary of War, Chief Digital and Artificial Intelligence Officer to the Joint Staff within Operation and Maintenance,

Defense-Wide.
(FY 2026 Baseline: $0 thousand)

b) Transfers Out $0

8. Program Increases $93,458

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $93,458

1) Administrative Support to JIATF-401 ..... $3,528
Provides funding for Joint Staff administrative support, including Defense Finance and Accounting Service, Financial Improvement and Audit Readiness, supplies, facilities, security, and other essential services due to the Joint Interagency Task Force 401 (JIATF 401) newly established as a Chairman Controlled Activity to lead the Department's Counter-small Unmanned Aircraft Systems initiatives. JIATF 401 is tasked with developing capabilities to address the global proliferation of small Unmanned Aircraft Systems both on and off the battlefield.

(FY 2026 Baseline: $0 thousand)

2) Chief Digital and Artificial Intelligence Officer $62,137
Increase funds investments in digital modernization needed to transform the Joint Staff into an "AI-first" warfighting force in order to maintain America's military dominance in the digital age by creating the data-infused, AI-enabled environment envisioned by the Department's AI strategy.
(FY 2026 Baseline: $3,627 thousand)

3) CIVPAY $7,662
The funding increase fully supports civilian pay requirements to accommodate an additional 39 FTEs necessary to address critical mission needs. These additional personnel will be distributed across several key areas to enhance operational effectiveness. Specifically, 12 FTEs will be allocated to support the Joint Interagency Task Force-401, 10 FTEs will be assigned to the Chief Data and Artificial Intelligence Office, and 8 FTEs will bolster the Joint Staff Directorate for Operations. Furthermore, 5 FTEs will be dedicated to the Analysis Working Group, and 4 FTEs will provide direct support to the Chairman of the Joint Chiefs of Staff.

The FY 2026 baseline includes $139,435 thousand and 715 FTEs, with this proposal increasing the total by 39 FTEs to meet mission-critical requirements.

(FY 2026 Baseline: $139,435 thousand; 715 FTEs; +39 FTEs)

4) Critical Communications.....$6,000
Funding ensures that the CJCS and other senior leaders, JS, and CCA's have secure, reliable, and interoperable communication capabilities, including video teleconferencing, across various networks like NIPR, SIPR, and JWICS. This infrastructure is critical for command and control, enabling joint operations and collaboration with mission partners. The modernization of this infrastructure, such as the move to a Joint Information Environment, aims to consolidate services, reduce costs, and enhance security and data-sharing capabilities.
(FY 2026 Baseline: $39,832 thousand)

5) Joint Requirements Oversight Council Modernization.....$10,500
Modernization effort will streamline and accelerate the identification of the top priority Joint Force needs and the solutions required to fulfill them; facilitate more rigorous engagement with industry; and greater integration of requirements determination and resource prioritization to ensure budgeting decisions are focused on the most critical needs and can deliver an integrated and effective Joint Force.
(FY 2026 Baseline: $4,710 thousand)

6) Pentagon Reservation Maintenance Revolving Funds - Rents.....$1,401
Increase fully funds the Joint Staff Washington Headquarters Services rent requirements.
(FY 2026 Baseline: $100,290 thousand)

7) Rents/Utilities.....$733
Fully funds rents and utilities costs for the Joint Staff facilities outside of the Pentagon Reservation.
(FY 2026 Baseline: $12,733 thousand)

8) Temporary Duty.....$1,497
Increase funds forecast travel costs supporting global integration, operations, and engagements.
(FY 2026 Baseline: $5,660 thousand)

9. Program Decreases.....$-45

a) Annualization of FY 2026 Program Decreases.....$0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $-45

1) Miscellaneous Minor Adjustments ..... $-45
Decreases funds for costs associated with transportation, communication, postal, and equipment.
(FY 2026 Baseline: $5,119 thousand)

FY 2027 Budget Request $534,218

Fiscal Year 2027 Budget Estimates

The Joint Staff (TJS)
Joint Training Exercise Evaluation Program

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Combat Development Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
JTEEP	682,528	22,284	240,420	945,232	13,993	434,573	1,393,798

I. Description of Operations Financed:

The FY 2027 budget requests $1,393,798 thousand to support the exercise and engagement requirements of the eleven Combatant Commands (CCMD), increase joint context in Service exercises, train individuals in key joint skills, and provide joint training enablers to the CCMDs and Services. In addition, FY 2027 supports an annual Large Scale Global Exercise/ ELITE CONSTELLATION that will stress global integration of the force across multiple levels of command and control in the conduct of Joint All Domain Operations. The increased funding enhances joint exercises within INDOPACOM and select CCMDs to execute ELITE CONSTELLATION, a campaign of exercise and training events that collectively prepare the Joint Force for a transregional, multi-functional and multi-domain conflict against a near-peer adversary. ELITE CONSTELLATION is a multi-year campaign that provides a framework for the Joint Force to conduct globally integrated, multi-domain operations to strengthen warfighting readiness and lethality, enabling the Joint Force to adapt to the changing character of war and deter or defeat global threats. ELITE CONSTELLATION operationalizes the Joint Warfighting Concept through integrated events across the Department of War (DoW) and with mission partners; priorities are to:

- *Increase globally integrated readiness and lethality.*
- *Refine and implement the Joint Warfighting Concept through the ELITE CONSTELLATION campaign.*
- *Adapt Joint Force readiness to the changing global operating environment across all domains.*
- *Enable Joint Force to address global threats while defending the homeland.*
- *Exercise options for rapid decision making in global conflict.*
- *Identify solutions for rapid mobilization and deployment of forces.*
- *Expand integration and interoperability among the interagency and Allies and Partners*

The Secretary of War priorities drive the alignment of Joint Training Exercise Evaluation Program (JTEEP) resources to enable and prepare the military to Defend the Homeland, Revive Warrior Ethos and Reestablish Deterrence – in support of Peace through Strength. The Secretary provided guidance to make this exercise a priority event in the Department to prepare the force to execute global campaign plans against peer adversaries and achieve National Defense Strategy objectives. These JTEEP- funded events improve the readiness of the force to conduct joint operations, highlight U.S. capabilities, deter potential adversaries, build partner capacity, and operationalize the Secretary of War-approved Joint

Warfighting Concept. In addition, the Secretary of War has directed JTEEP to support consolidating some of the eleven CCMD exercises to prepare the force. The CCMD exercise and engagement events are key DoW levers for strategic competition in preparation for warfighting and day-to-day competition. This funding enables over 105 major exercises annually that prepare U.S. forces to execute operational plans, train the combatant command staffs in demanding and realistic environments, provide presence and regional expertise for U.S. allies and partners, and build relationships and trust.

Joint Training Exercise Evaluation Program (JTEEP) Program Summary ($1,393,798 thousand): Funds exercise and training capabilities supporting CCMD exercise programs, theater security cooperation, and Global Campaign Plan objectives; joint context in Service training venues; joint training enablers; and development of a more adaptive joint force.

The JTEEP enables joint force readiness, future force development and design, strategic messaging and posture (deterrence and assurance), inter-agency integration, multi-national interoperability and strengthening relationships with our allies and partners. The JTEEP funding is the key resource used for the joint training requirements of the DoW, including exercises for eleven CCMDs and training that prepares the Services to operate as part of a joint force. These training events and exercises are key to improving mission-essential task-based readiness levels and supporting the threat-based global campaign plans. The priority use of these funds is for the readiness of U.S. forces and the CCMD staffs to execute missions assigned to them by national command authorities.

The JTEEP provides most Combatant Commanders' funds for military-to-military engagement. Because of their international political impact, Combatant Commanders' exercises are tools of national power, and the exercises directly advance the National Defense Strategy. In addition to their primary purpose of training U.S. forces, the Combatant Commanders' exercises have corollary effects that assist in strengthening alliances, shaping the geopolitical environment, as well as providing a realistic environment for the validation of joint concepts and capabilities to enable rapid innovation of joint force development and design.

For Service joint training, the JTEEP program supports the participation of multiple Service units/capabilities in Service training venues; for example, Air Force participation in the Army's pre-deployment exercises at the National Training Center. The JTEEP also provides training enablers for realistic and robust combat training with interagency participation in Service events, realistic opposing forces, feedback and lessons learned, and development of a more adaptive joint force. The JTEEP non-Major Headquarters Activity funding is further subdivided into eleven major sub-programs as follows:

1 Joint Exercise Transportation Program: Funds transportation of personnel and equipment to worldwide joint exercises. This tactical, operational, and strategic lift capability enables Combatant Commanders to train battle staffs and participating forces in joint and combined operations, evaluate contingency and operations plans, and execute theater engagement. The program also provides an opportunity to stress strategic transportation systems as well as command and control and intelligence, surveillance, reconnaissance systems to evaluate their readiness across the range of military operations.

2 Service Incremental Funding (SIF): These are funds provided for Service participation in CCMD Exercise and engagement events. Through a collaborative planning process, CCMDs identify forces required for an exercise. SIF is then provided to pay for the additional costs that the Services would otherwise absorb. This allows CCMDs to achieve Theater Campaign Plan objectives without detrimental impact on Service training budgets. The SIF is essential to the realistic conduct of field training exercises, which include forces in all domains, rather than exercises merely for the headquarters.

3 Joint Staff Support to Combatant Command Exercises: Each year, Combatant Commanders conduct exercises and engagement events. Linked multi-CCMD events informed by the Joint Staff, OSW, and interagency participation advances globally integrated operations to address the Nation's priority strategic challenges as an ELITE CONSTELLATION component. To maximize the effectiveness of these events, the Joint Staff prioritizes support to the CCMDs in accordance with the National Defense Strategy. Joint Staff leads the design, planning and execution of ELITE CONSTELLATION and provides functional and technical support to each CCMD and associated components during the planning and execution of their CCMD Training and Exercises. The support is essential to battle staff coordination, decision processes, and rehearsal of key Unified Command Plan mission areas. The Joint Staff Joint Force Development Directorate enabling support includes scenario development; observer/trainers; exercise management; and subject matter expertise in Interagency, Information Operations, Cyber Operations, Intelligence, Communications Synchronization, Sustainment and other warfighting functional areas. The program is an enterprise model that eliminates the need for redundant capabilities across each CCMD and optimizes best practice and insight across the Joint Staff. The Joint Staff provides this support to subordinate unified commands and to select Executive Branch organizations during the biennial National Level Exercise.

4 Combatant Command Training and Exercises: The CCMDs are resourced to conduct annual training, exercises, transformation, and engagement events to maximize readiness for assigned missions. This includes small-scale events through major command and national-level or globally integrated exercises. The program supports developing, evaluating, and integrating a single, high-quality training environment. In addition to serving as the operating budget for CCMDs, this program ensures the readiness of CCMD and component staff to execute key operational plans supporting the National Defense Strategy. Increased funding for U.S. Indo-Pacific Command enhances joint exercises that enable joint force readiness, deterrence (via strategic messaging and posture), future force development and design, inter-agency integration, multinational interoperability, and strengthening relationships with our allies and partners. Increased U.S. Southern Command funding will enhance its ability to plan and execute field training exercises in Panama and the Southern Cone of South America. These exercises are crucial for several reasons:

- Multinational Training Opportunities: They provide a platform for the U.S. and its partner nations to train, improving interoperability and coordination among their military forces.
- Demonstrating Commitment: These exercises serve as a visible demonstration of the U.S. and its partners' commitment to maintaining security and stability in the region. This is particularly important for ensuring free and unfettered access to key sea lanes of communication, which are vital for global trade and economic stability.
- Strengthening Partnerships: By engaging in joint exercises, the U.S. can strengthen its relationships with partner nations in the region, fostering greater trust and cooperation.
- Enhancing Regional Security: These exercises help to enhance the region's overall security by preparing forces to respond to various potential threats, from natural disasters to security challenges. Overall, the increased funding will enable U.S. Southern Command to play a more active and effective role in promoting regional stability and security through these critical training exercises.

5 Joint National Training Capability (JNTC): JNTC provides the technical standards, architecture, and development processes required to integrate/link joint training programs across the enterprise. Funding supports the technical integration and interoperability of Joint and Service models and simulations with an integrating architecture of Joint, Live, Virtual, Constructive (JLVC) training capabilities. At scale, the capabilities enable distributed training and exercise for training audiences at the Combatant Command, Joint Task Force, Component Command headquarters, and Service joint tactical levels.

The funding also supports the modernization of the Joint Training Environment through a Modular Open Systems Architecture approach, including a cloud-enabled, web-accessible Joint Training Platform (JTP) and Joint Training Tool (JTT) that support all phases of an exercise (planning, execution, and after action reports). JTP and JTT represent a digital transformation that increases warfighter access to digital and AI-enabled training enablers within the Joint Training Synthetic Environment. This funding will also support the transition to and operation of advanced JLVC capabilities, such as a fully informed simulation environment and non-kinetic effects tools, delivered through JLVC modernization.

Through the centralized maintenance and operation of joint exercise control, simulations, C4, and 40 persistent networked training sites, JNTC enables a Joint, Interagency, Intergovernmental, and Coalition context for the benefit of the entire training enterprise. This DoW enterprise-level capability realizes cost efficiency for the Department by reducing redundant systems, integrating CCMD/Service/Combat Support Agency networks and systems, and maximizing integrated training across the Services and Combatant Commands. This capability directly supports the ELITE CONSTELLATION campaign and the JTEEP program's published goals and objectives (Goal 5) to improve the joint training infrastructure and management, enhancing the joint training environment. Through a network of subject matter experts, JNTC provides a vital link between joint training activities and ongoing operations. This linkage is crucial for institutionalizing lessons learned and lessons anticipated at the speed of need with the changing character of war. JNTC also funds improvements to infrastructure that increase training realism, including enhancements to threat replication, opposition forces, and range infrastructure. These efforts are essential for training the Joint Warfighting Concept and the associated concept-related capabilities that must be exercised at the Service and joint levels. Additionally, this service joint training is foundational to effectively executing extensive global exercises like ELITE CONSTELLATION. In support of JTEEP, JNTC conducts technology modernization efforts to mitigate joint training gaps, including leveraging new cloud environment CJADC2 tools, Artificial Intelligence (Generative AI), and other technologies to deliver the directed training enhancements. Overall, JNTC increases training effectiveness while mitigating gaps and seams between Service-centric training programs.

6 Joint Training Coordination Program (JTCP): Enables the Services and U.S. Special Operations Command to participate in the exercises of the other Services. Through such participation, U.S. forces develop the skills and cross-Service familiarity necessary to operate in a joint environment. The JTCP facilitates the integration of special operations and conventional forces and provides cross-Service participation in pre-deployment exercises at Army's Combat Training Centers, Air Force's Green and Red Flag at Nellis Air Force Base, the Marine Air Ground Task Force Training Command at Twenty-Nine Palms, and the Navy's Fleet Training Program at multiple locations, improving pre-deployment training for warfighters who will be on the front lines.

7 Joint Knowledge Online (JKO): Adaptable 24/7 distributed learning training platform on both classified and unclassified networks, scalable to meet current and emerging individual and staff training needs of CCMD, Combat Support Agency, Service, multinational, coalition, and Interagency organizations. The JKO advances cost-effective training enablers to support frequent, small-facilitated events with training tools that support responsive, just-in-time staff training opportunities and enable perpetual refresher training. The JKO training content, videos, courses, virtual classroom, and scenario simulations address fundamental training requirements of the Joint Staff, Joint Task Forces, CCMDs, Combat Support Agencies, and supporting organizations across the DoW.

8 Joint Training Information Management System (JTIMS) sunset: JTIMS capability has transitioned into the cloud-based, web-enabled Joint Training Tool (JTT) within the JNTC at the end of FY 2025, leveraging the JTT's modern architecture and modular, data-centric approach to development. JTIMS functionality modernized in the JTT supports CJCS Title 10 responsibilities/requirements, CCMDs, Services, Combat Support Agencies, National Guard, and Office of the Secretary of War joint training responsibilities by providing a set of integrated information management capabilities necessary to identify, collect, analyze, develop, store, and disseminate the data required to implement the four phases of the Joint Training System. The JTT integrates with readiness, force sourcing, planning, training, and assessment systems, including Defense Readiness Reporting Systems – Strategic, Joint Capabilities Requirements Manager, Universal Joint Task List Development Tool, and Joint

Lessons Learned Information System.

9 Joint Interoperability & Data Link Training Center (JID-TC): Provides tactical data link training and operational support for Joint and Coalition forces through courses offered online, in-residence, and via mobile training teams. As the DoW's sole source of qualified Joint Interface Control Officers (JICO), as well as maintaining coordination of the training of Joint Data Network Operations Officers, the Training Center ensures the timeliness and accuracy of information used by operational commanders at all levels to make warfighting decisions. This directly reduces the risk of fratricide and improves operational effects. In 1999, the Office of the Secretary of War outlined the requirements for a single joint officer (the JICO) and a cell of tactical data link experts to plan, execute, and manage the multi-tactical data link architecture for the Joint Task Force or CCMD. In 2001, the Office of the Secretary of War and the Joint Requirements Oversight Council determined that no single service can mitigate interoperability gaps alone and directed the JID-TC to be the sole DoW provider of joint interoperability training and JICO production. Additionally, the JID-TC was tasked through Joint Chiefs of Staff Instruction 3151.01D with coordinating the training for the Joint Data Network Operations Officers.

10 Joint Targeting School (JTS): Provides formal operational-level joint targeting instruction to personnel assigned targeting, fires, and planning duties at CCMDs, the Joint Staff, Services, inter-agencies, and partner countries. The JTS delivers instruction to over 1,500 students through six courses for mid-career intelligence, operational officers, and Non-Commissioned Officers. Specifically, JTS provides instruction in Joint Targeting Staff, Combat Assessment, Weaponeering Applications, Joint Staff Familiarization, Joint Staff Familiarization for Partners, and Collateral Damage Estimation (CDE). The JTS is the DoW program manager for CDE accreditation of CDE schools as prescribed in the Chairman of the Joint Chiefs of Staff Instruction 3115.01D series, "No-Strike and the Collateral Damage Estimation."

11 Joint Deployment Training Center: Provides functional training to all CCMDs, Services, and other DoW Agencies for approved Global Command and Control Systems-Joint applications, including Joint Operation Planning and Execution System (JOPES), Common Operational Picture, and Integrated Imagery and Intelligence. Through the Joint Deployment Training Center (JDTC), the Joint Staff provides training on various Global Force Management (GFM) related tools, including JOPES, Joint Capabilities Requirements Manager, Preferred Force Generation, Logbook, and GFM Toolset. The JDTC also assists in mission analysis and readiness reporting by providing Subject Matter Experts to facilitate analysis, help build situational awareness, and address Joint Task Force Headquarters related sourcing requirement, future force development and design, strategic messaging and posture (deterrence and assurance), inter-agency integration, multinational interoperability and strengthening of relationships with our allies and partners. JTEEP funding is the key resource used for the joint training requirements of the Department of War, to include exercises for eleven Combatant Commands as well as training that prepares the Services to operate as part of a joint force. These training events and exercises are key to improving mission-essential task-based readiness levels and supporting the threat-based global campaign plans. The priority use of these funds is for the readiness of U.S. forces and the Combatant Command Staffs to execute missions assigned to them by national command authorities.

The FY 2027 request for JTEEP includes $1,373,798 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $1,393,798 thousand.

The FY 2026 spend plan amount for JTEEP includes $945,232 thousand of discretionary and $20,000 thousand of mandatory (reconciliation) for a total of $965,232. The FY 2026 Reconciliation funding was needed to cover increased multi-modal transportation costs to support activities in the Indo-Pacific Command area of responsibility.

FY 2026 Normalized Current Estimate $945,232

6. Price Change $13,993

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $456,357

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $456,357

1) Core Readiness Enhancements $264,491
The increase addresses the heightened operational demand by enhancing core capabilities to bolster the Department's joint combat force's warrior lethality in the JTEEP expanding global presence and power projection to defend the Homeland and deter external threats.
(FY 2026 Baseline: $945,232 thousand; 132 FTEs)

2) ELITE CONSTELLATION $104,217
Funds increased multi-modal transportation costs in support of ELITE CONSTELLATION activities which require global transportation of supplies and equipment needed to support Combatant Command joint exercises directly linked to the Secretary's priorities to Maintain Core Readiness, Deter China, and Defend the Homeland.
(FY 2026 Baseline: $313,045 thousand)

3) U.S. European Command Enhancements $15,649
This funding will enhance STEADFAST DETERENCE command post and field training exercises as a capstone exercise to access North Atlantic Treaty Organization progress as a warfighting exercise. This will also support Sensitive Compartmented Information Facility modifications, exercise data engineers, and integration of drone operation in exercise BALTOPS and FORMINABLE SHIELD.
(FY 2026 Baseline: $151,665 thousand)

4) U.S. Indo-Pacific Command Enhancements $72,000
This funding is for the integration of Unmanned Aircraft Systems and Counter-UAS capabilities into operations and exercises. Execution of a global campaign of learning to support the Joint Warfighting Concept and drive future force development and design initiatives. Expansion of modeling & simulation and assessment requirements in new exercises. Enhancement of joint training capabilities, including U.S. Indo-Pacific Command headquarters readiness, operationalization of United States Forces Japan 2.0, certifications for five Joint Task Forces, United States Forces Korea Joint Task Force certification, and traditional observer/mentor roles for special missions. Integration of high-end targets, such as Integrated Air and Missile Defense capabilities and maritime strikes, into Joint Field Training Exercises.
(FY 2026 Baseline: $245,936 thousand)

9. Program Decreases ..... $-21,784

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 .....$-21,784

1) Civilian Pay and Compensation .....$-191
The decrease aligns funding with current long term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government wide retirement funding requirements.
(FY 2026 Baseline: $24,094 thousand; 132 FTEs; +0 FTEs)

2) Contract Reductions.....$-21,491
Reduces advisory and assistant services information technology and service contracts to promote efficiencies and advance the policies of the Administration in alignment with Executive Order 14222, “Implementing the President’s Department of Government Efficiency Cost Efficiency Initiative.”

(FY 2026 Baseline: $200,582 thousand)

3) Efficiencies - Miscellaneous Expense .....$-102
Decrease funds for costs associated with equipment; facilities, sustainment, restoration, and modernization; rents; and services.
(FY 2026 Baseline: $4,855 thousand)

FY 2027 Budget Request $1,393,798

IV. Performance Criteria and Evaluation Summary:

The Joint Training Exercise Evaluation Program (JTEEP) is the primary DoW Joint training program that resources the Combatant Commands (CCMD) and Services to train fully capable Joint forces. In addition to training and readiness benefits, JTEEP funded exercises provide geostrategic advantage with our allies and partners, and a realistic environment to validate and transition future Joint Warfighting Concepts that enhance our competitive advantage. This is the Chairman of the Joint Chiefs keystone program to train U.S. forces in globally integrated operations with allies and partners while also deterring adversaries through posture and campaign activities. JTEEP funded exercises are aligned with National Defense Strategy objectives and enable the force to achieve Global Campaign Objectives against the key adversaries. These exercises stress the integration of joint / combined major force elements to conduct Joint All Domain Operations across multiple echelons of command and control against near peer adversaries.

1. Joint Exercise Transportation Program (JETP). The Joint Staff measures program effectiveness against the Office of Secretary of War (OSW) financial benchmarks and collects common JETP performance measures quarterly from all eleven CCMD.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of Joint Exercises supported with JETP funding	93	109	111	105
Total number of personnel moved with JETP	58,000	90,000	90,000	70,000
Total Tons of equipment moved with JETP	73,000	130,000	130,000	100,000
Total US personnel receiving joint training	138,000	215,000	215,000	175,000

2. Service Incremental Funds (SIF). SIF allows Service Component Commands to support the Combatant Commands' campaign objectives by providing trained and ready forces to over 105 joint exercises each year. The Joint Staff measures program effectiveness against OSW financial benchmarks and collects common SIF performance measures quarterly from all eleven CCMDs.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of US personnel participating in joint exercises through SIF	48,200	67,000	124,309	100,000
Number of personnel attending exercise planning events	16,300	23,865	23,865	20,411

3. Joint Staff Support to Combatant Command Exercises. The Joint Staff provides tailored joint training, exercise design, planning, subject matter experts, professional education, and insights and best practices to Joint Force Commanders. The Joint Staff measures program effectiveness based on customer feedback regarding joint training environment fidelity, technical support and capturing best practices and insights.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of CCMD training events supported	36	47	45	36

4. Combatant Command Training and Exercises. This program develops increased readiness and agility for U.S. forces and battle staffs through realistic and challenging joint/combined training at the strategic, operational and tactical levels. Training and exercise funding enables CCMDs to conduct exercises within complex, multinational operational environments. CCMDs measure the effectiveness of their joint training programs by assessing their staff's readiness to execute assigned missions and achieve Global Campaign Plan objectives.

Combatant Command	FY 2024 Exercises	FY 2025 Exercises	FY 2026 Exercises	FY 2027 Exercises
AFRICOM	10	10	10	8
CENTCOM	10	12	12	8
CYBERCOM	3	3	3	3
EUCOM	18	19	21	21
INDOPACOM	19	22	22	22
NORTHCOM	11	13	13	13
SOCOM	5	5	5	5
SOUTHCOM	8	8	8	8
SPACECOM	3	3	3	3
STRATCOM	4	4	4	4
TRANSCOM	6	10	10	10
Total	**94**	**109**	**111**	**105**

5. Joint National Training Capability (JNTC). The JNTC program provides joint capabilities that support the Services and U.S. Special Operations Command in their requirement to provide trained and ready forces in support of CCMD operational requirements. This program focuses efforts on improving, rather than consuming, readiness and creates a ready surge force consistent with the Chairman's guidance. To do this, the program provides accreditation and/or certification for Service and U.S. Special Operations Command training programs and/or sites. These sites and programs enhance elements of joint context across the JNTC resulting in improved joint training for the warfighter. The decrease in accreditation/certification events is due to a rebalance of workload due to manpower constraints.

	FY 2024	FY 2025	FY 2026	FY 2027
Accreditation and/or certification events	9	10	10	10
Number of accredited programs supported	37	38	38	38
Number of certified sites supported	37	38	38	38

6. Joint Training Coordination Program (JTCP). This program is the most critical element under the JNTC and incentivizes Service participation in other Service Title 10 JNTC accredited training programs by funding the movement of personnel and materiel to and from training sites during both planning and execution phases. JTCP enables the support of realistic joint training focusing on the precepts of the latest DoW strategic guidance in order to fully support the Combatant Commanders and execute missions across the full range of military operations. Historically, not all JNTC accredited training events receive JTCP funding because the demand exceeds available funding. Funding is allocated based on the priorities of the hosting Service and availability of supporting forces. Program effectiveness is measured through quarterly tracking of event/units funded and percentage of Service training events supported.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of training events executed with JTCP	127	127	129	129
Number of units participating with JTCP	393	393	393	393

7. Joint Knowledge Online. The Joint Knowledge Online learning platform provides 24/7 global web-based access for online education and training courses. The capability provides required, theater-entry, and self-paced training to prepare individuals for joint operations and training exercises. Program effectiveness is measured through quarterly tracking of online course completions and number of CCMD joint exercises and Service training events supported with blended learning opportunities and tailored individual training courses.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of course completions	7,002,919	8,951,992	9,000,000	9,100,000
Number of exercises/events supported with blended learning and tailored training	11	11	11	11

8. Joint Interoperability and Data Link Training Center. This funding supports the delivery of Tactical Data Link and Joint Interface Control Officer training to improve Joint force integration, readiness, and support Combatant Commands' operational needs. Program effectiveness is measured through quarterly collection of number of students trained, number of joint training courses delivered, and number of mobile training teams delivered.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of students trained in classroom settings	752	752	752	752
Number of online graduates	11,000	11,000	11,000	11,000
Number of joint training courses delivered	34	34	34	34
Mobile Training Teams delivered	10	10	10	10

9. Joint Targeting School (JTS). JTS provides doctrinally based joint targeting education and training in order to prepare CCMD, Service, interagency, and allied personnel for operational-level targeting duties. Demand for joint targeting training by the CCMDs is greater than current JTS capacity. Program effectiveness is measured through quarterly collection of number of students trained and number of mobile training teams delivered. JTS plans for a baseline of 1 Mobile Training Team per CCMD per year but provides additional teams if host organizations provide funding.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of in-resident students	1,077	1,249	1,080	1,080
Mobile Training Teams delivered	13	14	14	14

10. Joint Deployment Training Center. The Joint Deployment Training Center provides functional training to CCMDs, Services, and Combat Support Agencies on Department of War joint command and control systems of record. This training results in warfighters able to plan, deploy/redeploy, manage, and maintain situational awareness of global forces, equipment, and supplies. Program effectiveness is measured through quarterly collection of number of students trained and number of exercises/contingency events supported.

	FY 2024	FY 2025	FY 2026	FY 2027
Number of students trained	1,600	1,600	1,600	1,600
CCMD exercise and contingency events supported	4	4	4	4

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
Civilian End Strength (Total)	**0**	**132**	**132**	**132**	**0**

Fiscal Year 2027 Budget Estimates

The Joint Staff Cyber

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 1: Operating Forces/Combat Development Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
TJS Cyber	8,991	221	-265	8,947	187	-31	9,103

I. Description of Operations Financed:

The Joint Staff Cyber Program delivers cybersecurity capabilities and support to the Joint Staff Chief Information Office (CIO) and Joint Staff environments by implementing the Risk Management Framework for mission networks and applications and by developing and overseeing cybersecurity processes and compliance. It manages and reports on the Cyber workforce and administers the Enterprise Mission Assurance Support Service for Joint Staff use and for Combatant Command users.

A key component of this effort is the Department of War (DoW) Enterprise Cyber Range Environment (DECRE), which operates within the Cyber and Command and Control Operational Development Division (C3OD2). DECRE offers expert planning and execution for cyber assessments, supporting testing, training, and exercises. DECRE Command and Control (C2) Information Systems is one of three designated DoW Cyber Ranges which also includes the National Cyber Range Complex, Joint Information Operations Range, and Joint Mission Environment Test Capability's Multiple Independent Layers of Security. C3OD2 provides assessment planning and execution expertise to support cyber project objectives, including testing, training, and exercise support. It delivers commonly deployed joint C2 systems, such as the Global Command and Control System (Joint), Advanced Deep Operations Coordination System, and Joint Range Extension, as well as additional systems as required by each project. It provides the operational environment needed to run these C2 systems, along with the system operators necessary to generate realistic data exchanges or evaluate cyber impacts on system functionality. C3OD2's cyber projects span activities from assessing cyber effects on individual C2 systems to conducting mission rehearsals for real-world scenarios, to training cyber mission teams, and supporting large-scale cyber exercises sponsored by United States Cyber Command and other DoW organizations.

1. Core Management Headquarters ($9,103 thousand): Provides general support of the Joint Staff in the following key area:

1.1 Joint Staff CIO Directorate: Assists the Chairman of the Joint Chiefs of Staff in providing military advice while advancing cyber defense, Joint and Coalition interoperability, and C2 systems capabilities required by the Joint Force to preserve the nation's security. The Joint Staff CIO also provides management and oversight of processes that support and enable Joint Staff mission networks.

Budget Activity 04 (BA-04)/ Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
Service-wide Activities	0	0	0	0	0	431,652	431,652

I. Description of Operations Financed:
Joint Interagency Task Force 401 ($431,652 thousand) - The Joint Interagency Task Force 401 (JIATF 401) is the Department of War (DoW) lead organization to counter small Unmanned Aerial Systems (C-sUAS). JIATF 401 synchronizes C-sUAS efforts across the DoW to rapidly deliver joint capabilities at scale to defend the homeland, protect U.S. and allied forces, defend critical infrastructure, and assist federal agencies. The task force has a global focus and is a multifaceted organization leading DoW C-sUAS activities at the nexus of Office of Secretary of War, the Joint Staff, Combatant Commands, and the Services. The JIATF 401 will also exercise oversight and funding allocation for the Joint C-sUAS University, which provides standardized institutional training to the warfighter and government partners. The JIATF 401 is innovative, scalable, and threat adaptive. It has one measure of effectiveness: quickly deliver state-of-the-art C-sUAS capabilities to the warfighter at home and abroad. The Secretary of War designated the Secretary of the Army as DoW's Executive Agent for C-sUAS and aligned the JIATF 401 as a Chairman's Controlled Activity in the Joint Staff. The Executive Agent holds acquisition and procurement authority and oversight for the JIATF 401 activities.

The FY 2027 spend plan amount for JIATF 401 includes $431,652 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $431,652 thousand.

The FY 2026 spend plan amount for JIATF 401 includes $0 thousand of discretionary and $11,500 thousand of mandatory (reconciliation) for a total of $11,500 thousand. FY 2026 Reconciliation funding sustains deployed capabilities through integration, assessments, and site support for Domestic Shield (formerly known as Replicator 2). This funding enables enterprise-level operations across more than 220 sites, supporting critical activities such as joint site assessments (including travel, survey teams, and data collection), integration support (covering power, networking, and telecom), site preparation (emplacement, safety, and environmental checks), and early sustainment efforts (such as maintenance, troubleshooting, and vendor support).

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $431,652

1) JIATF 401 Establishment - Civilian Pay $10,600
Funds 50 civilian FTEs to support the establishment of JIATF 401 as the lead organization to counter small Unmanned Aerial Systems (C-sUAS) and synchronize C-sUAS efforts to rapidly deliver joint capabilities at scale to defend the homeland, protect U.S. and allied forces, defend critical infrastructure, and assist federal agencies.
(FY 2026 Baseline: $0 thousand; 0 FTEs; +50 FTEs)

2) JIATF 401 Establishment - Contract Support and Services $161,102

Provides contract services and support for the program management, operational planning, and analytical support, as well as coordination across interagency partners.
(FY 2026 Baseline: $0 thousand)

3) JIATF 401 Establishment - Equipment and Supplies $125,917
Funding supports equipment and supplies, replacement parts, maintenance kits, and operational tools to support the sustainment of existing systems, ensuring they remain functional and effective in addressing emerging threats.
(FY 2026 Baseline: $0 thousand)

4) JIATF 401 Establishment - Facilities, Sustainment, Restoration and Modernization $7,548
Funds facility upgrades for the Joint C-sUAS University to support the expanded mission of the organization.
(FY 2026 Baseline: $0 thousand)

5) JIATF 401 Establishment - Other intra-governmental purchases $117,271
Funding supports the JIATF 401 to synchronize C-sUAS across the DoW in concert with other government agencies to rapidly deliver low cost, attritable, and consumable C-sUAS capabilities. The JIATF 401 intra-governmental purchases will fund efforts executed by interagency and service partners supporting support rapid fielding of C-sUAS capabilities across the whole of government. This includes sustaining operational activities, maintaining existing C-sUAS systems, and providing the necessary resources to address immediate mission requirements.
(FY 2026 Baseline: $0 thousand)

6) JIATF 401 Establishment - Travel $9,214
Travel budget supports the JIATF 401 efforts to lead, coordinate, and integrate DoW C-sUAS activities worldwide in support the Joint C-sUAS University; efforts consist of CONUS and OCONUS. Activities include capability gap assessments, evaluation of proposed solutions, installation, training, and sustainment of employed equipment.
(FY 2026 Baseline: $0 thousand)

9. Program Decreases $0

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $0

I. Description of Operations Financed:

The National Defense University (NDU) $173,748 thousand: The NDU is the premier center for joint professional military education and the intelligence community, with a main campus on Fort McNair in Washington, D.C. There are three additional campuses supporting the NDU mission: The Joint Forces Staff College located at Norfolk, VA; The Joint Special Operations Master of Arts program located at Fort Bragg, NC; and the National Intelligence College located at Bethesda, MD. The Middle States Commission on Higher Education accredits the NDU. The NDU conducts world-class Joint Professional Military Education, seminars, symposia, and professional development and conferencing for the Department of War (DoW) and Congressional representatives.

The NDU is composed of the following colleges, institutions, and budget activities located at Ft. McNair, Washington, DC, and Norfolk, VA:

- CAPSTONE / PINNACLE / KEYSTONE
- College of International Security Affairs
- Dwight D. Eisenhower School of National Security and Resource Strategy
- College of Information Cyberspace (formerly Information Resources Management College)
- Institute for National Strategic Studies
- Joint Forces Staff College
- National War College
- National Intelligence College
- NDU Operations
- NDU Headquarters Activities

1. CAPSTONE / PINNACLE / KEYSTONE, $3,418 thousand:

CAPSTONE: This is a congressionally-mandated course required for all newly promoted active duty one star generals and admirals. By DoW policy, attendance is required within the first two years of confirmation to the one-star rank. CAPSTONE, offered four times a year, is a five-week course consisting of seminars, case studies, informal discussions, visits to key U.S. military commands within the continental U.S., and overseas

field studies to areas with high U.S. interests. Overseas field studies involve interactions with the Combatant Commanders, American Ambassadors, embassy staffs, and senior political and military leaders of foreign governments.

PINNACLE: Prepares selected three-star commanders to lead joint and combined forces, building upon CAPSTONE and the Joint Flag Officer Warfighting Course.

KEYSTONE: Prepares Command Senior Enlisted Leaders to serve in a general or flag officer level joint or Service headquarters.

2. College of International Security Affairs (CISA), $3,385 thousand: The CISA builds expert practitioners of Irregular Warfare across its campuses at Fort McNair and Fort Bragg (CISA-Joint Special Operations Master of Arts) and educates conventional and special operations joint warfighters, civilian national security leaders, and America's partners and allies in the theory and application of irregular warfare in order to promote U.S. national security interests. Students earn an NDU Master of Arts Degree in Strategic Security Studies, with McNair graduates earning Joint Professional Military Education II credit and Joint Special Operations Master of Arts students earning Advanced Operations Course credit. The CISA two-week Reserve Component National Security Course is executed three times each year for U.S. military officers (O4-O6) and non-commissioned officers (E8-E9) of the U.S. Reserve Components, interagency civilians, and partner nation officers. Upon completion of Reserve Component National Security Course, U.S. reserve officers earn two Joint credits toward Joint Qualification. The CISA four-month Homeland Defense Fellowship certificate program has been composed of International, Joint, and Interagency students, where Fellows analyze emerging security threats in their respective homelands and share best practices to organize appropriate and effective strategic integrated responses and protect critical infrastructure. The majority of CISA international students are funded through the DoW's Regional Defense Fellowship Program.

3. Dwight D. Eisenhower School of National Security and Resource Strategy, $6,909 thousand: This Senior-level course of study in national security strategy to prepare selected military officers, federal officials, and international officers for high-level policy, command, and staff responsibilities to lead the strategic institutions and activities associated with the integrated development and resource execution of national security and national defense strategies. The academic program includes courses in national security studies, economics, defense strategy and resourcing, acquisition, the global industrial base, and strategic leadership. The curriculum includes a one-of-a-kind study of industry that requires the development of a strategic perspective on the U.S. and global industrial base and its role in supporting the resource requirements of national security.

4. College of Information Cyberspace, $6,918 thousand: The College of Information Cyberspace prepares U.S. military and civilian leaders, international officers, and cyber workforce experts to lead, advise, and advance national and global security in the cyber domain and information environment; prepares graduates in a dynamic forum in which senior defense professionals and the broader military and federal civilian communities gain knowledge, skills, and competencies for development of national security and national cybersecurity strategies; and awards graduate level certificates and a Master of Science in Strategic Information and Cyberspace.

5. Institute for National Strategic Studies, $4,910 thousand: The Institute for National Strategic Studies produces cutting-edge research and analysis for joint warfighters and other national security leaders and integrates scholarship to advance NDU's educational mission. The Institute for National Strategic Studies provides timely, objective analyses, and recommendations to senior DoW decision makers and joint warfighters on international security and defense issues.

6. Joint Forces Staff College, $7,375 thousand: This intermediate and senior-level joint college educates national security leaders to plan and execute operational-level joint, multinational, and interagency operations. The Joint Forces Staff College was established to meet the requirements of the Goldwater-Nichols Act of 1986, that led to the establishment of the Joint Forces Staff College and other institutions focused on joint military education. The Officer Professional Military Education Policy establishes three Joint Professional Military Education programs: Joint Advanced Warfighting School, Joint and Combined Warfighting School, and the Joint and Combined Warfighting School-Hybrid to meet that congressional mandate. The Joint and Combined Warfighting School awards Joint Professional Military Education Phase II and Joint Advanced Warfighting School awards a Master of Science in Joint Warfighting.

7. National War College, $5,348 thousand: The National War College provides senior-level course of study in national security strategy and prepares select military officers, federal officials, and international officers for high-level policy, command, and staff responsibilities. The college emphasizes the joint (multi-service), interagency, and international perspectives and awards the Master of Science in National Security Strategy.

8. National Intelligence College, $3,285 thousand: The National Intelligence College, previously known as the National Intelligence University under the Office of the Director of National Intelligence. The National Intelligence College is a multi-campus institution dedicated to educating and preparing the next generation of Intelligence Community leaders. As the premier educational entity directly supporting national security and intelligence communities, the National Intelligence College delivers cutting-edge, career-long intelligence education to approximately 300 intelligence and national security professionals annually. The National Intelligence College offers a diverse curriculum that includes two master's degrees and a Certificate in Strategic Intelligence. The National Intelligence College's programs are designed to address the dynamic needs of the Intelligence Community and national security sectors through education and research in an integrated and multi-agency learning environment, equipping graduates with the essential skills and strategic insights to address complex security challenges.

9. NDU Operations, $125,973 thousand: NDU Operations provides information technology, facilities and engineering services, operations management, human resources, financial management services, library services, security, strategic communications, academic affairs, wargaming and simulation, institutional research and registrar, and Health and Fitness Directorates which provide general support to the Joint Staff and NDU components.

9. NDU Headquarters Activities, $6,227 thousand: The NDU Headquarters supports the seamless execution of university management functions primarily performed by the NDU President and Chief of Staff to include activities in support of international partners, interagency, industry, and other stakeholder engagements, as well as strategic initiatives to assess and implement modern academic and business processes and practices.

b) One-Time FY 2027 Increases	$0
c) Program Growth in FY 2027	$53,043
1) Enhanced Performance Awards	$920

The increase strengthens the Department's ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $56,219 thousand; +0 FTEs)

2) Facilities, Sustainment, Restoration and Modernization (FSRM) $15,223
Increase reflects program growth and associated FSRM requirements to improve academic and support facilities.
(FY 2026 Baseline: $30,038 thousand)

3) National Intelligence College - Direct costs $3,285
Increase funds direct costs (course materials, travel, college-specific supplies, and support contracts) associated with the establishment of the National Intelligence College (formerly the National Intelligence University under the Office of the Director of National Intelligence).
(FY 2026 Baseline: $0 thousand; 0 FTEs; +0 FTEs)

4) NDU Operations - National Intelligence College $28,715
Funds operations and overhead costs (civilian pay, utilities, leases, and registrar support) associated with the establishment of the National Intelligence College as part of the National Defense University (formerly the National Intelligence University under the Office of the Director of National Intelligence).
(FY 2026 Baseline: $0 thousand; 0 FTEs; +64 FTEs)

5) Utilities $4,215
Increase funds transition the responsibility of base-level utilities support from the Army Garrison to the National Defense University beginning in FY 2027.
(FY 2026 Baseline: $1,454 thousand)

6) Wargaming Center support for Joint Professional Military Education $685
Increase enhances support necessary to sustain and strengthen the Joint Professional Military Education training curriculum.
(FY 2026 Baseline: $749 thousand)

9. Program Decreases $0

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases $0

c) Program Decreases in FY 2027 ..... $0

FY 2027 Budget Request $173,748

IV. Performance Criteria and Evaluation Summary:

National Defense University (NDU) Success of the NDU programs is measured by the quantity and quality of graduates who are skilled in national and international security policy and strategy, joint warfighting and campaigning, national resource strategy and economic and military mobilization, cyberspace policy and strategy, information warfare, irregular warfare, and strategic leadership and decision-making. The NDU also measures success by the caliber of its faculty, the quality and rigor of its academic programs, and the level and pace in which research products enter the national security arena.

All joint academic programs at NDU are reviewed and approved by the Joint Staff J-7 Program for Accreditation of Joint Education, a rigorous evaluation of the curriculum and assessment of student outcomes. The Middle States Commission on Higher Education regionally accredits the University to award Master's Degrees and graduate credits.

The NDU faculty are nationally and internationally recognized as excellent teachers and for their expertise and contributions to research in their respective fields. Topics include joint warfighting and campaigning, ethical leadership and civil-military relations, supply chain management, cyber strategy, AI, irregular warfare, and information warfare. Due to the sensitive nature and complex topics addressed, many products of the NDU faculty cannot be attributed or publicly disclosed. The NDU publishes The Chairman of the Joint Chiefs of Staff national security journal, *Joint Force Quarterly*, which is a major contribution to the national security studies and joint operations and a quarterly journal of complex operations entitled *Prism*.

The following tables describe the actual (FY 2025) and planned (FY 2026 and FY 2027) enrollment in NDU professional military education programs.

Fiscal Year 2027 Budget Estimates

Washington Headquarters Services

April 2026

Operation and Maintenance, Defense-Wide Summary ($ in thousands)
Budget Activity (BA) 4: Administration and Service-wide Activities

	FY 2025 Actuals	Price Change	Program Change	FY 2026 Enacted	Price Change	Program Change	FY 2027 Request
WHS	473,827	-9,545	-54,176	410,106	6,956	119,484	536,546

I. Description of Operations Financed:
The Washington Headquarters Services (WHS) FY 2027 President's Budget request of $536,546 thousand is $126,440 thousand above the FY 2026 requested amount and is comprised of $6,956 thousand in pricing increases and a net $119,484 thousand in programmatic increases. The FY 2027 request empowers the WHS to continue to support key administration initiatives and priorities in defense of the Nation.

The WHS directly supports the Department of War (DoW), the Secretary of War (SECWAR), the Office of the Secretary of War (OSW), the Deputy Secretary of War (DEPSECWAR), the Defense Legal Services Agency (DLSA), the United States Court of Appeals for the Armed Forces (USCAAF), the Defense Agencies and DoW Field Activities (DAFA), including Pentagon Force Protection Agency (PFPA), the Defense Security Cooperation Activity (DSCA), the Defense Prisoner of War (POW)/Missing in Action (MIA) Accounting Agency (DPAA), National Guard Bureau, Defense Technology Security Administration (DTSA), and Defense Test Resource Management Center (DTRMC) and other select Federal Agencies such as the Department of State (DoS), the National Archives and Records Administration (NARA), and the White House. Additionally beginning in FY 2026 WHS began supporting the Direct Reporting Program Managers (DRPM) including the DRPM for Submarines, DRPM for Golden Dome for America, DRPM for Critical Major Weapons Systems, as well as the Economic Defense Unit. The WHS provides more than 80 essential services, absorbing and consolidating administrative requirements that allow DoW staff to focus on matters involving policy analysis and program oversight more efficiently. The WHS demonstrates expertise and innovation and provides solutions to tackle complex issues though operational prioritization. The WHS continues to transform into an organization of the future by focusing and upgrading core functions.

The WHS continues to cultivate the future by investing in the 2026 National Defense Strategy (NDS) objectives of "America First. Peace Through Strength. Common Sense," through the following lines of effort:

1) Defend the Homeland – The WHS provides foundational, mission-critical support that enhances the operational readiness and effectiveness of supported stakeholders directly responsible for homeland defense.

2) Deter China in the Indo-Pacific Through Strength, Not Confrontation – The WHS is a key enabler for supported stakeholders that manage strategic alliances, technology security, and inter-agency coordination, all of which are central to the deterrence strategy in the Indo-Pacific.

3) Increase Burden-Sharing with U.S. Allies and Partners – The WHS streamlines administrative and support functions in support of the Department by efficiently allocating and maximizing resources, consistently innovating solutions, and providing a skilled workforce.

4) Supercharge the U.S. Defense Industrial Base – The WHS provides essential support services within the Pentagon Reservation (Pentagon, Mark Center, and Raven Rock Mountain Complex) and the National Capital Region (NCR) providing reliable and responsive service to customers.

The WHS services are organized into three main functional areas: People, Business, and Facilities. Each is supported by various operational areas throughout the organization. The WHS enables centralized operational support functions to maximize efficiency, emphasizing our commitment to providing leading edge services to our mission partners in support of the defense to the Nation in the following functions:

WASHINGTON HEADQUARTERS SERVICES IMMEDIATE OFFICE:
The WHS Immediate Office (WHS IO) serves as the Agency integrator and establishes the framework for synchronizing emergent, cross-functional requirements among WHS Directorates to secure mission accomplishment and achieve strategic goals on behalf of the WHS Director and the Director of Administration and Management (DA&M). The WHS IO provides program management, administrative, and operational services to sustain and meet new Administration and regulatory requirements and supports Presidential and DoW transitions.

ACQUISITION DIRECTORATE:
The Acquisition Directorate (AD) plans, coordinates, and manages an extensive range of supplies and professional services totaling $4.377 billion in obligations in FY 2025. The AD is the single enterprise contracting office supporting acquisition services to all OSW components, WHS, the PFPA, the DSCA, the DPAA, and more. Contracts for knowledge-based services, research and development, and facility support account for more than 80 percent of AD's total obligations, providing a consistent capability to connect people and process information.

EXECUTIVE SERVICES DIRECTORATE:
The Executive Services Directorate (ESD) provides comprehensive knowledge management, information security, and visual information services to the OSW and DAFAs. The ESD also executes legally mandated programs and supports the Pentagon Reservation by providing a wide variety of customer services. The ESD provides executive services and a wide range of history and library services to the SECWAR, DEPSECWAR, OSW components, the Joint Staff and the DAFAs, and other agencies and organizations. Mandated programs include the Freedom of Information Act, the Privacy Act of 1974, the Federal Records Act, the Paperwork Reduction Act, Executive Order 13526, and programs relating to classification and declassification reviews. The executive services include managing the DoW issuances program, managing correspondence for the SECWAR and DEPSECWAR through the Correspondence and Task Management System, and designing visual information products. The ESD further supports its customers by operating the Pentagon Motor Pool.

FINANCIAL MANAGEMENT DIRECTORATE:
The Financial Management Directorate (FMD) provides Planning, Programming, Budgeting, Execution and accounting services, to include an established and designated U.S. Department of the Treasury direct treasury payment office, for the WHS, the OSW, and assigned DAFAs, and other programs and task forces. The FMD ensures financial transparency and consistency in identifying, analyzing, and developing funding solutions. Additionally, the FMD manages key functions to include developing the Program Objective Memorandum, formulating the President's Budget; funds distribution and certification; direct treasury disbursement; financial reporting; civilian pay management; audit support; and

manpower management. The FMD provides central funds management for the two revolving funds that provide for the operation and security of the Pentagon Reservation and the centralized management of DoW leases within the NCR. The FMD's Robotic Process Automation team leverages automation solutions to reduce manual work, enhance accuracy and timeliness, and allow employees to shift from low-value to high-value work. In FY 2027 the FMD will manage approximately $3.0 billion of WHS' organic funds, and approximately $229.3 billion for WHS customers in the OSW and assigned DAFAs.

The FMD Disbursing Office has disbursed $2.5 billion to date in FY 2026, and is expected to disburse approximately $5.2 billion by the end of FY 2026, an increase of approximately $1.5 billion over the FY 2025 disbursement total. This significant growth reflects FMD's exceptional of financial management and disbursement processes and increased higher value contracts.

FACILITIES SERVICES DIRECTORATE:
The Facilities Services Directorate (FSD) ensures the 24/7/365 readiness of facilities, enabling DoW and national leadership to execute mission responsibilities and provide the DoW workforce at supported locations with a safe, secure, healthy, resilient, energy efficient and operationally effective working environment. The FSD provides comprehensive lifecycle facility management supporting over 60,000 employees in approximately 15 million square feet of facilities across the NCR to include the Pentagon Reservation and 75 leased facilities. The FSD manages the DoW Headquarters Military Construction program, including all aspects of the planning, programming, and design process, and the Capital Improvement Program for the Pentagon Reservation.

The FSD customer base includes the OSW, the Joint Chiefs of Staff, the DAFAs, the Military Departments (MILDEPS) in the NCR, the National Guard Bureau, designated boards and commissions, and cross-functional teams. The FSD delivers infrastructure aligned with the NDS by providing structural integrity, resilient, and timely modernization of DoW facilities. Facility management services include design and construction; space allocation; maintenance, repair, alterations, and operations; DoW Sensitive Compartmented Information Facility (SCIF) management including building, design, and inspection; landscaping; property and real-estate management; permits and compliance with fire; and occupational health and safety.

The FSD is responsible for Pentagon Reservation master planning and execution with goals to ensure readiness; improve security, safety, and quality of life for employees and visitors; and enhance facility resiliency and sustainability.

The FSD leads space reduction initiatives to maximize efficiencies and reduce the leased space portfolio cost to the DoW through consolidation and return of leased facilities.

HUMAN RESOURCES DIRECTORATE:
The Human Resources Directorate (HRD) provides comprehensive human resources and personnel security services to the OSW, DAFAs, and select government organizations. The HRD also provides a full suite of services for the primary beneficiary base of more than 6,100 civilian employees and nearly 3,000 uniformed military members.

The HRD centrally manages its civilian compensation and benefits program. The HRD delivers a full range of advisory and transactional services for employee benefits (e.g., health and life insurance, retirement and injury compensation). The HRD manages the Employee Assistance Program, telework and wellness programs, and giving campaigns (e.g., Combined Federal Campaign). The HRD provides Workforce Shaping program management, including Voluntary Early Retirement Eligibility/Voluntary Separation Incentive Payment, Furlough, and Reduction in Force.

The HRD assists WHS-serviced DoW components recruit personnel and serves as a senior technical adviser on a range of HR issues critical to the achievement of human capital goals, including special employment.

The HRD provides HR policy guidance and voices HR concerns for all the DAFAs as a voting member of the DoW Civilian Personnel Policy Council. These representative and liaison duties provide a venue through which the DA&M communicates and translates the SECWAR's agenda into policy. The Senior Executive Management Office manages all political appointments for the DoW and manages the executive resources, staffing, and performance management for the Senior Executive Service, Scientific and Professional, Senior Level, and Intelligence Executive positions within the DoW Components. The Military Personnel Division provides military personnel support services to the OSW, the WHS, the MILDEPs, the White House, and select DAFAs.

SECURITY ENTERPRISE SERVICES DIRECTORATE:
The Security Enterprise Services Directorate (SESD) provides comprehensive security, mission assurance, and onboarding support to the OSW, WHS, other supported DoW and non-DoW activities, and elements of the legislative and judicial branches of government across the country and at Naval Station Guantanamo Bay (GTMO). The core mission is executed through six primary divisions: the Onboarding Management Team Division (OMT), Office of Special Security Division (OSS), Integrated Security Operations Division (ISO), the Personnel Vetting Operations Division (PVO), Sensitive Compartmented Information (SCI) Management Division, and the Security Appeals, Policy, and Performance Oversight Division (SAPPO).

The OMT streamlines the onboarding process for new personnel through its Security Branch and Customer Relations Management Branch by achieving Day One facilities and systems accesses and provisioning of equipment.

The OSS provides specialized security support to the Office of Military Commissions in the NCR and GTMO, ensuring these critical missions maintain appropriate security protocols. As a key component of the consolidated security enterprise, OSS delivers tailored security solutions for these high-priority operations.

The ISO manages comprehensive security operations and dedicated Security Office Support Services for the Pentagon Reservation, leased spaces throughout the NCR, and customer locations across the country. The ISO ensures the physical and information security of WHS-supported missions, facilities, and personnel.

The PVO, formerly under the Human Resources Directorate, manages personnel vetting in support of WHS customers to ensure proper security clearance processing and management and serves a vital role in ensuring a trusted workforce across all WHS-supported customers, including all

three branches of the federal government. Integration of the PVO into SESD centralizes all personnel security functions under one directorate, creating a more efficient and responsive security clearance process.

The SCI Management, led by the WHS Special Security Officer, provides comprehensive SCI support to WHS-serviced customers, including personnel management, indoctrinations and training, and lifecycle management of SCIFs. The SCI Management also supports Special Access Programs, and Alternative Compensatory Control Measures.

The SAPPO provides personnel security policy oversight and is the final adjudicative authority for security clearances for the DAFA. SAPPO also provides internal guidance for SESD operations through performance oversight as a direct report to the Director, SESD, by providing policy guidance, performance oversight, and managing clearance appeals.

The SESD implementation follows a phased approach to minimize service disruption while ensuring appropriate resources are acquired. Working in conjunction with the Security Enterprise Transformation and Modernization Program Office, SESD is conducting ongoing enterprise assessments of security program capabilities across WHS Directorates to reduce operational overlap and eliminate redundancy. The SESD is scheduled to achieve full operational capability by the end of 2028, completing the consolidation of security functions and realignment of personnel, facilities, resources, and other assets to create a more effective and efficient security enterprise for WHS and its customers.

The FY 2027 request for Washington Headquarters Services Operations and Maintenance includes $536,546 thousand of discretionary and $513,000 thousand of mandatory for a total of $1,049,4546 thousand.

The mandatory funds provide $513,000 thousand to WHS to restore the long-term sustainment of key infrastructure throughout the Pentagon Reservation and address a significant deferred maintenance backlog. This infrastructure investment is essential to ensure mission readiness and mitigate operational risk, and will bolster critical systems, including Fire Protection, Mission-Critical Power Redundancy, High-Voltage Utility Controls, Vertical Transport Systems (Elevators), and the replacement of high-risk equipment at the Heating and Refrigeration Plant.

The FY 2026 spend plan amount for Washington Headquarters Services Operations and Maintenance includes $410,106 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $410,106 thousand.

The FY 2025 spend plan amount for Washington Headquarters Services Operations and Maintenance includes $473,827 thousand of discretionary and $0 thousand of mandatory (reconciliation) for a total of $473,827 thousand.

II. Force Structure Summary:
Not Applicable.

III. Financial Summary ($ in Thousands):

		FY 2026				
			Congressional Action			
A. BA Subactivities	FY 2025 Actuals	Budget Request	Amount	Percent	Current Enacted	FY 2027 Request
Compensation and Benefits	$118,655	$114,881	$0	0.00%	$114,881	$136,587
Acquisition Management	$6,527	$3,042	$0	0.00%	$3,042	$2,237

6. Price Change $6,956

7. Functional Transfers $0

a) Transfers In $0

b) Transfers Out $0

8. Program Increases $150,451

a) Annualization of New FY 2026 Program $0

b) One-Time FY 2027 Increases $0

c) Program Growth in FY 2027 ..... $150,451

1) Compensation and Benefits: Average Annual Rate $149
Each year, civilian compensation rates are developed based on detailed execution and cost factor analyses. These rates are created and implemented with the paramount purpose of accurately forecasting cost estimates for the civilian workforce. The average annual rate (AAR) change is the product of rate changes combined with fluctuations in the composition of civilian pay types.
(FY 2026 Baseline: $114,490 thousand; 639 FTEs; +0 FTEs)

2) Compensation and Benefits: Awards $2,401
The increase strengthens the Department’s ability to recognize and reward the civilian workforce whose expertise and continuity underpin mission success. Expanded award capacity helps retain the talent that sustains warfighter readiness, drives innovation, and ensures uninterrupted support across the enterprise. Investing in civilian recognition directly reinforces the workforce that delivers stability, operational excellence, and long-term capability for the Department.
(FY 2026 Baseline: $2,125 thousand)

3) Joint Analysis Center of Excellence $98,200
The establishment of the Joint Analysis Center of Excellence (JACE) is a critical initiative to equip our nation's senior-most leaders with decisive, data-driven insights. The JACE will provide the Secretary of War, Deputy Secretary, Chairman, and Vice Chairman of the Joint Chiefs of Staff with rigorous, unbiased analysis of strategic options across all warfighting domains. This funding is a direct investment in the analytical capabilities—including wargaming, modeling, and simulation—necessary to evaluate force employment, guide future force design, and harness emerging technologies to maintain our competitive advantage. The requested funds are allocated for the essential personnel, facilities, and technology required to deliver this vital national security capability. The FY 2027 requested funding allocates $19,606 thousand for 70 civilian personnel, $30,200 thousand for secure facilities and utilities, $38,394 thousand for essential IT hardware and software development, and $10,000 thousand for specialized contractor support.
(FY 2026 Baseline: $0 thousand; 0 FTEs; +70 FTEs)

4) Mission Support: Buildings Maintenance Fund Rent $353
This increase delivers essential funding to the Buildings Maintenance Fund to support mandatory escalations in standard rental rates for all properties leased by Washington Headquarters Services.
(FY 2026 Baseline: $16,183 thousand)

5) Mission Support: Defense Counterintelligence Security Agency $6,406

Funding has been realigned internally to correct expenditure classifications. This action provides more accurate reporting and transparent accounting of actual costs.
(FY 2026 Baseline: $0 thousand)

6) Mission Support: History and Library Division - Realignment of Labor to Mission $170
This increase is due to the realignment of funding from labor to mission to support organizational requirements and operational flexibility.
(FY 2026 Baseline: $170 thousand)

7) Mission Support: Pentagon Reservation Maintenance Revolving Fund and Facilities $42,155
This increase funds critical infrastructure modernization of classified projects for the Raven Rock Mountain Complex and incorporates a necessary rent price adjustment, both of which are essential for ensuring long-term operational readiness.
(FY 2026 Baseline: $193,645 thousand)

8) Mission Support: Services & Security.....$617
This funding increase supports modifying essential contracts to meet expanded service requirements while simultaneously enhancing critical IT security capabilities. The funds will address expanded needs in Records Management, Audit Support, Human Resources, and Security Operations, and will also drive the implementation of Zero Trust principles, expand cybersecurity programs, and integrate threat management.
(FY 2026 Baseline: $14,115 thousand)

9. Program Decreases .....$-30,967

a) Annualization of FY 2026 Program Decreases $0

b) One-Time FY 2026 Increases .....$-12,252

1) 9/11 Pentagon Memorial Visitor Education Center .....$-12,252
This funding decrease reflects the removal of the $12,000 thousand one-time FY 2026 Congressional add for the 9/11 Pentagon Memorial Visitor Education Center.

c) Program Decreases in FY 2027 .....$-18,715

1) Compensation and Benefits: History and Library Division - Realignment of Labor to Mission .....$-170

This reduction is due to the realignment of funding from labor to mission to support organizational requirements and operational flexibility.
(FY 2026 Baseline: $114,881 thousand; 639 FTEs; -1 FTEs)

2) Compensation and Benefits: Voluntary Separation Incentives .....$-150
This funding decrease reflects an adjustment to program budget projections, which are based on an updated analysis of the eligible workforce population.
(FY 2026 Baseline: $391 thousand)

3) Efficiency - Contract Services .....$-10,810
The reduction of funding for contract services is undertaken in direct support of the President's Executive Order, which prioritizes cost efficiency, transparency, and the consolidation of services. This measure represents a deliberate workforce optimization strategy designed to streamline resources while safeguarding against adverse impacts to modernization initiatives and overall mission effectiveness.
(FY 2026 Baseline: $83,626 thousand)

4) Efficiency - Travel Budget .....$-124
Reduces discretionary travel funding to align with the Secretary of War's highest priorities to strengthen readiness, modernize capabilities, and sustain the Force.
(FY 2026 Baseline: $337 thousand)

5) Federal Retirement System - Agency Contribution Rates.....$-455
The reduction reflects updated Federal Employees Retirement System (FERS) contribution rates driven by changes in actuarial assumptions, workforce demographics, and projected retirement liabilities. These periodic adjustments lower the Department’s required contributions for FERS regular, Revised Annuity Employees (RAE) and Further Revised Annuity Employees (FRAE). The decrease aligns funding with current long-term cost projections while maintaining full support for civilian retirement benefits and ensuring continued compliance with government-wide retirement funding requirements.
(FY 2026 Baseline: $13,945 thousand)

6) Mission Support: Buildings Maintenance Fund Rents.....$-3,099
This decrease corresponds to a downward rate adjustment for customers. The reduction is made possible by savings realized from newly implemented efficiencies and a decreased requirement for leased space.
(FY 2026 Baseline: $16,183 thousand)

7) Mission Support: Defense Finance and Accounting Service .....$-281

Reduces customer rate and the volume of work provided.
(FY 2026 Baseline: $8,190 thousand)

8) Mission Support: Facilities Sustainment.....$-3,183
This funding decrease reflects the programmatic reduction in space alteration projects across the Pentagon Reservation and the NCR.

(FY 2026 Baseline: $4,242 thousand)

9) Mission Support: Other Services and Purchases.....$-443
Internal realignment to provide more accurate reporting and transparency of actual expenditures that provide specialized support for process improvement, data analytics, and business intelligence tool development, ensuring efficient operations, document management and processing, and increased customer service and engagement capability.
(FY 2026 Baseline: $16,653 thousand)

FY 2027 Budget Request $536,546

IV. Performance Criteria and Evaluation Summary:

The WHS is the designated shared service provider for the OSW, DoW components, and specified offices in the NCR. The WHS delivers full-spectrum services and facilitates our mission partners' success, serving as a force multiplier to enable business practices for greater performance and affordability. The following identifies some of the more significant indicators for WHS O&M activities:

Acquisition Directorate: The Acquisition Directorate provides knowledge-based services, research and development, and facility support, providing a consistent capability to connect people and process information. This metric showcases performance, contract volume, and commitment to the small business community.

	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Total Number of Contracts	4,841	5,315	5,315
Number FAR Based Actions	3,734	4,029	4,029
Number of Grants Awarded	145	58	58
Number of Leases Awarded	72	70	70
Number of Cooperative Agreements Awarded	94	54	54
Number of Other Transactions	278	209	209
Number De-obligations (Impacts Financial Audit)	518	879	879
Small Business Contract Actions (Certified HUB Zone, Serviced-Disabled Veteran-Owned, Small Disadvantage Business, Woman-Owned)			
Dollars to Small Business	$1,126 million	$855 million	$855 million
Small Rate	40%	40%	40%

Executive Services Directorate: Key performance indicators used to evaluate, adjust, and improve business processes includes the following:

- Per Executive Order 13526 (Section 3.5) to provide the public access to classified records cleared for public release, if requested by the public. The goal is designed to provide timely access to previously classified records to the public, specifically from the OSW and Joint Staff.
- Review OSW issuances to ensure necessity and applicability to the current requirements. The goal is to streamline DoW requirements to reduce the implementation burden on the DoW community, and to put policy and guidance into effect rapidly and efficiently.
- Review documents designated for public release by the Department to preclude publication of classified or sensitive data. The goal ensures timely review within a designated suspense.

	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Mandatory Declassification			
Number of cases closed	1,548	1,700	1,800
Cases closed within executive order requirements (Goal: 90%)	65%	65%	65%
DoW Issuances/Directives			
Number of completed compliance reviews	733	1,000	1,000
Directives Division compliance reviews completed within 20% of suspense in workdays (Goal: 90%)	96%	95%	95%
Prepublication/Security Review of DoW Documents for Public Release			
Number of cases received	6,177	6,300	6,500
Cases closed before statutory/issuance suspense (Goal: 90%)	90%	90%	90%
Freedom of Information Act Cases Submitted			
Number of cases received	5,174	6,600	8,000
Cases closed (Goal: 90%)	5,196	6,500	7,800

Financial Management Directorate: Key performance indicators used to evaluate, adjust, and improve business processes includes the following:

- Budget Execution Obligation Requests – with a goal of processing 90% of all obligations within three business days, FMD is making progress in this requirement. The 90% goal ensures the processing of obligations in a timely manner and assists WHS in reaching the 80/20 rule: a statutory limitation concerning year-end obligation.
- Treasury Direct Disbursements – with a goal of processing more than 75% of disbursements within six days of scheduled payment dates.
- Civilian Payroll – FMD certifies timecards for OSW, WHS, PFPA, USCAAF, DLSA, National Guard Bureau, DTSA, and DTRMC.

	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Budget Execution Obligation Requests			
Number of obligations processed	21,049	30,500	41,500
Obligations processed within 3 business days (Goal: 90%)	90%	90%	90%

Treasury Direct Disbursement			
Number of disbursements processed	57,467	60,000	62,646
Disbursements processed within 6 days of scheduled payment date (Goal: 75%)	90%	90%	90%
Civilian Payroll			
Number of active employees in payroll (per pay period)	5,554	5,299	5,369
Payroll certified before due date (Goal: 90%)	99%	99%	99%

Facilities Services Directorate: Key performance indicators used to evaluate, adjust, and improve business processes includes the following:

	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
OSW and WHS occupied SF - Rent requirement (Pentagon, Mark Center, and leased space)	2,187,741	2,187,741	2,187,741
DoW Leased Space Portfolio within the NCR			
***Projected** Number of buildings managed	75	75	75
SF within the leased space portfolio	~5.0 mil sq ft	~5.0 mil sq ft	~5.0 mil sq ft

Human Resources Directorate: Key performance indicators used to evaluate, adjust, and improve business processes includes the following:

- Average Time to Hire General Schedule (GS) 15 and below or equivalent employees
- Average Time to Fill Senior Executive Service (SES) – Non-Competitive Actions
- Average Time to Fill SES – Competitive Actions
- Percentage of personnel actions processed before respective payroll cut-off date

	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Time-to-Fill			
Number of closed hiring actions for SES – Non-Competitive Actions	205	120	120
Average number of days to close SES hiring actions - Non-Competitive	45	60	60
Number of closed hiring actions for SES – Competitive Actions	54	80	80
Average number of days to close SES hiring actions - Competitive	195	180	180

Time-to-Hire			
Number of closed hiring actions for GS-15 and below or equivalent	507	1,010	1,010
Average days to close GS-15 below hiring actions - excluding hiring freeze (OPM Goal: 80 days)	108	60	60
Notice of Actions			
Number of closed personnel actions for GS-15 and below or equivalent	21,176	17,500	18,500
Percentage of personnel actions processed before respective payroll cut-off date	98%	97%	97%

Security Enterprise Services Directorate: Key performance indicators used to evaluate, adjust, and improve business processes includes the following:

	FY 2025 Actuals	FY 2026 Enacted	FY 2027 Estimate
Volume: Number of Transactions	18,863	18,000	19,500
Timeliness: Percentage of Security Transactions Completed Within Two Calendar Days (Goal: 90%)	98.5%	98.0%	98.0%
Quality: Percentage of Security Transactions that Did NOT Require Rework (Goal: 95%)	99.9%	99.9%	99.9%

V. Personnel Summary:

	FY 2025	FY 2026	FY 2027	Change FY 2025/ FY 2026	Change FY 2026/ FY 2027
